## USB OPTIONS

### USB : GAME CONTROLLER

Featuring USB 2.0 HID compliant interface. APEM's USB joysticks are recognized as standard HID "game controller" devices. Adhering to the HID specification, APEM's USB joysticks are plug-and-play with most versions of Windows. Joystick button and axis assignments are dependent upon the controlled application.

- Features:
  - USB 2.0 HID compliant "game controller" device
  - Easy to install and operate
  - Functions determined by controlled application
- Supplied wiring: USB Male Type A Connector with 72" overmolded cable

### USB: JOYBALL (CURSOR EMULATION)

The cursor emulation option converts a multi-axis joystick into a mouse or cursor control device

- Applications: The cursor emulation option is ideal for vehicle applications subjected to dirt and high vibration which makes operating a traditional cursor control device difficult. The Cursor Emulation option is widely used in shipboard and military applications.
- Features:
  - HID compliant "pointing device"
  - Plug-and-play with USB option
- Supplied wiring: USB Male Type A Connector with overmolded cable
