

UG229: Si51211/Si51218 Evaluation Board User's Guide

The Si51211/Si51218 evaluation boards (the Si5121x-EVB) can be used to emulate custom Si5121x part numbers as below:

Base Part Number	EVB
Si51210/14	Si51211 EVB
Si51211	Si51211 EVB
Si51218	Si51218 EVB

The Si5121x-EVB has an on-board programmable Si514 that generates the input clock frequency and can demonstrate function of up to two dc input pins and one output clock or up to three output clocks from the Si5121x part, depending on the part emulated and the frequency plan.

EVB FEATURES

- Powered from USB port
- Onboard Si514 to generate any input clock based on the frequency plan
- CBPro™ GUI programmable V_{DD} supply allows device at 3.3 V or 2.5 V

1. Identifying the EVB Part

Look for the “check” on one of the two boxes for either the Si51211-EVB or the Si51218-EVB as shown in [Figure 1.1 Si5121x-EVB Identification on page 1](#). Other than this check box selection (and the Si5121x device used in the EVB), the EVBs are both identical by design. Therefore, the user guide to the EVBs is a common document. CBPro™ also has the ability to identify the EVBs and displays the EVB type as shown in [Figure 1.2 Si5121x-EVB Identification by CBPro on page 1](#).

Figure 1.1. Si5121x-EVB Identification

Figure 1.2. Si5121x-EVB Identification by CBPro

2. Functional Block Diagram

Figure 2.1. Si5121x-CEVB Functional Block Diagram

The C8051F380 MCU is used to control the Si514, Si5121x devices, and the voltage regulators and implement the plans created on CBPro.

3. Installing ClockBuilderPro (CBPro) Desktop Software

To install the CBPro software on any Windows 7 or above PC, go to www.silabs.com/CBPro and download the CBPro software. Installation instructions and a User's Guide for CBPro can be found at the download link shown above. Follow the instructions as indicated.

4. Using the Si5121x EVB

4.1 Connecting to a Si5121x EVB using CBPro

Once CBPro software is installed, connect to the EVB with a USB cable as shown in the figure below:

Figure 4.1. Connecting to Si5121x EVB via CBPro

4.2 Programing the Si5121x EVB using CBPro

There are three ways to select (or arrive at) a frequency plan on the CBPro software. They are as follows:

1. Selecting a “default plan” from CBPro.
2. Creating a plan using the CBPro wizard.
3. Opening an existing plan stored as a CBPro project file.

At the end of any of these three steps, the starting point to programming the EVB will be as shown in the following figures:

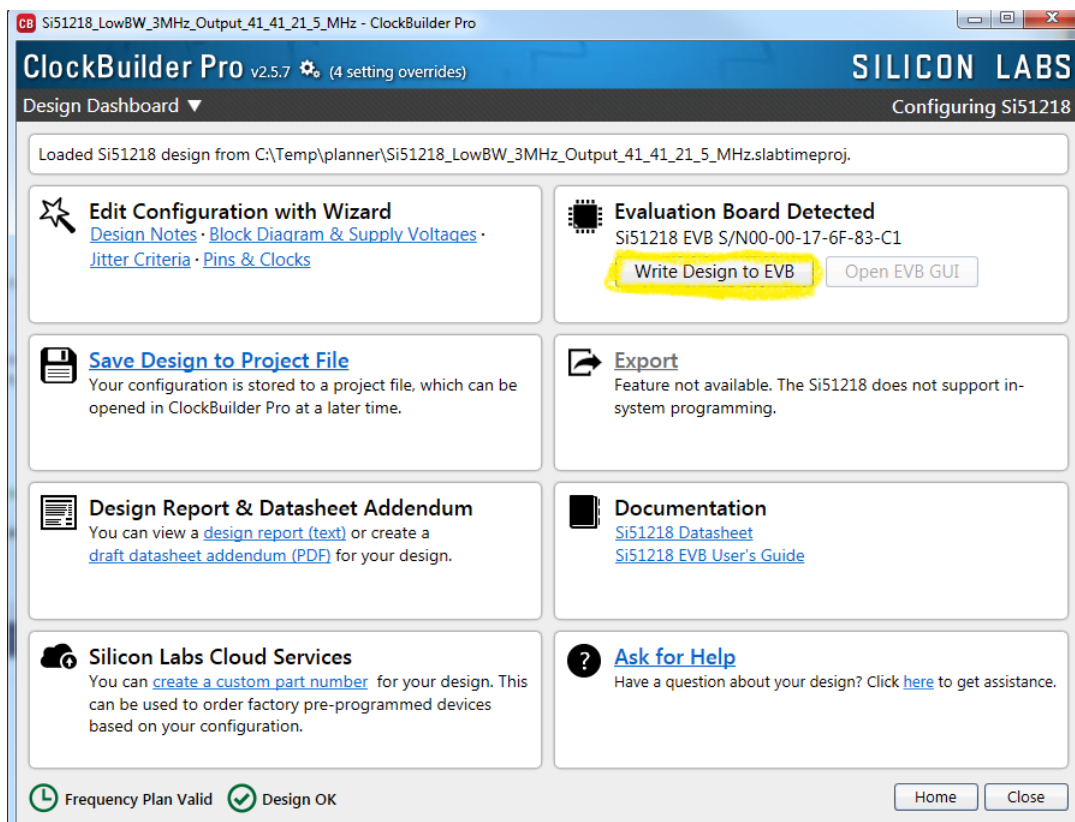

Figure 4.2. Starting Screen for EVB Write

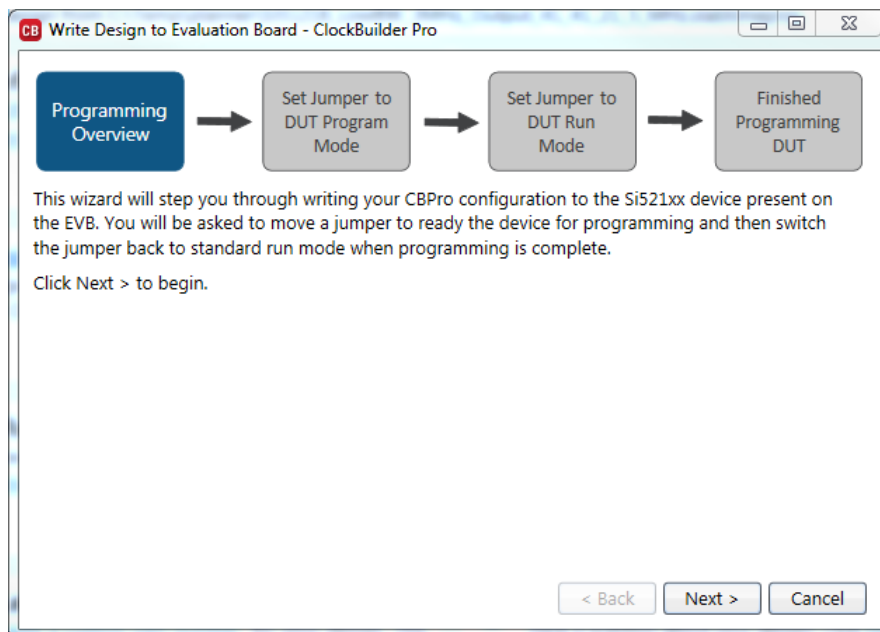

Figure 4.3. Step 1 of 4 in EVB Write

Click "Next" to get to the next window.

Figure 4.4. Step 2 of 4 in EVB Write

Now, ensure that the jumper JP3 is shorted and jumper JP4 is open. Then click "Next" to get to the window in [Figure 4.5 Step 3 of 4 in EVB Write on page 7](#).

Figure 4.5. Step 3 of 4 in EVB Write

Next, ensure that the jumper JP4 is shorted and jumper JP3 is open. Then click "Next" to get to the window in [Figure 4.6 Step 4 of 4 in EVB Write on page 7](#).

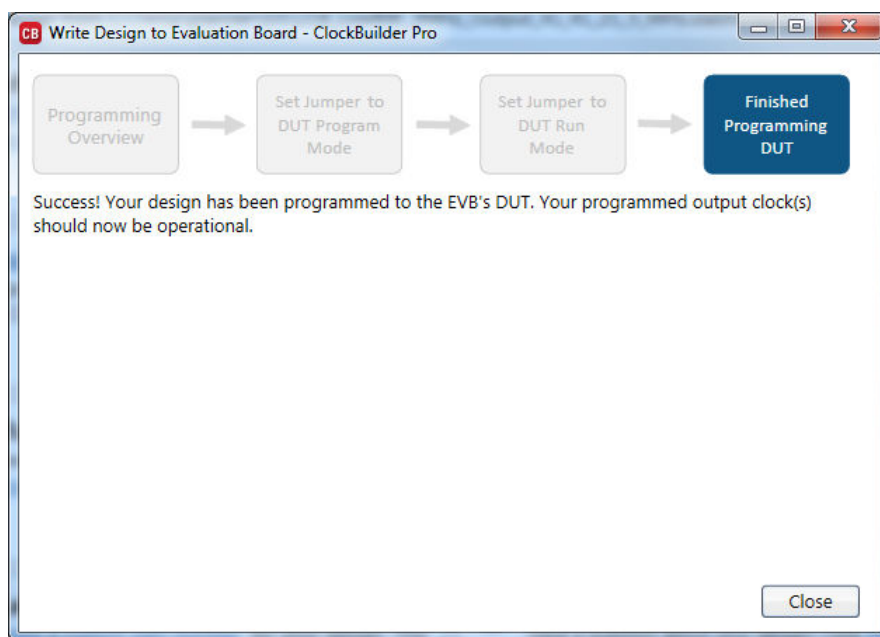

Figure 4.6. Step 4 of 4 in EVB Write

This step completes the programming. The plan can be evaluated now.

5. Controlling Input Pins

The input pin (IN1 or IN2) will be:

- High when the pin is left open, such as the IN2 setting in the figure below, or
- Low when the pin is shorted using an INx_CTRL jumper, such as the IN1 setting in the figure below.

Figure 5.1. Input Pin Control

6. Bill of Materials (BOM), Layout, and Schematic

The Si5121x EVB Bill of Materials (BOM), Layout, and Schematic design files can be found online at: <http://www.silabs.com/si512xx>.

Note: Please be aware the Si5121x EVB schematic is in OrCad Capture hierarchical format and not in a typical “flat” schematic format.

7. Revision History

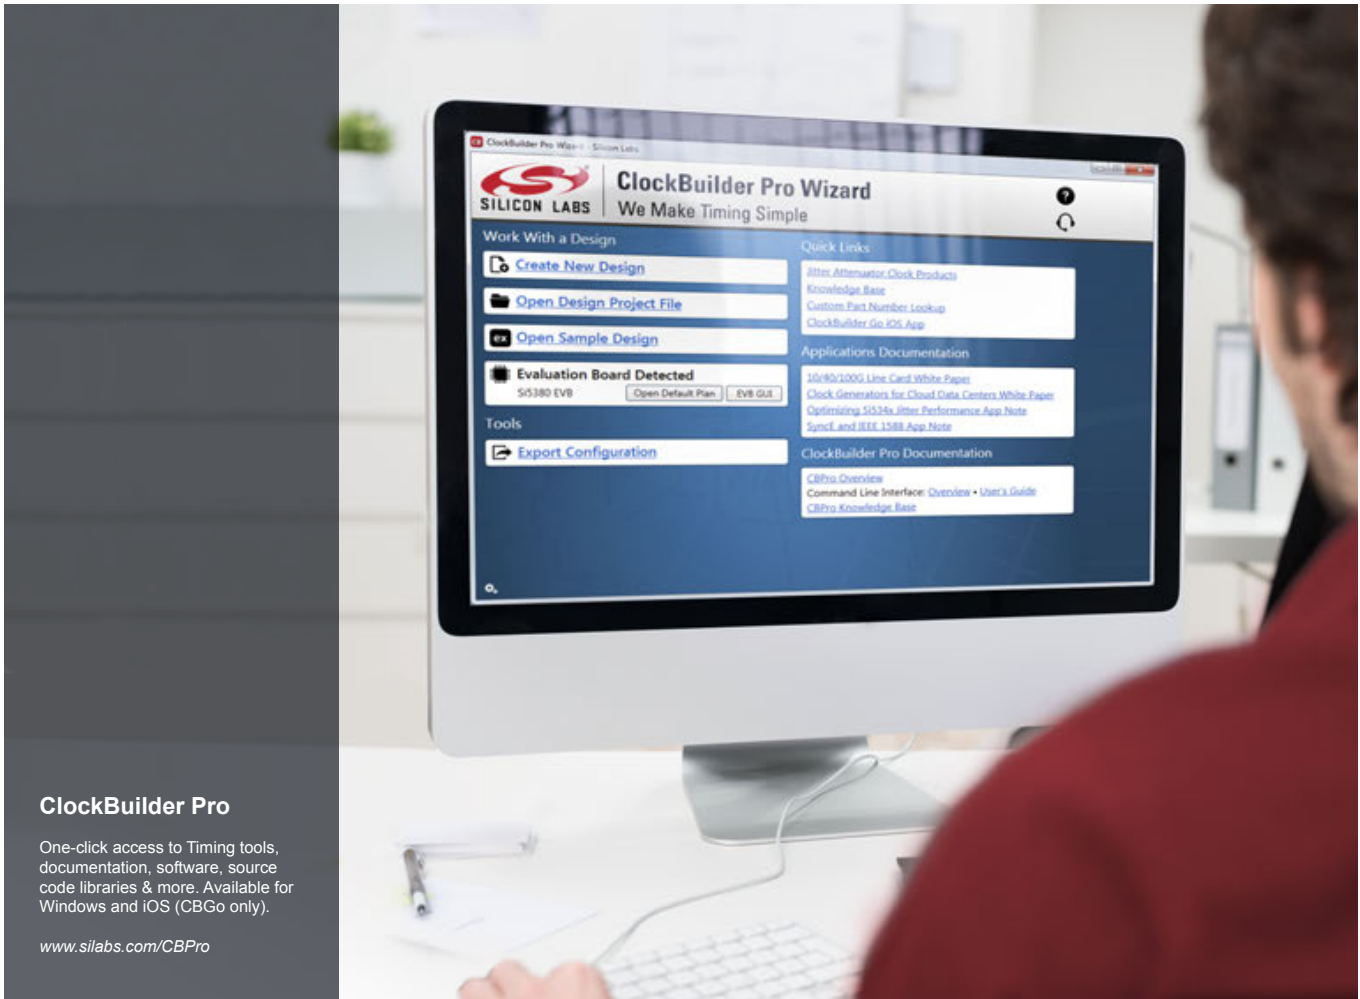

7.1 Revision 1.0

April 20, 2016

- Initial release.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренеспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
