Ambient Operating Range (T _A)	-55°C to +125°C
---	-----------------

NOTE 1: Signals on S_X, D_X, or IN_X exceeding V⁺ or V⁻ are clamped by internal diodes, and are also internally current limited to 25mA.

Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.
