Document Revision History

| Revision | Date | Description | Changed by |
|----------|------------|--|------------|
| 0 | 1/06/2008 | Initial Release | - |
| 1 | 9/18/2009 | User guide reformat | BE |
| 2 | 10/14/2009 | Updated Electrical Characteristic | MC |
| 3 | 11/9/2009 | Slave Address Updated | BE |
| 4 | 11/17/2009 | Slave Address Updated | MC |
| 5 | 11/20/2009 | Updated backlight supply current max / Updated Table of Commands | MC |
| 6 | 12/14/2010 | Updated backlight cable length | CL |

Functions and Features

- 160 x 100 pixels
- Built-in ST7528i (I2C) controller
- +3.0V power supply
- 1/100 duty cycle; 1/11 bias
- RoHS Compliant

Mechanical Drawing

TOLERANCES UNLESS OTHERWISE STATED
 XX.X ± 0.20 X.X ± 0.10

Specification:

- 1) LCD TYPE: FSTN, Transflective, Positive
- 2) Drive Method: 1/100 Duty, 1/11 Bias, VLCD: 11.5V, VDD: 3.0V
- 3) Viewing Angle: 6:00
- 4) Backlight: LED Sidelight(White), 2.9~3.1V, CURRENT 45~60mA
- 5) Operation temperature -20° C ~ +70° C
- 6) Storage temperature -40° C ~ +80° C
- 7) Controller: ST7528i

Optical Characteristics

| Item | Symbol | Condition | Min. | Typ. | Max. | Unit |
|----------------------------|----------|-----------|------|------|------|------|
| Viewing Angle - Vertical | θ | Cr≥3 | -20 | - | +40 | ° |
| Viewing Angle - Horizontal | Φ | | -35 | - | +35 | ° |
| Contrast Ratio | CR | | - | 10 | - | - |
| Response Time (rise) | Tr | - | - | 200 | 250 | ms |
| Response Time (fall) | Tf | - | - | 300 | 350 | ms |

Controller Information

Built-in ST7528. Download specification at http://www.newhavendisplay.com/app_notes/ST7528.pdf

I2C Interface:

I2C interface requires 2 lines, Serial Data and Serial Clock. Both lines must be connected to the positive supply via a pull-up resistor. Data transfer may be initiated only when the bus is not busy.

Bit transfer:

One data bit is transferred during each clock pulse. The data on the SDA line must remain stable during the HIGH period of the clock pulse, changes in the data line at this time will be interpreted as a control signal.

Start and Stop conditions:

Both data and clock lines remain HIGH when the bus is not busy. A HIGH-to-LOW transition of the data line while the clock is HIGH is define as the START condition. A LOW-to-HIGH transition of the data line while the clock is HIGH is defined as the STOP condition.

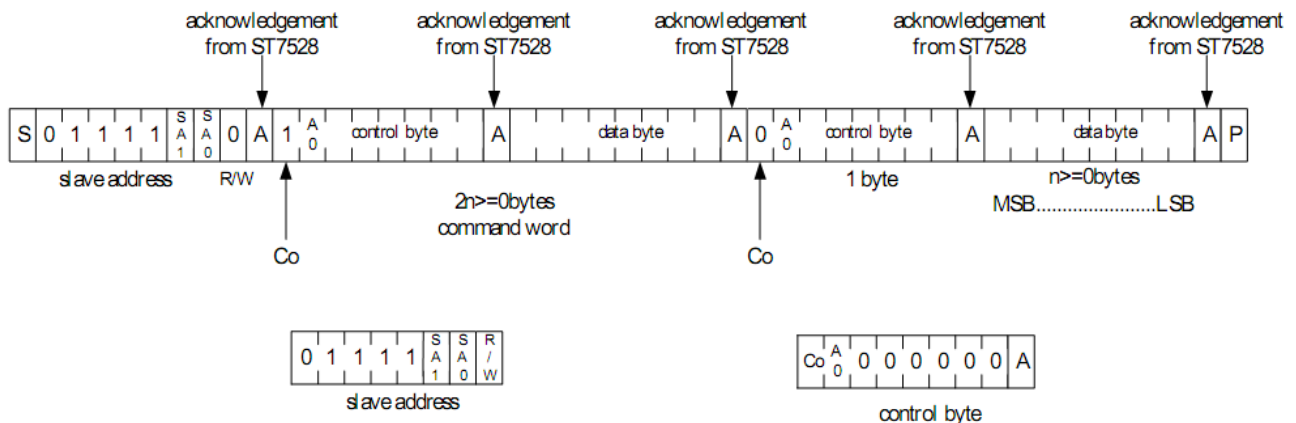

Acknowledge:

Each byte of eight bits is followed by an acknowledge bit. The ACK bit is a HIGH signal put on the bus by the transmitter, during which time the master generates an extra ACK related clock pulse. The LCD generates an ACK after the reception of each byte. The LCD will pull-down the SDA line during the ACK clock pulse, so that the SDA line is stable LOW during the HIGH period of the ACK clock pulse.

Slave Address = 0x3F

Timing Characteristics

Write mode

| | | |
|----|---|---|
| Co | 0 | Last control byte to be sent. Only a stream of data bytes is allowed to follow. This stream may only be terminated by a STOP or RE-START condition. |
| | 1 | Another control byte will follow the data byte unless a STOP or RE-START condition is received. |

($V_{DD}=3.3V, T_a=25^{\circ}C$)

| Item | Signal | Symbol | Condition | Rating | | Units |
|--|--------|----------|-----------|-------------|------|-------|
| | | | | Min. | Max. | |
| SCL clock frequency | SCL | FCLK | | - | 400 | kHZ |
| SCL clock low period | SCL | TLOW | | 1.3 | - | us |
| SCL clock high period | SCL | THIGH | | 0.6 | - | us |

Quality Information

| Test Item | Content of Test | Test Condition | Note |
|---------------------------------------|---|---|------|
| High Temperature storage | Endurance test applying the high storage temperature for a long time. | +80°C , 48hrs | 2 |
| Low Temperature storage | Endurance test applying the low storage temperature for a long time. | -30°C , 48hrs | 1,2 |
| High Temperature Operation | Endurance test applying the electric stress (voltage & current) and the high thermal stress for a long time. | +70°C 48hrs | 2 |
| Low Temperature Operation | Endurance test applying the electric stress (voltage & current) and the low thermal stress for a long time. | -20°C , 48hrs | 1,2 |
| High Temperature / Humidity Operation | Endurance test applying the electric stress (voltage & current) and the high thermal with high humidity stress for a long time. | +40°C , 90% RH , 48hrs | 1,2 |
| Thermal Shock resistance | Endurance test applying the electric stress (voltage & current) during a cycle of low and high thermal stress. | -0°C,30min -> 25°C,5min -> 50°C,30min = 1 cycle 10 cycles | |
| Vibration test | Endurance test applying vibration to simulate transportation and use. | 10-55Hz , 15mm amplitude. 60 sec in each of 3 directions X,Y,Z For 15 minutes | 3 |
| Static electricity test | Endurance test applying electric static discharge. | VS=800V, RS=1.5kΩ, CS=100pF One time | |

Note 1: No condensation to be observed.

Note 2: Conducted after 4 hours of storage at 25°C, 0%RH.

Note 3: Test performed on product itself, not inside a container.

Precautions for using LCDs/LCMs

Warranty Information and Terms & Conditions

http://www.newhavendisplay.com/index.php?main_page=terms

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
