

Compact Waterproof Automotive Connectors

MX47 Series

CONNECTOR

MB-0216-1

September 2010

RoHS Compliant

JAE has developed the MX47 Series compact, high-density waterproof connector for automotive applications.

The MX47 Series utilizes a structure similar to the existing MX23A Series waterproof connector, but is more compact while maintaining a low height.

The applicable cable and performance is equivalent or higher than the MX23A, there is a guide key for secure mating, and pin terminals have Pb-free compliant complete plating. Superior vibration resistance makes the connector ideally suited for use in harsh environments such as the engine areas of both 2 and 4-wheeled vehicles.

Features

- 2.5mm horizontal pitch, 3.6mm vertical pitch, 3 row board to wire connector.
- 39 position, different keying available.
- Guide key for secure mating.
- Dowels on both side of connector for light press-fit to board for temporary holding.
- Socket terminal is a compact box type which is strong against external force.
- Retainer is a simple structure front cap type which is easy to attach.
- Pin terminal press-fit structure to prevent leakage of potting material.
- Slim type pin terminal with 0.5mm thickness and 1.0mm width.
