

MAXIM

1.25Ω, Dual SPST, CMOS Analog Switches

MAX4580/MAX4590/MAX4600

General Description

The MAX4580/MAX4590/MAX4600 dual analog switches feature low on-resistance of 1.25Ω max. On-resistance is matched between switches to 0.25Ω max and is flat (0.3Ω max) over the specified signal range. Each switch can handle Rail-to-Rail® analog signals. The off-leakage current is only 2.5nA max at +85°C. These analog switches are ideal in low-distortion applications and are the preferred solution over mechanical relays in automatic test equipment or applications where current switching is required. They have low power requirements, require less board space, and are more reliable than mechanical relays.

The MAX4580 has two NC (normally closed) switches, the MAX4590 has two NO (normally open) switches, and the MAX4600 has one NC (normally closed) and one NO (normally open) switch.

These switches operate from a +4.5V to +36V single supply or from ±4.5V to ±20V dual supplies. All digital inputs have +0.8V and +2.4V logic thresholds, ensuring TTL/CMOS-logic compatibility when using a +12V single supply or ±15V dual supplies.

Applications

- Reed Relay Replacement
- Test Equipment
- Communication Systems
- PBX, PABX Systems

Features

- ◆ Low On-Resistance (1.25Ω max)
- ◆ Guaranteed R_{ON} Match Between Channels (0.25Ω max)
- ◆ Guaranteed R_{ON} Flatness Over Specified Signal Range (0.3Ω max)
- ◆ Rail-to-Rail Signal Handling
- ◆ Guaranteed ESD Protection >2kV per Method 3015.7
- ◆ Single-Supply Operation: +4.5V to +36V
Dual-Supply Operation: ±4.5V to ±20V
- ◆ TTL/CMOS-Compatible Control Inputs

1.25Ω, Dual SPST, CMOS Analog Switches

ABSOLUTE MAXIMUM RATINGS

V+ to GND	-0.3V to +44V	Continuous Power Dissipation (T _A = +70°C)	
V- to GND	+0.3V to -44V	16 SSOP (derate 7.1mW/°C above +70°C)	571mW
V+ to V-	-0.3V to +44V	16 Wide SO (derate 9.52mW/°C above +70°C)	762mW
V _L to GND	-0.3V to (V+ + 0.3V)	16 Plastic DIP (derate 10.53mW/°C above +70°C)	842mW
All Other Pins to GND (Note 1)	(V- - 0.3V) to (V+ + 0.3V)	Operating Temperature Ranges	
Continuous Current (COM ₋ , NO ₋ , NC ₋)	±200mA	MAX4 ₋ _OC_E	0°C to +70°C
Peak Current (COM ₋ , NO ₋ , NC ₋)		MAX4 ₋ _OE_E	-40°C to +85°C
(pulsed at 1ms, 10% duty cycle)	±300mA	Storage Temperature Range	-65°C to +160°C
		Lead Temperature (soldering, 10sec)	+300°C

Note 1: Signals on NC₋, NO₋, COM₋, or IN₋ exceeding V+ or V- are clamped by internal diodes. Limit forward diode current to maximum current rating.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

ELECTRICAL CHARACTERISTICS—Dual Supplies

On-Capacitance	C(COM)_	f = 1MHz, Figure 7, TA = +25°C		275		pF

Note 2: The algebraic convention, where the most negative value is a minimum and the most positive value a maximum, is used in this data sheet.

Note 3: Guaranteed by design.

Note 4: $\Delta R_{ON} = R_{ON(MAX)} - R_{ON(MIN)}$.

Note 5: Flatness is defined as the difference between the maximum and minimum value of on-resistance as measured over the specified analog signal range.

Note 6: Leakage parameters are 100% tested at maximum-rated hot temperature and guaranteed by correlation at +25°C.

Note 7: Off-isolation = $20 \log_{10} [V_{COM} / (V_{NC} \text{ or } V_{NO})]$, VCOM = output, VNC or VNO = input to off switch.

Note 8: Between any two switches.

Note 9: Leakage testing at single supply is guaranteed by testing with dual supplies.

–	–	9	NC1	Analog Switch Normally Closed Terminal
–	–	16	NO1	Analog Switch Normally Open Terminal

1.25Ω, Dual SPST, CMOS Analog Switches

Applications Information

Overvoltage Protection

Proper power-supply sequencing is recommended for all CMOS devices. Do not exceed the absolute maximum ratings, because stresses beyond the listed ratings can cause permanent damage to the devices. Always sequence V+ on first, then V-, followed by the logic inputs, NO, or COM. If power-supply sequencing is not possible, add two small signal diodes (D1, D2) in series with supply pins for overvoltage protection (Figure 1). Adding diodes reduces the analog signal range to one diode drop below V+ and one diode drop above V-, but does not affect the devices' low switch resistance and low leakage characteristics. Device operation is unchanged, and the difference between V+ and V- should not exceed 44V. These protection diodes are not recommended when using a single supply.

Maxim cannot assume responsibility for use of any circuitry other than circuitry entirely embodied in a Maxim product. No circuit patent licenses are implied. Maxim reserves the right to change the circuitry and specifications without notice at any time.

12 _____ **Maxim Integrated Products, 120 San Gabriel Drive, Sunnyvale, CA 94086 408-737-7600**

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
