

Medium Voltage Fuses

2,400 - 38,000 VAC • Current-Limiting

Littelfuse now offers a complete selection of “E” and “R” rated medium voltage fuses for the protection of transformers, potential transformers, feeders, and motor circuits. Single, double, and triple barrel designs are available to cover a wide range of current, voltage, and interrupting ratings. Conventional ferrule type, clip lock, and bolt-in mounting configurations are now available for virtually any application. Hermetically sealed fuses for use in hazardous environments are also offered.

Contact the factory or your local Littelfuse representative for additional fuse ratings or custom mounting configurations.

24 Hour Emergency Service is available. Call 847 824 1188.

Applications

- Power Transformer Protection
- Potential Transformer Protection
- Motor Controller Back-up Protection
- Fused Switches
- Feeder Circuits

Current-limiting “E” and “R” rated fuses are equipped with a mechanical indicator or striker pin that protrudes through the fuse cap upon operation of the fuse. This provides visual identification of a blown fuse and can be used as a trigger for external devices.

Note: Extension distance 1/2" min; extension force 2lb. min

General Information

The terms “Medium Voltage” and “High Voltage” have been used interchangeably by many people to describe fuses operating above 600 volts. Technically speaking, “medium voltage” fuses are those intended for the voltage range from 2,400 to 38,000 VAC. “High voltage” fuses are for circuits carrying voltages greater than 38,000 VAC.

“E” rated fuses are considered to be general purpose fuses and can be used to protect against low and high values of fault current. “R” rated fuses are designed for back-up protection. They must be used in series with other devices such as motor overload relays in order to achieve both overload and short-circuit protection.

Medium voltage fuses are not intended to provide overload protection in the same sense as fuses rated 600 volts or less. Medium voltage fuse current ratings do not have the same meanings as the ampere ratings of low voltage fuses.

All medium voltage fuses are limited in their ability to interrupt low value overcurrents, especially those between 100% and 200% of the fuse’s continuous current rating. They are designed to carry their rated current without exceeding the temperature rise permitted by NEMA and ANSI standards.

Additional application data can be found in the Fuse Application section of this catalog.

Bolt-in Mount Fuses

R Rated Medium Voltage Fuses

Current-Limiting

Features

"R" rated fuses provide required short-circuit protection for medium voltage motors, motor controllers and associated circuitry. These components have limited ability to absorb the energy of large short-circuit currents. Medium voltage motor controllers contain overload relays which provide both overload protection and locked rotor protection to the motor. The controllers are also intended to interrupt low value short-circuits within the capability of the motor controller. This protects the medium voltage fuse from sustained overcurrents which are less than their minimum interrupting rating.

NEMA Standards for "R" rated medium voltage power fuses require they operate within 15-35 seconds when subjected to an rms current 100 times the "R" rating. For example, a fuse with a 2R rating will open within 15 to 35 seconds on an applied current of $2 \times 100 = 200$ amperes.

Part Number System

Characteristics

Voltage Rating: 2,400 volts – 8,250 volts
Current Range: 2R – 36R

Options

- Hermitically sealed for use in hazardous locations (add "S" suffix to part number)
- Bolt-in mounting configurations

Hookeye Feature*

*For hookeye attachment; add "W" suffix to part number

Technical drawing of a 1/2 size shoe last. The drawing includes two views: a top view and a side view. The top view shows a last with a rounded toe and a heel. Dimensions for the top view are: total length 3.75, heel length 2.92, and heel width .08. The side view shows a last with a rounded toe and a heel. Dimensions for the side view are: total length 2.50, heel height 1.25, and heel width $\phi .50$.

Technical drawings of the 1000 Series 1/2" component. The top drawing is a side view showing a rectangular block with a central circular hole. Dimensions include a total width of .78, a central hole diameter of .31, and a thickness of .08. The bottom drawing is a top view showing a rectangular block with a central circular hole. Dimensions include a total width of .78, a central hole diameter of .31, and a thickness of .08.

Technical drawing of a U-shaped metal part. The drawing includes three views: a front view, a side view, and a cross-sectional view. The front view shows a U-shaped part with a width of 4.16 and a height of 1.50. It features two .038" HOLES. The side view shows the profile of the part with a height of 3.08. The cross-sectional view shows the thickness of the part as 4.50.

A diagram of a lever arm. A horizontal beam is supported by two small vertical blocks acting as fulcrums. A curved lever arm is attached to the beam at a pivot point. At the end of the lever arm is a circular weight with a small circle inside it. An arrow points downwards from the weight, indicating the force of gravity.

[illegible]

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
