

Accelerate Wireless Product Development

Simplify Development & Speed Time to Market

Helicomm's highly integrated IP-Link Modules simplify wireless integration and reduce development cycles by six months or more. Each IP-Link embedded module includes an IEEE 802.15.4-compliant radio, a Silicon Laboratories 8051 microcontroller, programmable I/O, flexible antenna and range solutions, and ZigBee-Ready IP-Net™ networking software.

Our FCC certified IP-Link Modules are designed for reliability and manufacturability, making it easy and convenient to add wireless communications to your products. Whether you need to evaluate mesh networking concepts, quickly demonstrate a wireless product prototype, or ramp your products to volume production, Helicomm can help you save time and money and reduce your development risk.

Unsurpassed Customer Choice

Helicomm offers the broadest selection of ZigBee wireless networking solutions available in the industry. Our 2.4GHz IP-Link Modules support global deployment and a data rate of 250Kbps, and our 915MHz Modules support extended range and enhanced Wi-Fi co-existence. IP-Link Modules can be ordered with your

Helicomm's industry leading, 8051-based IP-Link Modules support both ZigBee & IP-Net solutions and 2.4GHz & 915MHz frequencies.

choice of ultra low power or high performance 8051-based microcontroller, along with several standards-based networking gateways, packaged modems, development kits, design tools and design & integration services to help you complete your development project.

Powerful Development Environment

Helicomm's IP-Link Modules and DevKits include support for the Keil C compiler and integrated development environment, allowing you to embed your application directly onto the IP-Link module to reduce system cost and power consumption.

Flexible Networking Solutions

IP-Link Modules support mesh, star and hybrid networking topologies and come with Helicomm's ZigBee-Ready IP-Net software. Simply select the Networking solution that best meets

your needs for interoperability, IP compatibility, or simplicity.

Helicomm's ZigBee-Ready IP-Net networking software is ideal for customers looking for a highly reliable and field-proven wireless solution. IP-Net includes support for our innovative 'serial mesh mode', allowing RS232/RS485 data streams to be transmitted over multiple hops to improve data reliability and increase transmission range.

Alternatively Helicomm also provides ZigBee networking stack library to enable third party product and system interoperability, for example, lighting, heating, and access control systems to work as an integrated system.

ZigBee-Ready Modules are available now.

Module Selection Guide

Helicomm offers seven 8051-based IP-Link embedded modules, providing the broadest selection of ZigBee and IP-Net wireless networking solutions. IP-Link modules are available in both 2.4GHz and 915MHz frequencies, with three choices of Flash/RAM combinations. These options allow you to select the right-sized module for your needs, and provide you a flexible way to build and test both simple and sophisticated wireless networks.

The following Module Legend, IP-Link Module Comparison Charts and Module Specification Table are provided to aid in identifying the highly integrated, standards-based IP-Link modules that meet your requirements.

Module Legend

IP-Link Model	Description	Flash/RAM	Max Output Power
1220-2033	2.4GHz	128KB/8KB	0dBm
1221-2033	2.4GHz	64KB/8KB	0dBm
1220-2133	2.4GHz	128KB/8KB	15dBm
1221-2133	2.4GHz	64KB/8KB	15dBm
1220-2033*	2.4GHz	32KB/2KB	0dBm
1121-3033*	915MHz	64KB/8KB	0dbm
1122-3033*	915MHz	32KB/2KB	0dbm

*IP-Link 1121, 1122 & IP-Link 1222 are coming soon

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
