

3M™ Dissipative Vinyl Three-Layer Mats and Rolls 8200 Series

Premium Performance

Dissipative Vinyl Three-Layer Mats and Rolls 8200 Series are soft table and floor mats with a three-layer construction. The top layer is durable static dissipative vinyl, which has sufficiently low resistance to discharge static-laden conductors, yet will help prevent the shorting of pins on the backs of printed circuit boards laid on the mat. The middle layer is a highly-conductive scrim that provides the main discharge path to ground, and the bottom layer is static-dissipative foam, providing a durable nonskid cushion. Non-standard sizes are available on a custom order basis. Compatible with 3M™ Constant Monitors.
