Introduction

Infineon has been a leading semiconductor player in Mobile Communication since the days of Siemens AG, its parent company. Not only are we the world's largest LNA supplier, but also the ones who identified the need for – and created the first – LTE LNAs back in 2014. Furthermore, we're pioneers in LTE RF front-end and antenna tuning excellence, providing customers with new architecture proposals and highly qualified on-site support. Looking to the future, we're already a leading company in upcoming 5G applications such as mmW. As demonstrated by our tailor-made in-house technology development and in-house multi-site manufacturing to ensure a secure supply, we're highly committed to becoming the No. 1 player in radio frequency.

We support you by being the first to provide what applications truly need

- The world's first LTE LNA supplier with the highest market share to date worldwide
- Fastest market share growth in RF switches in 2015
- Fastest market share growth in antenna tuners in 2015

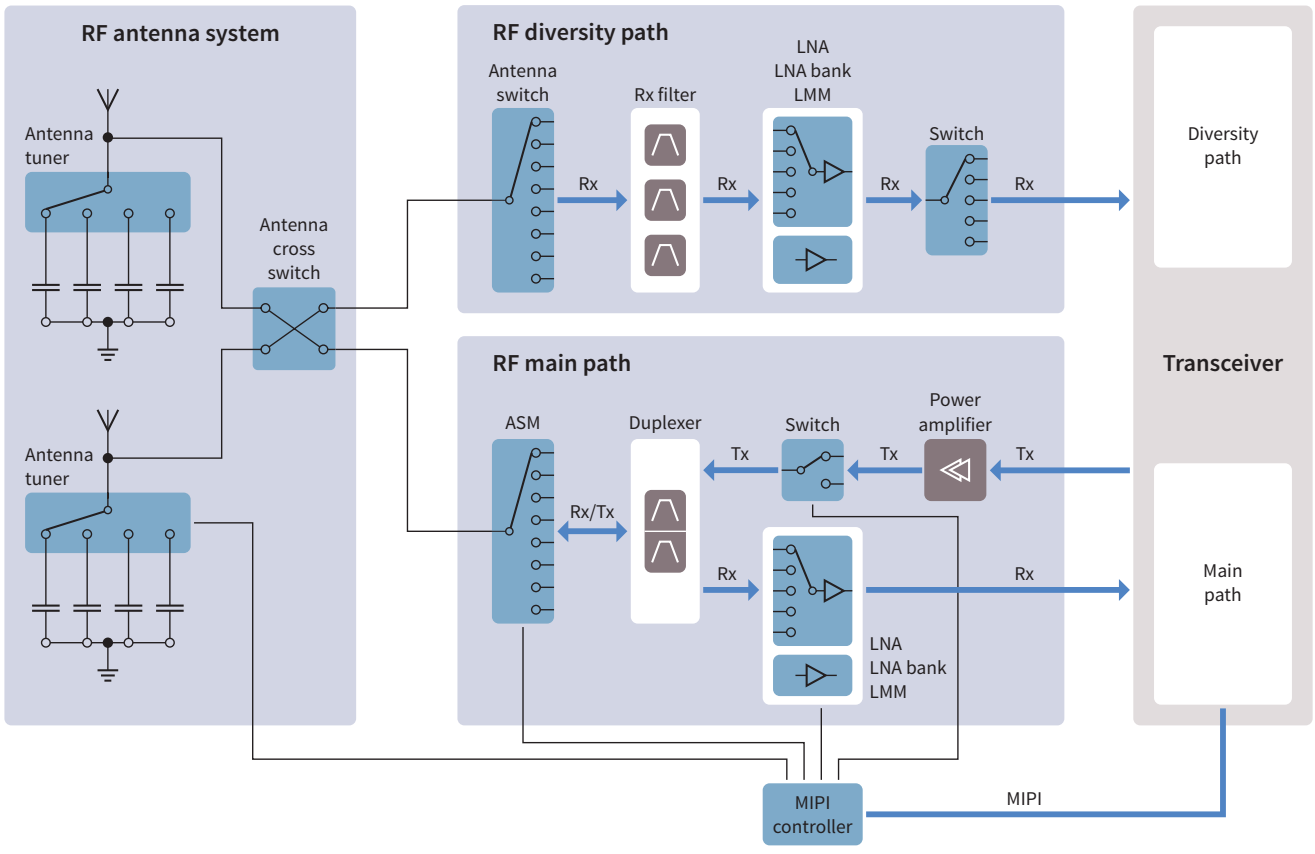
We support you with technological innovations dedicated to RF applications

- World's best SiGe:C technology enabling LNAs with the lowest NF, highest linearity and lowest power consumption
- In-house 130 nm RFCMOS technology enabling switches for complex technology with the smallest size and lowest insertion loss
- 2-layer leadframe package for complex systems and flexibility in design
- Continuous investment in future technologies, leading in mmW application

We support you with system know-how and technical support

- In-house system expert team with a background in smartphone design
- In-house system simulation capability
- Antenna expertise

Infineon's RF front-end system solutions



Overview of Infineon's RF front-end products

RF switches

Main path

High power

- BGS12PL6

High linearity

- BGS12PN10
- BGS13PN10
- BGS14PN10

Rx diversity

MIPI carrier aggregation

- BGSX28MA18
- BGSX210MA18
- BGSX212MA18
- BGS1414MN20
- BGS1515MN20
- BGS15MA12

MIPI

- BGS16MN14
- BGS18MN14
- BGS110MN20
- BGS15M2A12

GPIO

- BGS13GA14
- BGS14GA14
- BGS15GA14
- BGS16GA14
- BGS17GA14
- BGS18GA14
- BGS15AN16
- BGS22WL10

General purpose

- BGS12SN6
- BGS12S3N6
- BGS13S2N9
- BGS13SN8

LNA

LTE LNA

- BGA7L1N6
- BGA7M1N6
- BGA7H1N6
- BGA7L1BN6
- BGA7H1BN6

GPS LNA

- BGA824N6
- BGA524N6

Antenna devices

Antenna tuning

- BGSA11GN10
- BGSA12GN10
- BGSA13GN10
- BGSA14GN10
- BGSA133GN10
- BGSA131MN10
- BGSA132MN10
- BGSA14RN10
- BGSA20GN10

Antenna cross switches

- BGSX22GN10

LNA Multiplexer Modules (LMMs)

- BGM15LA12
- BGM15MA12
- BGM15HA12

MIPI controller

- BGAC600A11

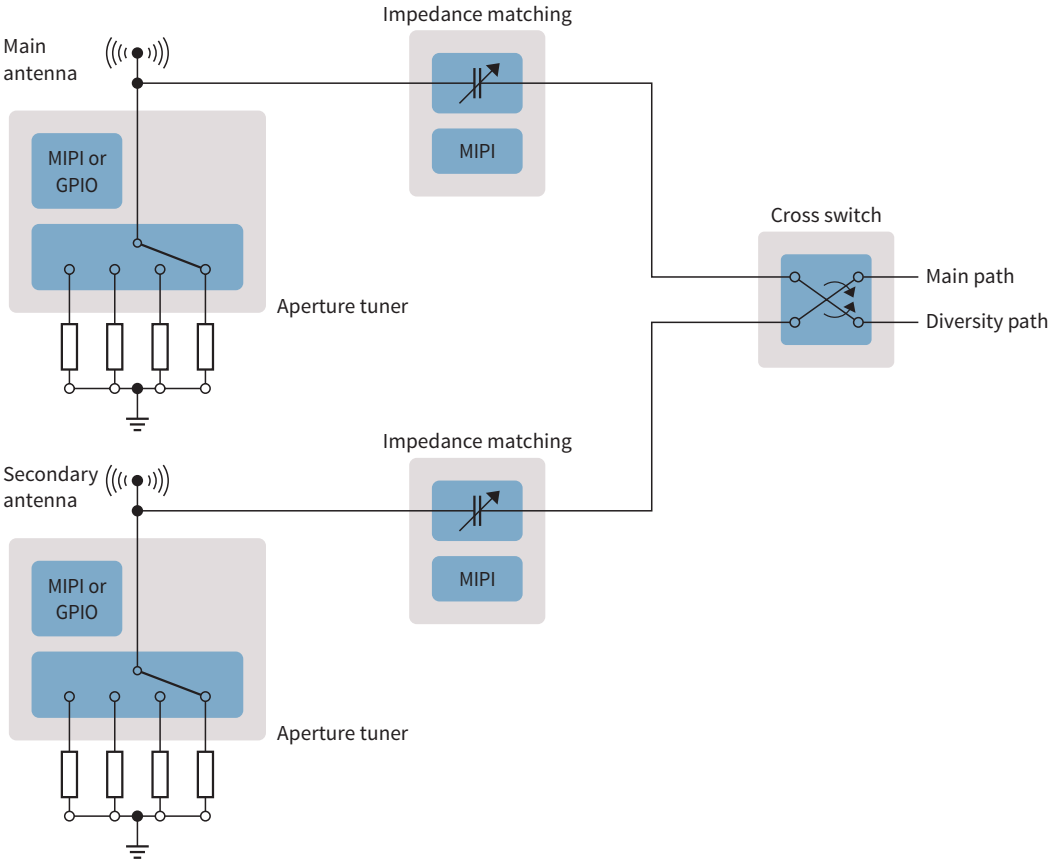
Antenna systems

RF antenna system – for improved signal quality and a longer battery life

A high-efficiency RF antenna needs space – something in short supply in today's smartphones. Outstanding signal quality and a long battery life go hand in hand with a good antenna. With Infineon by your side, you can overcome the challenges associated with antenna systems to create designs in tune with the needs of today.

Customer benefits

- A twenty-fold improvement in antenna radiation efficiency means
- Several hours of more talk time
- Several hours of more data browsing
- 5-bar signal strength wherever you go



Infineon switches for antenna tuning

Product family	Type	R_{on} [Ω]	C_{off} [pF]	V_{RF} (max.) [V]	Ctrl
BGSA11GN10	2x SPST	0.38	0.25	36	GPIO (4 states)
BGSA12GN10	SP2T	1.60	0.12	48	GPIO (2 states)
BGSA13GN10	SP3T	0.8/1.4/1.6	0.30/0.16/0.12	48	GPIO (4 states)
BGSA14GN10	SP4T	1.60	0.12	48	GPIO (4 states)
BGSA133GN10	SP3T	0.5/1.0/1.0	0.6/0.3/0.3	44	GPIO (4 states)
BGSA131MN10	SP3T	0.5/1.0/1.0	0.6/0.3/0.3	44	MIPI (8 states)
BGSA132MN10	SP3T	0.5/1.0/1.0	0.6/0.3/0.3	44	MIPI (8 states)
BGSA14RN10	SP4T	0.95	0.30	44	GPIO (8 states)
BGSA20GN10	2x SPST	2.30	C1+C2	90	GPIO (4 states)

Infineon cross switches for antenna routing

Product family	Type	P_{max} [dBm]	I_L [dB]	Frequency [MHz]	Ctrl
BGSX22GN10	DPDXT	36	0.3–0.6	100-3800	GPIO

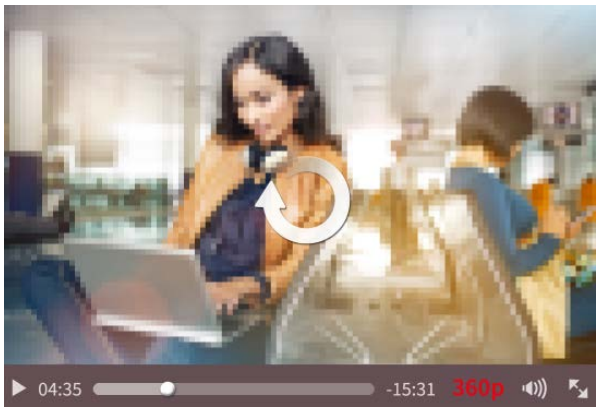
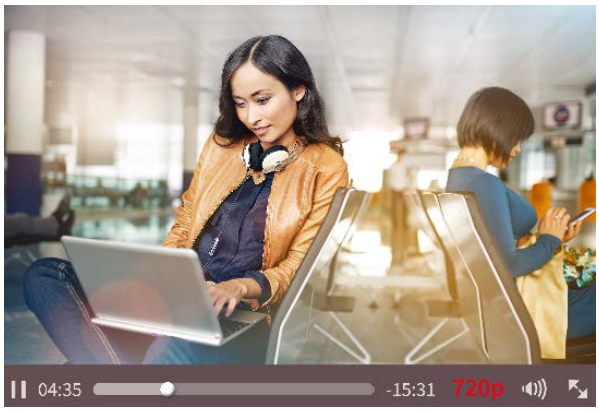
Diversity path

Enhanced RF diversity signals for a better user experience

One of the biggest frustrations of modern life is having to constantly wait for videos, maps etc. to load on our smartphone



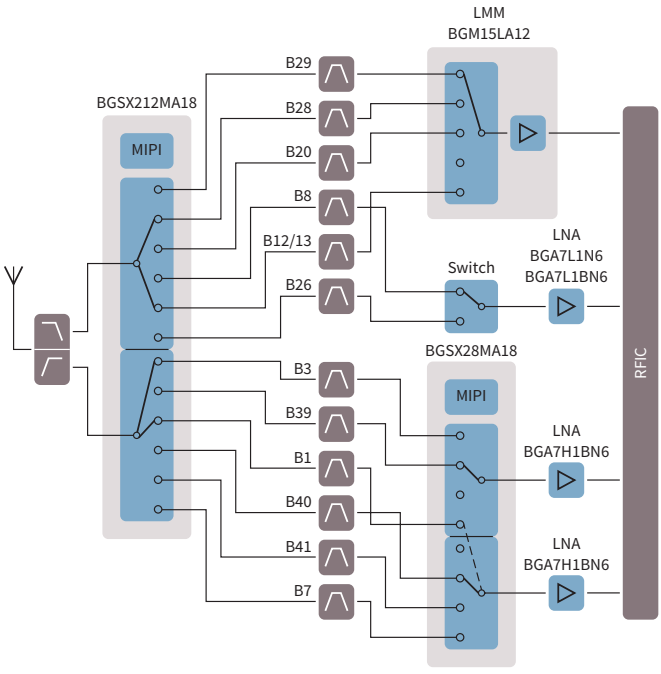
A satisfying user experience depends on the instant, smooth and reliable availability of data



Adding a diversity path coupled with the following technologies could help to achieve the desired satisfying user experience.

Carrier aggregation

- Carrier aggregation increases system bandwidth but requires hardware support
- Up to 4x downlink carrier aggregation-capable chipsets and handsets are available on the market today
- Thanks to their direct mapping and cross ports capability, Infineon's **BGSX2xxMA18** MIPI-controlled switches support up to 4CA and many different band combinations
- Infineon's **BGS15MA12** with direct mapping can support up to 5CA

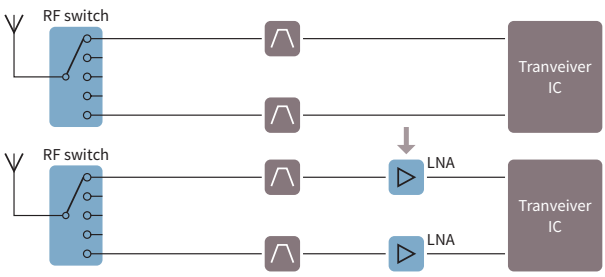


LNA (Low Noise Amplifier)

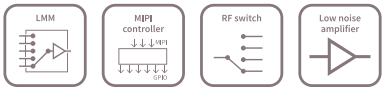
With more than 2 billion LTE LNAs shipped to date, Infineon is the world's first and foremost LTE LNA supplier. Infineon currently manufactures two LNA series:

LTE LNA without bypass			LTE LNA with bypass	
BGA7L1N6	BGA7M1N6	BGA7H1N6	BGA7L1BN6	BGA7H1BN6
Up to 0.5 dB better NF [1]			Up to 0.3 dB better NF [1]	
> 10 percent less current consumption [1]			> 15 percent less current consumption [1]	

1) Compared to competitors



Adding a low-noise amplifier could typically increase system SNR by 3 dB, thereby increasing the date rate by up to 80 percent.



Infineon switches with MIPI for carrier aggregation

Product family	Type	Size [mm]	Frequency (max.) [GHz]	dBm
BGSX28MA18	DPX8T	2.0 x 2.4	3.8	27
BGSX210MA18	DPX10T	2.0 x 2.4	3.8	27
BGSX212MA18	DPX12T	2.0 x 2.4	3.8	27
BGS15MA12	SP5T	1.1 x 1.9	3.0	27
BGS1414MN20	DP8T	2.3 x 2.3	3.0	32
BGS1515MN20	DP10T	2.3 x 2.3	3.0	32

Infineon switches with MIPI

Product family	Type	Size [mm]	Frequency (max.) [GHz]	dBm
BGS110MN20	SP10T	2.3 x 2.3	3.0	32
BGS18MN14	SP8T	2.0 x 2.0	3.0	32
BGS16MN14	SP6T	2.0 x 2.0	3.0	32
BGS15M2A12	SP5T	1.1 x 1.9	3.0	32

Infineon switches with GIPIO

Product family	Type	Size [mm]	Frequency (max.) [GHz]	dBm
BGS13GA14	SP3T	2.0 x 2.0	6.0	28
BGS14GA14	SP4T	2.0 x 2.0	6.0	28
BGS15GA14	SP5T	2.0 x 2.0	6.0	28
BGS16GA14	SP6T	2.0 x 2.0	6.0	28
BGS17GA14	SP7T	2.0 x 2.0	6.0	28
BGS18GA14	SP8T	2.0 x 2.0	6.0	28
BGS15AN16	SP5T	2.3 x 2.3	3.0	32
BGS22WL10	DPDT	1.15 x 1.55	3.8	30

LNA Multiplexer Modules (LMMs) with MIPI

Product family	Type	Band	Gain [dB]	NF [dB]	Frequency [GHz]
BGM15LA12	SP5T	Low band	17.5	1.10	0.7–1.0
BGM15MA12	SP5T	Mid band	16.7	1.15	1.7–2.2
BGM15HA12	SP5T	High band	16.3	1.20	2.3–2.7

LTE LNA

Product family	Band	Size [mm]	Gain [dB]	NF [dB]	Frequency [GHz]
BGA7L1N6	Low band	1.1 x 0.7	13.0	0.6	0.7–1.0
BGA7M1N6	Mid band	1.1 x 0.7	13.0	0.6	1.7–2.2
BGA7H1N6	High band	1.1 x 0.7	13.0	0.6	2.3–2.7
BGA7L1BN6	Low band	1.1 x 0.7	16.1	0.6	0.7–1.0
BGA7H1BN6	Mid + High band	1.1 x 0.7	15.7	0.8	1.8–2.7

www.infineon.com/rf

Main path

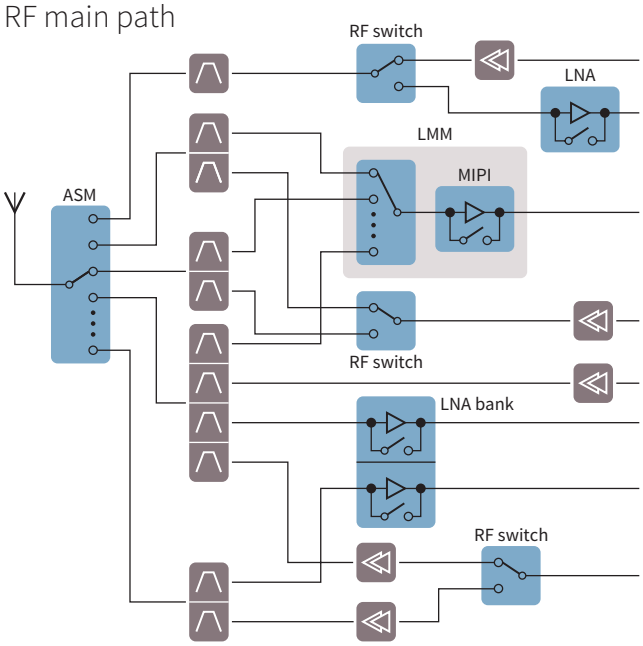
Added value and increased performance with Infineon components

The RF main path simultaneously transmits and receives RF signals. However, the introduction of carrier aggregation – for both transmitting and receiving signals – is making RF designs more complex. RF components have to:

› Handle high-power signals
› Deliver best performance and
› Help to safe valuable battery energy

All our LNA and Switch solutions are designed to do just this

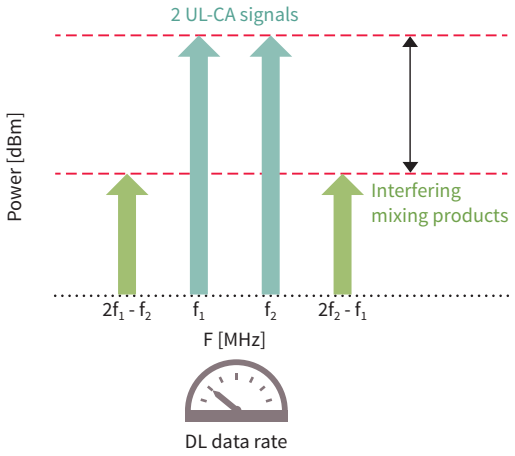
RF main path



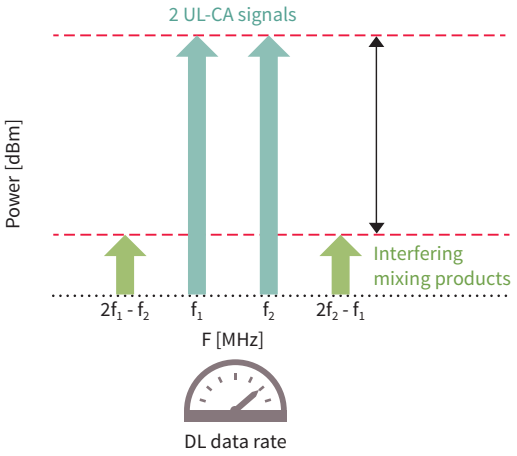
Main path switches

Our high-power switch family can handle very high transmitting signal levels of up to 38 dBm, while at the same time exhibiting low losses to conserve battery power. These switches feature proprietary RF CMOS technology and combine low loss characteristics with high linearity for uplink carrier aggregation, where two signals are transmitted simultaneously by a mobile device.

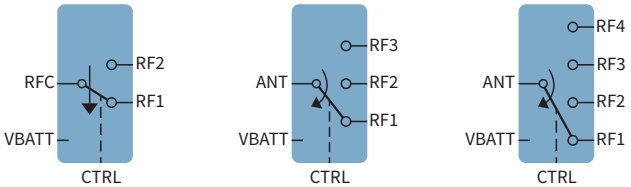
Low linearity component



High linearity component



The product family is designed to provide maximum flexibility in RF-front-end design.



Main path modules

The Low-noise amplifier Multiplex Module (LMM) simplifies the RF-front-end design and helps to

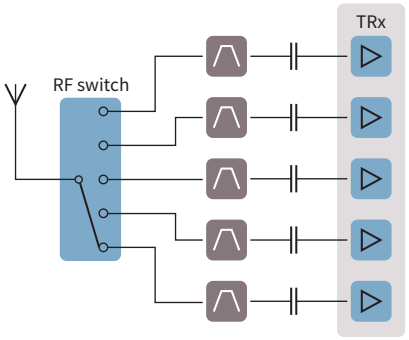
› Reduce size
› Optimize costs
› Improve system performance
› Reduce time-to-market

The LMM components are combine the advantages of discrete RF-components and Front-End Modules (FEM) – the ideal choice for Downlink-Carrier Aggregation (DL-CA) and Uplink Carrier-Aggregation (UL-CA).

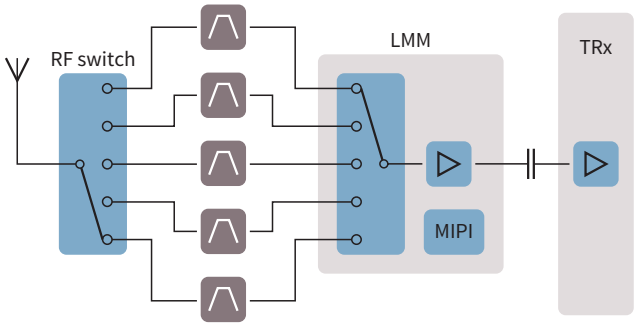
Added value of an integrated LNA + switch

› Up to 80 percent less number of routing lines + MIPI-controlled
› Up to 50 percent smaller
› Up to 60 percent BOM cost savings

Discrete RF front-end design



LMM RF front-end design



Infineon switches for high power/linearity

Product family	Type	Size [mm]	Frequency (max.) [GHz]	Power (max.) [dBm]
BGS12PL6	SPDT	0.7 x 1.1	3	35
BGS12PN10	SPDT	1.5 x 1.1	4	38
BGS13PN10	SP3T	1.5 x 1.1	4	38
BGS14PN10	SP4T	1.5 x 1.1	4	38

Infineon general-purpose switches SPDT/SP3T

Product family	Type	Size [mm]	Frequency (max.) [GHz]	Power (max.) [dBm]
BGS13S2N9	SP3T	1.15 x 1.15	2.7	30
BGS13SN8	SP3T	1.15 x 1.15	6.0	30
BGS12SN6	SPDT	0.7 x 1.1	6.0	30
BGS12S3N6	SPDT	0.65 x 0.98	6.0	30

LTE LNA for main path

Product family	Type	Size [mm]	Gain [dB]	NF [dB]	Frequency [GHz]
BGA7L1N6	w/o bypass	1.1 x 0.7	13.0	0.6	0.7–1.0
BGA7M1N6	w/o bypass	1.1 x 0.7	13.0	0.6	1.7–2.2
BGA7H1N6	w/o bypass	1.1 x 0.7	13.0	0.6	2.3–2.7
BGA7L1BN6	with bypass	1.1 x 0.7	16.1	0.6	0.7–1.0
BGA7H1BN6	with bypass	1.1 x 0.7	15.7	0.8	1.8–2.7

LNA Multiplexer Modules (LMMs) with MIPI

Product family	Type	Size [mm]	Gain [dB]	NF [dB]	Frequency [GHz]
BGM15LA12	SP5T + LNA	1.9 x 1.1	17.5	1.10	0.7–1.0
BGM15MA12	SP5T + LNA	1.9 x 1.1	16.7	1.15	1.7–2.2
BGM15HA12	SP5T + LNA	1.9 x 1.1	16.3	1.20	2.3–2.7

Complementary wireless

Enhanced connectivity in mobile devices

Today's smartphones are veritable all-rounders. After all, they come equipped with a host of complementary wireless applications from WiFi and Bluetooth to GNSS and mobile TV. For today's designers, however, ensuring high-quality signals over larger coverage areas is proving a real challenge. This is something that can be overcome by improving system sensitivity in wireless applications.

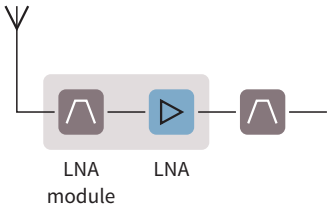
Infineon's broad portfolio of solutions includes dedicated Low-Noise Amplifiers (LNA) and various switch solutions for specific wireless applications. Our LNA solutions and switches enable you to create designs with the lowest NF/IL, low current consumption, high linearity and fast switching times – all of which result in the highest possible system sensitivity.

Our end-to-end portfolio also provides the ultimate in design flexibility, offering compact footprints and high levels of integration. Explore our range of wireless applications and find the right solution for your specifications.

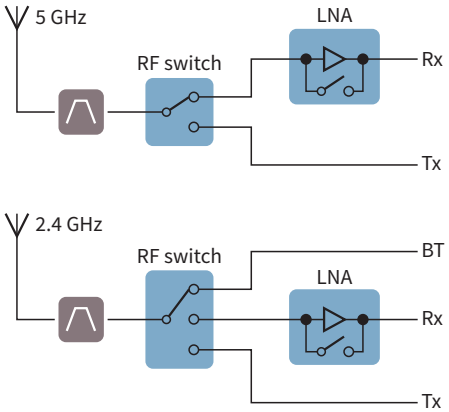
Customer benefits

- Improved Time to First Fix (TTFF) for navigation applications – even under the most extreme environmental conditions (urban and mountain environments)
- Better mobile TV reception – even in subways
- Fast WiFi connectivity in 2.4 GHz and 5 GHz frequency bands

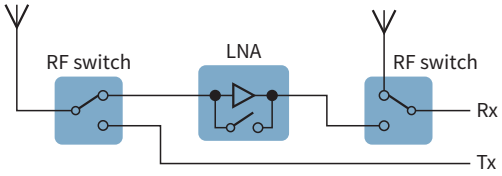
GNSS



WiFi



Mobile TV + FM radio



Low noise amplifier

GNSS LNA

Product family	Size [mm]	Gain [dB]	Current mA]	NF [dB]

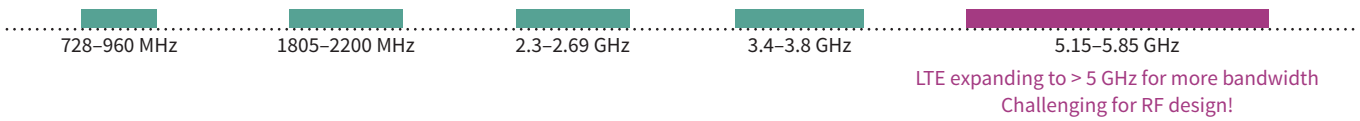
LTE-U/LAA

Taking data rates to the next level with 5–6 GHz unlicensed band

Motivation

Bandwidth is the most scarce resource in mobile communication. It's hard to get and the costs associated with a successful bid run into billions. Going for the unlicensed 5–6 GHz is a natural choice:

1. It's free.
2. It offers a very broad bandwidth.



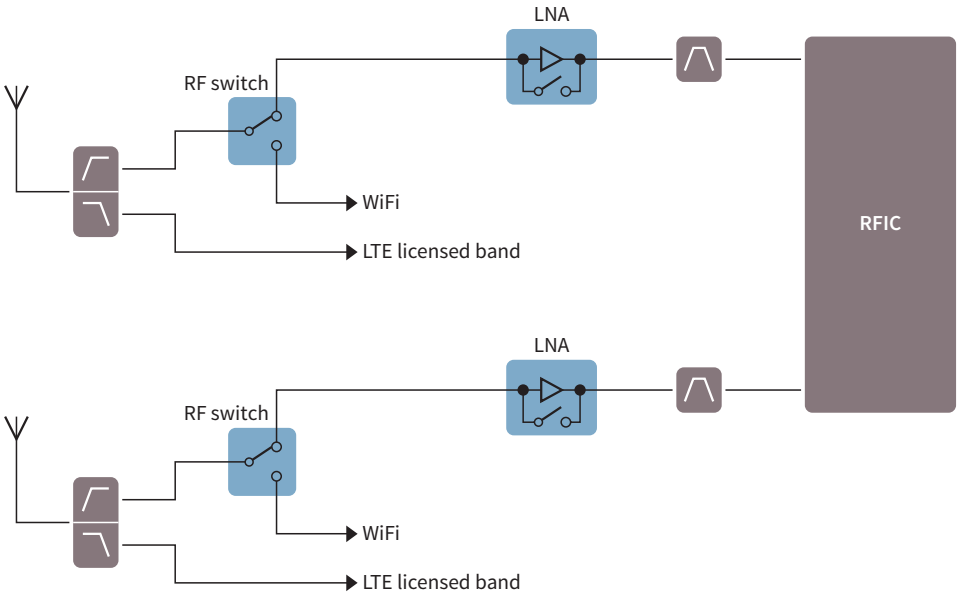
Challenge

Operating at a higher frequency presents RF design with a new challenge: the insertion loss associated with PCB trace, and the fact that the noise levels of the RFIC's internal LNA increase significantly (7 dB vs. 4 dB at high band). As a result, a lower SNR leads to a reduced data rate, which compromises the desired effect of LTE-U.

Solution

Adding an LNA to the circuit and placing it as close to the antenna as possible can help improve the SNR by 3 dB and help double the data rate.

In some customers' applications a low insertion loss switch is also required.



Infineon switches for application at up to 6 GHz

Product name	Type	Size [mm]	Frequency (max.) [GHz]	Power (max.) [dBm]
BGS12SN6	SPDT	0.7 x 1.1	6	30
BGS13GA14	SP3T	2.0 x 2.0	6	28
BGS14GA14	SP4T	2.0 x 2.0	6	28

ООО «ЛайфЭлектроникс» **“LifeElectronics” LLC**

ИНН 7805602321 КПП 780501001 Р/С 40702810122510004610 ФАКБ "АБСОЛЮТ БАНК" (ЗАО) в г.Санкт-Петербурге К/С 30101810900000000703 БИК 044030703

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- *Конкурентоспособные цены и скидки постоянным клиентам.*
- *Специальные условия для постоянных клиентов.*
- *Подбор аналогов.*
- *Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.*

- *Приемлемые сроки поставки, возможна ускоренная поставка.*
- *Доставку товара в любую точку России и стран СНГ.*
- *Комплексную поставку.*
- *Работу по проектам и поставку образцов.*
- *Формирование склада под заказчика.*

- *Сертификаты соответствия на поставляемую продукцию (по желанию клиента).*
- *Тестирование поставляемой продукции.*
- *Поставку компонентов, требующих военную и космическую приемку.*
- *Входной контроль качества.*
- *Наличие сертификата ISO.*

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- *Регистрацию проекта у производителя компонентов.*
- *Техническую поддержку проекта.*
- *Защиту от снятия компонента с производства.*
- *Оценку стоимости проекта по компонентам.*
- *Изготовление тестовой платы монтаж и пусконаладочные работы.*
