

**RoHS Qxx10xx & Qxx10xHx Series**

**Description**

10 Amp bi-directional solid state switch series is designed for AC switching and phase control applications such as motor speed and temperature modulation controls, lighting controls, and static switching relays.

Standard type devices normally operate in Quadrants I & III triggered from AC line.

**Features & Benefits**

- RoHS Compliant
- Glass – passivated junctions
- Voltage capability up to 1000 V
- Surge capability up to 120 A
- Electrically isolated package "L - Package" and UL recognized for 2500Vrms
- Solid-state switching eliminates arcing or contact bounce that create voltage transients
- No contacts to wear out from reaction of switching events
- Restricted (or limited) RFI generation, depending on activation point sine wave

**Agency Approval**

| Agency | Agency File Number |
|--------|--------------------|
|        | L Package: E71639  |

**Main Features**

| Symbol            | Value       | Unit |
|-------------------|-------------|------|
| $I_{T(RMS)}$      | 10          | A    |
| $V_{DRM}/V_{RRM}$ | 400 to 1000 | V    |
| $I_{GT(Q1)}$      | 25 to 50    | mA   |

**Schematic Symbol**

**Applications**

Alternistor type devices are used in applications requiring high commutation performance such as controlling inductive loads. Isolated packages are offered with internal construction, having the case or mounting tab electrically isolated from the semiconductor chip.

**Absolute Maximum Ratings — Standard Triac**

### Physical Specifications

|                          |  |
|--------------------------|--|
| <b>Terminal Finish</b>   | 100% Matte Tin-plated  |
| <b>Body Material</b>     | UL recognized epoxy meeting flammability classification 94V-0. |
| <b>Terminal Material</b> | Copper Alloy   |

### Design Considerations

Careful selection of the correct device for the application's operating parameters and environment will go a long way toward extending the operating life of the Thyristor. Good design practice should limit the maximum continuous current through the main terminals to 75% of the device rating. Other ways to ensure long life for a power discrete semiconductor are proper heat sinking and selection of voltage ratings for worst case conditions. Overheating, overvoltage (including dv/dt), and surge currents are the main killers of semiconductors. Correct mounting, soldering, and forming of the leads also help protect against component damage.

### Environmental Specifications

| Test                             | Specifications and Conditions   |
|----------------------------------|---|
| <b>AC Blocking</b>               | MIL-STD-750, M-1040, Cond A Applied Peak AC voltage @ 125°C for 1008 hours  |
| <b>Temperature Cycling</b>       | MIL-STD-750, M-1051, 100 cycles; -40°C to +150°C, 15-min dwell-time   |

### Product Selector

| Part Number | Voltage (xx) |      |      |       | Gate Sensitivity Quadrants |       | Type              | Package                    |
|-------------|--------------|------|------|-------|----------------------------|-------|-------------------|----------------------------|
|             | 400V         | 600V | 800V | 1000V | I – II – III               | IV    |                   |                            |
| Qxx10L4     | X            | X    | X    | X     | 25 mA                      | 50 mA | Standard Triac    | TO-220L                    |
| Qxx10R4     | X            | X    | X    | X     | 25 mA                      | 50 mA | Standard Triac    | TO-220R                    |
| Qxx10N4     | X            | X    | X    | X     | 25 mA                      | 50 mA | Standard Triac    | TO-263 D <sup>2</sup> -PAK |
| Qxx10L5     | X            | X    | X    | X     | 50 mA                      |       | Standard Triac    | TO-220L                    |
| Qxx10R5     | X            | X    | X    | X     | 50 mA                      |       | Standard Triac    | TO-220R                    |
| Qxx10N5     | X            | X    | X    | X     | 50 mA                      |       | Standard Triac    | TO-263 D <sup>2</sup> -PAK |
| Qxx10LH5    | X            | X    | X    | X     | 50 mA                      |       | Alternistor Triac | TO-220L                    |
| Qxx10RH5    | X            | X    | X    | X     | 50 mA                      |       | Alternistor Triac | TO-220R                    |
| Qxx10NH5    | X            | X    | X    | X     | 50 mA                      |       | Alternistor Triac | TO-263 D <sup>2</sup> -PAK |

### Packing Options

| Part Number  | Marking    | Weight | Packing Mode     | Base Quantity     |
|--------------|------------|--------|------------------|-------------------|
| Qxx10L/Ryy   | Qxx10L/Ryy | 2.2 g  | Bulk             | 500               |
| Qxx10L/RyyTP | Qxx10L/Ryy | 2.2 g  | Tube Pack        | 500 (50 per tube) |
| Qxx10NyyTP   | Qxx10Nyy   | 1.6 g  | Tube             | 500 (50 per tube) |
| Qxx10NyyRP   | Qxx10Nyy   | 1.6 g  | Embossed Carrier | 500               |

Note: xx = voltage, yy = type & sensitivity

**TO-263 Embossed Carrier Reel Pack (RP) Specifications**

Meets all EIA-481-2 Standards

**Part Numbering System**

**Part Marking System**

TO-220 AB – (R Package)  
TO-263 AB – (N Package)

TO-220 AB – (L Package)

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
