

## General Description

The SP3494 device is a 3.3V low power half-duplex transceiver that meets the specifications of the RS-485 and RS-422 serial protocols. This device is pin-to-pin compatible with the MaxLinear SP481E device and other popular industry standard devices. The SP3494 features the MaxLinear BiCMOS process, allowing low power operation without sacrificing performance. The partially slew-rate limited drivers minimize EMI and reduce reflections caused by improperly terminated cables allowing error-free data transmission. The SP3494 is a half-duplex partially slew-rate limited transceiver that will deliver a data transmission rate up to 2.5Mbps. The SP3494 is equipped with a low-power shutdown mode and driver / receiver high-Z enable lines.

## Features

- Operates from a single 3.3V supply
- Interoperable with 5.0V logic
- $\pm 200\text{mV}$  receiver input sensitivity
- -7V to +12V common-mode input voltage range
- Allows up to 32 transceivers on the serial bus
- Driver / receiver enable lines
- 10 $\mu\text{A}$  low-power shutdown mode
- Compatibility with the MAX3486 and 75176 industry standard pinout

## Revision History

Revision	Release Date	Change Description
--	10/15/02	Legacy Sipex Datasheet
1.0.0	7/10/12	Convert to Exar Format. Update ordering information and add new Figure 8 - Driver Short Circuit Current Limit Test Circuit. Remove EOL device SP3493.
1.0.1	9/7/17	Update to MaxLinear logo. Remove GND from Differential Output Voltage min (page 2), correct part number (SP3485 Receiver, page 3). Added maximum junction temperature, package power dissipation and ESD rating. Update format and ordering information table.
1.0.2	3/4/19	Update to MaxLinear format. Update pin compatibility references.

## Specifications

### Absolute Maximum Ratings

**Important:** These are stress ratings only and functional operation of the device at these ratings or any other above those indicated in the operation sections of the specifications below is not implied. Exposure to absolute maximum ratings conditions for extended periods of time may affect reliability.

**Table 1: Absolute Maximum Ratings**

Parameter	Minimum	Maximum	Units
$V_{CC}$		6.0	V
Input Voltages			
Drivers	-0.3	6	V
Receivers	-14	14	V
Output Voltages			
Drivers	-14	14	V
Receivers	-0.3	6	V
Temperature			
Storage temperature	-65	150	°C
Maximum junction temperature, $T_J$		125	°C
Power Dissipation			
8-pin NSOIC $\Theta_{JA}$		600	mW

### ESD Ratings

**Table 2: ESD Ratings**

Parameter	Value	Units
HBM (Human Body Model)	$\pm 2$	kV

### Operating Conditions

**Table 3: Operating Conditions**

Parameter	Value	Units
Package Power Dissipation		
8-pin NSOIC	128.4	°C/W

## Electrical Characteristics

$T_{AMB} = T_{MIN}$  to  $T_{MAX}$  and  $V_{CC} = 3.3V \pm 5\%$  unless otherwise noted.

**Table 4: Electrical Characteristics**

Parameter	Test Condition	Minimum	Typical	Maximum	Units

## Description

The SP3494 is a 3.3V low power half-duplex transceiver that meets the electrical specifications of the RS-485 and RS-422 serial protocols. This device is pin-to-pin compatible with the MaxLinear SP481E devices as well as other popular industry standard devices. The SP3494 feature Maxlinear's BiCMOS process allowing low power operation without sacrificing performance. The SP3494 has a partially slew rate limited driver with a data transmission rate of 2.5Mbps.

## Driver

The driver outputs of the SP3494 are differential outputs. The typical voltage output swing with no load will be 0 volts to  $V_{CC}$ . With worst case loading of  $54\Omega$  across the differential outputs, the driver can maintain greater than 1.5V voltage levels.

The SP3494 driver has an enable control line which is active HIGH. A logic HIGH on DE (pin 3) will enable the differential driver outputs. A logic LOW on the DE (pin 3) will force the driver outputs to high impedance (high-Z).

The SP3494 driver will operate up to 2.5Mbps. In addition to adhering to the 250mA  $I_{SC}$  maximum limit on the driver output, the driver output short-circuit protection will allow the device to withstand an infinite short circuit over the -7.0V to 12V common mode range without damage.

**Table 6: Transmit Function Truth Table**

Inputs			Line Condition	Outputs	
$\overline{RE}$	DE	DI		B	A
X	1	1	No Fault	0	1
X	1	0	No Fault	1	0
X	0	X	X	Z	Z

## Receiver

The receiver has differential inputs with an input sensitivity of  $\pm 200mV$ . Input impedance of the receiver is typically  $15k\Omega$  ( $12k\Omega$  minimum). A wide common mode range of -7V to 12V allows for large ground potential differences between systems. The receiver is equipped with a fail-safe feature which guarantees that the receiver output will be in a high state when the input is left unconnected. The receiver of the SP3494 operates up to 2.5Mbps.

The receiver of the SP3494 has an enable control line which is active LOW. A logic LOW on  $\overline{RE}$  (pin 2) of the SP3494 will enable the differential receiver. A logic HIGH on  $\overline{RE}$  (pin 2) will disable the receiver.

The SP3494 is equipped with a shutdown mode. To enable the shutdown state, both the driver and receiver must be disabled simultaneously. A logic LOW on DE (pin 3) and a logic HIGH on  $\overline{RE}$  (pin 2) will put the SP3494 into shutdown. In shutdown, the supply current will drop to less than  $10\mu A$ .

**Table 7: Receive Function Truth Table**

Inputs		A - B	Output
$\overline{RE}$	DE		R
0	0	0.2V	1
0	0	-0.2V	0
0	0	Inputs Open	1
1	0	X	Z

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренеспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
