

## Posistor® For Circuit Protection

### 1. Part Numbering (Part Number)

PT   GL   05   AR   151   H   8P52   B0  
 Product ID   Series   Dimensions   Temperature Characteristics   Resistance   Resistance Tolerance   Individual Specifications   Packaging

### 2. Ratings

Bulk Part Number	Temperature characteristic	*1 Resistance Value at +25°C	Max. voltage	*2 Max. Current	*3 Hold current at +60°C	*4 Trip current at -10°C	Dimensions (mm)													
							D	T	F	d										
PTGL05AR151H8P52B0	AR	150 ohm±25%	AC265 Vrms.	0.2Arms.	28mA	78mA	6.0	6.0	5.0	0.6										
PTGL05AR151H8P52A0							6.0	6.0	5.0	0.6										
PTGL07AR700H8B52B0							70 ohm±25%	0.4Arms.	66mA	185mA	8.0	6.0	5.0	0.6						
PTGL07AR700H8B52A0																				
PTGL07AR650H8B52B0							65 ohm±25%	1.0Arms.	68mA	190mA	8.0	6.0	5.0	0.6						
PTGL07AR650H8B52A0																				
PTGL07AR450H8B52B0							45 ohm±25%	1.0Arms.	80mA	220mA	8.0	6.0	5.0	0.6						
PTGL07AR450H8B52A0																				
PTGL09AR250H8B52B0							25 ohm±25%	1.0Arms.	118mA	330mA	10.0	6.0	5.0	0.6						
PTGL09AR250H8B52A0																				
PTGL12AR150H8B72B0							15 ohm±25%	1.5Arms.	165mA	460mA	12.5	6.0	7.5	0.6						
PTGL12AR150H8B72A0																				
PTGL13AR100H8B72B0							10 ohm±25%	2.2Arms.	200mA	560mA	14.0	6.0	7.5	0.6						
PTGL13AR100H8B72A0																				
PTGL18AR6R0H8B72B0							6 ohm±25%	4.1Arms.	300mA	830mA	18.5	6.0	7.5	0.6						
PTGL18AR6R0H8B72A0																				
PTGL05AR181M9N51B0							AR	180 ohm±20%	AC265 Vrms.	0.3Arms.	29mA	70mA	6.5	6.5	5.0	0.5				
PTGL05AR121M9N51B0													6.5	6.5	5.0	0.5				
PTGL07AR820M9A51B0													82 ohm±20%	0.5Arms.	60mA	150mA	8.2	6.5	5.0	0.5
PTGL07AR560M9A51B0																				
PTGL07AR560M9A51A0	56 ohm±20%	0.8Arms.	80mA	190mA	8.2	6.5							5.0	0.5						
PTGL07AR560M9A51B0																				
PTGL09AR390M9C61B0	39 ohm±20%	1.2Arms.	100mA	240mA	10.0	6.5							6.5	0.65						
PTGL09AR390M9C61A0																				
PTGL12AR270M9C01B0	27 ohm±20%	1.5Arms.	150mA	360mA	14.0	6.5							10.0	0.65						
PTGL12AR270M9C01A0																				
PTGL14AR180M9C01B0	18 ohm±20%	1.8Arms.	180mA	440mA	15.7	6.5							10.0	0.65						
PTGL14AR180M9C01A0																				

\*1 The resist. value is measured at a point of max. 2mm from the end of lead crimp.

\*2 Shows the maximum current value which may be repeatedly introduced into Posistor when the circuit runs abnormally.

\*3 Shows the maximum current value which be repeatedly introduced into Posistor when the circuit runs normally at 60°C.

\*4 Shows the minimum current value which flows the circuit when Posistor protects it from over load at -10°C.

### 3. Dimensions(mm)

(Bulk type)

• PTGL\*\*\*\*\*2B0

• PTGL\*\*\*\*\*1B0

(Taping type) Shown in Taping specification.

Note) Some part of resin covering lead wire of Posistor may come off by some outside shock on the root of lead wire, but Posistor can be used normally for electrical and reliability characteristics.

AR-030'

## Taping Specification

### 1. Dimensions of Taping

Item	Code	Dimensions	Note
Pitch of Component	P	12.7	Tolerance is determined by $\Delta S$ .
Pitch of Sprocket Hole	P <sub>0</sub>	12.7±0.3	
Lead Spacing	F	5.0 +0.8,-0.3	
Length from Hole Center to Component	P <sub>2</sub>	6.35±1.3	Deviation in the feeding direction
Length from Hole Center to Lead	P <sub>1</sub>	3.85±0.8	
Body Diameter	D	Refer to "2.Dimensions"	
Body Thickness	T	Refer to "2.Dimensions"	
Deviation along Tape. Left or Right	$\Delta S$	±1.5	Including the inclination caused by lead bending.
Carrier Tape Width	W	18.0 ± 0.5	
Position of Sprocket Hole	W <sub>1</sub>	9.0 +0.5,-0.75	Deviation of tape width.
Lead Distance between Reference and Bottom Planes	H <sub>0</sub>	16.0 ± 1.0	
	H <sub>2</sub>	6.0 max.	
Overflow of Lead	I	+0.5 to -1.0	
Diameter of Sprocket Hole	D <sub>0</sub>	4.0±0.2	
Lead Diameter	d	0.6±0.05	
Total Tape Thickness	t <sub>1</sub>	0.6±0.3	t <sub>2</sub> =2.0 max.
Deviation across Tape	$\Delta h_1, \Delta h_2$	1.5 max.	
Portion to cut in Case of Defect	L	11.0+0,-2.0	
Hold Down Tape Width	W <sub>0</sub>	11.0 min,	
Hold Down Tape Position	W <sub>2</sub>	4.0 max.	
Coating Extension on Lead	e	Up to the crimp point	

2. Splicing way of tape

2.1 Cohesive power of tape is over 2.94N at test condition as below figure.

2.2 Splicing of tape

a. When base tape is spliced :

- ▣ Base tape shall be spliced by cellophane tape
- ▣ Total tape thickness shall be less than 1.05mm

b. When adhesive tape is spliced :

- ▣ Adhesive tape shall be spliced with overlapping.
- ▣ Total tape thickness shall be less than 1.05mm

c. When both tape are spliced at a time :

### 2.3 Packing specification (Ammo Pack)

The tape with Posistor is folded each 25 pitches and packed in zigzag into a packing case, when body of Posistor is piled on other body under it. Standard quantity in a case are 1000pcs..

#### The size of packing case

#### Packing way

When Posistor 's body is situated on your side, adhesive tape is situated the upside.

## Notice for use

### Caution

1. This product is designed for application which is used under ordinary environment.(room temperature, normal humidity, normal pressure) Do not expose this to the following environments, because all these factor can deteriorate the characteristic of this and can cause failure or burn out.
  - (1) Corrosive gas or deoxidizing gas (Cl<sub>2</sub>, H<sub>2</sub>S, NH<sub>3</sub>, SO<sub>x</sub>, NO<sub>x</sub> etc.)
  - (2) Volatile, flammable gas
  - (3) Dusty place
  - (4) Place in a vacuum, reducing or putting pressure
  - (5) Place in splashed water, or high humidity and dewing place
  - (6) Salt water, oil, chemical liquid and solvent
  - (7) Vibratile place
  - (8) Other place equivalent to the above
2. Limitation of Applications  
Please contact us before using our products for the under-mentioned applications requiring especially high reliability in order to prevent defects which might directly cause damage to other party's life body or property(listed below).
  - (1)Aircraft equipment (2)Aerospace equipment (3)Undersea equipment (4)Power plant control equipment
  - (5)Medical equipment (6)Transportation equipment(automobiles, trains, ships, etc.)
  - (7)Traffic signal equipment (8)Disaster prevention / Crime prevention equipment
  - (9)Data-processing equipment (10)Applications of similar complexity or with reliability requirements comparable to the applications listed in the above.
3. Be sure to provide an appropriate fail-safe function on your product to prevent a second damage that may be caused by the abnormal function or the failure of our product.

### Notice

1. Do not apply abnormal voltage/current exceeding the specified maximum value. Because they may deteriorate or destroy PTC element.
2. Use this product within the specified temperature. A higher temperature may deteriorate the characteristic or material.
3. When this product is operated, temperature of some area may be over 100°C to 160°C. Please make sure that surrounding parts and inserting material can withstand the temperature. If the surrounding part and material is kept under such condition, they may be deteriorated or may produce harmful gas(Cl<sub>2</sub>, H<sub>2</sub>S, NH<sub>3</sub>, SO<sub>x</sub>, NO<sub>x</sub> etc.). And, such harmful gas may deteriorate the element.
4. The resin coating of this product is not for insulating purpose. Keep an adequate insulating distance to surrounding components.
5. This product does not have waterproof construction. A splashed water may cause failure mode such as deterioration of characteristic or current leak.  
So, Do NOT apply cleaning to immerse it into water or any solvent.
6. If you coat this product by resin, please evaluate the quality of this product before you use it.  
The stress of force which is caused by coating materials or heat cycles may cause failure mode such as deterioration of characteristic or current leak in worst case.
7. This product is using the solder of 221+/-5 °C of melting points, in order to connect ceramics with a lead wire. Do not heat up a terminal area of this product over 180 °C.
8. The ceramic element of this product is fragile, and care must be taken not to load a excessive pressforce or not to give a shock at handling. Such forces may cause cracking or chipping.

9. Do not apply an excessive force to the lead. Otherwise, it may cause break off the junction between lead and element, or may crack element. Therefore, hold of element side lead wire is recommended when lead wire is bent or cut.
10. When the lead of this product is soldered, pay attention as follows to avoid the decline of element characteristic or break down the element.
  - (1) Use Rosin type flux or non-activated flux(the content of chlorine shall be less than 0.2%)
  - (2) Do not dip the body into flux. (Flux shall be coated to lead wire only for soldering.)
  - (3) The pre-heat up should be conducted without melting the soldering of this product.
11. Do not apply tensile force or separating force to lead wire at soldering.
12. Do not touch the resin case by soldering iron. The soldering point shall be min. 5 mm away from the root of lead wire. Please solder the following conditions.
  - Iron Tip Temperature : 360 degree C max.
  - Soldering Time : 4 seconds max. / 1 terminal
  - Number of Soldering : 1
13. To keep solderability of product from declining, following storage condition is recommended.
  - (1) Storage condition Temperature : -10 to +40°C  
Humidity : less than 75%RH(not dewing condition)
  - (2) Term : Please use this product within 6 months after shipment by first-in and first-out stocking system.
  - (3) Handling after unpacking of the minimum package : Reseal it promptly or store it seal open inside a sealed container with a drying agent.
  - (4) Place : Do not store this product in corrosive gas(SO<sub>x</sub>,Cl etc) or under sun-light.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
