

## TRANSIENT VOLTAGE SUPPRESSOR

# VRD

VRD is a transient voltage suppressor used for protecting electric circuits from surge voltage and thus preventing breakdown.

VRD has superior surge suppression characteristics, such as extremely fast response time, very low clamping voltage, and high surge capacity. Unlike metal oxide varistors, VRD does not have characteristics to change with surge variations within the rated capacity. This feature comprises another superior characteristics of the VRD as a transient voltage suppressors.

### Part number

<b>Z2 033 U - 52Z</b>	52Z : Axial tapping winding type
	52R : Axial tapping relay type
	FT : Radial form tapping type
	Nil : individually packed in a bag
	U : Uni-Polar
	Nil : Bi-Polar
	Break down voltage
	Type
	Z2 : Rated electricity 1.0W
	Z6 : Rated electricity 2.0W
	ZD : Rated electricity 0.5W (reverse blocking type)

### Electrical characteristics

Figure 1 shows the electrical characteristics. Bipolar type has almost symmetrical breakdown Voltage ( $V_B$ ) The reverse breakdown voltage of the ZD type is 200 Volts or more at  $10\mu A$  DC.

Fig 1

### Taping

One of standard taping is as shown in Figure.

Fig 2

Unit:(mm)

### Taping qty

Part series	Taping method	Qty(pcs)	
Z2,Z2U	Axial tapping	reel type	5,000
		winding type	2,000
	Radial tapping	winding type	2,000
Z6,Z6U	Axial tapping	reel type	2,500
		winding type	1,000

### Surge capability

Allowable surge capability ( $P_{PPM}$ ) is determined by the following equation:

$$P_{PPM} = I_{PPM} \times V_C$$

$I_{PPM}$ : Rated peak impulse current

$V_C$ : clamping voltage

The allowable surge capability (Rated peak impulse power dissipation  $P_{PPM}$ ) of VRD is shown in following Figure 3 and the surge capability derating characteristics are shown in Figure 6.

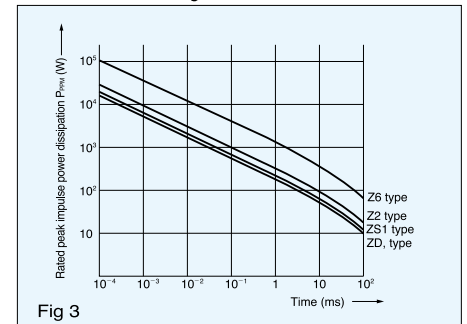

Fig 3

### Surge waveform

There are many types of surge waveform depending on the source of the surge. For the VRD surge suppression characteristics test, the EXP waveform shown below is used. The EXP waveform is shown as  $t_a/t_b$  depending on the time width, however 10/1000 waveform is used as the standard test waveform.

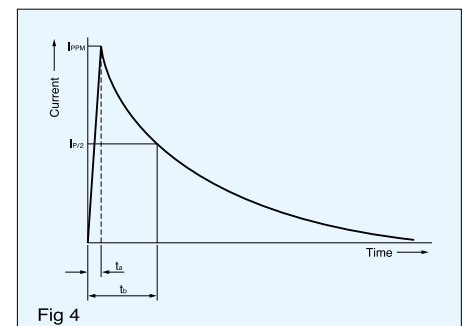

Fig 4

### Surge suppression characteristics

When EXP waveform is applied, the surge suppression waveform shown in the figure 5 can be observed.

### Power derating

### Z2 type VRD has bipolar or unipolar electrical characteristics.

Maximum ratings

Rated peak impulse power dissipation  
:500 W (10/1000 $\mu$ s)  
6.00 kW (8/20 $\mu$ s)

Rated average power dissipation:1W  
Operating and storage temperature  
: -40°C to 125°C

### Z6 type VRD has bipolar or unipolar electrical characteristics.

Maximum ratings  
 Rated peak impulse power dissipation : 1.5kW(10/1000μs)  
 18.0kW(8/20μs)  
 Rated average power dissipation: 2W  
 Operating and storage temperature : -40°C to 125°C

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренеспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
