

MAX14752/MAX14753

8-Channel/Dual 4-Channel 72V Analog Multiplexers

General Description

The MAX14752/MAX14753 are 8-to-1 and dual 4-to-1 high-voltage analog multiplexers. Both devices feature 60Ω (typ) on-resistance with 0.03Ω (typ) on-resistance flatness. These low on-resistance multiplexers conduct equally well in either direction. Flexible logic levels for the channel-select interface are defined by the EN input.

The MAX14752 is a 8-to-1 multiplexer and MAX14753 is a dual 4-to-1 multiplexer. Both devices operate with dual supplies of $\pm 10V$ to $\pm 36V$, or a single supply of $+20V$ to $+72V$.

The MAX14752/MAX14753 are available in a 16-pin TSSOP package and are pin compatible with the industry-standard DG408/DG409. Both the MAX14752/MAX14753 are specified over the extended $-40^{\circ}C$ to $+85^{\circ}C$ operating temperature range.

Applications

Programmable-Logic Controllers
Environment Control Systems
ATE Systems
Medical Monitoring Systems

Benefits and Features

- Supply Range Accommodates Wide Voltage Applications
 - Wide $\pm 36V$ (max) Bipolar Power Supply
 - High $+72V$ (max) Single Power Supply
 - Asymmetric Bipolar Power Supply Operation
- Low Leakage Current and R_{ON} Improves System Accuracy
 - Low On-Resistance 60Ω (typ)
 - 0.03Ω (typ) R_{ON} Flatness Over Common-Mode Voltage Range
 - $20nA$ Low-Input, On-Leakage Current (max)
- Low $25\mu A$ I_{DD} Supply Current in Disable Mode Saves Power
- Easy to Upgrade with Pin-Compatible, Industry-Standard DG408/DG409

Ordering Information

PART	TEMP RANGE	PIN-PACKAGE
MAX14752EUE+	$-40^{\circ}C$ to $+85^{\circ}C$	16 TSSOP
MAX14753EUE+	$-40^{\circ}C$ to $+85^{\circ}C$	16 TSSOP

+Denotes a lead(Pb)-free/RoHS-compliant package.

Pin Configurations appear at end of data sheet.

Functional Diagrams

Absolute Maximum Ratings

V _{DD} to V _{SS}	-0.3V to +72V
GND to V _{SS}	-0.3V to V _{DD}
EN, S0, S1, S2 to GND	-0.3V to the lesser of (+12V and V _{DD} + 0.3V)
IN ₋ , INA ₋ , INB ₋ , OUT, OUTA, OUTB to V _{SS}	-2V to (V _{DD} - V _{SS} + 2V) or 100mA (whichever occurs first)
Continuous Current into IN ₋ , INA ₋ , INB ₋ , OUT, OUTA, OUTB	100mA
Continuous Power Dissipation (T _A = +70°C) 16-Pin TSSOP (derate 11.1mW/°C above +70°C)	890mW

Junction-to-Ambient Thermal Resistance (θ _{JA}) (Note 1) 16-Pin TSSOP	90°C/W
Junction-to-Case Thermal Resistance (θ _{JC}) (Note 1) 16-Pin TSSOP	27°C/W
Maximum Operating Temperature Range	-40°C to +125°C
Junction Temperature	+150°C
Storage Temperature Range	-65°C to +150°C
Lead Temperature (soldering, 10s)	+300°C
Soldering Temperature (reflow)	+260°C

Note 1: Package thermal resistances were obtained using the method described in JEDEC specification JESD51-7, using a four-layer board. For detailed information on package thermal considerations, refer to www.maximintegrated.com/thermal-tutorial.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

DC Electrical Characteristics—Dual Supplies

(V_{DD} = +35V, V_{SS} = -35V, V_{GND} = 0V, V_{EN} = +3.3V, T_A = -40°C to +85°C, unless otherwise noted. Typical values are at T_A = +25°C.)

Detailed Description

The MAX14752/MAX14753 are 8-to-1 and dual 4-to-1 high-voltage analog multiplexers. Both devices feature 60Ω (typ) on-resistance with 0.03Ω (typ) on-resistance flatness. These low on-resistance multiplexers conduct equally well in either direction.

The MAX14752 is an 8-to-1 multiplexer and MAX14753 is a dual 4-to-1 multiplexer. Both devices operate with dual supplies of ±10V to ±36V or a single supply of +20V to +72V. Both devices can also operate with unbalanced supplies, such as +36V and -10V. These multiplexers support rail-to-rail input and output signals. The control logic level is defined via the EN input. These devices do not require power-supply sequencing.

Applications Information

Current Through the Mux

The current flowing through each on-channel of the MAX14752/MAX14753 multiplexers must be limited to ±5mA for normal operation. If the current exceeds this limit, an internal leakage current from that channel to V_{SS} appears. Larger input current does not destroy the device if the max power dissipation is not exceeded.

Input Voltage Clamping

For applications that require input voltages beyond the normal operating voltages, the internal input diodes to V_{DD} and V_{SS} can be used to limit the input voltages. As shown in Figure 11, series resistors can be employed at the inputs to limit the currents flowing into the diodes during undervoltage and overvoltage conditions. Choose the

limiting resistors such that the input currents are limited to I_{IN(max)} = 100mA. The values of the current limit resistors can be calculated as the larger of R_{LIM+} and R_{LIM-}.

$$R_{LIM+} = \frac{V_{IN(max)} - V_{DD}}{I_{IN(max)}}$$

$$R_{LIM-} = \frac{V_{SS} - V_{IN(min)}}{I_{IN(max)}}$$

During an undervoltage or overvoltage condition, the input impedance is equal to R_{LIM}. The additional power dissipation due to the fault currents needs to be calculated. The MAX14752/MAX14753 multiplexer operates normally on a channel that is on during an overvoltage or undervoltage clamping condition on a second channel that is not switched.

Beyond-the-Rail Input

If input voltages are expected to go beyond the supply voltages, but within the absolute maximum supply voltages of the MAX14752/MAX14753, add two diodes in series with the supplies as shown in Figure 12.

During undervoltage and overvoltage events, the internal diodes pull V_{DD}/V_{SS} supplies up/down. An advantage of this scheme is that the input impedance is high and currents do not flow through the MAX14752/MAX14753 during overvoltage and undervoltage events. The input voltages must be limited to the voltages specified in the *Absolute Maximum Ratings* section.

Revision History

REVISION NUMBER	REVISION DATE	DESCRIPTION	PAGES CHANGED
0	8/08	Initial release	—
1	10/08	Changed the units from mA to μ A for V_{DD} and V_{SS} supply current in the <i>DC Electrical Characteristics—Dual Supplies</i> table	2
2	2/09	Added capacitance information to EC table	2, 4, 13, 14, 15, 16
3	7/10	Deleted the “Input Capacitance” parameter from the <i>DC Electrical Characteristics—Dual Supplies</i>	3
4	4/15	Removed automotive reference	1
5	5/15	Revised <i>Benefits and Features</i> section	1

For pricing, delivery, and ordering information, please contact Maxim Direct at 1-888-629-4642, or visit Maxim Integrated's website at www.maximintegrated.com.

Maxim Integrated cannot assume responsibility for use of any circuitry other than circuitry entirely embodied in a Maxim Integrated product. No circuit patent licenses are implied. Maxim Integrated reserves the right to change the circuitry and specifications without notice at any time. The parametric values (min and max limits) shown in the Electrical Characteristics table are guaranteed. Other parametric values quoted in this data sheet are provided for guidance.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
