

DESCRIPTION

Demonstration Circuit 697 is a quad output power supply intended for use in large TFT-LCD panels. The circuit features the LT1943 high current quad-output switching regulator and generates a 3.3V logic supply along with the triple output supply required for the TFT-LCD panels. With an input voltage range of 4.5V to 8V, a step down regulator provides 3.3V V_{LOGIC} with up to 1.5A current; a high power boost converter, a lower power boost converter and an inverting converter provide three independent output voltages AV_{DD} , V_{ON} and V_{OFF} required by the LCD panels. An internal high side PNP provides delayed turn on of the V_{ON} signal.

All four switchers are synchronized to the internal 1.2MHz clock, allowing the use of low profile inductors and ceramic capacitors. They all have soft-start to limit inrush current.

Long wires run from input sources (such as wall adaptors) can cause large voltage spikes during initial plug-in. C17 is installed on DC697 to damp the possible voltage spikes. C17 is not required for applications where input source is close to the regulator. Please refer to Application Note 88 for details.

Design files for this circuit board are available. Call the LTC factory.

LT is a trademark of Linear Technology Corporation

Table 1. Performance Summary ($T_A = 25^\circ\text{C}$ unless otherwise noted)

PARAMETER	CONDITION	VALUE
Minimum Input Voltage	-40°C to 85°C	4.5V
Maximum Input Voltage	-40°C to 85°C	8V
Output Voltage V_{LOGIC}	$V_{\text{IN}} = 4.5\text{V to } 8\text{V}$, $I_{\text{OUT}} = 0\text{A to } 1.5\text{A}$	3.3V $\pm 3\%$
Maximum Output Current at V_{LOGIC}	$V_{\text{IN}} = 4.5\text{V to } 8\text{V}$	1.5A
Typical Output Ripple V_{LOGIC}	$V_{\text{IN}} = 5\text{V}$, load at $V_{\text{LOGIC}} = 1.5\text{A}$ (20MHz BW)	19mV _{P-P}
Typical Output Ripple AV_{DD}	$V_{\text{IN}} = 5\text{V}$, load at $AV_{\text{DD}} = 500\text{mA}$ (20MHz BW)	33mV _{P-P}
Typical Switching Frequency		1.2MHz
On/Off Control	Logic Low Voltage-Off, -40°C to 85°C	0.4V MAX
	Logic High Voltage-On	2.4V MIN

QUICK START PROCEDURE

Demonstration circuit 697 is easy to set up to evaluate the performance of the LT1943. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

NOTE: When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the input or one of the outputs and GND ter-

minals. See Figure 2 for proper scope probe technique.

1. With power off, connect the input power supply to V_{in} and GND.
2. Set the input between 4.5V to 8V. Turn on the power at the input.

HIGH CURRENT QUAD OUTPUT SWITCHING REGULATOR FOR 5V INPUT TFT-LCD PANELS

3. Check for the proper output voltages. If there is no output, temporarily disconnect the load to make sure that the load is not set too high.
4. Once the proper output voltages are established, adjust the loads within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters.

serve the output voltage regulation, ripple voltage, efficiency and other parameters.

NOTE: If more than 20mA is needed at V_{ON} , connect L3 to a higher input, such as AV_{DD} .

CUSTOMER NOTICE

LINEAR TECHNOLOGY HAS MADE A BEST EFFORT TO DESIGN A CIRCUIT THAT MEETS CUSTOMER-SUPPLIED SPECIFICATIONS; HOWEVER, IT REMAINS THE CUSTOMER'S RESPONSIBILITY TO VERIFY PROPER AND RELIABLE OPERATION IN THE ACTUAL APPLICATION. COMPONENT SUBSTITUTION AND PRINTED CIRCUIT BOARD LAYOUT MAY SIGNIFICANTLY AFFECT CIRCUIT PERFORMANCE OR RELIABILITY. CONTACT LINEAR TECHNOLOGY APPLICATIONS ENGINEERING FOR ASSISTANCE.

THIS CIRCUIT IS PROPRIETARY TO LINEAR TECHNOLOGY AND SUPPLIED FOR USE WITH LINEAR TECHNOLOGY PARTS.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
