

FEATURES

- Isolated Analog Input Voltages.**
- Amplifies, Protects, and Filters Analog Input.**
- 10kHz bandwidth which ideally suits them to measuring signals that vary rapidly with time.**
- Generates an output of -5V to +5V.**
- Module circuitry can withstand 240v rms at the input screw-terminals.**
- All 5B40 & 5B41 series modules are mix-and-match and Hot Swappable.**

APPLICATIONS

- Industrial signal conditioning**
- Industrial signal isolation**
- Industrial signal filtering**

PRODUCT OVERVIEW

The 5B Series represents an innovative generation of low cost, high performance plug-in signal conditioners. Designed for industrial applications, these modules incorporate highly reliable transformer-based isolation and automated surface-mount manufacturing technology. They are compact, economical components whose performance exceeds that available from more expensive devices. Combining 1500 V rms continuous isolation, +0.05% calibrated accuracy, small size and low cost, the 5B Series is an attractive alternative to expensive signal conditioners and in-house designs

All modules are potted and identical in pin-out and size (2.27" x 2.32" x 0.595"). They can be mixed and matched, permitting users to address their exact needs, and may be "hot swapped" without disturbing field wiring or power. The isolated input modules provide 0 to +5V or +5V outputs and accept J, K, T, E, R, S, N, or B type thermocouples.

These modules feature complete signal conditioning functions including 240 V rms input protection, filtering, chopper stabilized low drift +1 uV/oC amplification, 1500 V rms isolation, and sensor excitation when required.

All modules feature excellent common mode rejection and meet industrial transient surge withstand specifications.

FUNCTIONAL BLOCK DIAGRAM

Figure 1. 5B40 and 5B41 Functional Block Diagram

There are also a number of backplanes and mounting sockets which provide a complete signal conditioning solution for end users. Each backplane incorporates screw terminals for field wiring inputs and outputs and cold junction sensors for thermocouple applications.

These signal conditioners are designed to provide an easy and convenient solution to signal conditioning problems of both designers and end users in measurement and control applications. Typical uses include microcomputer-based measurement systems, standard data acquisition systems, programmable controllers, analog recorders and dedicated control systems. The 5 B series modules are ideally suited to applications where monitoring and control of temperature, pressure, flow, rotation and other analog signals are required.

The 5B Series modules and backplanes are approved by Factory Mutual (FM) and the 5B Series modules are approved by the Canadian Standards Association (CSA) for use in Class 1, Division 2, Groups A, B, C, and D locations. These approvals certify that the 5B Series is suitable for use in locations where a hazardous concentration of flammable gas may exist only under fault conditions of operation. Equipment of this category is called "nonincendive" and they need no special enclosures or other physical safeguards.

The 5B series modules and backplanes have been tested and passed the stringent heavy industrial requirements of the European Union's electromagnetic compatibility (EMC) directive – EN50082-1 and EN50081-2. When used according to installation directions (refer to 5B series User Manual), any errors caused by EMI/RFI interference will be less than 0.1% of the full scale 5B measurement range for field strengths up to 10 V/M and frequencies up to 1 GHz.

GENERAL DESCRIPTION

The 5B40 and 5B41 are wide-bandwidth single-channel signal conditioning modules that amplify, protect, filter and isolate analog input voltages. Both modules provide a 10 kHz bandwidth which ideally suits them to measuring signals that vary rapidly with time. Examples include pressure inside a plastic injection molding machine, strain on an automobile chassis during a crash test and vibrations on a machine bearing shortly before failure.

The 5B40 and 5B41 protect the computer side from damage due to field-side over-voltage faults. All models withstand 240V rms at their input terminals without damage thereby shielding computer-side circuitry from field-side over-voltage conditions. In addition, 5B40 and 5B41 Series modules are mix-and-match and hot swappable, so can be inserted or removed from any socket in the same backplane without disrupting system power.

A chopper-stabilized input amplifier provides low drift and stable gain. At the amplifier input, a stable, laser-trimmed zero-scale input offset is subtracted from the input signal to set the zero-scale value. For user convenience, the zero can be optionally factory-set to meet custom needs, This allows

suppression of a zero-scale input value many times larger than the total span for precise expanded-scale measurements.

A single-pole anti-aliasing filter resides at each modules input. A three-pole, low-pass filter in the output stage sets the bandwidth and yields optimal noise performance for accurate measurement of small signals in high electrical noise.

Signal isolation by transformer coupling uses a proprietary modulation technique for linear, stable and reliable performance. The differential input circuit on the field side is fully floating, eliminating the need for any input grounding. A demodulator on the computer side of the signal transformer recovers the original signal, which is then filtered and buffered to provide a low-noise, low-impedance output signal. The output common must be kept within 3Vdc of power common.

A series output switch eliminates the need for external multiplexing in many applications. The switch is turned on by an active-low enable input. If the switch is to be on at all times, the enable-input should be grounded to power common as it is on the 5B01 and 5B08 backplanes.

5B40 and 5B41 Models Available

Model	Input Range	Output Range	Model	Input Range	Output Range
5B40-01	-10 mV to +10 mV	-5 V to +5 V	5B41-01	-1 V to +1 V	-5 V to +5 V
5B40-02	-50 mV to +50 mV	-5 V to +5 V	5B41-02	-5 V to +5 V	-5 V to +5 V
5B40-03	-100 mV to +100 mV	-5 V to +5 V	5B41-03	-10 V to +10 V	-5 V to +5 V
5B40-04	-10 mV to +10 mV	0 V to +5 V	5B41-04	-1 V to +1 V	0 V to +5 V
5B40-05	-50 mV to +50 mV	0 V to +5 V	5B41-05	-5 V to +5 V	0 V to +5 V
5B40-06	-100 mV to +100 mV	0 V to +5 V	5B41-06	-10 V to +10 V	0 V to +5 V
5B40-Custom	*	*	5B41-07	-20 V to +20 V	-5 V to +5 V
			5B41-Custom	*	*

* Custom Input/Output ranges are available. Refer to configuration guide.

5B40 and 5B41 Specifications

Description	Model 5B40	Model 5B41
Input Ranges		
Standard Ranges	±10 mV to ±100 mV	±1 V to ±20 V
Custom Ranges	±5 mV to ±500 mV	±0.5 V to ±20 V
Output Ranges ($R_L > 50\text{ k}\Omega$)⁴	-5 V to +5 V or 0 V to +5 V	*
Accuracy²		
Initial @ +25°C	±0.05% Span ±10 μV RTI ±0.05% (V_Z^1)	±0.05% Span ±0.05% (V_Z^1)
Nonlinearity	±0.02% Span	*
Input Offset vs. Temperature	±1 $\mu\text{V}/^\circ\text{C}$	±20 $\mu\text{V}/^\circ\text{C}$
Output Offset vs. Temperature	±40 $\mu\text{V}/^\circ\text{C}$	*
Gain vs. Temperature	±25 ppm of Reading/ $^\circ\text{C}$	±50 ppm of Reading/ $^\circ\text{C}$
Input Bias Current	±3 nA	±0.2 nA
Input Resistance		
Power On	200 M Ω	650 k Ω
Power Off	40 k Ω	650 k Ω
Overload	40 k Ω	650 k Ω
Noise		
Input, 0.1 Hz to 10 Hz Bandwidth	0.4 μV rms	2 μV rms
Output, 100 kHz Bandwidth	10 mV peak-peak	*
Bandwidth, -3 dB	10 kHz	*
Output Rise Time, 10% to 90% Span	35 μs	*
Common-Mode Voltage (CMV)³		
Input-to-Output, Continuous	1500 V rms, maximum	*
Output-to-Power, Continuous	±3 V maximum	*
Transient	ANSI/IEEE C37.90.1-1989	*

Common-Mode Rejection (CMR)		
1 k Ω Source Imbalance, 50/60 Hz	100 dB	90 dB
Normal Mode Rejection	-3 dB @ 10 kHz	*
Input Protection		
Continuous	240 V rms, maximum	*
Transient	ANSI/IEEE C37.90.1-1989	*
Output Resistance	50 Ω	*
Voltage Output Protection	Continuous Short to Ground	*
Output Selection Time	6 μ s @ C _{load} = 0 to 2,000 pF	*
Output Enable Control		
Max Logic "0"	+1 V	*
Min Logic "1"	+2.5 V	*
Max Logic "1"	+36 V	*
Input Current "0"	0.4 mA	*
Power Supply Voltage	+5 V \pm 5%	*
Power Supply Current	30 mA	*
Power Supply Sensitivity, RTI	\pm 2 μ V/Vs%	\pm 0.4 mV/Vs%
Mechanical Dimensions	2.275" x 2.375" x 0.595" (57.8 mm x 59.1 mm x 15.1 mm)	*
Environmental		
Temperature Range		
Rated Performance	-25°C to +85°C	*
Operating	-40°C to +85°C	*
Storage	-40°C to +85°C	*
Relative Humidity	0 to 93% @ +40°C non-condensing	*
RFI Susceptibility	\pm 0.5% Span error @ 400 MHz, 5 Watt, 3 ft	*

* Specifications same as model 5B40.

¹ Vz is the nominal input voltage that results in a 0 V output.

² Includes the combined effects of repeatability, hysteresis, and nonlinearity and assumes R_L > 50 k Ω . Loads heavier than 50 k Ω will degrade nonlinearity and gain temperature coefficient.

³ The output common must be kept within \pm 3 V of power common.

Specifications subject to change without notice.

ESD CAUTION

ESD (electrostatic discharge) sensitive device. Electrostatic charges as high as 4000 V readily accumulate on the human body and test equipment and can discharge without detection. Although this product features proprietary ESD protection circuitry, permanent damage may occur on devices subjected to high energy electrostatic discharges. Therefore, proper ESD precautions are recommended to avoid performance degradation or loss of functionality.

NOTES

NOTES

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
