\*1 TEST1 and TEST2 are either the time when power is applied or "00000000" is set. Do not attempt to change "00000000" during operation. "00000000" is returned when reading is made.

\*2 No problem in terms of operation occurs even when writing is made to the address 04h to 0Dh and 14h to 1Dh. "00000000" is returned when this address is read.
