ADLINK industrial grade solid state drives (SSDs) are designed to provide high performance, low power consumption, high reliability and high capacity in 2.5" and 1.8" form factors. Optimized for high-throughput data transfers, ADLINK ASD SSDs are ideal for telecom server, defense, transportation and industrial applications.

Built on high speed SLC/MLC NAND flash and advanced controller technology, ADLINK ASD SATA SSDs deliver high speed sustained sequential read/write performance of up to 480MB/s and 410MB/s, respectively, at 512 GB capacity. By utilizing single level cell (SLC) NAND technology, the ADLINK SLC line of SSDs provides increased reliability and longer life cycle for mission critical applications.

Designed to industrial grade specifications, ADLINK ASD SSDs are available in both commercial (0°C to +70°C) and industrial (-40°C to +85°C) operating temperature ranges. Strict shock and vibration tests are performed to ensure that ADLINK ASD SSDs meet the needs of the most demanding applications.
