## **PCB connection technology and electronics housing**

- PCB terminal blocks and plug connectors
- Electronics housing

## **Connection technology for field devices**

- Plug connectors
- Cables and connectors

## **Modular terminal blocks**

- Modular terminal blocks

## **Sensor/actuator cabling and industrial plug connectors**

- Sensor/actuator cabling
- Cables and connectors
- Plug connectors

## **Marking systems, tools, and mounting material**

- Marking and labeling
- Tools
- Installation and mounting material

## **Surge protection and power supply units**

- Lightning monitoring system
- Surge protection and interference filters
- Power supply units and UPS
- Protective devices

## **Interface technology and switching devices**

- Electronic switching devices and motor control
- Measurement and control technology • Monitoring and signaling
- Relay modules • System cabling for controllers

## **Control technology, I/O systems and automation infrastructure**

- Ethernet networks • Functional safety • HMIs and industrial PCs • I/O systems
- Industrial lighting and signaling • Industrial communication technology
- Fieldbus components and systems • Wireless data communication
- Process infrastructure • Software • Controllers

### SMD- Surface Mount Device

Generally the term SMD or SMT (surface mount technology) refers to the dominant production method currently used for assemblies in electronics production. In this case solder paste is applied to the contact surfaces of the PCB. The surface contacts of the component are dipped in this paste and soldered by means of the reflow soldering process.

### Properties of SMD/THR components in the reflow process

- Resistance to high temperatures
- Suction areas (1) for automatic PCB assembly by means of pick-and-place
- Stability in the case of mechanical loads
- Coplanarity (2) (evenness) of the SMD contacts

### PTSM 0,5...SMD

In addition to the SMD contacts, the components have anchor metal on the side. This ensures that the insertion and withdrawal force of the plugs does not overload the contact points.

### SPT-SMD 1,5...

Additional solder pins on the side position the component on the PCB and prevent it moving during the process. Moreover, they absorb the force when the conductors are connected.

The qualification of the SMD connectors is based on IPC/JEDEC J-STD020 indicating the MSL (Moisture Sensitive Level) and the max. processing temperatures. The SMD/THR components meet MSL 1 or 2 which means that dry bag packaging is not required.

The standard tape width for tape-on-reel packaging supports automatic PCB assembly in pick-and-place applications.

Dimensional drawings of tape reels and suction areas and pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

### Reflow soldering

The reflow process and the required temperature profiles are described in SMD standards DIN EN 61760-1 or also IEC 60068-2-58. The profiles described are usually used for test purposes, but are also recommended for the application.

# PCB connection technology and electronics housing

## PCB terminal blocks with 2.54 to 7.62 mm pitch

### SMD PCB terminal blocks with push-in spring connection up to 1.5 mm<sup>2</sup>

- Push-in direct plug-in technology for solid and stranded conductors
- Suitable for use in SMD processes
- Horizontal and vertical design with a 3.5 mm and 3.81 mm pitch
- High stability due to anchor pins or two soldering pads per position
- Supplied in taped packaging according to IEC 60286-3 for automatic assembly
- Touch connection for voltage testing using a 1 mm Ø test pin

#### Notes:

Dimensional drawings of tape reels and place pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

1) Current carrying capacity curve available on request.

#### For accessories, see Catalog 1

# PCB connection technology and electronics housing

## PCB terminal blocks with 2.54 to 7.62 mm pitch

### SMD PCB terminal blocks with push-in spring connection up to 1.5 mm<sup>2</sup>

- Push-in direct plug-in technology for solid and stranded conductors
- Suitable for use in SMD processes
- Horizontal and vertical design with a 5.0 mm and 5.08 mm pitch
- High stability due to anchor pins or two soldering pads per position
- Supplied in taped packaging according to IEC 60286-3 for automatic assembly
- Touch connection for voltage testing using a 1 mm Ø test pin

#### Notes:

Dimensional drawings of tape reels and place pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

1) Current carrying capacity curve available on request.

#### For accessories, see Catalog 1

# PCB connection technology and electronics housing

## PCB terminal blocks with 2.54 to 7.62 mm pitch

### THR PCB terminal blocks with push-in spring connection up to 1.5 mm<sup>2</sup>

- Push-in direct plug-in technology for solid or stranded conductors
- Suitable for use in SMT reflow processes
- Horizontal and vertical design with 3.5 mm and 3.81 mm pitch
- Two solder pins for a high level of stability on the PCB
- Standard pin length of 2.6 mm also suitable for wave soldering processes
- Supplied in tape-on-reel packing according to IEC 60286-3 for automated mounting in the reflow process with pin length of 2.0 mm
- Touch connection for voltage testing using a 1 mm Ø test pin

#### Notes:

Dimensional drawings of tape reels and place pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

1) Current carrying capacity curve upon request.

Pin length of 2.6 mm, box-packaged PCB terminal blocks, connection direction horizontal to the PCB

#### For accessories, see Catalog 1

# PCB connection technology and electronics housing

## PCB terminal blocks with 2.54 to 7.62 mm pitch

### THR PCB terminal blocks with push-in spring connection up to 1.5 mm<sup>2</sup>

- Push-in direct plug-in technology for solid or stranded conductors
- Suitable for use in SMT reflow processes
- Horizontal and vertical design with 5.0 mm and 5.08 mm pitch
- Two solder pins for a high level of stability on the PCB
- Standard pin length of 2.6 mm also suitable for wave soldering processes
- Supplied in tape-on-reel packing according to IEC 60286-3 for automated mounting in the reflow process with pin length of 2.0 mm
- Touch connection for voltage testing using a 1 mm Ø test pin

#### Notes:

Dimensional drawings of tape reels and place pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

1) Current carrying capacity curve upon request.

Pin length of 2.6 mm, box-packaged PCB terminal blocks, connection direction horizontal to the PCB

## PCB terminal blocks with 2.54 to 7.62 mm pitch

### Double-level PCB terminal blocks with push-in spring connection up to 1.5 mm²

- Push-in connection with spring lever for tool-free conductor connection
- Unique integration into front panels in two rows
- Conductor cross sections up to 1.5 mm² with ferrule
- Printing area at the front
- Touch connection for voltage testing using a 1 mm test pin

#### Notes:

1) Current carrying capacity curve upon request.

#### For accessories, see Catalog 1

### Inverted headers for reflow processes

- Inverted headers with a 3.5 mm pitch
- Plug-in direction parallel or vertical to the PCB
- Versions with snap-in lug for locking inverted plugs with self-locking flanges
- You can find user notes and recommendations for the THR procedure in Catalog 1
- Combination with MC 1,5 pin strips for the PCB/PCB connection

#### Notes:

In accordance with DIN EN 61984, COMBICON connectors have no switching power. During designated use, they must not be plugged in or disconnected when carrying voltage or under load.

#### COMBICON select

Possible combinations for connectors can be found in COMBICON select at [phoenixcontact.net/products](http://phoenixcontact.net/products).

<sup>1)</sup> Current carrying capacity curve upon request.

2.0 mm pin length  
Box-packaged headers,  
Plug-in direction parallel to the PCB

## Connector systems with a 3.5/3.81 and 5.08 mm pitch

### Single-level header for reflow processes

- 13 to 20 pos. headers with a 3.81 mm pitch
- High-precision pin strips for increased tolerance requirements
- Short 2.0 mm pin for reduced overhang in 1.6 mm PCBs
- You can find user notes and recommendations for the THR procedure in Catalog 1
- For further numbers of positions, visit [phoenixcontact.net/products](http://phoenixcontact.net/products)

#### Notes:

In accordance with DIN EN 61984, COMBICON connectors have no switching power. During designated use, they must not be plugged in or disconnected when carrying voltage or under load.

#### COMBICON select

Possible combinations for connectors can be found in COMBICON select at [phoenixcontact.net/products](http://phoenixcontact.net/products).

CP-MSTB and SK 3,... may only be used after reflow soldering.

Dimensional drawings of the free space for solder paste, the tape, and pick-and-place pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

Pin length 2.0 mm,  
Box-packaged headers,  
Plug-in direction parallel to the PCB

# PCB connection technology and electronics housing

## Connector systems with a 3.5/3.81 and 5.08 mm pitch

### Single-level header for reflow processes

- 13 to 20 pos. headers with a 3.81 mm pitch
- High-precision pin strips for increased tolerance requirements
- Short 2.0 mm pin for reduced overhang in 1.6 mm PCBs
- Tape-on-reel packing according to IEC 60286-3 for automated mounting
- Tape width corresponds to order designation, e.g., R32 = 32 mm tape width
- You can find user notes and recommendations for the THR procedure in Catalog 1
- For further numbers of positions, visit [phoenixcontact.net/products](http://phoenixcontact.net/products)

#### Notes:

In accordance with DIN EN 61984, COMBICON connectors have no switching power. During designated use, they must not be plugged in or disconnected when carrying voltage or under load.

#### COMBICON select

Possible combinations for connectors can be found in COMBICON select at [phoenixcontact.net/products](http://phoenixcontact.net/products).

CP-MSTB and SK 3,... may only be used after reflow soldering.

Pick and place pads for taped THR articles usually protrude beyond the components. The PCB layout must ensure that collisions are avoided when components are assembled. Dimensional drawings of the pick and place pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

Pin length 2.0 mm,  
Taped headers,  
Plug-in direction parallel to the PCB

### Plug with spring-cage connection up to 0.75 mm²

- Specifically designed for use in reflow and SMT processes
- High current carrying capacity of 6 A
- Robust solder anchor for secure, mechanical fixing to the surface
- Supplied in taped packaging according to IEC 60286-3 for automatic assembly
- Compatible with PTSM...-/PTPM...plugs
- 2.5 mm pitch

#### Notes:

PTSM plugs and headers are also available in black.

#### COMBICON select

Possible combinations for connectors can be found in COMBICON select at [phoenixcontact.net/products](http://phoenixcontact.net/products).

Pick and place pads for taped THR articles usually protrude beyond the components. The PCB layout must ensure that collisions are avoided when components are assembled. Dimensional drawings of the pick and place pads can be found online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

<sup>1)</sup> Current carrying dependent upon plug used

<sup>2)</sup> 0.75 mm² possible, terminates the conductor insulation before the terminal block.

#### For accessories, see Catalog 1

# PCB connection technology and electronics housing

## PCB terminal blocks for power electronics with a pitch from 5.0 to 15.0 mm

### PCB terminal blocks, 7.5 mm pitch

- SPTA 5 PCB terminal block with push-in spring connection for conductor cross sections up to 6 mm<sup>2</sup> and a current carrying capacity of 41 A
- Fully insulated bridges (FBSK) with different numbers of positions, e.g., for potential distribution
- Fast connection technology, thanks to tool-free direct plug-in principle
- Unrestricted 600-V-UL approval thanks to compact zig-zag pinning
- Conductor connection direction: 30° to the PCB
- Single-position terminal blocks with double pinning

#### Notes:

When aligning versions with double pinning, other rated insulation voltages can occur.

1) Please observe the current carrying capacity curves and laboratory data sheets. Further current carrying capacity curves on request.

#### For accessories, see Catalog 1

# PCB connection technology and electronics housing

## PCB terminal blocks for power electronics with a pitch from 5.0 to 15.0 mm

### PCB terminal blocks, angled, 10 mm pitch

- SPTA 16 PCB terminal block with push-in spring connection for conductor cross sections up to 16 mm<sup>2</sup> and a current carrying capacity of 76 A
- Fully insulated bridges (FBSK) with different number of positions, e. g. for potential distribution
- Fast connection method thanks to principle of direct plug-in without tools
- Unrestricted 600-V-UL approval thanks to compact zig-zag pinning
- Conductor connection direction: 30° to the PCB
- Single-position terminal blocks with double pinning

#### Notes:

When aligning versions with double pinning, other rated insulation voltages can occur.

<sup>1)</sup> Please observe the current carrying capacity curves and laboratory data sheets. Further current carrying capacity curves on request.

#### For accessories, see Catalog 1

The 45° push-in spring connection enables quick, tool-free, and space-saving connection. The solid conductor or a conductor with ferrule is simply inserted into the terminal point and pressed against the current bar by the spring. It is only when fine-strand conductors without ferrules are connected and when this connection is released that it is necessary to use a standard bladed screwdriver. The perfect connection for rapid wiring in the field.

Optimally seal the potting compounds - molded feed-through terminal blocks from Phoenix Contact

The terminal blocks consist of an internal and external element. These pass through the housing panel and snap together without the need for tools. The engagement mechanism ensures a tight fit, however thick the panel.

The various engagement pin versions can be used to create pre-assembled blocks for fast mounting.

Technical drawing of a mechanical part with dimensions:

- Top hole diameter:  $\varnothing 4,5$
- Top hole diameter:  $\varnothing 10$
- Left side height: 10
- Right side hole diameter:  $\varnothing 4,5$
- Bottom distance (left): 12
- Bottom distance (right):  $13,3^*$

## 29

The ME-IO housing is particularly suitable for applications with a small amount of installation space. The push-in front connection technology as well as the compact design enable devices with up to 36 positions to be implemented in a confined space.

The Lock & Release system provides secure and defined locking and release for plugs and headers.

Releasing the lever automatically ejects the plug from the header. The contact system between the plug and header is interrupted, but the plugs do not fall out.

Coding with CP-DMC... coding profile prevents mismatching in the device.

The HSCP-... plugs and HSCH ... headers are mounted with corresponding CP-DMC ... coding profiles. If the coding profile is mounted between the same positions, the plug cannot be plugged in.

The coding can be implemented later on site or is provided in pre-assembled versions.

The ME 18,8 TBUS connector can be snapped onto the NS 35/7,5 DIN rail to connect individual modules together. This means that the signal and supply voltage can be implemented in the device system without any wiring.

The bus connector is compatible with the bus system of the ME TBUS and ME MAX housing ranges, thereby enabling the creation of complex devices with quick and convenient mounting.

### Flexible modular principle

The flexible housing concept of ME-IO offers numerous solutions. Thanks to the variety of covering hoods, plugs, and headers, there is no doubt a solution for your special requirements.

An overview of predefined assembly versions is shown on the next page.

### Lock & Release

The Lock & Release system is available in four lengths. It is available in 3, 5, 7, and 9 units. The length of Lock & Release defines the possible plug area.

### Various covering hoods

Covering hoods are available in lengths from 2 to 7 units. This means that the appropriate hood can be used for display and operating elements as well as data connectors.

### Plug version with TWIN connection

The TWIN connector is characterized by the connection of two conductors to one connection terminal. It is used to loop through signals or to distribute potential or power.

The 2 and 4-pos. plug versions can be flexibly combined for sophisticated device solutions.

### Color options for the plug

The spring levers of plugs can also be produced in other standard colors. This enables easy conductor/terminal point assignment during installation.

The plug and electronics housing can be produced in non-standard colors as well.

#### Notes:

For the functionality of the Lock & Release system, note the positioning of the header. A side-by-side arrangement of the HSCH 2,5-3U/12 9005 header is not possible. In the examples, the quantities of covering hoods, headers, and plugs and their respective position for fitting are specified. Data sheets for the housing system with connectors are available at [phoenixcontact.net/products](http://phoenixcontact.net/products). Numerous other configurations are possible.

| Example 4                                                                         |                              |                          | Example 5                                                                         |                             |                          | Example 6                                                                         | Example 7                                                                          |                    | Example 8                                                                           | Example 9                                                                           |

**Notes:**

- Electronic components and HSC headers can be assembled and soldered in a single step.
- Lock & Release and headers are snapped in. The pressure springs are inserted in the rear grips provided.
- The PCB can be easily snapped into the housing thanks to the guide edges in the lower housing part.
- The covering hood is placed on the free area and snapped into the HSC headers.
- The HSC plugs are marked with an arrow to indicate the plug-in direction.

The headers are available in two and three-unit sizes and the plugs in one unit. Two plugs fit on the HSCH 2,5-2U... and three plugs fit on the HSCH 2,5-3U...

- 12 terminal points – 3 x 4-pos.
- 8 terminal points – 2 x 4-pos.
- 6 terminal points – 1 x 4-pos. and 1 x 2-pos.
- 4 terminal points – 2 x 2 TWIN connections
- 2 terminal points – 1 x 2 TWIN connections and ME-IO 18,8 C 3U 7035

Together with the PBR jumper, the new PCO power connector enables the transmission of high levels of power between modules in ME MAX housings.

The new ME TBUS 4P1S enables the easy implementation of serial and parallel circuits for module-to-module connection in the DIN rail.

The ME TBUS ADAPTER allows even more effective use of ME TBUS technology for modules with a design width from 35 mm. ME TBUS 4P1S and the ME TBUS ADAPTER can be used in ME and ME MAX housings.

#### **PCO... power connector for ME MAX housing**

The PCO power connector is used to transmit power of up to 42 A (8 A per module) and 60 V DC between modules in ME MAX housings. There are no restrictions on the mounting and removal of modules from the group while in the off-load state.

The PCO connector can be soldered to other electronic components in the wave soldering process. For additional information, please refer to the data sheets at [phoenixcontact.net/products](http://phoenixcontact.net/products). Cross connection is achieved by simply inserting the PBR jumper.

#### **ME... TBUS 4P1S: serial and parallel connection in the DIN rail**

The ME TBUS 4P1S enables the serial and parallel connection of modules via the DIN rail: 4 positions are intended for parallel circuits and 1 position for serial circuits.

#### **ME TBUS ADAPTER: easy extension**

From a housing width of 35 mm, the ME TBUS ADAPTER is the ideal solution for the efficient use of the TBUS system.

In addition, by using the ME TBUS ADAPTER there is more PCB area available for mounting in the housing as there is no T-tap.

PCO... power connector for ME MAX housing

The PCO... power connector can be used together with the PBR... jumper in ME MAX housing.

- Technical data:
- Voltage up to 60 V DC
  - Total current of 42 A
  - 8 A per module
  - 2-pos.
  - With orthogonal pin outlet
  - Designed for parallel connections
  - ME MAX connection technology and accessories can also be used without restriction

| Description                                                                                                                                                                                           |

## ME TBUS 4P1S and ME TBUS ADAPTER for ME and ME MAX housing

The ME... TBUS 4P1S enables the implementation of parallel circuits together with serial circuits, which connect various modules on the DIN rail in ME and ME MAX housings.

### Technical data:

- Voltage up to 50 V
- Currents up to 8 A per position
- 4 parallel positions
- 1 serial position

The ME... TBUS ADAPTER is particularly useful for using wider modules in the ME and ME MAX housing more efficiently together with the ME... TBUS.

### Technical data:

- Voltage up to 125 V
- Currents up to 8 A per position
- 5 parallel positions
- No tap in the electronics housing

| Description                                                                                                                                | No. of pos. |

# Connection technology for field devices

## Data connectors

### Unique variety for copper and fiber optics

For compact device connection

For flexible cable connection

For easy cabling

### The right connection for every application

Modern industrial automation requires connectors for large quantities of data in robust packaging. Benefit now from powerful connectors and cables for on-site assembly.

High requirements are placed on components used for outdoor data transmission, in fields such as telecommunications, renewable energies, and offshore applications. Whether you're concerned about UV, temperature or humidity, the connectors from Phoenix Contact offer ideal protection.

Phoenix Contact offers an extensive and forward-looking product range for modern building cabling which impresses with its easy installation. Our patch cables and patch fields allow you to install flexible and fault-tolerant cabling.

### The right connection technology for every application

**Fast assembly without special tools**  
– with IDC and Piercecon® fast connection

**Fast assembly in the field**  
using professional tools

### RJ45 industrial connectors, IP20

- Optimized for industrial use with a high degree of resistance to vibration
- High resistance to ESD and EMI for reliable transmission
- Easy handling, thanks to one-piece design
- Metal locking

# Connection technology for field devices

## Data connectors – RJ45 connectors

### Push-pull industrial connectors, version 14

- High resistance to ESD and EMI for reliable transmission
- Easy handling, thanks to one-piece design
- Locking system to prevent unintentional removal
- Consistent 360° shielding concept

Description

**Push-pull Advance**, RJ45 industrial connector, IP67, 8-pos.

Value pack

**Stripping tool**, for multiple-stage repositioning of shielded conductors

**Electronic diagonal cutter**, tapered head, without chamfer, with opening spring, non-reflective phosphate-treated surface, punched version

**Push-pull industrial connectors,  
version 14**

**Push-pull Advance,  
cable outlet at the bottom**

## Data connector – patch panel, terminal outlet

### Modular distribution panel

- 19" distribution field with space for 8 modules, with a total of 48 x RJ45
- Front release without special tool
- Plug and Play – thanks to pre-assembled modules
- Up to 10 Gbps (Class E<sub>A</sub>)
- Cable length according to customer requirements
- Optimized strain relief for every module
- GHMT certification

Assembled modules  
for 19" mounting frames

19" mounting frame

| 19" frame, empty, for using 8 modules (RJ45)                                                                                                                         |                                |           |                      |                       |           |             |
| Gray (similar to RAL 7035)                                                                                                                                           |                                |           |                      | CUC-PP-FRAME-19       | 1407986   | 1           |
| Black (similar to RAL 9005)                                                                                                                                          |                                |           |                      | CUC-PP-FRAME-19 BK    | 1409140   | 1           |
| Module, RJ45 to RJ45, consisting of two housings each with 6 x RJ45 10 Gbps (Class E <sub>A</sub> ) pre-assembled with multi-cable, variable length, GHMT-certified. |                                |           |                      |                       |           |             |
| Patch bay, 19", for orderly cabling in the control cabinet                                                                                                           | CUC-PP-MODUL-RJ45:6-RJ45:6/... | 1407995   | 1                    |                       |           |             |
| Gray, with plastic hooks                                                                                                                                             |                                |           |                      | CUC-PP-PATCHBAY       | 1407994   | 1           |
| Gray, with metal hooks                                                                                                                                               |                                |           |                      | CUC-PP-PATCHBAY-MH    | 1409283   | 1           |
| Black, with metal hooks                                                                                                                                              |                                |           |                      | CUC-PP-PATCHBAY-MH BK | 1409284   | 1           |
| Dummy frame, size of one module, for use in the frame                                                                                                                |                                |           |                      |                       |           |             |
|                                                                                                                                                                      | CUC-PP-MODUL-COVER             | 1407988   | 1                    |                       |           |             |

### Ordering example for modules of variable length:

For an RJ45 module with a cable length of 25.0 m, the ordering data is as follows:

| Order No. | Length [m]<br>Max. 80 m              |
|-----------|--------------------------------------|
| 1407995   | 25                                   |
|           | Increment:<br>1.5 m ... 80 m = 0.5 m |

### M5 to M12 circular connectors

Circular connectors for signals, data, and power.

### M17 to M58 circular connectors

Circular connectors for signals, data, and power.

### M12 rear mounting XL

The new device connectors for rear mounting feature an optimized housing contour with additional tightening limitation. This simplifies the housing cutout on the device and protects the O-ring during mounting.

### M12 front mounting XL

The wrench flat on the new device connectors for front mounting has been enlarged and now features additional tightening limitation. This simplifies the device cutout and increases security and tightness when mounting.

### M12 power front/rear mounting XL

The M12 XL housing design has also been introduced for the M12 power device connectors with S- and T-coding. This addition means that there is now a consistent design available for the M12 device connectors for signal and power.

### M12 power for 230 V/16 A

The M12 power series has been extended with the 2+PE (S-coded) pin assignment. The M12 design means that a compact mains voltage plug is now available for 230 V and up to 16 A.

### M23 hybrid cable and coupler connector

Special hybrid lines allow signals, data, and power to be transmitted using just one connector.

### M23 hybrid device connectors

Angled, rotatable, and straight housing versions are available for front mounting on the device side.

## M12 device connectors XL, front mounting

- M16 fastening thread
- With 0.5 m long litz wires
- Tightening limitation
- Wrench size 19

# M12 power device connectors XL, front mounting

- M16 fastening thread
- With 0.5 m long litz wires
- Tightening limitation
- Wrench size 19

<sup>1)</sup> The effective current carrying capacity must be determined using a derating curve, if necessary, according to the application.

<sup>2)</sup> The values specified assume that the connector pair is correctly locked and is only disconnected for testing and maintenance purposes. If the connector is unlocked and exposed to ambient conditions, and if there is a danger of contamination, the connector must be sealed using a protective cap ≥ IP54.

<sup>3)</sup> The cable clamping areas specified on the following pages may vary depending on the cable material/structure. Selection and testing is the responsibility of the user.

Flexibility is required when it comes to the structure of a sustainable power supply system. A combination of various sources of renewable energy – even in conjunction with storage technologies – is already proving cost-effective. What is striking here is that miniaturization is more than just a trend; it is a recognized method of increasing system efficiency.

In photovoltaics, the micro inverter, the little brother of the string inverter, is particularly gaining in popularity. It can even be used cost-effectively in locations that are clearly less than ideal. Double-figure percentage increases in yield in comparison to string inverters mean that even areas that are not ideal can be used cost-effectively.

SUNCLIX micon, the connection system for the AC-side of micro inverters, simplifies installation using components which have proven themselves a million times over.

### AC-Y connectors

The AC-Y connectors consist of two 3-pos. connections, which are connected to each other via the trunk line without the risk of polarity reversal. In addition to accommodating the trunk line, the coupling side also accommodates the drop line, which serves as a connection to the inverter.

### Mains connector plugs

The mains connector plugs provide the connecting link between the PV system and mains. Depending on the system structure, the mains can be connected via the plug or coupling side of the AC Y-connector. The free cable end is either connected in a distributor box or fed into an incoming mains feeder box via a cable sleeve.

### Protective caps

Dust protection caps (brown) made from biodegradable plastic protect the pin connector pattern from contamination during transport. When it comes to installation, they can be easily removed from the plug without any special tools. During installation, the IP protective caps (black) are inserted as an end cap on the last connector in order to protect it from atmospheric influences.

### Contact removal tool

The locking mechanism on the connector is extremely robust and prevents unintentional release. The contact removal tool enables the lock to be opened easily and quickly. Thanks to an additional latch, it does not fall out of the plug housing once it has been released.

### DC connectors

With the SUNCLIX DC connector as a device plug or for field assembly, you can also impress with performance and quality on the module side.

# Connection technology for field devices

## Photovoltaic AC connectors

### SUNCLIX micon

- Pre-assembled sets for minimum effort at the installation site
- Customer-specific versions on request
- Networked cables
- Proven SUNCLIX contact technology for optimum system performance

## Photovoltaic AC connectors

### Cable installation

#### Cable splice kit

- Cable-to-cable connection
- IP67 for outdoor applications
- Accepts three conductors, 1.5 mm<sup>2</sup> to 25 mm<sup>2</sup> (16 to 4 AWG)

#### Cable terminator

- End-of-run cable terminator
- IP67 for outdoor applications
- Accepts three conductors, 1.5 mm<sup>2</sup> to 25 mm<sup>2</sup> (16 to 4 AWG)

Cable splice kit

Cable terminator

#### **IP-protected circular connectors for power electronics**

The new power connectors in the PRC series enable you to reliably and conveniently connect 3 and 5-wire cables to your device (e.g., a solar inverter). The device connectors with crimp connection are supplied pre-assembled with punched-on litz wires or alternatively they can be self-assembled.

Remove the cable sheath, strip the wires, and conveniently connect with screw connection

Snap the contact carrier into the plug housing

Tighten the cable gland

– Sealable for protection against tampering

– UV-resistant plastic for safe outdoor use

– Secure latching to be disconnected using tool

– Fully flexible for the device manufacturer: Pre-assembled panel feed-through or flexible and rapid self-assembly.

– The mechanical coding ensures that 3- and 5-pos. connectors are not accidentally connected to each other.

– Everything from a single source: Phoenix Contact supplies connectors for all the interfaces on a solar inverter.

## Photovoltaic AC connectors

### Cable connectors

- Snaps in automatically when inserted, released using a screwdriver
- Screw connection of 1.5 mm<sup>2</sup> to 6 mm<sup>2</sup>
- With lagging PE contact

| Description |
|-------------|
|-------------|

**M25 device connector incl. locking nut**, cable length 150 mm, with conductor cross section:

2.5 mm<sup>2</sup>  
4 mm<sup>2</sup>  
6 mm<sup>2</sup>

**Contact carrier incl. locking nut**, without contacts,  
for crimp contacts, conductor cross section of 2.5 mm<sup>2</sup> ... 6 mm<sup>2</sup>

Protective cap

### Replacement locking nut

**Crimp contacts CK 2,5**, silver-plated contact surface  
for conductor cross section:

2.5 mm<sup>2</sup>  
4 mm<sup>2</sup>  
6 mm<sup>2</sup>

The development of a widespread charging infrastructure in conjunction with renewable energy is an important step toward a mobile future. Internationally standardized charging systems are used to establish an electrical connection between the electric vehicle and the infrastructure (e.g., a charging station). In terms of the charging interfaces required, a distinction is made between:

- Vehicle inlets
- Socket outlets on the charging station
- Charging cables with connectors (charging plug on the vehicle), plugs (charging plug in the infrastructure), and integrated IC-CPD control units.

International standards ensure uniform connection for charging stations and vehicles:

- Type 1 according to SAE J1772 (USA, Japan)
- Type 2 according to IEC-62196 (Europe)
- GB standard (China).

The charging plugs from Phoenix Contact offer reliable, standard-compliant solutions for a consistent charging interface for all applications.

This is implemented, for example, with the Combined Charging System (CCS), which was developed by major German automobile manufacturers in cooperation with Phoenix Contact. The electric vehicle can be charged conventionally with AC at home, for example. In addition, the vehicle-side inlet is also designed for rapid DC charging. Only short stops are required for the charging process - e.g., on the go at rest stops.

### AC type 1

The type 1 AC charging system is based on standard SAE J1772. It is primarily used in the USA and Japan. The lock is implemented using a lever system.

### AC type 2

The type 2 AC charging system, developed for Europe, is designed according to the IEC 62196-2 standard. It supports single- and three-phase charging. An electromechanical actuator lock safeguards the charging process.

### AC GB

The AC charging system standardized according to the Chinese GB standard enables both single- and three-phase charging. Charging takes place securely thanks to a special lever system.

### DC CCS type 1

In the USA, the type 1 DC CCS charging system is used for fast DC charging, according to SAE J1772 and IEC 62196-3. The lever locking mechanism is also supported by an additional actuator lock.

### DC CCS type 2

In Europe, the type 2 DC CCS charging system is the vanguard for rapid DC charging according to IEC-62196-3. The electromechanical actuator lock prevents premature removal during the charging process.

### DC GB

The DC GB charging system is based on the GB standard. It offers rapid DC charging for Chinese charging stations. The lever lock is also supported by an additional actuator lock.

## Charging cables for electric vehicles

### Type 1 AC charging cables with open cable end

Type 1 AC charging cables with open cable end are primarily installed in charging stations and wall boxes in the USA and Japan. They are used to charge electric vehicles with alternating current.

## Type 2 AC charging cables with open cable end

Type 2 AC charging cables with open cable end are installed in charging stations and wall boxes in European infrastructure. They are used to charge electric vehicles with alternating current.

|                                                                                 |

# Connection technology for field devices

## Charging cables for electric vehicles

### Type 1 and type 1 mobile AC charging cables (mode 3)

The mobile AC charging cables enable electric vehicles to be charged with alternating current at European charging stations or wall boxes at home and while on the move. They can easily be stored inside the vehicle.

|                                                                 |

## Type 1 and type 2 mobile AC charging cables (mode 2)

The mobile AC charging cables with In Cable Control and Protection Device (IC-CPD) enable electric vehicles to be charged with alternating current at a normal, European socket at home and while on the move. Standardized communication with the vehicle as well as the safety equipment are integrated in the IC-CPD.

# Connection technology for field devices

## Charging cables for electric vehicles

### Combined charging system (CCS) DC charging cables type 1 and type 2

The CCS DC charging cables with open cable end are connected directly to a DC charging station. They are suitable for fast DC charging of electric vehicles.

The CCS connector is compatible with the CCS inlet, which also accommodates an AC connector.

**Type 1 combined DC connector,  
with AWG cable**

**Type 2 combined DC connector,  
with metric cable**

## DC charging cables GB standard (China)

DC GB charging cables with open cable end are installed in Chinese charging stations with a stationary AC/DC converter. They are suitable for fast DC charging of electric vehicles.

FAME is the innovative test system for all measuring and testing tasks in network protection technology for medium and high-voltage switchgear. With the modular system, you can now perform manual testing automatically, safely, and more quickly. Suitable for every application, the modular system can be directly integrated into the control cabinet panel or used as a DIN rail version.

The test plug is completely inserted and engaged, the display window turns red. All test contacts are contacted according to the test setup.

The twist grip is turned upward as far as it will go, the display window turns yellow. Test contacts with short contact tab lengths (e.g., current transformers) are once again connected to the protective device.

The twist grip must be turned back to its starting position. Now the mechanism releases the plug so it can be fully removed. The display window turns green.

Preprogrammed short-circuit and switching operations depend on consistent insertion and removal of the test plug. Undefined contact states are effectively avoided thanks to the twist grip mechanism.

The patented wall fastening is easy to use and has a robust design. Even tolerances in the panel cutout of up to 4 mm are compensated.

The offset test socket arrangement enables the use of CAT III and CAT IV/1000 V safety test leads according to EN 61010-031 in a confined space.

FAME test terminal strips have an IP20 design. Blind plugs without switching function can be inserted and secured with seals. These can only be released with two-hand operation.

In addition to the two marking grooves, the test terminal strips for wall mounting also offer two function shafts, or six function shafts in the case of the DIN rail version, inside the control cabinet for forming and grounding the star point.

The compact and modular design of the system, as well as the plugs and test terminal strips, provides an extensive range of options for every application with positions from 4 to 25.

All applications which do not involve testing through the closed door and the open rack mounting can be implemented with the DIN rail version. Terminal points and plug-in zone can be operated from one direction.

The test plug provides three function shafts between the 4 mm test contacts. Horizontally aligned, as leading short-circuit jumper - vertically aligned as through connection in the plug.

The coding profiles can be applied by the user according to their application. VDE-compliant versions are pre-coded on delivery. This ensures maximum safety.

## FAME 2 – safe in every operating state

The new, modular FAME measuring transducer test system enables all transformer testing tasks to be carried out quickly and safely.

The automatically generated transformer short circuit, the twist grip mechanism, and the shock-proof design provide maximum safety during measurement.

### Normal operation

Closed N/O contact

### Transformer short circuit

Leading short circuit by means of auxiliary contact

### Test operation

N/O contact connected via test socket

Due to the N/C contact function of the FAME 2 system, additional power plugs are not required for normal operation. If desired, the plug-in zone can be covered with a blind plug to prevent unauthorized access.

When replacing the protective device or even in the case of a relay test, a leading short circuit of the current transformer (for the purpose of signal splitting) can be easily carried out by means of a jumper inserted crossways.

With the jumper simply inserted lengthways in the test plug, test equipment can be easily looped into the current path via the 4 mm test sockets.

### Test terminal strip, multi-position with PT ... push-in connection, for PTWE ... wall mounting

The modular FAME measuring transducer test system, with the innovative push-in connection technology, enables all transformer testing tasks to be carried out quickly and safely. The transformer is short-circuited and the testing device is looped in automatically through the insertion process.

- The test terminal strips can be used universally for current and voltage transducers
- The test terminal strip can be mounted on the control cabinet door or on the DIN rail
- Signal and status messages can be wired in combination in a test terminal strip
- The correct switching sequence when removing the test plug is ensured by a locking device and a mechanical drive in the twist grip
- All test signals can be connected with touch-proof safety test leads (CAT III and CAT IV/1000 V according to EN 61010-031)
- All versions listed can be equipped with coding for the matching test plug
- Star points of the current transformer can easily be created in the test terminal strip on the rear by means of FBS jumpers.
- You can find corresponding accessories from page 99

#### Notes:

To create panel cutouts, see phoenixcontact.net/products.

1) Derating curve available on request.

2) Rated surge voltage of 5 kV.

6 (10) mm<sup>2</sup>, 30 A, 4 ... 25-pos. test terminal strip, for wall mounting

**Test terminal strip, multi-position  
with PT ... push-in connection,  
for PTRE ... DIN rail mounting**

**6 (10) mm<sup>2</sup>, 30 A, 4 ... 25-pos. test terminal  
strip, for DIN rail mounting**

**Notes:**

<sup>1)</sup> Derating curve available on request.

<sup>2)</sup> Rated surge voltage of 5 kV.

**Max. electrical data**

### Test terminal strip, multi-position with UT ... screw connection, for UTWE ... wall mounting

The modular FAME measuring transducer test system, with universal screw connection technology, enables all transformer testing tasks to be carried out quickly and safely. The transformer is short-circuited and the testing device is looped in automatically through the insertion process.

- The test terminal strips can be used universally for current and voltage transducers
- The test terminal strip can be mounted on the control cabinet door or on the DIN rail
- Signal and status messages can be wired in combination in a test terminal strip
- The correct switching sequence when removing the test plug is ensured by a locking device and a mechanical drive in the twist grip
- All test signals can be connected with touch-proof safety test leads (CAT III and CAT IV/1000 V according to EN 61010-031)
- All versions listed can be equipped with coding for the matching test plug
- Star points of the current transformer can easily be created in the test terminal strip on the rear by means of FBS jumpers
- You can find corresponding accessories from page 99

#### Notes:

To create panel cutouts, see phoenixcontact.net/products.

1) Derating curve available on request.

2) Rated surge voltage of 5 kV.

6 (10) mm², 30 A, 4 ... 25-pos. test terminal strip, for wall mounting

### Test plug, multi-position, freely-configurable contact tabs FTPR ... and FTP ...

The test plugs allow the switching sequence of the individual functions to be carried out with safe chronological disconnection with a switching operation via three different contact tab lengths. Configure the lengths of the contact tabs of the test plug to suit your application. We can provide you with a test plug according to your requirements in next to no time.

- The test plugs can be easily configured and ordered with just a click of the mouse in the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products)
- To order via fax or e-mail, please use the ordering data as shown in the ordering example on the following page

The test plugs are characterized by:

- User-friendly twist grip function with latching
- Robust and warp resistant design
- Mechanically secure, molded contact tabs
- High-quality contact surfaces for reliable transmission of signals
- Strain relief for the connected test leads on the plug
- Flexibility in the number of positions thanks to the modular design (additional options on request)
- Large-surface marking options for each contact
- Use of CLIPLINE complete accessories for testing, bridging, and marking
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- All test signals can be connected with touch-proof safety test leads (CAT III and CAT IV/1000 V according to EN 61010-031)
- You can find corresponding accessories from page 99

#### Notes:

1) Rated surge voltage of 5 kV.

24 A, 4 ... 25-pos. test plug with twist grip or standard grip, 4 mm test sockets

## Ordering example: configurable test plug with twist grip function

To ensure that your order is correct, you need a defined view of how everything is counted. This is achieved when the status window in the top view is on the left-hand side. Position 1 is then on the left.  
Each position of a test plug is described by a contact tab feature that is selected. The following features are possible:

**S** Short contact tab, gray  
**M** Medium contact tab, gray  
**L** Long contact tab, gray  
**LGN** Long contact tab, green  
**N** No contact tab, gray

Each position with a contact tab is supplied fitted with two gray test sockets.

### Ordering example:

A 15-pos. test plug with twist grip needs to be configured as follows:

Pos. 1 Short contact tab, gray  
Pos. 2 Short contact tab, gray  
Pos. 3 Short contact tab, gray  
Pos. 4 Short contact tab, gray  
Pos. 5 Short contact tab, gray  
Pos. 6 Short contact tab, gray  
Pos. 7 Short contact tab, gray  
Pos. 8 No contact tab, gray

Pos. 9 No contact tab, gray  
Pos. 10 Medium contact tab, gray  
Pos. 11 Medium contact tab, gray  
Pos. 12 Medium contact tab, gray  
Pos. 13 Medium contact tab, gray  
Pos. 14 Long contact tab, green  
Pos. 15 Long contact tab, green

### The order data for this ordering example is therefore:

| Order No. | Pos. 1 | Pos. 2 | Pos. 3 | Pos. 4 | Pos. 5 | Pos. 6 | Pos. 7 | Pos. 8 | Pos. 9 | Pos. 10 | Pos. 11 | Pos. 12 | Pos. 13 | Pos. 14 | Pos. 15 |
|-----------|--------|--------|--------|--------|--------|--------|--------|--------|--------|---------|---------|---------|---------|---------|---------|
| 3001693   | /S     | /S     | /S     | /S     | /S     | /S     | /S     | /N     | /N     | /M      | /M      | /M      | /M      | /LGN    | /LGN    |

### Blind plug, multi-position, sealable FBP-2/...

During normal operation, the blind plug acts as a protective cover for the test terminal strip and is characterized by:

- Secure latching on the test terminal strip
- The robust latching can only be released with two-hand operation
- The optional seal protects against unauthorized actuation
- Large-surface marking options
- The coding profile set can be used to assign test terminal strips and blind plugs according to the specific application, see right-hand page

Blind plug 4 ... 25-pos.

## PC-...-TRI coding profile set

- The coding profile set can be used to assign test terminal strips and test plugs according to the specific application
- Maximum safety is therefore ensured for all testing tasks

**General data**

Material  
Inflammability class according to UL 94

**Technical data**

PA  
V0

**Ordering data**

| Description                                                                       | Color |

## Colored PSBJ ... test sockets

- 4 mm safety test leads with fixed insulation according to EN 61010-031 CAT III and CAT IV up to 1000 V can be coded in true color
- Additional test leads, assembled with ring and fork-type cable lugs (see accessories, e.g., page 96) can be attached with test sockets

| Description                    | Color       |

## Modular terminal blocks

### FAME plug-in test system

Jumper, red, 8.2 mm pitch,  
FBS ...

- The FBS ...-8 plug-in bridges are used for short-circuiting, as star-point jumpers, and also to establish grounding in connection with a PE modular terminal block on the terminal strip

Jumper with extraction tool, red,  
8.2 mm pitch, FBSRH ...

- The FBSRH ...-8 bridges have a molded extraction tool which means that they can be used conveniently and without tools for individual bridging tasks. This enables a transformer short circuit to be created in test disconnect terminal blocks, for example.

### Cover profiles for test plug or test terminal strip mounted on DIN rail

- The AP-FTP cover profile prevents undesired changes to the star point, feed-through, and short-circuit jumpers on the completely assembled test plug
- To mount, gently release the side screw connection of the plug and snap the profile into place
- The APH-ME end bracket is used in conjunction with the AP-ME cover for the DIN rail mounted test terminal strip

The **VDE A7** version described here is suitable as a plug-in test system in single-system current, voltage, and power relays, wattmetric and ground fault wiper relays, detuning level controllers or reverse power protection for generators.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

To create panel cutouts, see [phoenixcontact.net/products](http://phoenixcontact.net/products).

1) Derating curve available on request.

<sup>2)</sup> Rated surge voltage of 5 kV.

A7

**6 (10) mm<sup>2</sup>, 30 A, test terminal strip, for wall mounting, VDE coded type A7**

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type B7, for wall and DIN rail mounting

The **VDE B7** version described here is suitable as a plug-in test system in digital differential protection as an addition to the F19 plug-in test system, see page 120.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                                                                      |

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type E7, for wall and DIN rail mounting

The **VDE E7** version described here is suitable as a plug-in test system for single-stage automatic frequency load shedding (AFLS) and as rotor ground fault protection.

- The test plugs are assembled according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                    |  |
|-----------------------------------------------------------|--|
| To create panel cutouts, see phoenixcontact.net/products. |  |
| 1) Derating curve available on request.                   |  |
| 2) Rated surge voltage of 5 kV.                           |  |

Long contacts  
Short contacts

E7

6 (10) mm², 30 A, test terminal strip, for wall mounting, VDE coded type E7

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type A14, for wall and DIN rail mounting

The **VDE A14** version described here is suitable as a plug-in test system for three-stage automatic frequency load shedding (AFLS), as zero-power comparison protection, and as stator and rotor ground fault protection.

- The test plugs are assembled according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

**6 (10) mm<sup>2</sup>, 30 A, test terminal strip, for wall mounting, VDE coded type A14**

| Notes:                                                                                                      |

### Test terminal strip with PT ... push-in connection, VDE type B14, for wall and DIN rail mounting

The **VDE B14** version described here is suitable as a plug-in test system in overcurrent directional protection, distance protection for high and medium voltage, as well as voltage regulation.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

**6 (10) mm², 30 A, test terminal strip, for wall mounting, VDE coded type B14**

| Notes:                                                                                                      |
|-------------------------------------------------------------------------------------------------------------|

### Test terminal strip with PT ... push-in connection, VDE type C14, for wall and DIN rail mounting

The **VDE C14** version described here is suitable as a plug-in test system in overcurrent time protection, unbalanced load protection, and stator ground fault protection for busbar operation.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

6 (10) mm<sup>2</sup>, 30 A, test terminal strip, for wall mounting, VDE coded type C14

| Notes:                                                                                                      |

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type B19, for wall and DIN rail mounting

The **VDE B19** version described here is suitable as a plug-in test system in distance protection for high voltage.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

6 (10) mm<sup>2</sup>, 30 A, test terminal strip, for wall mounting, VDE coded type B19

| Notes:                                                                                                      |

### Test terminal strip with PT ... push-in connection, VDE type C19, for wall and DIN rail mounting

The **VDE C19** version described here is suitable as a plug-in test system in distance protection as system busbar protection, overcurrent directional protection, and current comparison protection for cables.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

6 (10) mm<sup>2</sup>, 30 A, test terminal strip, for wall mounting, VDE coded type C19

| Notes:                                                                                                      |
|-------------------------------------------------------------------------------------------------------------|

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type D19, for wall and DIN rail mounting

The **VDE D19** version described here is suitable as a plug-in test system for electromechanical differential protection for transformers.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

#### Notes:

To create panel cutouts, see [phoenixcontact.net/products](http://phoenixcontact.net/products).

<sup>1)</sup> Derating curve available on request.

<sup>2)</sup> Rated surge voltage of 5 kV.

#### Max. electrical data

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type F19, for wall and DIN rail mounting

The **VDE F19** version described here is suitable as a plug-in test system in electromechanical differential protection for transformers, generators, motors, and cables.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

6 (10) mm², 30 A, test terminal strip, for wall mounting, VDE coded type F19

| Notes:                                                    |
|-----------------------------------------------------------|
| To create panel cutouts, see phoenixcontact.net/products. |
| 1) Derating curve available on request.                   |
| 2) Rated surge voltage of 5 kV.                           |

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type G19, for wall and DIN rail mounting

The **VDE G19** version described here is suitable as a plug-in test system in digital differential protection for transformers.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                                                                      |

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type H19, for wall and DIN rail mounting

The **VDE H19** version described here is suitable as a plug-in test system in overcurrent directional protection and distance protection as system protection.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

#### Notes:

To create panel cutouts, see [phoenixcontact.net/products](http://phoenixcontact.net/products).

<sup>1)</sup> Derating curve available on request.

<sup>2)</sup> Rated surge voltage of 5 kV.

## FAME plug-in test system

### Test terminal strip with PT ... push-in connection, VDE type I19, for wall and DIN rail mounting

The **VDE I19** version described here is suitable as a plug-in test system in medium voltage, outlet, and coupling protection, including selective ground fault detection.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type A7, for wall and DIN rail mounting

The **VDE A7** version described here is suitable as a plug-in test system in single-system current, voltage, and power relays, wattmetric and ground fault wiper relays, detuning level controllers or reverse power protection for generators.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                    |  |
|-----------------------------------------------------------|--|
| To create panel cutouts, see phoenixcontact.net/products. |  |
| 1) Derating curve available on request.                   |  |
| 2) Rated surge voltage of 5 kV.                           |  |

### Test terminal strip with UT ... screw connection, VDE type B7, for wall and DIN rail mounting

The **VDE B7** version described here is suitable as a plug-in test system in digital differential protection as an addition to the F19 plug-in test system, see page 120.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                    |  |
|-----------------------------------------------------------|--|
| To create panel cutouts, see phoenixcontact.net/products. |  |
| 1) Derating curve available on request.                   |  |
| 2) Rated surge voltage of 5 kV.                           |  |

Long contacts  
Short contacts

B7

6 (10) mm², 30 A, test terminal strip, for wall mounting, VDE coded type B7

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type E7, for wall and DIN rail mounting

The **VDE E7** version described here is suitable as a plug-in test system for single-stage automatic frequency load shedding (AFLS) and as rotor ground fault protection.

- The test plugs are assembled according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                    |  |

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type A14, for wall and DIN rail mounting

The **VDE A14** version described here is suitable as a plug-in test system for three-stage automatic frequency load shedding (AFLS), as zero-power comparison protection, and as stator and rotor ground fault protection.

- The test plugs are assembled according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                    |  |
|-----------------------------------------------------------|--|
| To create panel cutouts, see phoenixcontact.net/products. |  |
| 1) Derating curve available on request.                   |  |
| 2) Rated surge voltage of 5 kV.                           |  |

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type B14, for wall and DIN rail mounting

The **VDE B14** version described here is suitable as a plug-in test system in overcurrent directional protection, distance protection for high and medium voltage, as well as voltage regulation.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

6 (10) mm², 30 A, test terminal strip, for wall mounting, VDE coded type B14

| Notes:                                                                                                      |
|-------------------------------------------------------------------------------------------------------------|
| To create panel cutouts, see <a href="http://phoenixcontact.net/products">phoenixcontact.net/products</a> . |
| 1) Derating curve available on request.                                                                     |
| 2) Rated surge voltage of 5 kV.                                                                             |

### Test terminal strip with UT ... screw connection, VDE type C14, for wall and DIN rail mounting

The **VDE C14** version described here is suitable as a plug-in test system in overcurrent time protection, unbalanced load protection, and stator ground fault protection for busbar operation.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

6 (10) mm², 30 A, test terminal strip, for wall mounting, VDE coded type C14

| Notes:                                                    |  |

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type B19, for wall and DIN rail mounting

The **VDE B19** version described here is suitable as a plug-in test system in distance protection for high voltage.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                                                                      |  |

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type C19, for wall and DIN rail mounting

The **VDE C19** version described here is suitable as a plug-in test system in distance protection as system busbar protection, overcurrent directional protection, and current comparison protection for cables.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type D19, for wall and DIN rail mounting

The **VDE D19** version described here is suitable as a plug-in test system for electromechanical differential protection for transformers.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                    |  |

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type F19, for wall and DIN rail mounting

The **VDE F19** version described here is suitable as a plug-in test system in electromechanical differential protection for transformers, generators, motors, and cables.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type G19, for wall and DIN rail mounting

The **VDE G19** version described here is suitable as a plug-in test system in digital differential protection for transformers.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                                                                      |  |

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type H19, for wall and DIN rail mounting

The **VDE H19** version described here is suitable as a plug-in test system in overcurrent directional protection and distance protection as system protection.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

#### Notes:

To create panel cutouts, see [phoenixcontact.net/products](http://phoenixcontact.net/products).

<sup>1)</sup> Derating curve available on request.

<sup>2)</sup> Rated surge voltage of 5 kV.

## FAME plug-in test system

### Test terminal strip with UT ... screw connection, VDE type I19, for wall and DIN rail mounting

The **VDE I19** version described here is suitable as a plug-in test system in medium voltage, outlet, and coupling protection, including selective ground fault detection.

- The test plugs are assembled with jumpers and contact tab lengths according to the circuit diagram
- A transparent covering hood protects the jumpers. The covering hood can only be removed by dismantling the test plug
- All VDE-specified 7, 14, and 19-pos. versions are supplied with exclusive coding for the matching test plug and blind plug
- The components are supplied pre-marked according to the VDE Directive
- Test signals can be connected with touch-proof safety test leads (CAT III and IV/1000 V according to EN 61010-031)
- The test plugs are equipped with two gray test sockets per position, for further color versions, see the range of accessories
- Additional test leads, assembled with ring and fork-type cable lugs, can be attached with test sockets
- Other VDE versions available on request

| Notes:                                                    |  |

## Modular terminal blocks

### Modular terminal blocks - CLIPLINE complete

#### Push-in connection technology

The PT series is characterized by the easy, direct conductor connection and makes consistent use of the benefits of the CLIPLINE complete system.

#### Easy insertion

The up to 50 percent reduction in insertion force offered by push-in technology supports simple and direct insertion of solid and stranded conductors featuring ferrules with a cross section of 0.34 mm<sup>2</sup> or higher.

#### Latch function

The integrated latch allows you to release connections with any type of tool – easily and without direct contact with live parts.

The reducing bridge allows terminal blocks with different nominal cross sections to be connected with ease, e.g., a PT 10 push-in terminal block to a PT 2.5. Power blocks can be created quickly using the reducing bridge.

The double function shaft can be used to connect any number of terminal blocks with two-position bridges. The 2 to 50-pos. bridges allow up to 50 terminal blocks to be bridged in one step.

Bridging between non-adjacent terminal blocks is created by removing individual contact tabs from the standard bridge. Two potentials can then be routed in parallel through a terminal strip. The contact points can also be marked.

The isolated feed-through connector P-FIX, isolating plug P-DI, component plug P-CO, and the cartridge fuse plug P-FU can be used in the universal plug-in zone of the disconnect terminal block.

A test plug with a 2.3 mm diameter is available for measuring lines. All measurement and test work can be completed at speed using test adapters for 4 mm diameter test plugs and the modular test plugs.

As well as offering a testing facility in the double function shaft, all push-in technology terminal blocks offer an additional test contact for test plugs with a 2.3 mm diameter.

Push-in COMBI terminal blocks are available for the plug-in configuration of signal wiring. The system is touch-proof and offers plugs for self-assembly with extensive accessories.

Automatic flat-type fuse terminal blocks with a 4 mm² conductor connection are available in the same shape as the feed-through terminal blocks. All terminal blocks can be continuously bridged with one another with the double function shaft.

The compact lever-type fuse terminal blocks are of the same shape as the feed-through terminal blocks and can be labeled and bridged continuously. A time-saving potential distribution is easily created using bridging between non-adjacent terminal blocks.

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### PT 1,5/S... and PTT 1,5/S... push-in knife disconnect terminal blocks

- Now available for the first time with a design width of just 3.5 mm
- Testing facility on both sides of the disconnect point
- Actuation cross on the disconnect knife enables the use of different sized screwdrivers, see image below
- Same shape feed-through versions
- Clear grouping of the terminal strips through orange cover with a design width of just 0.8 mm

#### Single-level PT 1,5/S...

- Three and four-conductor terminal blocks can be used for multi-conductor connections
- Seamless and can be double bridged for all tasks in time-saving potential supply and distribution

#### Double-level PTT 1,5/S-2MT

- Space-saving design for maximum wiring density
- Disconnection option on each level
- The assignment from the disconnect knife to the contact points is indicated by the colored levers and the height offset

#### Notes:

- The nominal current for PT ...MTD... terminal blocks is 17.5 A.
- 1) The max. load current must not be exceeded by the total current of all connected conductors.
- 2) Refer to the reducing bridge table; see Catalog 3.

1.5 (1.5) mm<sup>2</sup>, 10 A, knife disconnect terminal block, two connections, bridgeable

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### PTT 2,5... push-in double-level disconnect and knife disconnect terminal blocks

- Design width of just 5.2 mm
- Testing facility on both sides of the disconnect point
- Space-saving design for maximum wiring density
- Clear grouping of the terminal strips through orange cover with a design width of just 0.8 mm
- Disconnection option on each level
- The assignment from the disconnect knife to the contact points is indicated by the colored levers and the height offset

| Notes:                                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------|
| 1) If the fuse is faulty, the downstream circuit is not disconnected.                                                   |
| 2) Observe max. load current.                                                                                           |
| 3) Observe max. load current, depending on the power dissipation of the components. Max. 0.5 W with single arrangement. |
| 4) see Catalog 3.                                                                                                       |

2.5 (4) mm<sup>2</sup>, 16 A, double-level terminal block, with one disconnect zone

## Modular terminal blocks - CLIPLINE complete

2.5 (4) mm², 16 A, double-level terminal block with one knife disconnect zone

2.5 (4) mm², 16 A, double-level terminal block with two knife disconnect zones

2.5 (4) mm², 20 A, double-level terminal block, same shape

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### PTTBS 2,5... push-in double-level disconnect and knife disconnect terminal blocks in desk design

The angled push-in terminal blocks in desk-design were developed for wiring systems where space is saved by means of underfloor wiring. They offer numerous advantages:

- Design width of just 5.2 mm
- Angled conductor entry for use in flat terminal boxes
- Disconnection option on each level
- The assignment from the disconnect knife to the contact points is indicated by the colored levers and the height offset
- Two function shafts before and after the disconnect point for flexible potential distribution
- Additional 2.3 mm test connections on the contact chamber lever
- Two large-surface, central marking options, marking assigned through a height offset
- Convenient potential bridging of the levels with the vertical FBS-PV potential bridge
- PTTBS 2,5–2TGB with universal disconnect zone, for accommodating isolating plugs, feed-through connectors, component and fuse plugs

CLIP PROJECT Planning enables the quick and convenient planning and configuration of fault-free terminal strips.

| Notes:                                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------|
| 1) If the fuse is faulty, the downstream circuit is not disconnected.                                                   |
| 2) Observe max. load current.                                                                                           |
| 3) Observe max. load current, depending on the power dissipation of the components. Max. 0.5 W with single arrangement. |
| 4) see Catalog 3.                                                                                                       |

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### UT ...-TG screw connection, disconnect and knife disconnect terminal blocks with fuse plug

- Compact design and high current carrying capacity of up to 20 A
  - Double bridge shaft enables individual potential distribution and supply
  - The function terminals are suitable for use in potentially explosive areas (zone 2) according to standards established worldwide.
- They meet the requirements of the following ignition protection concepts:

#### Marking

- IECEx:
- Ex nA IIC Gc
- ATEX:
- II 3 G Ex nA IIC Gc
  - Ex i
- UL US
- AEx nA IIC Gc
  - Class I zone 2
  - Class I Division 2 Groups A B

#### S-MT switching lock

- The optional switching lock snaps in and effectively prevents accidental switching, see figure below

#### Notes:

Detailed information and data sheets regarding modular terminal blocks in the Ex area are available in the product area on our website at phoenixcontact.net/products and in IECEx Certificate of Conformity IECEx UL 13.0007U and in UL file E192998.

- 1) If the fuse is faulty, the downstream circuit is not disconnected.
- 2) Current and voltage are determined by the plug used.
- 3) see Catalog 3.

4 (6) mm<sup>2</sup>, 20 A, disconnect terminal block, with test socket screws

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### UTT 2.5-TG, UTT 2.5-2(MT) screw connection, double-level disconnect and knife disconnect terminal blocks

- Optimized for process technology through:
- Design width of just 5.2 mm
  - Space-saving design for maximum wiring density
  - Disconnection option on each level
  - Testing facility on both sides of the disconnect point
  - Clear assignment of the disconnect levels thanks to height offset and color disconnect knife, green at the bottom, orange at the top

#### Offset levels

- Offset levels provide:
- Unobstructed access to the lower connection level if fully wired
  - Better view of the lower marking labels and conductor entry funnel

| Notes:                                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------|
| 1) Observe max. load current.                                                                                           |
| 2) Observe max. load current, depending on the power dissipation of the components. Max. 0.5 W with single arrangement. |
| 3) Current and voltage are determined by the plug used.                                                                 |
| 4) see Catalog 3.                                                                                                       |
| 5) For maximum power dissipation, see Catalog 3.                                                                        |

2.5 (4) mm<sup>2</sup>, 20 A, double-level terminal block with disconnect zone, test socket screw

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### Screw connection, multi-level function and lever-type fuse terminal blocks with UT 4... PE foot

- Suitable for process technology thanks to applied for Ex nA approval
- For power and signal transmission in potentially explosive areas
- Same shape as UT 4-PE/L/HESI multi-level lever-type fuse terminal blocks on the following page

### Terminal strip service

We produce fully pre-assembled terminal strips for fitting straight into the control cabinet or switch system. This simplifies installation, saves time, and cuts costs.

| Notes:                                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------|
| 1) Observe max. load current.                                                                                           |
| 2) Observe max. load current, depending on the power dissipation of the components. Max. 0.5 W with single arrangement. |
| 3) Current and voltage are determined by the plug used.                                                                 |
| 4) see Catalog 3.                                                                                                       |
| 5) For maximum power dissipation, see Catalog 3.                                                                        |

4 (6) mm², 36 A, feed-through terminal block

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### Screw connection, multi-level lever-type fuse terminal blocks with UT 4... PE foot

- Suitable for process technology thanks to applied for Ex nA approval
- For power and signal transmission in potentially explosive areas
- Compact design for maximum space saving
- Two function shafts mean that all potential distribution tasks can be undertaken at speed
- Test connection on both sides in safety lever
- Same shape as the UT 4-PE/L... feed-through and disconnect terminal blocks

CLIP PROJECT Planning enables the quick and convenient planning and configuration of fault-free terminal strips.

| Notes:                                                                             |
|------------------------------------------------------------------------------------|
| 1) If the fuse is faulty, the downstream circuit is not disconnected.              |
| 2) The current is determined by the fuse used.                                     |
| 3) The current is determined by the fuse used, the voltage by the light indicator. |
| 4) For maximum power dissipation, see Catalog 3.                                   |

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### Screw connection test disconnect terminal block with UK 4-SD test isolating plug

This disconnect terminal block offers numerous advantages especially for testing in measuring and signal circuits:

- Simultaneous interruption of individual or multiple neighboring disconnect terminal blocks by using the PS 6-DI-SD isolating plug
- Safe, uninterruptible looping in of measuring devices in the circuit with the aid of the PS 6-CT-SD test isolating plug
- Safe contacting of the potentials after opening the disconnect point through use of the PS 6-VT-SD test isolating plug
- Terminal points in the test isolating plugs allow individual test applications to be wired.
- Easy potential distribution in the terminal strip with insertion bridges

CLIP PROJECT Planning enables the quick and convenient planning and configuration of fault-free terminal strips.

### Circuit examples

- Normal operation: no plug inserted
- Measurement checking: looping in a measuring device with the PS 6-CT-SD test isolating plug
- Current transformer short circuit: measurement split between two positions

# Modular terminal blocks

## Modular terminal blocks - CLIPLINE complete

### Fast connection

#### QTCU 2,5-TWIN-MT hybrid knife disconnect terminal block

The advantages of the different

connection methods are as follows:

- The TWIN fast connection is used inside the control cabinet and the universal screw connection is used on the end customer side
- Compact design and high current carrying capacity of 20 A
- Testing facility on both sides of the disconnect point

### S-MT switching lock

- The optional switching lock snaps in and effectively prevents accidental switching

A test plug with a 2.3 mm diameter is available for measuring lines. All measurement and test work can be completed at speed using test adapters for 4 mm diameter test plugs and the modular test plugs.

#### Notes:

1) The max. load current must not be exceeded by the total current of all connected conductors.

2) see Catalog 3.

2.5 (2.5) mm<sup>2</sup>, 20 A, knife disconnect terminal block, three connections

### QTC 2,5-QUATTRO... fast connection feed-through and ground terminal blocks

- The fastest conductor connection for signal and low-spectrum power wiring
- Large packing density with a maximum conductor cross section of 2.5 mm<sup>2</sup>
- Compact design

#### Notes:

<sup>1)</sup> The max. load current must not be exceeded by the total current of all connected conductors.

2.5 (2.5) mm<sup>2</sup>, 24 A, feed-through terminal block, four connections

2.5 (2.5) mm<sup>2</sup>, ground terminal block, four connections

### Save energy

The new valve connectors with energy-reducing function are characterized by up to 50% reduced current consumption compared to conventional versions.

### Save costs

After controlling the valve, the holding current is reduced to 50% by the energy-reducing function. This means that power supply units with smaller dimensions can be used.

### Compatible with the standard

The functionality and compatibility of valve connectors corresponds to the familiar standard. Integration in existing systems can be easily accomplished.

## Valve connector with energy-reducing function

- Energy-reducing function by means of holding current limiting device

Valve connector with freewheeling diode,  
type A, 3-pos.

Valve connector with freewheeling diode,  
type B, 3-pos.

# Sensor/actuator cabling and industrial connectors

## Sensor/actuator cabling - assembled cables

### Valve connector, Deutsch DT06-2S connector

– For mobile hydraulic applications

Valve connector, Deutsch DT06-2S,  
2-pos.

Valve connector, Deutsch DT06-2S,  
with 1 LED, 2-pos.

# Sensor/actuator cabling and industrial connectors

## Installation system - QPD installation system

### H-distributor, 6.0 mm<sup>2</sup>

- Can be used as a H-distributor with continuous master cable
- Can be used as a star distributor
- Can be used as a Y-distributor with a test connection
- Touch-proof in accordance with DIN EN 50274

With four QUICKON nuts,  
4+PE-pos.

Without QUICKON nut,  
4+PE-pos.

**T-distributor, 6.0 mm<sup>2</sup>**

- Can be used as a T-distributor with continuous master cable
- Touch-proof in accordance with DIN EN 50274

With three QUICKON nuts,  
4+PE-pos.

With two QUICKON nuts,  
4+PE-pos.

# Sensor/actuator cabling and industrial connectors

## Installation system - QPD installation system

### Cable connectors, 6.0 mm<sup>2</sup>

- The QUICKON connections at opposite ends feature different position markings and mechanical coding
- Touch-proof in accordance with DIN EN 50274

With two QUICKON nuts,  
4+PE-pos.

With one QUICKON nut,  
4+PE-pos.

### Panel feed-throughs, 2.5 mm<sup>2</sup> with push-in connection

- Devices no longer need to be opened in order to connect the cables
- User-friendly connection, even on devices that are difficult to access
- For internal push-in connection, solid conductors are simply stripped and inserted in the connection
- Touch-proof in accordance with DIN EN 50274

With one QUICKON nut,  
4+PE-pos.

# Sensor/actuator cabling and industrial connectors

## Installation system - QPD installation system

### Panel feed-throughs, 2.5 mm² for intrinsically safe circuits

- Devices no longer need to be opened in order to connect the cables
- User-friendly connection, even on devices that are difficult to access
- Touch-proof in accordance with DIN EN 50274

#### Notes:

Intended for applications in intrinsically safe circuits according to EN 60079-11 and EN 60079-14.

With litz wires,  
4+PE-pos.

With manual solder/spade connection,  
4+PE-pos.

Panel feed-throughs, 6.0 mm<sup>2</sup>

- Devices no longer need to be opened in order to connect the cables
- User-friendly connection, even on devices that are difficult to access
- Touch-proof in accordance with DIN EN 50274

With one QUICKON nut,  
4+PE-pos.

Without QUICKON nut,  
4+PE-pos.

### Assembled cables, 2.5 mm<sup>2</sup>

- Connecting cable between two QUICKON connections
- User-friendly connection, even on devices that are difficult to access
- Touch-proof in accordance with DIN EN 50274
- Other versions available on request

4+PE-pos.

## Accessories

- Mounting clip ① for easily fixing the H-distributor in place without the need for tools
- DIN rail mounting can be achieved using two DIN-rail adapters ②
- Plastic labels ③ can be stuck to the middle of the H-distributor
- Red sealing plugs ④ can be easily stuck into the QUICKON nuts and create a seal when screwed tight
- Protective caps with retaining cords ⑤ for closing open QUICKON domes which are going to have a connector (for example) fitted at a later date
- Locking nuts ⑥ for fixing the panel feed-throughs to thin panels that are unable to accommodate a proprietary thread
- Insulating sleeve ⑦ for 4.8 mm slip-on connections
- Transparent protective caps ⑧ for attaching to the open QUICKON dome
- Transparent protective caps ⑨ at front for attaching to the connector
- Slotted socket wrenches ⑩ enable you to tighten the QUICKON nuts easily and securely
- Red coding profiles ⑪ for preventing QPD connector mix-ups. Simply insert them into the QUICKON dome and connector on the front side. They are marked with an arrow and their symmetrical form enables them to be mounted in four different positions
- AS-Interface seals ⑫ for connecting 1 or 2 AS-Interface cables
- Aluminum shielding tape ⑬ prevents the splicing of the braided shield and enables a clean shield connection

## Heavy-duty connectors - HEAVYCON type B

### Contact inserts

#### BB series

500 V, 16 A

Connection technology:

- Crimp connection

With groove for accommodating coding profiles for easy and inexpensive coding of identical plug-in connections

- Can be coded in seconds, thanks to the coding profile

#### Notes:

For accessories, see Catalog 4 from page 552

Order crimp contacts separately

Connectors may only be operated when under no load

Observe notes on the connection technology

# Sensor/actuator cabling and industrial connectors

## Heavy-duty connectors - HEAVYCON type B

### Contact inserts

#### HS series, high-current applications

500 V, 35 A

Connection technology:

– Screw connection

With groove for accommodating coding profiles for easy and inexpensive coding of identical plug-in connections

– Can be coded in seconds, thanks to the coding profile

#### Notes:

For accessories, see Catalog 4 from page 552

Connectors may only be operated when under no load

Observe notes on the connection technology

### EMC protection

The new EMC series of HEAVYCON EVO heavy-duty connectors has been specifically developed for applications with increased requirements. Furthermore, the housing surfaces and all seals are constructed so as to be electrically conductive.

### Flexible, thanks to reduced number of versions

Thanks to the unique HEAVYCON EVO bayonet locking, only the swivel cable glands have to be replaced in order to cover the M20, M25, M32, and M40 clamping areas with straight and lateral outlet.

### Fully compatible

The HEAVYCON EVO housing is plug-compatible with standard aluminum housing. It fits the standard panel cutouts of heavy-duty connectors.

### Easy closing operation

The bayonet locking designed specially for EVO applications ensures easy on-site assembly without tools. For removal, a standard screwdriver is used to push down on the locking spring.

### Suitable for all inserts

All fixed and modular contact inserts in B series format fit in HEAVYCON EVO housing.

### Electrical connection

A solid electrical connection is required between the housing and the cable gland for EMC and safety reasons. The locking spring ensures a safe mechanical and electrical connection.

### Complete panel feed-through

The new EMC housings combine the advantages of EVO plastic housing with those of standard metal housing. A complete panel feed-through system is therefore available for EMC applications.

### Easy cable assembly

On the HEAVYCON EVO housing, the angled cable inlet is particularly large. This simplifies cable assembly if the cable gland is only mounted at the end of the process.

### For harsh conditions

The metal housings are made from salt-water-resistant aluminum. They meet the requirements of IP66 protection and NEMA 4/4x/12.

## Heavy-duty connectors - HEAVYCON type B

### EVO housing, type B6, metal, for EMC applications, single locking latch

## Heavy-duty connectors - HEAVYCON type B

### EVO housing, type B16, metal, for EMC applications, single locking latch

#### General data

Housing material  
Surface material  
Locking latch material  
Sealing material  
Ambient temperature (operation)  
Type of protection (when plugged in)

#### Technical data

Die-cast aluminum, salt water resistant  
Uncoated  
Polyamide  
NBR, conductive  
-40°C ... 125°C  
IP66

#### Ordering data

### Cable glands

Metal HEAVYCON EVO standard cable gland for higher strain relief with bayonet locking.

Black plastic cable glands with extended clamping area.

#### Notes:

Not for EMC applications

EVO standard cable gland, metal, with NBR seal

Cable gland, plastic

## Thread adapters, filler plugs

These thread adapters enable the use of special cable glands and corrugated pipe connections with HEAVYCON EVO type D housings.

Filler plugs for sealing unused thread openings on box mounting bases.

EVO D thread adapter, plastic

Filler plug, plastic

## Special flat gaskets, coding profiles

Special flat gaskets for type B panel mounting bases for uneven mounting surfaces.

Coding profile for new BB series contact inserts.

- For easy and inexpensive coding of identical plug-in connections
- Can be coded in seconds, thanks to the coding profile

Special flat gasket,  
for standard B panel mounting base

### Sealing frames with cone-shaped cable sleeves

Pre-assembled sealing frames with 8 (B16) or 10 (B24) cone-shaped cable sleeves. Particularly suitable for cables that are assembled or wired in the control cabinet. Cables up to 11 mm in diameter can be fed through by cutting off the sleeves.

- IP65 when using cable binders and vertical mounting
- Resistant to oil, fuels, and grease
- Halogen-free

Sealing frames with cone-shaped cable sleeves and screw locking

#### General data

Material of frames  
Material of cable sleeves  
Degree of protection

#### Technical data

Polyamide  
NBR  
IP54 (DIN IEC 60529)/IP65 (when directly mounted on the housing panel (perpendicular mounting or underwall mounting) and using a 3.6 mm wide cable binder (e.g., Order No. 3240744))

Temperature range [°C] -40 ... 120

## Installation and mounting material - cable glands

### Plastic cable gland, NPT, ANSI B1.20.1

- Material: polyamide 6
- Color: deep black (RAL 9005)
- Seal: neoprene
- Ambient temperature:  
-30°C ... +80°C (+150°C briefly)
- Degree of protection: IP68, 5 bar
- Strain relief: integrated according to  
EN 50262

# **Brass cable gland, NPT, ANSI B1.20.1**

- Material: brass, nickel-plated
- Seal: neoprene
- Clamping insert: polyamide 6
- O-ring: NBR
- Ambient temperature:  
-40°C ... +100°C
- Degree of protection: IP68, 5 bar
- Strain relief: integrated according to  
EN 50262

## Installation and mounting material - cable glands

### Brass cable gland, metric, Ex protection

Cable glands for unarmored and braided cables provide flameproof (type "d"), increased safety (type "e"), and restricted breathing (type "nR") hazardous area protection to IP66, IP67, and IP68.

Brass cable gland

Ex: SIRI13ATEX1068X / IECEx SIR13.0023X

#### General data

Cable gland material  
Seal material  
O-ring material  
Ambient temperature (operation)

#### Technical data

Nickel-plated brass  
Thermoplastic elastomers  
Viton  
-60°C ... 130°C

# Marking systems, tools, and mounting material

Optimize all of the processes involved in the setup, installation, and maintenance of your control cabinets and switchgear. We offer optimally coordinated products from our marking, tool, and mounting material ranges.

### MARKING system

MARKING system provides the perfect solutions for terminal, conductor, cable, device, and system marking. It places at your disposal the CLIP PROJECT planning and marking software, various printing systems, and a wide variety of marking materials.

### TOOL fox

TOOL fox is the complete range of professional processing and measuring tools. Designed for use in all processes in electrical engineering, the tools and automatic devices impress with their optimum handling and quality.

### CABINET add-on

CABINET add-on stands for modern control cabinet technology. DIN rails and end brackets ensure the secure attachment of terminal blocks and modules, while shield connection clamps guarantee EMC-compliant wiring and cable ducts bring order to the control cabinet.

### Service

Choose the complete range. Working to your specifications, we will manufacture and label terminal strips and complete terminal boxes or modules for direct installation in your application.

The TOPMARK LASER marking system provides you with the flexibility to implement the requirements of challenging industrial identification. With a comprehensive product range of over 400 markers for your terminal, conductor, cable, and device marking, you will find the ideal solution for your application.

The stainless steel material can be marked in two ways: through material removal (engraving) or annealing marking. The latter involves changing the color of the material while the material surface remains level.

You can easily mark all materials in the UCT product range with the automated material handling of the TOPMARK LASER. The laser marker automatically detects the material sheets fed in. This means that you can carry out marking quickly and effectively - without time-consuming parameter settings.

# TOPMARK LASER, desktop laser marker for card material and material sheets

Direct laser marking

Integration in the CLIP PROJECT planning and marking software makes the TOPMARK LASER the fastest desktop laser marker in its class - and the easiest to use. You can now mark all materials without special knowledge of laser technology.

- Wide range of materials comprising stainless steel, aluminum, ABS, polyacrylics, and polycarbonate
- Preset optimized laser parameters are available for all material types
- Automatic material detection enables fast and effective marking
- The material sheet can be easily reused by creating a project code

## Marking material for TOPMARK LASER - MARKING system

### Stainless steel and aluminum cable marking for assembly with cable binders with cable binders

- The LS-WMTB ... product range is available in stainless steel (V4A) or aluminum and includes markers that can be quickly and easily fitted with cable binders
- The LS-WMTB-V4A ... group is particularly characterized by its high resistance to salt water, chloride, and solvents and it is therefore also suitable for the most demanding industrial requirements

- Automatic material detection enables fast and effective marking without time-consuming parameter settings
- The material sheet can be easily reused by creating a project code
- **Designation example:**  
**LS-WMTB-V4A (29x8)**  
Lettering field size: 29 x 8 mm

- The use of modern laser technology creates highly resistant and permanent marking, which can only be removed by destroying the material
- The LS-WMTB-V4A ... product group can be marked in two ways: by engraving or annealing
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

Can be marked using:

Direct laser marking

# Marking systems, tools, and mounting material

## Marking material for TOPMARK LASER - MARKING system

### Stainless steel and aluminum device marking for screwing or riveting

Can be marked using:

Direct laser marking

Stainless steel, material thickness: 0.5 mm

- The LS-EMSP ... product range is available in stainless steel (V4A) or aluminum and includes markers that can be quickly and easily fitted with screws or rivets
- The LS-EMSP-V4A ... group is particularly characterized by its high resistance to saltwater, chloride, and solvents and is therefore also suitable for the most demanding industrial requirements
- The LS-EMSP-V4A ... product group can be permanently marked in two ways: by engraving or annealing
- **Designation example: LS-EMSP-V4A (39x15)**  
Lettering field size: 39 x 15 mm
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

#### Notes:

For matching rivets for securing the LS-EMSP-V4A ... and LS-EMSP-AL ..., see page 370 in main catalog 5 or the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).

For drilling diagrams, visit [phoenixcontact.net/products](http://phoenixcontact.net/products).

1) For an ordering example, see page 358 in main catalog 5.

2) From lettering field size 110 x 80 to 170 x 180 mm, the material thickness is 1.5 mm.

# Marking systems, tools, and mounting material

## Marking material for TOPMARK LASER - MARKING system

### Adhesive aluminum device marking

Can be marked using:

Direct laser marking

Aluminum,  
material thickness: 0.8 mm

- The aluminum LS-EMLP-AL ... product range includes self-adhesive device markers with a high adhesive strength
- The use of modern laser technology creates highly resistant and permanent marking, which can only be removed by destroying the material
- Automatic material detection enables fast and effective marking without time-consuming parameter settings
- The material sheet can be easily reused by creating a project code
- **Designation example:**  
**LS-EMLP-AL (27x15)**  
Lettering field size: 27 x 15 mm
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

#### Notes:

1) For an ordering example, see page 358 in main catalog 5.

# Marking systems, tools, and mounting material

## Marking material for TOPMARK LASER - MARKING system

### Aluminum device marking for snapping into marker carriers

Can be marked using:

Direct laser marking

Aluminum, material thickness: 0.8 mm

- The aluminum LS-EMP-AL ... product range includes markers that can be quickly and easily fitted into existing CARRIER-EMP ... label frames
- The use of modern laser technology creates highly resistant and permanent marking, which can only be removed by destroying the material
- Automatic material detection enables fast and effective marking without time-consuming parameter settings
- The material sheet can be easily reused by creating a project code
- **Designation example:**  
**LS-EMP-AL (27x15)**  
Lettering field size: 27 x 15 mm
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

#### Notes:

<sup>1)</sup> For an ordering example, see page 358 in main catalog 5.

# Marking systems, tools, and mounting material

## Marking material for TOPMARK LASER - MARKING system

### Plastic adhesive device marking

Can be marked using:

Direct laser marking

White, material thickness: 0.8 mm

- The LS-EMLP ... product range includes self-adhesive double-layer plastic device markers
- A wide range of different marker sizes is available for custom designs
- Automatic material detection enables fast and effective marking without time-consuming parameter settings
- The material sheet can be easily reused by creating a project code
- **Designation example:**  
**LS-EMLP (11x9) SR**  
Lettering field size: 11 x 9 mm, silver material with black marking

# Marking systems, tools, and mounting material

## Marking material for TOPMARK LASER - MARKING system

### Plastic adhesive device marking, marked according to customer specifications

- The LS-EMLP ... product range includes self-adhesive double-layer plastic device markers
- A wide range of different marker sizes is available for custom designs
- Automatic material detection enables fast and effective marking without time-consuming parameter settings
- The material sheet can be easily reused by creating a project code
- **Designation example:**  
**LS-EMLP (11x9) SR CUS**  
Lettering field size: 11 x 9 mm, silver material with black marking
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

#### Notes:

<sup>1)</sup> For an ordering example, see page 358 in main catalog 5.

White, material thickness: 0.8 mm

# Marking systems, tools, and mounting material

## Marking material for TOPMARK LASER - MARKING system

### Plastic adhesive device marking, with hole for switch

Can be marked using:

Direct laser marking

Diameter: 24 mm,  
material thickness: 0.8 mm

- The LS-EMLP 24/ 30/ 32 ... product range includes self-adhesive double-layer plastic device markers with a hole for the switch
- A wide range of different marker sizes is available for custom designs
- Automatic material detection enables fast and effective marking without time-consuming parameter settings
- The material sheet can be easily reused by creating a project code
- **Designation example:**  
**LS-EMLP 24 (30x12) WH**  
Lettering field size: 30 x 12 mm  
Hole diameter for switch: 24 mm,  
white material with black marking
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

#### Notes:

<sup>1)</sup> For an ordering example, see page 358 in main catalog 5.

Laser foil adhesive device marking

Can be marked using:

Direct laser marking

Black-white

- The LS-EML ... product range includes self-adhesive, double-layer plastic foil labels that can be custom designed
- The laser foil is characterized by its high heat resistance and particularly strong adhesive properties
- Automatic material detection enables fast and effective marking without time-consuming parameter settings
- The material sheet can be easily reused by creating a project code
- **Designation example:**  
**LS-EML (180x180) BK-WH**  
Lettering field size: 180 x 180 mm, can be custom designed, black material with white marking
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

# Marking systems, tools, and mounting material

## Terminal marking - MARKING system

### Terminal marking, marker strips for tall and flat marker grooves

- The TMT labeling range includes markers for all products with tall and flat marker grooves
- Labeling service: Phoenix Contact can custom-label all TMT markers in accordance with your requirements

#### Notes:

<sup>1)</sup> For an ordering example, see page 358 in main catalog 5.

<sup>2)</sup> The TMT TOOL snap-in tool can only be used for terminal blocks from Phoenix Contact.

Can be marked using:

Thermal transfer for rolls

Unlabeled or labeled according to customer specifications

#### General data

# Marking systems, tools, and mounting material

## Conductor and cable marking - MARKING system

### Clip-on UniCard conductor marking

Can be marked using:

Thermal transfer for sheets and cards

UV LED technology

Direct laser marking

32 markers  
for conductor diameters of 2 to 2.9 mm

- The UCT-WMCO ... UniCard marking range includes markers for the subsequent marking of conductors by clipping on
- Secure tight fit even in the event of vibrations
- The markers, which are supplied in uniform sheets, can be marked quickly and easily with the TOPMARK LASER, THERMOMARK CARD, THERMOMARK CARD PLUS, and the BLUEMARK... printers
- The format automatically ensures printing with a high level of positional accuracy
- Large-surface labeling in a space-saving design
- The sheets provide space for including function texts
- Labeling service: Phoenix Contact can custom-label all UniCard markers in accordance with your requirements

#### Notes:

<sup>1)</sup> For an ordering example, see page 358 in main catalog 5.

## Conductor and cable marking - MARKING system

### UniCard cable marking for assembly with cable binders

Can be marked using:

Thermal transfer for sheets  
and cards

UV LED technology

Direct laser marking

15 markers  
for conductor diameter > 5 mm

- The UCT-WMTBA ... UniCard marking range includes markers that can be secured using standard cable binders
- The markers, which are supplied in uniform sheets, can be marked quickly, easily, and accurately with the TOPMARK LASER, THERMOMARK CARD, THERMOMARK CARD PLUS, and BLUEMARK CLED
- The format automatically ensures printing with a high level of positional accuracy
- For large-surface marking of conductors and cables > 5 mm in diameter
- The sheets provide space for including function texts
- Thanks to their angular shape the markers fit perfectly onto cables
- Labeling service: Phoenix Contact can custom-label all UniCard markers in accordance with your requirements

#### Notes:

For cable binders up to 5 mm wide.

For matching cable binders, see page 574 onwards in main catalog 5 or the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).

<sup>1)</sup> For an ordering example, see page 358 in main catalog 5.

## Conductor and cable marking - MARKING system

### Plastic cable markers for insert labels, for assembly with cable binders

- KMK HP ... plastic cable markers for marking and bundling conductors and cables indoors
- Inflammability class V0 acc. to UL 94
- The KMK HP... cable markers are particularly suitable for use in the railway industry, traffic technology, and building technology thanks to their outstanding material properties
- The KMK... versions have eyelets and are attached with cable binders
- The printed insert label is protected from dirt by the sealing cap
- Labeling service: Phoenix Contact can custom-label all insert labels for plastic cable markers in accordance with your requirements

#### Notes:

For matching cable binders, see page 574 onwards in main catalog 5 or the product area on our website at phoenixcontact.net/products.

Lettering field size: 25 x 6 mm,  
for cable diameter > 6 mm

**UniCard**, insert strip for KMK... cable marker carriers, can be marked with THERMOMARK CARD... and BLUEMARK CLED

Lettering field size: 25 x 6 mm, 15-section  
Lettering field size: 29 x 8 mm, 15-section  
Lettering field size: 60 x 15 mm, 3-section  
Lettering field size: 40 x 17 mm, 3-section

**UniCard**, insert strips for KMK... cable marker carriers, marked according to customer specifications

Lettering field size: 25 x 6 mm, 15-section  
Lettering field size: 29 x 8 mm, 15-section  
Lettering field size: 40 x 17 mm, 3-section  
Lettering field size: 60 x 15 mm, 3-section

**UniSheet**, 0.5 mm thick, inflammability class V0 according to UL 94  
84-section, lettering field size: 25 x 6 mm  
48-section, lettering field size: 29 x 8 mm  
9-section, lettering field size: 60 x 15 mm  
16-section, lettering field size: 40 x 17 mm

**Insert labels for thermal transfer printer**, halogen-free

Lettering field size: 25 x 6 mm, 5000 labels per roll

Lettering field size: 29 x 8 mm, 5400 labels per roll

Lettering field size: 60 x 15 mm, 2500 labels per roll

Lettering field size: 40 x 17 mm, 2300 labels per roll

**Cable binder**, inflammability class according to UL 94: V0, halogen-free, temperature range: -40°C ... 85 °C, maximum bundle Ø [mm]/minimum tensile strength [N]

35 / 130

50 / 220

79 / 220

**Magazine**, for THERMOMARK CARD ..., for accommodating UCT-EMP ...

## Conductor and cable marking - MARKING system

### Plastic cable markers for insert labels, for assembly with cable binders

- KMK UV ... plastic cable markers for marking and bundling conductors and cables outdoors
- The KMK UV... cable markers are ultra-transparent, impact resistant, and have excellent weathering resistance. At the same time, they also possess outstanding chemical resistance
- The KMK... versions have eyelets and are attached with cable binders
- The printed insert label is protected from dirt by the sealing cap
- Labeling service: Phoenix Contact can custom-label all insert labels for plastic cable markers in accordance with your requirements

#### Notes:

For matching cable binders, see page 574 onwards in main catalog 5 or the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).

<sup>1)</sup> WT-UV HF...BK cable binders are weatherproof and UV resistant according to ISO 4892 (after QUV-B 600 hours) for up to 10 years.

Lettering field size: 25 x 6 mm,  
for cable diameter > 6 mm

#### Description

**Cable marker carrier** for cable binder assembly

transparent

**UniCard**, insert strip for KMK... cable marker carriers, can be marked with THERMOMARK CARD... and BLUEMARK CLED

Lettering field size: 25 x 6 mm, 15-section  
Lettering field size: 29 x 8 mm, 15-section  
Lettering field size: 60 x 15 mm, 3-section  
Lettering field size: 40 x 17 mm, 3-section

**UniCard**, insert strips for KMK... cable marker carriers, marked according to customer specifications

Lettering field size: 25 x 6 mm, 15-section  
Lettering field size: 29 x 8 mm, 15-section  
Lettering field size: 40 x 17 mm, 3-section  
Lettering field size: 60 x 15 mm, 3-section

**UniSheet**, 0.5 mm thick, inflammability class V0 according to UL 94  
84-section, lettering field size: 25 x 6 mm  
48-section, lettering field size: 29 x 8 mm  
9-section, lettering field size: 60 x 15 mm  
16-section, lettering field size: 40 x 17 mm

**Insert labels for thermal transfer printer**, halogen-free

Lettering field size: 25 x 6 mm, 5000 labels per roll

Lettering field size: 29 x 8 mm, 5400 labels per roll

Lettering field size: 60 x 15 mm, 2500 labels per roll

Lettering field size: 40 x 17 mm, 2300 labels per roll

**Cable binder**, halogen-free, inflammability class according to UL 94: V2, maximum bundle Ø [mm] / min. tensile strength [N]<sup>1)</sup>

35 / 130

50 / 220

79 / 220

**Magazine**, for THERMOMARK CARD ..., for accommodating UCT-EMP ...

## Device marking - MARKING system

### Adhesive UniCard device marking for applications in process engineering

Can be marked using:

UV LED technology

Unlabeled or labeled according to customer specifications

- The UC-EMLP...-EX UniCard labeling range includes self-adhesive device markers with good adhesive properties
- The marking requirements in terms of legibility, adhesion, and wipe resistance in potentially explosive areas (ATEX), according to IEC/EN 60079-0, can also be ensured following storage in typical gas atmospheres. Phoenix Contact developed these sheets especially for process engineering which is where these requirements typically arise. These sheets meet the requirements for wipe resistance according to DIN EN 61010-1 against aggressive media such as acetone, ethanol, and MEK
- Thanks to the special adhesive, the marker meets the demanding requirements of process engineering
- The markers can be marked quickly, easily, and inexpensively with the BLUEMARK CLED and LED
- By using modern UV LED printing technology, a highly resistant and optimum printing quality can be achieved, which is resistant to solvents and suitable for use even under harsh industrial conditions
- Labeling service: Phoenix Contact can custom-label all markers according to your requirements

### Adhesive device marking for applications in process engineering

Can be marked using:

Thermal transfer for rolls

Unlabeled or labeled according to customer specifications

- The EML...-EX self-adhesive device markers have been specifically developed for marking various types of equipment in the Ex area
- The marking requirements in terms of legibility, adhesion, and wipe resistance in potentially explosive areas (ATEX), according to IEC/EN 60079-0, can also be ensured following storage in typical gas atmospheres. Phoenix Contact developed these labels especially for process engineering, which is where these requirements typically arise. These labels meet the requirements for wipe resistance according to DIN EN 61010-1 against aggressive media such as acetone, ethanol, and MEK
- They are only suitable in conjunction with the TM- RIBBON110-EX
- Thanks to the special surface and adhesive, the marker meets the demanding requirements of process engineering
- If high-quality ink ribbons are used, the labeling is resistant to solvents, making it suitable for use even under harsh industrial conditions
- A wide range of marker sizes and colors are available for custom designs
- The special packaging protects rolls that have already been started from the dirt found in industrial environments
- **Designation example:**  
**EML (10x4)R-EX**  
Lettering field size: 10 x 4 mm  
Type of packaging: roll
- Marking service: Phoenix Contact can custom-mark all EML markers according to your requirements

## Device marking - MARKING system

**UniSheet device marking for sticking onto rough or textured surfaces**

Can be marked using:

Thermal transfer for sheets and cards

Unlabeled or labeled according to customer specifications

- The US-EMLP-HA ... UniSheet marking range has excellent adhesive properties on rough, textured, and low-energy surfaces, thanks to the special adhesive
- The markers, which are supplied in uniform sheets, can be marked quickly, easily, and cost-effectively using THERMOMARK CARD and THERMOMARK CARD PLUS
- The perforated markers are easy to separate and can be easily fitted
- The sheets provide space for including function texts
- Marking service: Phoenix Contact can custom-mark all US-EMLP-HA ... markers according to your requirements

#### RFMARK high-frequency handheld

RFMARK HF is a powerful handheld device for contact-free reading and writing of HF transponders. The RFMARK HF can identify and locate HF transponders. Data can be received, transmitted, and scanned on a contact-free basis and without visual contact.

#### RFMARK ultra-high frequency handheld

The RFMARK UHF is a powerful handheld device which is equipped with a crossed dipole antenna. This allows UHF transponders to be written and read regardless of their position. Bulk detection of 150 transponders per second is also possible.

#### Dimensions

| General data         | [mm]  |
|----------------------|-------|
| Degree of protection |       |
| Temperature range    | [°C]  |
| Weight               | [kg]  |
| Frequency            | [MHz] |
| Read/write format    | [m]   |
| Memory               |       |
| Display              |       |

#### Description

##### Handheld, high-frequency range

Range up to 0.1 m, depending on the environment

##### Handheld, ultra-high frequency range

Range up to 2.0 m, depending on the environment

#### Advantages and accessories

Advantages of the RFMARK readers:

- Easy operation via touch screen
- Low power consumption and long battery life
- 1D laser scanner and 2D imager

#### Matching accessories

You can make optimum use of the RFMARK readers and ensure they are as user-friendly as possible with our reader accessories.

#### Radio-frequency identification, RFID

Used for contact-free identification, data exchange, and localization of transponders/tags without visual contact. With the aid of an RFID handheld device, which acts as a transmitter and receiver, data is transmitted to and received from a transponder/tag by electromagnetic waves (UHF) or a magnetic field (HF).

**Charging and data exchange station**, with replacement battery, connection for USB 2.0 and Ethernet, charger

for RFMARK HF, with power supply unit and power cable (EU/UK)

for RFMARK UHF, with power supply unit and power cable (EU/UK/US/CN)

#### Replacement battery

for RFMARK HF, Li-ion 7.4 V, 2.6 Ah

for RFMARK UHF, Li-ion 3.7 V, 2.26 Ah

**Protective bag**, with strap, protection against splash water, touch screen operation not possible

for RFMARK HF

for RFMARK UHF

**Belt pouch**, touch screen can be operated

for RFMARK HF

for RFMARK UHF

**Read and write USB stick**,

Crossed dipole antenna, range: 1 m

Handheld, high-frequency (HF)

Handheld, ultra-high frequency (UHF)

System marking - MARKING system

Adhesive system marking  
with RFID transponder

Can be marked using:

UV LED technology

Unlabeled

Markers

- The UCT-PMLP-RFID ... UniCard labeling range includes self-adhesive markers for system marking, with good adhesive properties
- The markers are integrated in a uniform matrix and can be printed quickly and easily with the BLUEMARK CLED
- The format automatically ensures printing with a high level of positional accuracy
- The wide temperature range means that the labels can be used both indoors and outdoors

Inlays

- The HF transponder inlays comply with ISO 15693 and ISO 18000-3 mode 1
- The UHF transponder inlays comply with EPC Class 1 Gen 2 and ISO 18000-6C

| General data                                                                                                                                                                        |       | Technical data                 |           |             |

Can be marked using:

## UV LED technology

Unlabeled

- The UniCard UCT-PMP-RFID ... marking range includes markers for system marking, specially designed to fit into existing CARRIER-PMP (108x38) marker carriers

- The markers are integrated in a uniform matrix and can be printed quickly and easily with the BLUEMARK CLED
- The format automatically ensures printing with a high level of positional accuracy
- The wide temperature range means that the labels can be used both indoors and outdoors
- The CARRIER-PMP ... marker carriers can be equipped with colored PMST markers according to DIN 2403

- The HF transponder inlays comply with ISO 15693 and ISO 18000-3 mode 1
- The UHF transponder inlays comply with EPC Class 1 Gen 2 and ISO 18000-6C

Notes:

1) RVT-PA...BK rivet for fixing PMST ... marker strips to the CARRIER-PMP ...

The material editor allows you to create the required markings directly in the application environment via tablet PC or smartphone.

The product scanner allows you to quickly and easily call up technical data for the marking material or directly mark it via the material editor.

With the search assistant, you can carry out a structured, targeted search for suitable marking materials, even without knowledge of this field.

## MARKING system app

You can retrofit your THERMOMARK LINE printer with MINI FD BLUETOOTH. MINI FD BLUETOOTH enables reliable, wireless data exchange between THERMOMARK LINE printers and mobile, Bluetooth-capable devices, such as smartphones and tablet PCs. This means that print orders can be conveniently sent to the printer using the MARKING system app.

### Notes:

For additional information on the THERMOMARK LINE printers, please refer to the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products) or main catalog 5.

#### Easy ordering process via CLIP PROJECT and e-mail

You can create customer-specific marking quickly and easily via CLIP PROJECT and order via e-mail.

#### New: color-printed marking solutions

You can use marking materials in UniCard and UniSheet format as well as metal labels for color printing.

#### We mark marking materials according to your requirements

All materials which can be marked according to customer requirements are indicated with this symbol.

## CLIP PROJECT advanced and professional

### CLIP PROJECT advanced

The CLIP PROJECT advanced program enables the quick planning and configuration of terminal strips for the control cabinet and field as well as custom-marking of terminal blocks, cables, and lines, plus devices and systems:

- The automatic correction function performs a logical test of the terminal strips and automatically adds the necessary accessories such as covers and end brackets
- The terminal strip configurator enables the distributed arrangement of individual terminal strips on different DIN rails
- 3D preview and complete documentation of the assembled DIN rails, such as order and mounting lists
- Numerous sorting and filter functions for efficient management of your print jobs
- One software for all output devices: CLIP PROJECT controls all marking technologies from Phoenix Contact, from the BLUEMARK CLED high-speed printer, the THERMOMARK LINE thermal transfer printer, and the plotter to the TOPMARK LASER desktop laser marker
- Continual extension of the output devices and marking materials via updates
- Automatic Internet update
- Intuitive Windows® user interface
- CLIP PROJECT supports all marking materials from Phoenix Contact, from V4A stainless steel and aluminum to plastics such as polyamide or polycarbonate or foils made of PVC or polyester. These are stored with preset parameters

### CLIP PROJECT professional

- The professional version also includes an efficient template designer, which can be used to design signs of your choice and to adapt existing material descriptions
- Graphics, various barcode types, and geometric elements such as squares, circles, and lines can be accessed for design work
- Data can also be imported into the templates from various data sources

**CRIMPHANDY** - portable hand-held machine. Stripping and crimping in just one step.

Simply insert the conductor, ...

... stripping and crimping is carried out automatically, ...

... and you're done.

Easy operation thanks to the automatic stripping and crimping function. One tool for both work steps, resulting in time savings of approx. 75%. The device signals the operating states clearly by means of colored LEDs.

Automatic cross-section monitoring prevents faulty crimping as a result of incorrect cross sections. The device displays a corresponding message.

The efficiency is particularly evident when used in combination with the push-in connection terminal block PT: conductors are processed and contacted in no time at all.

Integrated magazine for ferrules in strip form. The automatic feed enables conductors to be crimped one after another.

Easy to remove collecting chamber for discarded insulation. This guarantees a clean working environment. At around just 430 grams, the device can also easily be used inside the control cabinet.

Integrated lithium-ion polymer rechargeable battery for up to 2000 crimps. The fast charger provided charges the battery, which is easy to replace, in just 60 minutes.

## Tools - TOOL fox

### CRIMPHANDY, portable hand-held machine, for a 1.0 to 1.5 mm<sup>2</sup> conductor cross section

The product innovation for switchgear manufacturing – the CRIMPHANDY. With this portable hand-held machine, you can strip and crimp your conductors in under two seconds – 75% less time than before.

- The matching reel ferrules are suitable for use on all modular terminal blocks, particularly those from the CLIPLINE complete system:
- UT screw connection terminal blocks
- ST spring-cage connection terminal blocks
- PT push-in connection terminal blocks
- COMBI plug-in connection solutions

#### Notes:

An application video can be found in the download area for the relevant product on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).

## Tools - TOOL fox

### CUS tool sets, equipped with tools according to customer requirements

You can put together your own CUS tool set according to your individual requirements

- Six different bags are available, designed for typical applications
- Easily select your tools at [phoenixcontact.net/products](http://phoenixcontact.net/products)

#### Notes:

The CUS tool sets can be put together according to your requirements in the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).

#### TOOLS FOR YOU

Tool case, lockable, with straps

#### Ordering data

Tools - TOOL fox

CRIMPFOX pliers, laser marked according to customer specifications

- Customize your crimping tool!
- You can now use robust laser engraving to mark CRIMPFOX pliers
- Individual laser marking prevents your tools from being mixed up

**Notes:**  
Matching accessories can be found in main catalog 5 or the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).  
<sup>1)</sup> Tools with customer-specific laser marking can be ordered quickly and easily in the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).

- The advantages of our CRIMPFOX tools:
- Consistently high crimping quality
  - Unlockable pressure lock
  - Marked die stations for precise processing of the relevant cross sections
  - Easy work thanks to improved force transfer
  - Ergonomically designed, non-slip handles
  - CRIMPFOX 6S-F CUS: the self-adjusting die automatically adapts to the connector size

## Tools - TOOL fox

### CRIMPFOX and WIREFOX pliers, laser marked according to customer specifications

- Customize your crimping and stripping tool!
- You can now use robust laser engraving to mark CRIMPFOX and WIREFOX pliers
- Individual laser marking prevents your tools from being mixed up

**Notes:**  
Matching accessories can be found in main catalog 5 or the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).  
1) Tools with customer-specific laser marking can be ordered quickly and easily in the product area on our website at [phoenixcontact.net/products](http://phoenixcontact.net/products).

- The advantages of our WIREFOX tools:
- The special spring mechanism helps you to work precisely and safely
  - Ergonomically designed, non-slip handles
  - The WIREFOX pliers automatically adjust to different insulations and conductor diameters
  - Highly adjustable limit stop for the stripping length
  - Practical integrated wire cutter
  - Easily replaceable blade cassettes for different cross sections and insulation

#### **VAL-MS-AR – surge protection for the American railway industry**

The VAL-MS-AR surge protective devices offer reliable, touch-proof protection while also providing a connection block for railway and signaling systems.

The VAL-MS BE-AR... base element has been designed so that the field input and house output connections are on the same side. The ground connection is on the opposite side. The integrated isolator allows you to easily carry out field diagnostics and insulation measurements.

VAL-MS-AR... complies with the practices recommended by AREMA C&S. In contrast to conventional installation with bolts and nuts, the alternative connection technology with base elements and plugs considerably reduces the effort required for installation, tests, and repair measures.

In addition to the standard products, VAL-MS-AR... /FM feature a remote monitoring function. This means that immediate failure or the removal of a protective plug can be signaled via floating contacts.

#### **Features:**

- Easy to replace, plug-in surge protection
- Protects systems against direct lightning strikes and coupled surge voltages
- Mechanical status indicator on each protective plug
- Optional remote signaling via floating PDTs
- Integrated isolator for insulation measurements and field diagnostics
- Screw terminal blocks for copper wire up to 4 AWG (25 mm<sup>2</sup>), solid, stranded, stripped or with sleeves
- Convenient marking options

### Field and house connection

Independent terminal points for field and house connection enable wiring from the field side and signal lines with one conductor each. The terminal points are designed for typical wire gauges for railway applications:

House: 20 - 6 AWG (0.5 – 15 mm<sup>2</sup>),

Field: 18 - 4 AWG (1.5 - 25 mm<sup>2</sup>).

### Disconnect and test point

Integrated isolator for carrying out diagnostics and insulation measurements without tampering with the installation. The disconnect knife remains connected to the field side for testing.

### Function monitoring

Each plug has an optical, mechanical status indicator. In the event of a fault, the status is changed via the thermal disconnect device. In the VAL-MS-AR.../FM versions, a floating PDT is thereby switched, so that the status can be remotely indicated.

### Protective plug, free of leakage current

VAL-MS...VF... plugs have a series connection consisting of a varistor and a spark gap. The advantage of this component combination is that no leakage currents flow in the passive state and therefore signals are not impaired.

### Lightning current plugs with latching

The "T1/T2" plugs are robust enough to cope with direct lightning current. They are heavier than standard plugs and are equipped with latching to keep them in place in the event of vibrations, shocks, and magnetic influences.

### Ground and bridging options

The base elements can be easily bridged together with low impedance using pre-assembled MPB bridges. The terminal points for the ground connection accommodate conductors up to 2 AWG (35 mm<sup>2</sup>).

# Surge protection and power supplies

## Surge protection and interference filters

### VAL-MS-AR surge protection with multifunctional base element

- Base element with isolator for easy field diagnostics and carrying out insulation measurements
- Independent inputs and outputs on one side of the base element, ground connection on the opposite side
- Optical, mechanical status indication for the individual arresters
- Disconnect device on each individual plug
- With or without floating remote indication contact
- Terminal block cases capable of bearing high-current, for solid or stranded conductors that are stripped or with sleeves

Type 1/2 lightning arrester SPD

Type 2 hybrid SPD

Total width 17.7 mm

Total width 17.7 mm

## Lightning and surge arresters for 48 V DC applications

- Suitable for the protection of remote radio heads in telecommunications systems
- Extremely low voltage protection level  $U_p$  of < 400 V
- Consistent plug-in arresters, type 1/2
- Secure hold of plugs in the event of high lightning current loads and strong vibrations thanks to latching
- Thermal disconnect device for each individual plug
- Optical, mechanical status indication for the individual arresters
- Mechanical coding of all slots
- With or without floating remote indication contact
- Plugs can be checked with CHECKMASTER

Type 1/2 arrester for 48 V DC applications

Total width 35.6 mm

### Electrical data

IEC test classification/EN type  
Nominal voltage  $U_N$   
Maximum continuous operating voltage  $U_C$   
Impulse discharge curr.  $I_{imp}$  (10/350)  $\mu$ s

Peak value 12.5 kA  
Charge 6.25 As  
Specific energy 39.00 kJ/ $\Omega$

Nominal discharge current  $I_n$  (8/20)  $\mu$ s  
Max. discharge current  $I_{max}$  (8/20)  $\mu$ s  
Voltage protection level  $U_p$   
Backup fuse max. in acc. with IEC

VAL-SQ NP... provides modular surge protection for an entire house or a small company. The surge protective device consists of a base element and plug. It has the same base area as two standard 1 inch wide circuit breakers to enable installation in the corresponding distributor boxes. Initial installation must be performed by an electrically skilled person. If necessary, the surge protection plug can be replaced by the house owner.

The status indicator on the plug indicates the state of the surge protection. If the protection fails, the VAL-SQ NP... ST protective plug can be replaced quickly and easily. Up to now, components in all other products of this type had to be replaced by an electrically skilled person in the event of a fault.

The high-performance protective circuit features a discharge capacity of 32 kA per phase. The individual protective paths are protected thermally as well as against overcurrent.

The VAL-SQ NP... is suitable for single-phase 120/240 V applications with common neutral conductor and ground.

### Distributor box compatibility

VAL-SQ NP can be used in all distribution boxes for single-phase 120/240 AC SN systems with 1 inch pitch.

VAL-SQ NP... devices are compatible with the following distributor boxes:

#### Eaton

- BR series (prefix 1BR or B) distributor boxes

#### Siemens Industry, Inc.

- PL series (prefix P, PW or G)
- ES series (prefix S, SW or G)
- EQ series (prefix E or W)

#### General Electric Co.

- Powermark Gold series (prefix TL, TM or TP)

#### Schneider Electric USA Inc./ Square D Co.

- Homeline series (prefix HOM)

### Surge protection for distributor boxes in houses and small businesses

- Installs in NEMA-style distributor boxes with 1-inch pitch
- Uses the same footprint as two standard 1-inch pitch circuit breakers
- Suitable for single-phase 120/240 V AC systems
- 32 kA surge current capacity per phase
- 10 kA (UL) nominal surge discharge current ( $I_N$ )
- LEDs provide continuous feedback on the status of each phase
- UL 1449 3<sup>rd</sup> edition

#### Notes:

The products are offered exclusively for export outside the European Economic Area (EEA).

SPD for distributor boxes with 1-inch pitch

### PLUGTRAB PT-IQ

- Surge protection system
- Multi-level state monitoring
- Collective message about supply and remote module
- Multi-level, floating remote signaling
- System supplied via DIN rail bus
- Up to 28 protection modules per supply module
- Maximum ease of maintenance, thanks to the two-piece design
- Plugs are coded
- Impedance-neutral disconnection of plug for maintenance purposes
- Base element remains an integral part of the installation

# Surge protection and power supplies

## Surge protection and interference filters

### PLUGTRAB PT-IQ EX

#### With screw connection

- Tailored to the special requirements of intrinsically safe circuits
- Surge protection system
- Multi-level state monitoring
- Collective message about supply and remote module
- Multi-level, floating remote signaling
- System supplied via DIN rail bus
- Up to 10 protection modules per supply module
- Maximum ease of maintenance, thanks to the two-piece design
- Plugs are coded
- Impedance-neutral disconnection of plug for maintenance purposes
- Base element remains an integral part of the installation

Double conductor (loop), floating, 9/10 connection grounded directly

2 double conductors (loops), floating, 9/10 connection grounded directly

Total width 17.7 mm

ZB 6, see Catalog 6, page 111

Surge protection for SHDSL telecommunications interfaces

- Protection for two SHDSL ports
- Connection: RJ45 (RJ12/RJ11) and plug-in screw terminal block (COMBICON)
- Alternatively, can be snapped onto a DIN rail
- Protective circuit:
  - Course/fine protection combination between all cables of signal wire pairs, as well as common mode voltage coarse protection between all signal wires and ground
- Separate ground connection line
- The adapter included enables conversion from RJ45 to RJ11 and RJ12 (for contacting, see circuit diagram)

Attachment plug for two SHDSL interfaces (ports)

## QUINT POWER power supplies - with maximum functionality

- AC and DC input in a single device
- Specially designed for connection to two outer conductors of a three-phase system and to a DC intermediate circuit voltage of an inverter; typical applications include injection molding machines.
- Starts up with two-phase AC voltage or DC voltage. In the event of a mains failure connected 24 V loads continue to be supplied using the kinetic energy of the motor. In this way, the motor acts as a generator and supplies energy to the intermediate circuits as long as it is moving.
- Fast tripping of standard circuit breakers with dynamic power reserve SFB (selective fuse breaking) technology with up to 6 times the nominal current for 20 ms
- Reliably start difficult loads with the static POWER BOOST power reserve
- Preventive function monitoring warns against critical operating states before errors occur.

**Power supply with two separate input circuits for frequency inverters**  
2 AC, 1 DC/24 V DC, 20 A

### Technical data

#### Input data of AC

Nominal input voltage range  
Input voltage range AC  
Frequency range  
Current consumption (nominal load)  
Inrush current limitation at 25°C (typ.) / I<sup>2</sup>t  
Mains buffering (I<sub>N</sub>, typ.)

2x 400 V AC ... 500 V AC  
2x 360 V AC ... 575 V AC  
45 Hz ... 65 Hz  
2.5 A (400 V AC)/2.1 A (500 V AC)  
< 85 A/s < 1.5 A<sup>2</sup>s  
> 20 ms (400 V AC)

#### Input data of DC

Nominal input voltage range  
Input voltage range DC  
Max. current consumption

600 V DC  
450 V DC ... 840 V DC  
approx. 0.9 A (600 V DC)

#### Output data

Nominal output voltage  
Setting range of the output voltage

24 V DC ±1%  
18 V DC ... 29.5 V DC (U<sub>IN</sub> ≥ 360 V AC/480 V DC)  
18 V DC ... 26 V DC (< 480 V DC)  
20 A/26 A/120 A

Output current/POWER BOOST/SFB (20 ms)  
Magnetic fuse tripping  
Can be connected in parallel/series  
Max. power dissipation (no load/nominal load)  
Efficiency (typ.)  
Residual ripple

-  
Yes/Yes  
11 W/51 W  
> 92% (600 V DC)  
< 50 mV<sub>PP</sub>

#### Signaling

Signaling DC OK  
Boost signaling

LED, relay contact  
LED, active switching output

#### General data

Weight/dimensions W x H x D  
Spacing when mounting

2 kg/120 x 130 x 125 mm  
Alignable: 5 mm horizontally, 15 mm next to active components,  
50 mm vertically  
Screw connection  
0.2 - 6 mm<sup>2</sup>/0.2 - 4 mm<sup>2</sup>/24 - 10  
0.2 - 6 mm<sup>2</sup>/0.2 - 4 mm<sup>2</sup>/12 - 10  
0.2 - 6 mm<sup>2</sup>/0.2 - 4 mm<sup>2</sup>/24 - 10  
IP20/I  
> 500000 h  
-25°C ... 70°C (> 60°C derating)

#### Connection method

Input connection data (solid/stranded/AWG)  
Output connection data (solid/stranded/AWG)  
Signal connection data (solid/stranded/AWG)  
Degree of protection/protection class  
MTBF (EN 29500, 40°C)  
Ambient temperature (operation)

2 kV AC (routine test)/1.5 kV AC (type test)

#### Standards/regulations

Insulation voltage input/output

Conformance with EMC Directive 2004/108/EC  
EN 60950-1/VDE 0805 (SELV)  
EN 50178/VDE 0160 (PELV)  
DIN VDE 0100-410  
UL applied for

#### Electromagnetic compatibility

Electrical safety  
Electronic equipm. for electrical power installations  
Safe isolation  
UL approvals

### Ordering data

#### Description

DC-DC converter, primary switched mode

# Surge protection and power supplies

## Power supplies and UPS

### UNO POWER power supplies - with basic functionality

- Save energy, thanks to particularly low idling losses and a high degree of efficiency
- Save space in the control cabinet through compact housing with high power density
- Robust and reliable at temperatures from -25 to 70°C

Power supply,  
1 AC, 5 DC, 25 W

Power supply,  
1 AC, 5 DC, 40 W

# Surge protection and power supplies

## Power supplies and UPS

### UNO POWER power supplies - with basic functionality

- Save energy, thanks to particularly low idling losses and a high degree of efficiency
- Save space in the control cabinet through compact housing with high power density
- Robust and reliable at temperatures from -25 to 70°C

Power supply,  
1 AC, 15 DC, 100 W

Power supply,  
1 AC, 24 DC, 90 W  
NEC Class 2

### Easier than ever but slim as before

The new highly compact MINI Analog Pro signal conditioners offer the easiest installation and startup in a confined space.

Easily accessible terminal points, current measurement during operation, and the unique FASTCON Pro plug-in connection technology make your work considerably easier.

### Choose the right MINI Analog signal conditioner for your application:

#### Analog IN/OUT

- Universal and standard 3-way signal conditioners
- 3-way repeater power supplies

#### Temperature

- Universal measuring transducers for resistance thermometers and thermocouples

#### Universal potiposition transducer

- Potiposition transducers with automatic potentiometer detection

#### Accessories

- Supply components
- Fault monitoring module
- Marking material
- Surge protection, see Catalog 6

### Easy installation in a confined space

- Thanks to the front orientation, all terminal points are easily visible and accessible at all times – this not only saves time, but also space above and below devices
- All conductors can be fed individually and in any order, regardless of whether you start wiring from the input or output side
- The FASTCON Pro connection terminal blocks can be inserted and removed in any order

### Measure current signals during operation

You can conveniently measure signals for startup and servicing during operation, thanks to integrated test disconnect terminal blocks:

- The circuit does not have to be separated in order to integrate the measuring device in the signal circuit
- By setting the plug to the disconnect position, signal circuits can be easily interrupted during servicing and startup

### Numerous parameterization options

#### Easy DIP switch configuration

Many of the MINI Analog modules can be configured: the basic functions can be easily set using DIP switches – without the need for any software.

#### PC configuration for extended function and monitoring

For extended functionality, you can configure the modules conveniently with the S port interface on your PC using one of the free software solutions.

#### Smart configuration without accessories

Place your smartphone on the device and establish a wireless connection via near field communication (NFC). Depending on the device type, the free MINI Analog Pro app offers different functions.

#### App functions via NFC communication

**Access to information**  
– Access module information

**DIP switch setting help**  
– Access module information  
– Display DIP switch setting help on the smartphone

**Configuration via NFC**  
– Access module information  
– Display DIP switch setting help  
– Wireless configuration via smartphone

### Space savings of up to 65%

- Compared to other signal conditioners on the market with design widths up to 17.5 mm.

### Easy installation

- Easily visible and accessible terminal points and FASTCON Pro plug-in connection terminal blocks.

### Power bridging and fault monitoring

- The DIN rail connector simplifies supply and enables group error monitoring via remote diagnostics.

### Easy to start up and control

- Measure current signals during operation, without disconnecting current loops, plus optional disconnect function.

### Numerous parameterization options

- Easy configuration via DIP switches as well as extended configuration via software or smartphone app without additional accessories.

### Easy maintenance

- Large-surface marking areas for complete loop identification using standard marking material as well as constantly visible status LEDs in every module.

### Choice of connection technology

- Wiring with screw connection or fast and tool-free push-in technology.

### Optimum signal quality

- The latest transmission technology and safe electrical isolation between input, output, and supply with 3 kV test voltage.

### Suitable for any application

- Extended supply voltage and temperature range as well as multifunctional device types.

## Analog IN / Analog OUT 3-way signal conditioner

**Configurable,  
Up to 144 signal combinations**

Ex: **Ex**

Housing width 6.2 mm

- Configurable, ultra-compact signal conditioner for electrical isolation, conversion, amplification, and filtering of standard analog signals
- Plug-in connection system
- Safe 3-way isolation
- Standard signal combinations configurable via DIP switches
- Power supply and fault monitoring possible via DIN rail connector
- Status LED

## Analog IN / Analog OUT 3-way signal conditioner

With fixed signal combinations

- Highly compact signal conditioner for electrical isolation, conversion, amplification, and filtering of standard analog signals
- Fixed signal combinations
- Plug-in connection system
- Safe 3-way isolation
- Power supply and fault monitoring possible via DIN rail connector
- Status LED

## Analog IN / Analog OUT repeater power supplies

Repeater power supply  
with HART transmission

- Highly-compact repeater power supply for electrical isolation, conversion, amplification, and filtering of standard analog signals
- Supply of 2-wire and passive 3-wire sensors
- Can also be used as an isolator without supply
- Plug-in connection system
- Safe 3-way isolation
- Bidirectional HART transmission as an option
- Power supply and fault monitoring possible via DIN rail connector
- Status LED

## Temperature

Temperature transducers  
for resistance thermometersUniversal measuring transducer  
for resistance thermometers

- Universally configurable, highly compact temperature transducer for electrical isolation, conversion, amplification, and filtering of resistance thermometer and remote resistance-type sensor signals
- For 2, 3 or 4-wire sensors according to IEC 751, JIS, GOST
- Plug-in connection system
- Safe 3-way isolation
- Standard signal combinations configurable via DIP switches
- Freely configurable via software or smartphone app
- Power supply and fault monitoring possible via DIN rail connector
- Status and error indicator LEDs

- Universally configurable, highly compact temperature transducer for electrical isolation, conversion, amplification, and filtering of thermocouple signals
- For thermocouples according to IEC 584 and GOST
- Internal cold junction compensation
- Plug-in connection system
- Safe 3-way isolation
- Standard signal combinations configurable via DIP switches
- Freely configurable via software or smartphone app
- Power supply and fault monitoring possible via DIN rail connector
- Status and error indicator LEDs

## Input data

### Potentiometers, potiposition transducers

**Configurable, automatic potentiometer detection**

- Universally configurable, highly compact potiposition transducer for electrical isolation, conversion, amplification, and filtering of potentiometer signals
- For potentiometers from 100 Ω to 100 kΩ
- Automatic potentiometer detection without manual adjustment
- Plug-in connection system
- Safe 3-way isolation
- Standard signal combinations configurable via DIP switches
- Freely configurable via software or smartphone app
- Power supply and fault monitoring possible via DIN rail connector
- Status and error indicator LEDs

### Accessories

#### ME 6,2 TBUS... DIN rail connector

- For bridging the supply voltage
- Reduces wiring costs
- Module replacement without interrupting the supply to the remaining modules (hot swappable)
- One DIN rail connector for two MINI Analog modules
- Only distinguished by color coding

For bridging the supply voltage

For bridging the supply voltage

#### Description

**DIN rail connector (TBUS)**, for bridging the supply voltage, can be snapped onto 35 mm DIN rails as per EN 60715, with UL approval

Color: green  
Color: gray

### Accessories

#### Power terminal blocks

- Power terminal block for supplying the supply voltage to the DIN rail connector
- Plug-in connection system
- Increased output current of 3.2 A
- Monitoring of supplies in combination with the fault monitoring module
- Flexible redundant supply from one or both module sides
- Status and error indicator LEDs

Redundant supply for existing 24 V

## Accessories

## ME 17,5 TBUS-... DIN rail connector

- For bridging the supply voltage when using a MINI POWER system power supply

## Notes:

If the system power supply is used, two ME 17,5 TBUS DIN rail connectors are required. This allows you to establish the connection to the ME 6,2 TBUS DIN rail connector of the MINI Analog system and provide an effective power supply.

For system power supply

## Description

**DIN rail connector**, for bridging the supply voltage, can be snapped onto 35 mm DIN rails as per EN 60715, with UL approval, two pieces are required per system power supply

## Ordering data

| Type                           | Order No. | Pcs. / Pkt. |
|--------------------------------|-----------|-------------|
| ME 17,5 TBUS 1,5/ 5-ST-3,81 GN | 2709561   | 10          |

## Accessories

## System power supply

- For supplying the supply voltage via the DIN rail connector where AC voltages are available
- 100 ... 240 V AC nominal input voltage range
- 24 V DC output voltage
- For up to 60 MINI Analog modules
- For up to 1.5 A, secondary
- Status and error signaling via diagnostic LEDs

For applications with local voltages of over 100 V

## Description

**System power supply**, primary-switched, with zone 2 approval. Further information can be found in Catalog 6, Surge protection and power supplies.

**System power supply**, primary-switched (not for zone 2!) Further information can be found in Catalog 6, Surge protection and power supplies.

### Accessories

#### Error message modules

- Fault monitoring module for evaluating and reporting group errors from the fault monitoring system
- Monitoring of up to 115 connected MINI Analog Pro modules
- Plug-in connection system
- Monitoring of supply voltages of MINI MCR-2-PTB(-PT) power terminal blocks
- Drawing off the supply is possible
- Fault signaling via an N/C contact
- Status and error indicator LEDs

Group error message and supply monitoring

## Accessories

## Programming adapter

IFS-USB-PROG-ADAPTER programming adapter for configuring Phoenix Contact INTERFACE modules with S-PORT interface.

The adapter is used with FDT/DTM software or ANALOG-CONF software. For programming MACX Analog and MINI Analog.

## General data

EMC note

## Description

**Programming adapter** for configuring modules with S-PORT interface

## Technical data

Class A product, see page 443

## Accessories

## Marking label for transparent cover

- Snap-in labels and adhesive labels with large-area for marking
- For snapping into or sticking onto MINI Analog Pro covers, without overlapping the status and error LEDs
- The sheets can be marked quickly and easily using the BLUEMARK CLED and the THERMOMARK CARD...
- They can also be custom printed according to customer requirements

### Integrate analog signals safely

Integrate analog signals easily into your safety application according to the Machinery Directive. The MACX Safety analog signal conditioners are certified according to EN ISO 13849-1 with performance level PL d.

### Ex i signals

MACX Safety Ex enables the easy and safe processing of intrinsically safe analog signals according to the Machinery Directive.

### Cost savings

- Direct safe shutdown without an additional safety controller or in conjunction with a small-scale controller from Phoenix Contact offers a clear cost advantage
- Further cost savings can be made thanks to easy configuration and easy integration in the safety chain
- Versions with push-in technology save installation time

### Choose the right MACX Safety signal conditioner for your application:

#### Analog IN

- 4...20 mA repeater power supplies and input signal conditioners with 2 electrically isolated outputs

#### Temperature

- Universal temperature transducers for resistance thermometers, resistance-type sensors, potentiometers, thermocouples, and mV sources – with safe limit value relay

### Functional safety – from the initial idea to the finished product

Phoenix Contact meets the requirements of functional safety according to IEC 61508 in a standardized development process. Here, all fault avoidance and fault control measures are taken into consideration, from the very development and production of a device right up to device operation. The devices are examined by an independent test center.

### DIN rail connector-compatible

The DIN rail connector enables the modular bridging of the 24 V supply voltage.

### Wide range supply

The modules featuring a wide range supply (...-UP) can be used in all power supply networks the world over without the need for additional power supply units.

### Safe and reliable functions

- Consistent PL d and SIL certification. This ensures the highest level of reliability and safety for your systems.

### Precise transmission and high operational reliability

- Thanks to patented transmission concept
- Safe electrical isolation.

### Easy integration with Sistema

- Easy integration into the safety chain via Sistema. The required data is already stored in Sistema.

### Easy configuration and monitoring

- Easy configuration and monitoring with the ANALOG-CONF stand-alone software with integrated monitoring function or with FDT/DTM.

### Easy to combine

- Analog signals, whether passive or active, can be easily combined with other safety modules.

### Easy-maintenance connection technology

- Plug-in connection terminal blocks with screw connection or fast push-in technology – coded, with integrated sockets.

### Precise transmission, long service life

- Patented circuit concepts ensure precise signal transmission and minimal self-heating.

### Even for the Ex area

- Maximum explosion protection for all Ex zones with the MACX Safety Ex range as associated intrinsically safe equipment and for installation in zone 2.

### Direct safety shutdown

- Simple and direct shutdown for small applications is possible without an expensive safety controller or in conjunction with a small-scale controller.

## Analog IN

## Repeater power supplies

**Repeater power supply and input signal conditioner, with two electrically isolated outputs**

Housing width 12.5 mm

## Technical data

- 4...20 mA input, powered and not powered
- Two electrically isolated 4...20 mA (active) outputs
- PL d according to EN ISO 13849-1
- Up to SIL 2 according to EN 61508
- Installation in zone 2 possible
- Plug-in screw and push-in connection technology
- 4-way electrical isolation
- Bidirectional HART communication possible
- Power supply via DIN rail connector possible

**Repeater power supply and input signal conditioner, with two electrically isolated outputs**

Housing width 12.5 mm

#### Technical data

- 4...20 mA input, [Ex ia], powered and not powered
- Two electrically isolated 4...20 mA (active) outputs
- PL d according to EN ISO 13849-1
- Up to SIL 2 according to EN 61508
- Installation in zone 2 possible
- Plug-in screw and push-in connection technology
- 4-way electrical isolation
- Bidirectional HART communication possible
- Power supply via DIN rail connector possible

#### Input data

Input signal  
Transmitter supply voltage  
Voltage drop

#### Output data

Output signal (per output)  
Load  
Output ripple

#### General data

Supply voltage range  
Current consumption  
Power dissipation  
Temperature coefficient  
Step response (10-90%)  
Transmission error, typical  
Maximum transmission error  
Under-/overload range  
Electrical isolation

#### Input/output/power supply

Input/output  
Input/power supply  
Output 1/output 2

Ambient temperature range  
Status indication  
SMART communication (per output)  
Protocols supported  
Housing material  
Dimensions W/H/D  
Screw connection solid/stranded/AWG  
Spring-cage connection (solid/stranded/AWG)  
EMC note

#### Safety data as per ATEX

Max. output voltage  $U_o$   
Max. output current  $I_o$   
Max. output power  $P_o$   
Maximum voltage  $U_m$

## Temperature

## Temperature transducer, Ex i

Universal, with limit value relays,  
wide range power supply

Housing width 35 mm

## Technical data

- Input for resistance thermometers, thermocouples, resistance-type sensors, potentiometers, mV sources, [Ex ia]
- Differential measurement possible with Pt 100
- A safety-related limit value relay, by bridging two relays
- An additional limit value relay for non-safety-related function
- PL d according to EN ISO 13849-1
- Up to SIL 2 according to EN 61508
- Configuration via software (ANALOG-CONF or FDT/DTM)
- Cold junction compensation with separate plug
- Wide range power supply 19.2 ... 253 V AC/DC
- Status indicators for supply voltage, cable, sensor, and module errors
- Installation in zone 2 possible
- Plug-in screw and push-in connection technology

## Description

Temperature transducer with threshold value switch, with performance level, intrinsically safe input

Screw connection  
Spring-cage connection

Programming adapter for configuring modules with S-PORT interface

Plug with 50  $\Omega$  resistor, for current signals between +20 mA and -20 mA

## Configuration software ANALOG-CONF and FDT/DTM

Input configuration with indication of the pin assignment

Relay configuration

### ANALOG-CONF

The user-friendly ANALOG-CONF software allows you to quickly and clearly configure the temperature modules. The pin assignment for the input and output is directly displayed. You have access to the complete range of configurable parameters. You have the option to pre-configure parameters and then import them into any number of temperature transducers or read the data from the device and directly display the settings and measured values.

### FDT/DTM

Configuration is also possible via the FDT/DTM universal configuration tool. The DTM files can simply be downloaded in the download area for the item.

### The following parameters can be configured:

- Restart following failsafe

#### Input:

- Resistance thermometer
- Thermocouples
- Potentiometer
- Remote resistance-type sensor
- Voltage signals  $\pm 1$  V
- User characteristic curve
- Additional analog signals
- Filter
- Cold junction

#### Analog output:

- Type of fault signaling

#### Switching outputs:

- Acknowledgement, switching behavior
- Switch-on/off delay

#### Monitoring:

- Representation in diagram or value list, recording possible

#### Service:

- Reset, password protection, display DIP switch position
- and much more

Monitoring function

Configuration with FDT/DTM

### Software for acquisition of usage data

The EMwise software from Phoenix Contact is the efficient solution for acquiring energy data regarding heat, cold, air or electricity in conjunction with a small-scale controller.

Integrate up to 24 digital inputs, 8 analog channels, 50 EMpro energy meters, 30 M-bus counters, and 4 IO-Link measuring sensors.

A web-based interface is available for system parameterization. Each device/channel can be configured individually, without any programming knowledge. The configuration is saved to a file and can be reused for identical systems.

Your advantages:

- Startup without programming knowledge
- Direct parameterization of predefined sensors

Three software versions, suitable for every application:

- EMWISE IMPULS: for up to 16 digital signals
- EMWISE IMP ANALOG: for up to 16 digital and 6 analog signals
- EMWISE EXTENDED: for up to 24 digital and 8 analog signals, EMpro energy meters, M-bus counters, M-bus level converters, IO-Link sensors

## Software for data logging

Turn your controller into a data logger. The SD FLASH 512MB ILDL FLEX memory card from Phoenix Contact provides all the software needed to extend your PLC for use as a data logger. The software contains the familiar application from the FLEX data logger kit.

In conjunction with the ILC 151 GSM/GPRS small-scale controller, 3 digital and 4 analog input or output terminal blocks can be mounted. The mounted terminals are automatically detected and started up by the controller. Different PCP channels can also be selected during parameterization.

Your advantages:

- Send digital and analog status information via SMS or e-mail or write it to an SQL database
- Startup without programming knowledge

**Pressure sensor with IO-Link**

Pressure sensors from Phoenix Contact detect the operating pressure of gas media in a range from -1 to 10 bar. The overload-proof ceramic measuring cell is designed for in excess of 100 million cycles and enables a high switching point accuracy. The pressure switch offers the option of using the set switching points via two switching outputs or reading all process data via the IO-Link interface.

Your advantages:

- IO-Link communication
- Parameterization, diagnostics, and process value monitoring via IO-Link
- Programmable function
- 4-character alphanumeric display

 **IO-Link**

## Current transformers for retrofitting PACT RCP

### Fast installation in a confined space

PACT current transformers for retrofitting can be conveniently mounted where there is not enough space for split core current transformers. System downtimes are reduced as system parts do not have to be removed for installation.

Simply place the handy Rogowski coil quickly around power rails and circular conductors. The measuring transducer connected downstream supplies the same typical secondary currents as a standard current transformer.

### Your advantages:

- High system availability due to reduced downtimes: fast installation without removing system parts
- Transform alternating currents up to 4000 A using a single measuring system
- Space saving and handy, as the current strength does not affect the size and weight of the coil
- Safe installation and operation: no dangerous open circuit voltages
- Harmonics and transients detected with phase accuracy with a large frequency spectrum from 10 to 5000 Hz
- Rogowski coil secured on power rails and circular conductors thanks to professional holding device

### Fast installation without removing system parts

**Eight different current measuring ranges from 100 to 4000 A**

**Detect harmonics and transients with a large frequency spectrum from 10 to 5000 Hz**

### Professional holding device for power rails

## Current transformers for retrofitting PACT RCP

- Practical handling due to the flexible measuring coil for opening
- Universal application possibilities through 8 different current measuring ranges in one device: (0 ... 100/ ... / ... /4,000 A)
- The large bandwidth (10 ... 5,000 Hz) enables harmonics and transients to be detected
- It is not possible for dangerous open circuit voltages to occur
- The bracket ensures optimum alignment of the measuring coil to the power rail
- Low space requirement in the control cabinet

Current transformer for subsequent installation in the field

### Extremely compact control

The PLC logic programmable logic relay system is the extremely compact way to carry out small automation tasks easily and flexibly. It consists of the PLC-V8C logic modules, the PLC-INTERFACE relay system, and the LOGIC+ software. The logic modules are simply plugged into a row of eight PLC-INTERFACE terminal blocks and combine the logic and interface level in one unit. Depending on the switching requirements, plug-in electromechanical and solid-state relays can be combined in order to flexibly switch and control the I/O signals.

PLC logic processes digital and analog input signals as well as logic functions and timer modules - and replaces conventional switching and control devices. Up to 16 I/O signals can be processed using the stand-alone logic modules - that's with a design width of just 50 mm. If more I/O signals are required, a maximum of 48 I/O signals can be linked using the basic and extension modules.

### Switching and controlling with plug-in relays

- PLC logic brings together the standard combination of logic module and separate plug-in relay and eliminates the wiring effort and additional switching elements
- Convenient connections with screw or push-in connection technology, which also accommodate return conductors, remove the need for separate potential terminal blocks
- Each relay channel can be freely configured as an input or output. PLC logic therefore perfectly adapts to fit the application at hand

### Intuitive programming

Programming is quick and easy with the intuitive LOGIC+ programming software. Ladder (LD) and function block diagrams (FBD) can be created by selecting the relevant functions and their connection using drag & drop. The graphical representation of PLC logic in the hardware editor supports intuitive operation. The programs created can be simulated offline on the PC and tested online during operation. Basic functions, such as AND, OR, NOT, etc. are complemented by special functions, such as counters, seven-day timers, timer modules, and mathematical functions, to name a few.

### Logic module with plug-in relays

PLC logic combines a logic module and plug-in relay and eliminates the wiring effort and additional switching elements. Each relay channel can be flexibly equipped with an electromechanical or a solid-state relay. PLC logic processes 16 I/O signals with just one logic module and boasts an extremely compact design width of just 50 mm.

### Intuitive programming with LOGIC+

- Function block diagram or ladder diagram
- Numerous integrated function blocks
- Specific function blocks are available to download
- Hardware view in the program
- Download free of charge at [www.phoenixcontact.com](http://www.phoenixcontact.com).

### Standard programming cable

PLC logic is connected to a PC via a standard micro USB cable. The drivers for PLC logic are automatically installed on connection by means of plug and play.

### Easily connect extension modules

The basic module and the extension module are connected via integrated connectors - no tools required. A maximum of two extension modules can be connected to a basic module. This means that PLC logic can work with up to 48 I/Os.

### Saving and copying data

PLC logic programs are saved by the memory block or can be easily copied to other devices.

If settings such as time or date are required on the new device, these values can be configured via the integrated web server. The new device does not need access to the LOGIC+ software for this.

### Integration into PROFIBUS DP

Adaptable fieldbus gateways, available as an option, can be used to integrate PLC logic into a PROFIBUS DP network. This enables communication with a higher-level controller for remote control, diagnostics, and visualization purposes.

DTM device drivers and GSD files for configuring the gateway can be downloaded free of charge at [www.phoenixcontact.com](http://www.phoenixcontact.com).

### Logic modules

PLC-V8C are the plug-in logic modules which form the PLC logic relay system in conjunction with the narrow 6.2 mm PLC-INTERFACE terminal blocks. Eight freely selectable PLC-INTERFACE terminal blocks must be separately ordered for each logic module. You can find an overview of matching PLC-INTERFACE terminal blocks on page 360.

All logic modules feature these properties:

- 8 integrated digital inputs (of which two inputs are configurable as analog inputs), connection via connector with screw or push-in connection technology
- A further 8 channels can be configured with matching PLC-INTERFACE terminal blocks as digital inputs or outputs
- Programming with the LOGIC+ software

#### PLC-V8C.../SAM

- Stand-alone logic module with 16 I/Os, not extendable
- Connection to PC via micro USB socket
- Integrated realtime clock (RTC)
- Accommodates external IFS-CONFSTICK memory block

#### PLC-V8C.../BM

- Basic logic module with 16 I/Os, can be extended with a maximum of two extension modules (PLC-V8C.../EM) to 48 I/Os
- Connection to PC via micro USB socket
- Integrated realtime clock (RTC)
- Accommodates external IFS-CONFSTICK memory block
- Optional connection to PROFIBUS-GATEWAY-IFS

#### PLC-V8C.../EM

- Extension logic module with 16 I/Os, for extending the basic module

Stand-alone module

### Accessories

#### Programming cable and memory block

- The programming cable (MICRO USB B to USB A) is used to connect PLC logic to a PC, length: 2 m
- PLC logic programs are saved by the memory block or can be easily copied to other devices

General data

EMC note

Description

Color

**Programming cable**

**Multi-functional memory block** for the INTERFACE system

- Flat design

### Accessories

#### Gateway to PROFIBUS DP

The gateways are connected to the PLC-V8C.../BM PLC logic basic modules via the ME 22,5 TBUS... DIN rail connector and the PLC-V8C/CAB... connecting cable.

The gateways are connected to a PC and configured via the integrated S-PORT interface and the IFS-USB-DATACABLE.

Accessories

PLC logic starter kit

The PLC logic starter kit contains all the components needed to get started quickly and easily with PLC logic with push-in connection technology and 8 inputs and 8 outputs.

- PLC-V8C-PT/24DC/BM plug-in logic module
- PLC-RPT-24DC/1/ACT eight relay output terminal blocks
- Micro USB programming cable
- Software LOGIC+
- “PLC logic quick start guide” poster

## LOGIC+ programming software

### Integrated web server

PLC logic basic settings are easily configured via the integrated web server. The LOGIC+ software does not need to be installed in order to do so.

- Time and date
- Password and access control
- Firmware update
- Status indicators for inputs and outputs
- General device information

### LOGIC+ user interface

- Clear separation in program editor, toolbox, hardware view, and signaling window
- All elements can be easily placed using drag & drop
- Notes and errors are highlighted in color in the program editor

### Hardware configurator

- Each relay channel can be configured as an input or output with an electromechanical or a solid-state relay
- Clear assignment of the inputs and outputs thanks to the graphical representation of the hardware connections

### Function blocks

- Basic functions: AND, OR, NOT, XOR
- Mathematical functions: add, divide, multiply, subtract, generate absolute value
- Positive and negative edge detection
- RS and SR flip-flops
- Switch-on and switch-off delay, pulse encoder, pulse stretching, weekly clock timer
- Up and down counter
- Analog and digital comparators
- Special functions, e.g., solar altitude calculations are available for download

### Simulation and online values

- Offline simulation:
  - Simulation of the created program directly in LOGIC+
  - Virtualization of the values in the program editor, hardware view, and in the observation window
- Online values:
  - Representation of the program running on the hardware in LOGIC+ with online values
  - Overwriting of values from LOGIC+

### Example programs

Numerous application examples make it easy to get started with LOGIC+. These include:

- Underground garage ventilation
- Conveyor belt
- Pumping plant
- Two-way control
- Tips for creating shift registers or surge relays

Fully mounted RIF-0 relay modules

- Fully mounted RIF-0 relay modules, consisting of:
- Relay base with push-in connection
  - Solid-state relays
  - Relay ejector lever on the housing

- The advantages:
- Status LED integrated into the base
  - RTIII sealed solid-state relay
  - Zero voltage switch at AC output
  - Professional bridging of adjacent modules saves wiring time

Max. DC voltage output of 3 A

Technical data

| Input data                                            |                                                                 |
|-------------------------------------------------------|-----------------------------------------------------------------|
| Rated actuating voltage range with reference to $U_C$ |                                                                 |
| Switching level (with reference to $U_C$ )            | 1 signal ("H")<br>0 signal ("L")                                |
| Rated actuating current $I_C$                         | [mA]                                                            |

### Fully mounted RIF-1 relay modules

Fully mounted RIF-1 relay modules, consisting of:

- Relay base with push-in connection
- 1 or 2 PDT relays with detectable manual operation
- Relay retaining bracket
- Input module/interference suppr. module (AC types only)

The advantages:

- Relay with lockable manual operation and status LED
- With DC types, free-wheeling diode is integrated into relay
- Mechanical switch position indicator
- Professional bridging of adjacent modules saves wiring time

**RIF-1 relay module with 1 PDT relay**

**DC coils**

**AC coils**

RIF-1 relay module with  
2 PDT relay

## RIF-1-RPT.../1X21... (1 PDT)

Operating voltage range

- ① DC coils  
② AC coils

Interrupting rating

- ① = AC, ohmic load  
② = DC, ohmic load

Contact derating

- ① DC coil  
② AC coil  
③ DC coil, jumper between 11 and 21  
④ AC coil, jumper between 11 and 21

Electrical service life

- ① = 250 V AC, ohmic load

## RIF-1-RPT.../2X21... (2 PDTs)

Operating voltage range

- ① DC coils  
② AC coils

Interrupting rating

- ① AC, ohmic load  
② DC, ohmic load, contacts in series  
③ DC, ohmic load

Contact derating

- ① DC coil  
② AC coil

Electrical service life

- ① 250 V AC, ohmic load

DC coils

AC coils

### PLC RELAY with an integrated solid-state relay

- 6.2 mm narrow solid-state relay for switching AC loads
- Status display
- Protection circuits in input and output
- Wear-free
- Switching capacity up to 230 V AC/2.4 A
- Screw and push-in connection technology

Solid-state power relay with AC voltage output of 2.4 A, max.

#### Technical data

### VIP - power cabling

#### Universal front adapters for SIMATIC® S7-300

##### Four connection options are available:

- Connection of 40-pos. modules via four cables, each with a 10-pos. COMBI connector
- Connection of 20-pos. modules via two cables, each with a 10-pos. COMBI connector
- Connection of 40-pos. modules via 40 individual wires in rope structure (not assembled)
- Connection of 20-pos. modules via 20 individual wires in rope structure (not assembled)

Front adapter with punched-on connectors for 40 plug-in modular terminal blocks

##### The front adapters have the following features:

- Can be screwed on/snapped in with the I/O module
- Suitable for all common S7-300 modules, up to max. 250 V AC/DC, 6 A
- Universal 1:1 connection
- Numerically marked wires/connectors

##### Combination example:

A front adapter with punched-on 10-pos. COMBI connectors can be combined with the following modular terminal blocks for field connection:

- 3045017 UT 2,5/1P
- 3210033 PT 2,5/1P
- 3040012 ST 2,5/1P
- 3040766 ST 2,5-TWIN-MT/1P

You can find further versions, accessories, and combination options in Catalog 3 “Modular terminal blocks” in the “Plug-in COMBI connection solutions” section, or online at [phoenixcontact.net/products](http://phoenixcontact.net/products).

### VIP output module

These VIP VARIOFACE output modules are used in combination with the respective front adapters. Like the front adapters, the modules are connected via 14-pos. system cables.

Features:

- Plug-in miniature relays, each with a PDT contact
- LED status display for each signal path and supply voltage
- Free-wheeling diode for each signal path
- Push-in connection

Output module with 8 miniature relays, 1 PDT and fuse per output circuit

## VIP input module

These VIP VARIOFACE input modules are used in combination with the respective front adapters. Like the front adapters, the modules are connected via 14-pos. system cables.

## Features:

- Plug-in miniature relays, each with an N/O contact
- LED status display for each signal path and supply voltage
- Free-wheeling diode for each signal path
- Push-in connection

Digital input module with 8 channels  
for 24 V DC

Digital input module with 8 channels  
for 120 V AC

Emerson DeltaV  
VIP controller board with fuses  
for 8 channels

System-specific interface module for use in combination with the respective system cables. The controller board is connected to 8-channel modules through 16-position "mass termination blocks" with flat ribbon cable connection.

- Features:
- Fuse per channel
  - Separate equipotential terminals per channel
  - Knife disconnection for each channel
  - Push-in connection

Interface module with fuses  
for 16-pos. mass termination block

VIP potential distributor with fuses

- The VIP-2/PT/PDM-2/16/FU 6.3A module has the following features:
- Two potential levels
  - P1 potential has 6.3 A fusing
  - Separate supply
  - Consecutive labeling
  - Push-in connection

Push-in connection and 2 potential levels

## Industrial Ethernet switches

## Power over Ethernet switch

## Gigabit switch

The FL SWITCH 1708 M12 POE offers a unique combination of a high degree of protection, gigabit transmission, and Power over Ethernet.

The IP67 switches can be installed in a distributed manner and enable connection of Power over Ethernet devices with gigabit transmission.

## Features:

- Connection via gigabit M12 plug CAT6A
- Flexible use of PoE devices thanks to powerful 30 W PoE ports (IEEE 802.3at)
- -40°C ... +70°C ambient temperature
- Gigabit support
- Jumbo frames with up to 9720 bytes
- Rugged metal housing
- IP67 protection
- Easy panel mounting

## Description

Gigabit Power-over-Ethernet switch

## Ethernet

8 ports (M12 socket),  
for wall mounting

## Technical data

8 (M12 socket)  
10/100/1000 Mbps  
M12 connector, 8-pos.

Store-and-forward switch, 10/100/1000 Mbps, auto negotiation, complies with standard IEEE 802.3, 4 priority classes according to IEEE 802.1p, PoE according to IEEE 802.3at/802.3af, jumbo frames up to 9720 bytes

3 status LEDs per Ethernet port: LINK, Activity, and PoE status. Supply voltage  $U_{S1}$  and  $U_{S2}$  (redundant supply voltage) as well as FAIL, PoE Power Status.

Network, linear, and star structure: any  
100 m

24 V DC (M12 connector)  
3.6 V<sub>PP</sub>  
18 V DC ... 32 V DC  
300 mA (at  $U_S = 24$  V DC)

| FL SWITCH 1708 M12 POE | 2701883   | 1           |

## Industrial Ethernet switches

## Managed switches

## Lean Managed Switch

Maximum possible diagnostics in the minimum amount of space. The compact Ethernet switch is optimized for PROFINET applications in standard machine production.

The switch supports the functions required by PROFINET Class A, such as PTCP filter and Quality of Service. In addition, the Lean Managed Switch features important management functions such as a broadcast limiter, port mirroring, as well as the non-proprietary redundancy protocol RSTP.

## Features:

- Compact housing
- PROFINET support
- RSTP
- PTCP filter
- Web-based management, SNMP
- Configuration can be stored externally
- Configurable alarm contact

## Ethernet

8 RJ45 ports

## Smart Managed Switches

The Smart Managed Narrow switch **FL SWITCH SMN 8TX-PN** is an Ethernet switch suitable for industrial applications with eight Fast Ethernet ports in RJ45 format. The switch is optimized for use in PROFINET RT and EtherNet/IP™ applications.

The switch has PROFINET mode activated by default. You can easily and quickly switch to EtherNet/IP™ or universal mode using the SMART button.

### Features:

- Narrow design
- VLANs
- RSTP
- MRP client
- MRP master with FL MEM PLUG/MRM configuration memory as an option
- Web-based management, SNMP
- PROFINET device function
- LLDP

## Ethernet

8 RJ45 ports

## Industrial Ethernet switches

## Advanced Managed Switches

The automation switches in the 7000 series are the first switches to support direct integration into a Device Level Ring (DLR). Direct integration of the switches into the DLR is a considerable advantage when installing and operating EtherNet/IP™ networks.

Up to six devices can be integrated into a DLR via the FL SWITCH 7000. In system networks, the switches allow the redundant rings to be connected to the higher-level networking level. In this way, you can create networks with minimal switch-over times of less than three milliseconds (< 3 ms).

The Managed Switches of the 7000 series communicate directly via the Common Industrial Protocol (CIP) in the EtherNet/IP™ network. Via CIP, you can integrate the switch into an EtherNet/IP™ control system from where it can be configured and diagnosed.

Pure copper versions and versions with up to three fiberglass ports are available for flexible use.

**Features:**

- Narrow design
- -40°C ... +70°C ambient temperature
- VLANs
- Common Industrial Protocol (CIP)
- Device Level Ring (DLR)
- RSTP
- Web-based management

## Ethernet

8 RJ45 ports

## Ethernet interface

|                    |                |
|--------------------|----------------|
| Number of ports    | 8 (RJ45 ports) |
| Transmission speed | 10/100 Mbps    |
| Connection method  | RJ45           |

## Fiber optic interface

|                     |   |
|---------------------|---|
| Number of ports     | - |
| Transmission speed  | - |
| Connection method   | - |
| Transmission length | - |

## Fiber optic interface

| Number of ports     | - |
| Transmission speed  | - |
| Connection method   | - |
| Transmission length | - |

## Function

## Basic functions

## Technical data

Store-and-forward switch complies with IEEE 802.3, 8 priority classes in acc. with IEEE 802.1 P (QoS), N:1 port mirroring, IGMP snooping, VLANs, Rapid Spanning Tree (RSTP), Large Tree Support, Fast Ring Detection (FRD), link aggregation (802.3ad), MAC-based port security, DHCP option 82, LLDP, ACD, Device Level Ring (DLR), Common Industrial Protocol (CIP)

## Status and diagnostic indicators

2 status LEDs per Ethernet: LINK and selectable status LED: activity, 100 Mbps, full duplex. Supply voltage:  $U_{S1}$  and  $U_{S2}$  (redundant supply voltage) and FAIL. EtherNet/IP™ status LED: Net, Mod

## Industrial Ethernet switches

## Redundancy modules according to IEC 61850/IEEE 1613

Energy networks rely on particularly high fault tolerance. The new PRP redundancy modules enable parallel redundancy without switch-over time in the event of a fault. You can therefore ensure maximum availability of your network.

## Interruption-free communication

- The FL RED 2000E redundancy module is equipped with the Parallel Redundancy Protocol (PRP)
- Interoperability in high-availability networks is possible, as required in the energy sector
- The system continues to operate in the case of redundancy without switch-over time

## Robust design

- Developed according to the requirements of IEC 61850-3 and IEEE 1613: complies with the high requirements for network technology in this area
- Robust to withstand voltage fluctuations due to a wide input voltage range of 18 V DC ... 58 V DC
- Rugged metal housing
- -40°C ... 70°C operating temperature

## Easy handling

- Design of a high-availability network without configuration
- LED indicators provide on-site information regarding the status of the network and redundancy
- Alarm signal contact indicates the status of the module and network

## Ethernet

## Managed Switches according to IEC 61850/IEEE 1613

Ethernet switches control Ethernet traffic and maximize uptime. Operation in extreme environments is assured with a wide temperature range and an electrical noise immunity up to four times that of normal industrial switches.

### Features:

- DIN rail mounting
- Mix IEEE and Extended Ring redundancy options which provide 15 ms recovery time for hundreds of switches
- Comprehensive IEEE security and performance functions
- Unique web customization, diagnostic viewing mode and, help pages simplify maintenance
- Optional PRP redundancy modules provide 0 ms recovery times

## Industrial Ethernet switches

## Managed Switches according to IEC 61850/IEEE 1613, 19" rack-mount

The FL SWITCH 4800E line of managed switches combines 24 ports of 10/100 Mbps device connections with four 10/100/1000 Mbps uplink ports for a total of 28 ports. Application flexibility is assured with different mixes of copper/fiber and fiber types, gigabit fiber/copper "combination" ports and modular power supplies. Operation in extreme environments is assured with a wide temperature range and an electrical noise immunity up to four times that of normal industrial switches.

## Features:

- All switches have four Gigabit RJ45/SFP combination ports for supervisory or high throughput field network connections
- Flexible cabling using eight or 24 10/100 Mbps RJ45 connections with up to 16 fiber (100 Mbps) fiber connections
- Mix IEEE and Extended Ring redundancy options which provide 15 ms recovery time for hundreds of switches
- Optional PRP redundancy modules provide 0 ms recovery times
- Comprehensive IEEE security and performance functions
- Unique web customization, diagnostic viewing mode and help pages simplify maintenance
- Supports up to two modular, hot-swappable power supplies for maximum power flexibility and uptime
- Electrical noise immunity per IEC 61850-3 and IEEE 1613

## Notes:

<sup>1)</sup> Requires the installation of at least one FL SWITCH 4800E-P1 or FL SWITCH 4800E-P5 for operation.

## Ethernet

## IEC 61850-3

24 RJ45 ports and  
4 gigabit combo (SFP or RJ45) ports

## Technical data

## Description

**Managed switch**, 19-inch rack mounted  
- 24 RJ45 and 4 GB combo ports  
**Managed switch**, 19-inch rack mounted  
with 8 RJ45 and 4 GB combo ports  
- 16 fiber optic (LC duplex) ports  
- 16 fiber optic (LC single-mode) ports  
- 16 fiber optic (SC duplex) ports  
- 16 fiber optic (SC single-mode) ports

## Power supply, modular redundant

- 48 V DC nominal  
- 230 V nominal

## Redundancy module

- 3 RJ45 ports  
- 1 RJ45 port, 2 LC fiber optic ports (multi-mode)

Industrial Ethernet switches

Fiber optic interface module

Rugged, small form-factor pluggable (SFP) modules provide a variety of fiber optic interfaces. They are inserted into SFP sockets on managed switches, customizing both quantity and type of fiber used.

Features:

- Supports 100 Mbps full duplex fiber communication
- Electrical noise immunity per IEC 61850-3 and IEEE 1613
- Wide temperature range

SFP modules for transmission ranges up to 40 km

**WLAN access point**

The latest generation of WLAN modules offers maximum reliability, data throughput, and range.

**Faster**

- The new high-speed WLAN 5100 brings WLAN 802.11n to industrial applications and with it a data rate of up to 300 Mbps

**Configuration**

- Central cluster management enables the entire wireless network to be set up in just minutes

**More reliable**

- MiMo technology with three antennas for wireless communication that is more robust, faster, and covers a wider range

**WLAN**

**WLAN access point/client 2.4 GHz, 5 GHz  
802.11 a, b, g, n  
Approval for Japan**

## Media converters

FL MC 2000T... media converters optimize the performance and reliability of industrial Ethernet applications and are optimized for use in extreme environments. Selectable port settings provide usability with a wider range of devices. Selectable low latency (700 ns) allows the media converter to be used in time-critical applications. Configurable link monitoring diagnostics increase network reliability.

## Features:

- Optional multi-mode or single-mode SC duplex fiber optic connection at 100 Mbps
- DIP switch selectable auto negotiate or fixed port settings, data rate and half or full duplex
- DIP switch selectable store-and-forward or pass-through mode (low latency, 700 ns)
- Alarm contact provides power and link status diagnostics
- Link fault pass through (LFP) function for easy connection monitoring
- Wide operating temperature range (-40°C... 75°C)

**COM server for extreme fields of application**

The **FL COMSERVER...232/422/485-T** offer extended temperature and supply voltage ranges. This means that you can now integrate serial RS-232/422/485 interfaces in existing Ethernet networks, even under extreme ambient conditions. Implement functions such as cable replacement, network integration or a Modbus gateway with ease.

Both devices extend the existing FL COMSERVER product range.

- FL COMSERVER BASIC 232/422/485 (Order No.: 2313478)
- FL COMSERVER UNI 232/422/485 (Order No.: 2313452)
- FL COMSERVER WLAN 232/422/485 (Order No.: 2313559)
- FL COMSERVER PRO 232/422/485 (Order No.: 2313465)

**Cable replacement**

Two devices in combination tunnel serial connections via Ethernet, using either the TCP or UDP protocol.

**Network integration**

You can integrate automation devices such as controllers or frequency inverters into a network using corresponding programming and diagnostics software. COM diversion software creates a virtual COM port on the PC and transmits the data to the FL COMSERVER.

**Modbus gateway**

The integrated Modbus gateway function provided in FL COMSERVER UNI converts serial Modbus ASCII or RTU data into Modbus TCP. Naturally, the conversion process also works in the opposite direction.

**Features of the T versions**

- Extended temperature range  
–40°C to +70°C
- Supply voltage 12 ... 30 V AC/DC
- Serial interfaces:  
RS-232, RS-422, RS-485
- 10/100 Base-T(X) interface
- Software for virtual COM ports supplied as standard
- 3-way electrical isolation VCC // RS-232/RS-422/RS-485 // network
- Configuration via web-based management

**FL COMSERVER UNI...-T**

- Supports TCP, UDP, Modbus TCP/RTU/ASCII
- Can be used exactly as required on Modbus master or slave

**FL COMSERVER BAS...-T**

- Best-value version
- Supports TCP and UDP

**Description**

**FL COMSERVER...232/422/485**, for converting serial interfaces to Ethernet. COM port redirector software and additional software supplied as standard

TCP, UDP, MODBUS, PPP  
TCP, UDP

**D-SUB plug, with screw connection**

- 9-pos., socket

**RS-232-D-SUB cable**, length: 2 m

- 9-pos. socket on 9-pos. socket

- 9-pos. socket on 25-pos. socket

**Patch cable**, CAT5, preassembled

3 m

**Shield connection clamp** for RS-485/422 operation

Ethernet

**Universal device - Modbus gateway between  
RTU/ASCII and TCP**

Ethernet

**Basic version for redirector operation -  
TCP and UDP**

**Technical data**

## Passive patch panel for the DIN rail

The mini patch panels provide a convenient alternative to on-site assembly of RJ45 plugs.

The cross-control-cabinet field cabling is simply connected to screw connection terminal blocks or RJ45 sockets, depending on the version selected.

The connection to the termination devices is then completed using pre-assembled RJ45 patch cables.

The new patch panels extend the product range of passive connection fields with new properties.

## General features

- CAT5e
- 10/100 Mbps
- Mounted on DIN rails

## FL-PP-RJ45/RJ45-B

Ethernet interface module with two RJ45 sockets as basic version with compact design and extended temperature range.

- Two RJ45 sockets
- 8-pin assignment: 1:1
- Extended temperature range  
-40°C to 85°C
- Narrow design W/H/D:  
22.5 mm/78 mm/44 mm

## FL-PP-RJ45-SCC/...

Y-splitter for transmission of two individual network connections with 10/100 Mbps via a CAT cable with eight wires.

- Spring-cage connection terminal blocks
- Option of shield contacting on DIN rail via jumpers
- For **FL-PP-.../SC041:**  
two RJ45 sockets, vertical
- For **FL-PP-.../SC045:**  
two RJ45 sockets, horizontal

## Description

**Patch panel, two RJ45 sockets** (1:1 assignment), **extended temperature range**, CAT5, 10/100 Mbps, DIN rail mounting, IP20, consistent shield, width 22.5 mm

**Cable sharing module**, two RJ45 sockets with Ethernet assignment, to 8 spring-cage connection terminal blocks, CAT5e, 10/100 Mbps, DIN rail mounting, IP20, option of shield contacting on DIN rail via jumpers

- Cable outlet at the front, width 52 mm
- Cable outlet at the top, width 56 mm

| FL-PP-RJ45-SCC/SC045 | 2904577   | 1           |

## Remote signaling and remote control system

## Alarm and remote control via the mobile phone network

Use the mobile phone network, monitor analog and digital values, and switch relays remotely using the TC mobile I/O product range.

Depending on the product version, data is transmitted via SMS, e-mail, GPRS or ODP protocol.

Thanks to the large voltage range and the different inputs, the signaling system is suitable for use in a wide range of applications.

## Features:

- Event-controlled or continual communication
- 4 digital inputs
- 2 analog inputs (current/voltage)
- 4 relay outputs, switchable via mobile phone
- Alarming in case of voltage failure via SMS
- Configuration via USB and web browser
- Standard SIM card
- Compact design: 4 pitches (DIN 43880)
- Cover can be sealed
- Numerous helpful software functions

## Applications:

- Machine, building and system monitoring
- Pumps, sewage treatment plants, water supply
- Light controllers, remote switching systems
- Lifts, doors
- Alarm and domestic engineering
- Climate and ventilation engineering
- Battery monitoring up to 60 V
- Railway applications according to EN 50121-4

Communication via SMS and e-mail,  
2 additional analog inputs

**Multi-band antenna** for UMTS and quad band GSM, with omnidirectional characteristic, 2 m antenna cable with SMA round plug, degree of protection: IP65, dimensions: 76 x 20 mm

**Multiband antenna** for external panel and external mast mounting for UMTS and quad-band GSM, with omnidirectional characteristics, 5 m antenna cable with SMA round plug

**Antenna extension cable** for UMTS and quad-band GSM, 5 m long, antenna cable with SMA plug and SMA coupling

**Antenna extension cable** for UMTS and quad-band GSM, 10 m long, antenna cable with SMA plug and SMA coupling

**Power supply unit**, primary-switched

**USB connecting cable** (individual) for configuration

**Surge protection** for UMTS and quad-band GSM antenna, with SMA plug and SMA coupling

**SUBCON-PLUS-M12-  
fast connection**

The new SUBCON-PLUS fast connection plugs with M12 connection ensure error-free installation of bus systems, thanks to the use of fully-tested components, such as cables and connection plugs.

The innovative housing concept is lightweight yet offers optimum mechanical protection against environmental influences. This means that the fast connection plugs are ideal, even in applications subject to vibration.

The unique SPEEDCON fast locking system on the M12 connections offers reliable connection with just half a turn.

**Features:**

- Easy startup, plug and play
- Error-free installation, particularly in standard machine production
- Quick connection thanks to M12-SPEEDCON fast locking system
- Low weight
- Termination using M12 termination resistor
- Adapter between IP20 and IP67 environments
- For PROFIBUS and CANopen® systems

SUBCON-PLUS-CAN/...M12 function block diagram

**Wireless system for license-free use in Europe**

The RAD-868-IFS wireless module is suitable for license-free use in Europe.

**Features:**

- Trusted Wireless 2.0 wireless technology
- 868 MHz frequency band
- Adjustable transmission power up to 500 mW
- Range of up to several kilometers
- Integrated RS-232 and RS-485 interface
- Distribute signals at the turn of a switch (I/O mapping)
- Can be easily extended with up to 32 I/O extension modules via T-connector
- Optionally transmits I/O signals or serial data

**868 MHz wireless transceiver, can be extended with I/O extension modules**

Housing width 17.5 mm

**Technical data**

## Device couplers for field devices

- Couple field devices and provide short-circuit current limiting
- Provide non-sparking and FISCO ic spur connections
- Single-sided connection configuration simplifies wiring in field housing
- Diagnostic LEDs indicate DC OK and errors at the spur connection
- Fulfills the requirements of EN 60079-0:2012, EN 60079-11:2012, EN 60079-15:2005, and EN 60079-15:2010.

Device couplers for 6 and 12 spurs

## Multifunctional safety relays

You can easily implement three safety functions, such as emergency stop, safety door or light grid monitoring, with the PSR-MXF device range – and all using a single device.

In total, there are four function versions available each with three connection methods.

## Features:

- Up to cat. 4/PL e according to EN ISO 13849-1
- Up to SIL 3 according to IEC 61508
- Up to SILCL 3 according to EN 62061
- Low housing width of only 22.5mm
- No software configuration required

Screw connection

Spring-cage connection

## PSR-TRISAFE modular

The PSR-TS-SDOR4 is a safe relay extension module for the PSR-TRISAFE-M safety module. It makes additional configurable relay outputs available to the master module.

## Features:

- Output extension for PSR-TRISAFE-M (modular)
- 4 single-channel relay outputs or (configurable via SAFECONF) 2 two-channel relay outputs
- 4 signal outputs
- Slim 22.5 mm housing
- Including PSR-TBUS DIN rail connector for adapting to the PSR-TRISAFE-M master module
- Up to cat. 4/PL e according to EN ISO 13849-1
- Up to SIL 3 according to IEC 61508
- Up to SILCL 3 according to EN 62061

PSR-TBUS DIN rail connectors are used for cross-wiring between the modules.

## Description

**Extension module**, 4 relay outputs (1-channel) or 2 relay outputs (2-channel)  
 With screw connection  
 With spring-cage connection

**Freely configurable master module**, for monitoring emergency stops, safety doors, light grids, etc., with 20 safe inputs and 4 safe outputs, 4 alarm outputs and 2 clock outputs, safe and standard extension, including memory stick and PSR-TBUS DIN rail connector

With screw connection  
 With spring-cage connection

**PSR-TBUS DIN rail connector**, for supplying/controlling/monitoring (depending on the module)

Safe I/O modules

You can install the safety-related Axioline F PROFIsafe I/O modules anywhere inside an Axioline station. In addition to standard signals, this means you can now also read and output safe signals in the Axioline system.

Depending on the installation and parameterization, you can achieve the following safety characteristics with these modules:

- Up to cat. 4/PL e according to EN ISO 13849-1
- Up to SIL 3 according to IEC 61508
- Up to SILCL 3 according to EN 62061

Digital input module

| Local bus interface                    |                                                                                      |
|----------------------------------------|--------------------------------------------------------------------------------------|
| Name                                   | Axioline F local bus                                                                 |
| Connection method                      | Bus base module                                                                      |
| Power supply for module electronics    |                                                                                      |
| Communications power $U_{Bus}$         | 5 V DC (via bus base module)                                                         |
| Current consumption from $U_{Bus}$     | Typ. 280 mA (Normal operation)                                                       |
| I/O supply                             |                                                                                      |
| Supply of digital input modules $U_i$  | 24 V DC                                                                              |
| Supply voltage range $U_i$             | 19.2 V DC ... 30.2 V DC (including all tolerances, including ripple)                 |
| Current consumption from $U_i$         | Typ. 40 mA (when using the appropriate clock supply)                                 |
| Protective circuit                     | Protection against polarity reversal, EMC protective circuit, undervoltage detection |
| Digital inputs                         |                                                                                      |
| Connection method                      | 2, 3, 4-wire                                                                         |
| Number of inputs                       | 4 (with two-channel assignment)<br>8 (for single-channel assignment)                 |
| Description of the inputs              | IEC 61131-2 type 3                                                                   |
| Nominal input voltage $U_{IN}$         | 24 V DC                                                                              |
| Nominal input current at $U_{IN}$      | Typ. 4.2 mA                                                                          |

## Safe I/O modules

You can install the safety-related Axioline F PROFI-safe I/O modules anywhere inside an Axioline station. In addition to standard signals, this means you can now also read and output safe signals in the Axioline system.

Depending on the installation and parameterization, you can achieve the following safety characteristics with these modules:

- Up to cat. 4/PL e according to EN ISO 13849-1
- Up to SIL 3 according to IEC 61508
- Up to SILCL 3 according to EN 62061

Digital output module

Safe analog value processing

Wherever analog values need to be processed in a safety-related manner, the Safe AI solution package from Phoenix Contact is the ideal solution. With this TÜV-certified and software-based analog value processing, no safety-related I/O modules are required. This saves you money and offers flexibility.

Components of the Safe AI solution package:

- Initial application advice via telephone on the required software and hardware components
- License key for using the ANALOGINPUT\_SF function block library including user documentation
- Advice from the Competence Center Safety in the form of a web meeting

## Bus couplers

The Axioline F bus coupler is the link between the Axioline F system and the higher-level third-generation Sercos network.

For startup tests, the Axioline F station can be started up independently of the higher-level network via either the service interface or an Ethernet port on the bus coupler using the Startup+ software.

## Features:

- Sercos specification V1.3
- Minimum Sercos cycle time of 31.25 µs
- Two rotary encoding switches for address assignment
- 2 RJ45 connections (with integrated switch)
- Up to 63 additional Axioline devices can be connected
- Typical cycle time of the Axioline F local bus is around 10 µs
- Runtime in bus coupler is negligible (almost 0 µs)
- FSP-IO (Function Specific Profile-IO) for modular I/O devices
- Firmware can be updated
- Diagnostic and status indicators

## Bus coupler

The Axioline F bus coupler is the link between the Axioline F system and the higher-level Ethernet system.

The new version of the device features web-based management. It can be used to access static information (e.g., technical data, MAC address) or dynamic information (e.g., IP address, status information).

For startup tests, the Axioline F station can be started up independently of the higher-level network via either the service interface or an Ethernet port on the bus coupler using the Startup+ software.

PROFINET bus coupler

### Features:

- PROFINET RT and PROFINET IRT support
- Minimum cycle time of PROFINET for RT and IRT is 250 µs
- Module replacement without software possible
- 2 RJ45 connections (with integrated switch)
- Up to 63 additional Axioline devices can be connected
- Typical cycle time of the Axioline F local bus is around 10 µs
- MRP client
- Shared device
- Firmware can be updated
- Diagnostic and status indicators

## Digital input and output modules

This module is designed for use within an Axioline F station.

It is used to acquire and output digital data.

You can adjust the filter times of the inputs to increase noise immunity. Filter times of 100  $\mu$ s enable you to implement a counting function with a maximum input frequency of 5 kHz in the application.

**Features:**

- 8 digital inputs and 8 digital outputs
- 24 V DC, 500 mA
- Connection of sensors or actuators in single-wire technology
- Minimum update time < 100  $\mu$ s, bus synchronous
- Filter times can be set in three increments:  
< 100  $\mu$ s, 1000  $\mu$ s or 3000  $\mu$ s
- Maximum input frequency: 5 kHz
- Short-circuit-proof outputs
- Stored device rating plate
- Diagnostic and status indicators

8 digital inputs and 8 digital outputs

Description

**Axioline digital input/output module**, complete with accessories (bus base module)

- 8 inputs, 8 outputs

**Axioline bus base module** (replacement part)

## Analog input modules

This module is designed for use within an Axioline F station.

It is used to acquire standard analog voltage signals. Connection is via 2, 3 or 4-wire technology and a shield connection.

### Features:

- 4 analog differential signal inputs
- Voltage measuring ranges
- Input filter selection
- Minimum update time of 250 µs, bus synchronous
- 16-bit measured value representation
- Stored device rating plate
- Integrated sensor supply
- Diagnostic and status indicators

## Analog output modules

This module is designed for use within an Axioline F station.

The module is used to output standard analog current and voltage signals. It is connected using 2-wire technology and a shield connection.

### Features:

- 4 analog outputs
- Bipolar voltage outputs, Unipolar current outputs
- Minimum update time of 250 µs, bus synchronous
- 16-bit output value
- Overload and short-circuit protected
- Stored device rating plate
- Diagnostic and status indicators

4 analog outputs  
Current/voltage signals

Description

**Axioline analog output module**, complete with accessories  
(bus base module)  
- 4 outputs

**Axioline bus base module** (replacement part)  
**Axioline shield connection set**

Temperature recording modules

This module is designed for use within an Axioline F station.

It is used to record resistive temperature sensors. Connection is via 2, 3 or 4-wire technology and a shield connection.

RTD features:

- 4 inputs for temperature shunts
- 500 Ω and 5 kΩ linear inputs
- Programmable filters
- Short-circuit-proof inputs
- Stored device rating plate

4 RTD inputs

## Temperature recording modules

This module is designed for use within an Axioline F station.

It is used to acquire data from thermocouples. Connection is via 2-wire technology and a shield connection.

### Features of UTH:

- 4 inputs for thermocouples
- Linear voltages from -100 mV to +100 mV
- 1 input from -5 V to +5 V
- 2 Pt 100 inputs (external cold junction)
- Configurable cold junction type
- Stored device rating plate

4 UTH inputs

Connection method

Connection data solid / stranded / AWG

Weight

Axioline F local bus

Bus base module

5 V DC (via bus base module)

Max. 40 mA

24 V DC

Surge protection of the supply voltage

Polarity reversal protection of the supply voltage

Transient protection

2-wire (shielded, twisted pair)

4 + 1 (4 inputs for thermocouples or linear voltage, plus 1 input -5 V to +5 V)

Short-circuit protection, overload protection of the inputs

Transient protection of inputs

Pt 100 (2 external cold junctions, can also be used as a sensor input)

-100 mV ... 100 mV

16 bits (15 bits + sign bit)

40 ms/60 ms/100 ms/120 ms (adjustable)

Typ.  $\pm 0.19$  K (Thermocouple type K, plus tolerance of cold junction)

Push-in technology

0.2 ... 1.5 mm<sup>2</sup>/0.2 ... 1.5 mm<sup>2</sup>/24 - 16

144 g

### Ordering data

#### Description

**Axioline analog input module**, complete with accessories  
(bus base module)

- 4 inputs for connection of thermocouple sensors

#### Type

**AXL F UTH4 1H**

#### Order No.

**2688598**

#### Pcs. / Pkt.

**1**

### Accessories

**Axioline bus base module** (replacement part)

**Axioline shield connection set**

**AXL F BS H**

**AXL SHIELD SET**

**2700992**

M-bus master terminal

The Inline terminal is designed for use within an Inline station.  
It enables communication with standard M-bus counters according to EN 13757.

- Features:**
- M-bus connection for up to 30 devices
  - Transmission speed can be set from 300 baud to 19,200 baud
  - Parameterization via process data
  - Process data width: 16 words
  - Diagnostic and status indicators

M-bus master

## HMI and industrial PCS - HMIs

## HMIs for maritime applications

HMI devices for maritime applications are the reliable and robust solution for demanding applications on ships. The touch panels are specifically tested and approved for shipbuilding.

**Your advantages:**

- Tested quality - certified according to GL, LR, BV, DNV, and ABS
- Flexible communication, even with third-party systems, thanks to numerous drivers
- Save costs and increase service life, thanks to LED backlighting that can be adjusted directly via buttons
- Increase system availability, thanks to temperature and voltage monitoring
- Save costs for acoustic signaling devices: integrated buzzer
- Global use: additional fonts are easy to install
- Cost-effective solution, since there are no additional costs for SCADA runtime: unlimited runtime license for Visu+ RT and AX OPC Server included

17.8 cm (7") TFT color display

## Box PCs

Box PCs are compact and flexible. They can be used in a wide variety of applications such as measurement, control and process testing. The compact size and numerous mounting options also work well for distributed systems with remote monitors.

## Features:

- High system availability thanks to a fanless design or convection booster, suitable for industrial applications and absence of moving parts
- 3rd generation of Intel® Celeron® and Core™ i7 processors
- Versatile use, thanks to various mounting options, e.g., on the DIN rail
- Large-scale compatibility with open IT standards, numerous interfaces and operating system options

## Panel PCs

Panel PCs combine the advantages of a modern industrial PC with the operation and monitoring functions of a touch screen monitor. Typically installed in the front of the control cabinet, they provide monitoring and control directly on site.

## Features:

- High system availability thanks to a fanless design or convection booster, suitable for industrial applications and absence of moving parts
- 3rd generation of Intel® Celeron® and Core™ i7 processors
- Large-scale compatibility with open IT standards, numerous interfaces and operating system options
- Display sizes from 12 (SVGA) to 17 (SXGA) inches
- High graphic performance with Intel HD graphics 4000

Panel PC with Atom™ processor

## Outdoor panel PCs

The new outdoor panel PCs fit seamlessly into the existing portfolio of panel PCs. Designed for use under extreme ambient conditions, the devices meet the requirements for an extended temperature range, easily readable displays in direct sunlight, UV resistance, and a high level of mechanical and chemical resistance.

**Additional features:**

- Display can be read in direct sunlight
- Resistant to UV and IR radiation
- Extended temperature range
- Watertight thanks to IP67 protection
- Resistant to environmental influences, such as salt spray and termites
- Resistant to chemicals, e.g., aggressive cleaning agents, deicers for aircraft
- Can be operated when wearing work gloves

## IP65 panel PCs

Designline 7000 IPCs are powerful panel PCs that utilize Intel® Core™ i7 processors. The fanless design and completely enclosed IP65 housing makes the Designline 7000 suitable for demanding industrial applications. VESA 100 mounting allows installation directly on a machine or system for an integrated, attractive appearance.

**Features:**

- 4th generation Intel Core i7 processors
- Projected capacitive touch screen (PCT)
- 15-inch XGA to 21.5-inch displays with Intel HD graphics 5000
- Fanless for clean, quiet operation
- Slim, attractive design
- All-in-one, IP65-rated design
- Conforms to VESA MIS-D, 100 mounting standard

**Notes:**

<sup>1)</sup> Configuration options can affect the operating temperature. See data sheet for details.

**Fully enclosed IP65 IPC  
with 38.1 cm (15") display**

Extend your system visualization to smartphones or tablets with the **Visu+ mobile** visualization app from Phoenix Contact. You can design flexible operating and monitoring concepts, as the Visu+ mobile app allows you to access your system at any time and from any location.

Integrate Visu+ mobile quickly and easily in existing touch panel or industrial PC visualization solutions. The Visu+ web server required for the app is already pre-installed in numerous devices from Phoenix Contact, such as touch panels. IPCs with Visu+ simply need to be extended with the web license option.

You can conveniently download the app in the usual way from the Google Play Store for Android or the App Store for Apple devices.

#### Features:

- Familiar comfort: simply use conventional smartphones or tablets to perform operation and monitoring
- Conventional SCADA functions such as trend display or alarm handling now also available on mobile devices
- Easy installation via Google Play store or App store
- High-performance, scalable Visu+ web server: up to 100 clients can be operated simultaneously in its maximum configuration
- Convenient generation of HTML visualization pages for the Visu+ web server from the Visu+ development environment

Easy app installation via Google Play store or Apple app store

Visu+ mobile on a mobile termination device via access point, with a touch panel and web server

Visu+ mobile on a mobile termination device via access point, with an industrial PC and web server

## Multiplexer function for retrofitting

With the software for multiplexer systems, you can create a multiplexer system from two ILC 131 ETH small-scale controllers. Without any time-consuming programming.

To do so, extend each small-scale controller with an SD FLASH 512MB MODULAR MUX SD card and the corresponding I/O panel. Configuration is easy with few wire bridges - you just need to define the master and slave.

The software is therefore ideal for all areas of application where a multiplexer solution is required, without additional programming work for the controller.

- Wireless, Ethernet cable or network connection
- Multiplexer solution with standard components (2x ILC 131 ETH and 2x SD FLASH 512MB MODULAR MUX)
- Integration in Ethernet network via web interface, with PC and standard browser

### Notes:

When ordering, please note that you require two controllers and two SD cards respectively.

### Technical data

## Logic modules

Minimal effort with maximum benefits – for Nanoline programmable logic modules the focus is on simplicity and flexibility. This means a modular and adaptable design with optimum networking options.

**Your advantages:**

- Save time – by intelligently controlling basic tasks
- Easy use without prior knowledge, thanks to intuitive programming
- Versatile communication with numerous integration and networking options
- Maximum flexibility, thanks to the modular design

**Additional features:**

- Two high-speed counters and two analog inputs
- Supports four mathematical functions
- Integrated digital I/O
- Add an additional digital I/O extension module for a maximum of 12 I/O points
- Support for large Nanoline operator panel
- Integrated realtime clock (RTC)
- Integrated RS-232 for connection to a PC for programming and configuration
- Integrated RS-232 and RS-485 allow you to use your logic module as a Modbus RTU server
- Flexible programming with nanoNavigator or LOGIC+

24 V DC, 4 digital inputs and 2 relay outputs

## Large operator panel

The operator panel is your interface for interacting with the Nanoline system. Read the status of all I/O points, registers, timers, counters, and system flags directly. In addition, the application program sends prompts and instructions to the display. The operator panel offers numerical (0-9), directional (up, down, left, right), and input keys. In addition, each of the 14 keys on the operator panel can be used to create user-specific menus in a flow chart.

### Additional features:

- 76 mm diagonal screen
- Variable text sizes for enhanced readability of custom messages (4 x 20 or 2 x 10 or a combination)
- Cable length of up to 15 m allows remote mounting away from the logic module
- External 24 V DC
- Variable backlight: red, blue or green
- Adjustable backlight timer to save energy

Analog I/O extension module

Temperature extension module provides RTD and thermocouple inputs as well as four digital outputs.

- Two temperature sensor inputs
- Configuration options for PT100 and PT1000 RTD sensors with two or three wires
- Configuration options for thermocouple types B, E, J, K, N R, S, and T
- Four PNP digital outputs
- Automatically recognized by nanoNavigator

2 temperature inputs, 4 PNP outputs

### Digital I/O extension module for NLC-035 and NLC-040 logic modules

You can extend your Nanoline with an additional I/O extension module. Extension modules provide additional inputs and outputs beyond what is available on the logic module.

- The NLC-IOX is only compatible with the NLC-035 and NLC-040
- One module can be added to the right side of a logic module
- Automatically recognized by nanoNavigator

**EMC: Class A product:**

In accordance with statutory regulations, our products are indicated with this footnote if they are intended for use in industrial environments. This means that the permissible limit values for residential applications may be exceeded in the event of conducted and emitted interference. In such cases, the operator may have to take additional safety measures in order to ensure electromagnetic compatibility in residential applications.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
