

## 5.0 mm Power Key Connectors (5.0 PKC) (Wire-to-Board)

### Product Facts

- Compact design with 19.4 mm mated height
- Power circuit connector with 5.0 mm contact centerline
- Wire-to-board connectors consisting of plug housings for wires and PCB header assemblies
- With a clear clicking sound, contact insertions can be made easier. The double lock plate provides for complete loading of contacts
- Locking levers are surrounded by walls, which protect levers and prevent tangling with wires
- Connector is designed to release bubbles created by the process of potting (PC board coating)
- Housing lances also help prevent tangling of wired contacts
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association, File No. LR7189 

5.0 mm Power Key Connectors are for power circuits of home appliances, especially targeting gas appliances. The connector features four kinds of keying per housing.

Only color-coding of housings limited the efficiency of blind mating where you could not see connectors. However, the new keying mechanism not only improves assembly efficiency but also helps prevent mismatching.

Part numbers involved can be reduced so that purchasing and stock level control can be made simpler.

### Performance Characteristics

**Voltage Rating**—300 VAC<sup>1</sup>  
**Current Rating**—10A max.<sup>2</sup>  
**Operating Temperature**—  
 -30°C ~ +105°C  
**Applicable Wire**—24-16 AWG  
**Applicable PC Board Thickness**—  
 1.6 mm

- 1 Excludes header tyne round space. Usable for 150 VAC applications when the round dimensions are 3 mm or less.
- 2 Specified values vary according to the number of contacts and the wire used. The 10 A maximum value applies to 16 AWG wire used with 2 contacts.

**.093 [2.36] Commercial Pin and Socket Connectors**

**Product Facts**

- Polarized
- Cavity identification
- Low contact-mating force
- Dual locking lances
- Detent and positive locking
- Contacts available in brass and phosphor bronze with tin and gold plating
- Panel mounting and free-hanging styles
- “F” crimp contacts
- Applicator and hand tool available
- Economical commercial-grade connectors
- Compatible with high-speed application machinery and competitive soft shells
- Wire range 24 to 14 AWG [0.2 to 2 mm<sup>2</sup>]
- Accepts wires with insulation diameters as large as .180 [4.57]
- Housings available in 1 to 15 positions
- .093 plug and receptacle housings accept pin or socket contacts. The preferred convention is to use socket contacts with receptacle housings
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association, File No. LR 7189 

**Performance Characteristics**

The .093 Commercial Pin and Socket Connectors performance characteristics found on pages 143-144 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

**Thermal Shock**— -55°C to +105°C

**Temperature-Humidity Cycling**— +25°C to +65°C at 90–95% RH

**Corrosion**—48 hr. at 5% salt concentration

**Vibration**—10-55-10 cycles per minute at .06 [1.52] total excursion

**Physical Shock**—18 shocks, 50 Gs sawtooth in 11 milliseconds

**Durability**—50 mating cycles

**Dielectric Withstanding Voltage**— 1.0 kVAC

**Insulation Resistance**— 1000 megohms min. initial

**Voltage Rating**—250 V AC or DC

**Connector Mating**— 2.5 lb. [11.1 N] max. per contact

**Connector Unmating**— 1.5 lb. [6.7 N] min. per contact

**Contact Retention**— 10 lb. [44.5 N] min.

**.093 [2.36] Commercial Pin and Socket Connectors** (Continued)

**Performance Characteristics** (continued)

**Maximum Current**—Maximum current rating of .093 Commercial Pin and Socket Connectors is limited by the maximum operating temperature of the housings which is 105°C including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current-carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

**Wire-to-Wire**

**.093 Commercial Pin and Socket Connectors — Calculated Current Table**

| Number of Circuits | Wire AWG |       |       |      |      |      |
|--------------------|----------|-------|-------|------|------|------|
|                    | 14       | 16    | 18    | 20   | 22   | 24   |
| 2                  | 13.00    | 12.00 | 11.00 | 8.00 | 6.00 | 6.00 |
| 3                  | 13.00    | 11.00 | 10.00 | 8.00 | 6.00 | 5.00 |
| 4 In-Line          | 11.00    | 10.00 | 9.00  | 7.00 | 5.00 | 4.00 |
| 4 Matrix           | 11.00    | 10.00 | 9.00  | 7.00 | 5.00 | 4.00 |
| 5                  | 10.00    | 9.00  | 8.00  | 6.00 | 5.00 | 4.00 |
| 6                  | 10.00    | 9.00  | 8.00  | 6.00 | 4.00 | 4.00 |
| 9                  | 9.00     | 7.00  | 6.00  | 5.00 | 4.00 | 3.00 |
| 12                 | 8.00     | 7.00  | 6.00  | 4.00 | 3.00 | 3.00 |
| 15                 | 7.00     | 6.00  | 5.00  | 4.00 | 3.00 | 3.00 |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested and this chart contains interpolated and extrapolated values.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

| AWG | Min. Length (in.) | AWG | Min. Length (in.) |
|-----|-------------------|-----|-------------------|
| 30  | 2.6               | 18  | 9.4               |
| 28  | 3.2               | 16  | 11.3              |
| 26  | 4.1               | 14  | 13.7              |
| 24  | 5.1               | 12  | 16.4              |
| 20  | 7.8               | 10  | 19.3              |

**Note:** If wire lengths used are less than those listed above, the current-carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

**Termination Resistance/Contact Crimp Tensile Force**

| Wire Size |                 | Termination Resistance |                                   | Contact Crimp Tensile Force |       |
|-----------|-----------------|------------------------|-----------------------------------|-----------------------------|-------|
| AWG       | mm <sup>2</sup> | Test Current (Amps)    | Resistance Milliohms (Max. Init.) | Force (Min.)                |       |
|           |                 |                        |                                   | lbs.                        | N     |
| 24        | 0.2             | 2.0                    | 4.0                               | 8                           | 35.6  |
| 22        | 0.3–0.4         | 3.0                    | 4.0                               | 10                          | 44.5  |
| 20        | 0.5–0.6         | 4.5                    | 4.0                               | 15                          | 66.7  |
| 18        | 0.8–0.9         | 6.0                    | 3.5                               | 25                          | 111.2 |
| 16        | 1.25–1.4        | 8.0                    | 3.5                               | 25                          | 111.2 |
| 14        | 2               | 10.0                   | 3.0                               | 30                          | 133.4 |

**Note:** This is the total resistance between wire crimps of a mated pin and socket.

**Engineering Notes**

---

**Commercial MATE-N-LOK Connectors**

**Product Facts**

- Fully polarized nylon housings
- Easy cavity identification
- Locking devices are integral part of design. Connector halves will hold together under severe conditions of vibration and shock
- Built-in contact stabilization and self-aligning features
- Hot side egg-crate design for safety
- Precision molded to exacting tolerances
- Contacts accept a wire size range of 30-14 AWG [.05-2.0 mm<sup>2</sup>]
- Keying plug available
- “Clean” design contact—no sharp projections to impede insertion or damage housings
- Low insertion/extraction forces
- Contacts available in pre-tin or gold over nickel plated to fit the application requirements
- Wire-to-PC Board capability using pin or socket headers
- Solderability—Headers meet MIL-STD 202 method 208
- Four circuit PC Board-to-PC Board capability available by mating vertical socket header with either vertical, right-angle or surface mount pin header
- Four circuit insulation displacement connector (IDC) available
- Ultraviolet (UV) stable housings available in 1, 2 and 3 circuit
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189A

**Performance Characteristics**

The Commercial MATE-N-LOK Connector performance characteristics found on pages 151-152 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

**Dielectric Withstanding Voltage**—1.5 KVAC between adjacent circuits

**Insulation Resistance**—500 megohms minimum initial between adjacent circuits

**Voltage Rating**—250 V AC or DC

**Connector Mating**—4 lb. max. per circuit

**Connector Unmating**—0.7 lb. min. per circuit

**Contact Retention**—15 lb. min. per contact

**Durability**—50 cycles, mating and unmating

**Performance Characteristics** (Continued)

**Maximum Current**—Maximum current rating of Commercial MATE-N-LOK connectors is limited by the maximum operating temperature of the housings which is 105°C including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current-carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Printed Wiring Board Conductor Size**—The finished trace conductor width and thickness should be maximized to allow for the greatest current-carrying capacity and heat dissipation.

Commercial MATE-N-LOK connectors also will withstand the following tests:

**Vibration**—10-55-10 cycles per minute at .06 inch total excursion

**Physical Shock**—18 drops, 50 G sawtooth at 11 milliseconds

**Housing Panel Mount Retention**—40 lb. min. 3 and 4 circuit  
65 lb. min. 6, 9, 12, and 15 circuit

**Housing Lock Strength with Positive Locking Devices Engaged**—25 lb. min.

**Thermal Shock**—-55°C to +85°C

**Temperature-Humidity Cycling**—25°C to 65°C at 95 RH

**Corrosion**—48 hr. at 5% salt concentration

**Wire-to-Wire**

**Motor Mount Calculated Current Table**

| Number of Circuits | Wire Gauge |       |      |      |      |      |      |
|--------------------|------------|-------|------|------|------|------|------|
|                    | 14         | 16    | 18   | 20   | 22   | 24   | 30   |
| 6                  | 13.00      | 10.50 | 9.50 | 7.50 | 6.00 | 5.00 | 2.50 |
| 8                  | 12.00      | 9.50  | 8.50 | 7.00 | 5.50 | 4.50 | 2.50 |
| 10                 | 11.00      | 9.00  | 8.00 | 6.50 | 5.00 | 4.50 | 2.00 |
| 12                 | 10.50      | 8.50  | 7.50 | 6.00 | 5.00 | 4.00 | 2.00 |
| 16                 | 9.50       | 8.00  | 7.00 | 5.50 | 4.50 | 3.50 | 2.00 |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested, and this chart contains interpolated and extrapolated values.

**Calculated Current Table**

| Number of Circuits | Wire Gauge |       |       |       |      |      |      |
|--------------------|------------|-------|-------|-------|------|------|------|
|                    | 14         | 16    | 18    | 20    | 22   | 24   | 30   |
| 1                  | 19.00      | 15.50 | 14.00 | 11.00 | 9.00 | 7.50 | 4.00 |
| 2                  | 18.00      | 14.50 | 13.00 | 10.50 | 8.50 | 7.00 | 4.00 |

| 4                  | 15.00      | 12.50 | 11.00 | 9.00  | 7.00 | 6.00 | 3.00 |
| 6 Matrix           | 13.00      | 10.50 | 9.50  | 7.50  | 6.00 | 5.00 | 3.00 |
| 8                  | 12.50      | 10.50 | 9.00  | 7.50  | 6.00 | 5.00 | 2.50 |
| 9                  | 11.00      | 9.00  | 8.00  | 6.50  | 5.50 | 4.50 | 2.50 |
| 10                 | 12.00      | 9.50  | 8.50  | 7.00  | 5.50 | 4.50 | 2.50 |
| 12                 | 10.50      | 8.50  | 7.50  | 6.00  | 5.00 | 4.00 | 2.00 |
| 15                 | 9.50       | 8.00  | 7.00  | 5.50  | 4.50 | 4.00 | 2.00 |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested, and this chart contains interpolated and extrapolated values.

**Wire-to-Board**

Due to the vast differences in trace geometry and printed circuit board configurations, we are unable to provide a separate current carrying chart for our printed circuit board header products. However, the above Wire-to-Wire charts may be used as a guideline for headers if the trace width and thickness is equal to the listed wire gauge. For vertical headers, only 95% of the Wire-to-Wire value should be used. For right-angle headers, only 75% of the Wire-to-Wire value should be used. The chart values are only a tool for connector selection and will require the customer to fully test their application.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

| AWG | Min. Length (in.) | AWG | Min. Length (in.) |
|-----|-------------------|-----|-------------------|
| 30  | 2.6               | 18  | 9.4               |
| 28  | 3.2               | 16  | 11.3              |
| 26  | 4.1               | 14  | 13.7              |
| 24  | 5.1               | 12  | 16.4              |
| 20  | 7.8               | 10  | 19.3              |

**Note:** If wire lengths used are less than those listed above, the current carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

**Termination Resistance/Contact Crimp Tensile Force**

| Wire Size |                 | Termination Resistance |                                   | Contact Crimp Tensile Force |     |
|-----------|-----------------|------------------------|-----------------------------------|-----------------------------|-----|
| AWG       | mm <sup>2</sup> | Test Current (Amps)    | Resistance Milliohms (Max. Init.) | Force (Min.) lbs.           | N   |
| 30        | .05             | .50                    | 4.00                              | 2                           | 9   |
| 28        | .08             | .75                    | 3.50                              | 3                           | 13  |
| 26        | .12             | 1.00                   | 3.50                              | 7                           | 31  |
| 24        | .2              | 1.5                    | 3.50                              | 10                          | 44  |
| 22        | .3              | 3                      | 3.50                              | 15                          | 67  |
| 20        | .5              | 4.5                    | 3.00                              | 20                          | 89  |
| 18        | .8              | 6                      | 3.00                              | 30                          | 133 |
| 16        | 1.2             | 8                      | 2.75                              | 30                          | 133 |
| 14        | 2.0             | 10                     | 2.75                              | 35                          | 156 |

**Note:** This is the total resistance between wire crimps of a mated pin and socket.

**Recommended Panel Cutout for Panel Mount Socket Housing**

View is from socket housing entry side

**Mounting Information**

1. Recommended panel thickness—.025-.065 [.635-1.65].
2. Both locking legs are to be squeezed together and the housing is to be inserted "straight-in", as opposed to a rocking manner.
3. The panel should be punched so that the housing enters the panel in the same direction as the punch.
4. The panel must not have any material (paint, porcelain, etc.) applied in the mounting hole area that would decrease the retention of the housing in the panel.
5. If the two items above are not complied with, the "A" dimension should be reduced .020 [5.08] for proper retention.

Standard Density

Commercial MATE-N-LOK Connectors  
.200 [5.08] Centerline

**.140 MATE-N-LOK Connectors (Large Insulation), .240 Centerline**

**Product Facts**

- Available in 2, 3 and 9 circuit configurations for panel mounting; 4 and 9 circuit configurations for free-hanging applications
- Standard natural nylon housings
- Housings fully polarized
- Contacts fully protected in housings
- Contacts accept wire size range 20-10 AWG [1.5-5.0 mm<sup>2</sup>] with insulation diameters from .100 [2.54] to .180 [4.57]
- Low insertion/extraction forces
- Dual locking lances provide optimum contact stability
- Extraction tool removes both pins and sockets
- Contacts are on .240 [6.09] centerline spacing
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189A

**Performance Characteristics**

The .140 MATE-N-LOK Connector performance characteristics found on this page are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

**Dielectric Withstand Voltage**—3.0 KVAC between adjacent circuits

**Insulation Resistance**—1000 megohms minimum initial between adjacent circuits

**Voltage Rating**—600 V AC or DC

**Connector Mating**—4.5 lb. max. per circuit

**Connector Unmating**—8 lb. min. per circuit

**Contact Retention**—30 lb. min.

**Durability**—25 cycles, mating and unmating

**Thermal Shock**—-55°C to +85°C

**Temperature-Humidity Cycling**—25°C to 65°C at 95 RH

**Maximum Current**—Maximum current rating of .140 MATE-N-LOK Connectors is limited by the maximum operating temperature of the housings which is 105°C and the temperature rise of the contacts which is 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current-carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Note:** This is the total resistance between wire crimps of a mated pin and socket.

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

**Wire-to-Wire**

**.140 MATE-N-LOK Connector Calculated Current Table**

| Number of Circuits | Wire AWG |       |       |       |       |       |
|--------------------|----------|-------|-------|-------|-------|-------|
|                    | 10       | 12    | 14    | 16    | 18    | 20    |
| 2                  | 28.00    | 23.00 | 18.50 | 15.00 | 13.50 | 10.50 |
| 3                  | 25.00    | 21.00 | 17.00 | 13.50 | 12.00 | 9.50  |
| 9                  | 18.50    | 15.00 | 12.00 | 10.00 | 9.00  | 7.00  |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested, and this chart contains interpolated and extrapolated values.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

**Note:** If wire lengths used are less than those listed, the current carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

## Universal MATE-N-LOK Connectors

### Product Facts

- Pins and sockets can be intermixed in the same housing
- Positive polarization
- Rear cavity identification
- Contacts completely enclosed in housings
- Positive locking housings
- Insulation capability to .200 [5.08] diameter
- Removable, crimp snap-in contacts
- Low contact mating force
- Contacts accept 30-10 AWG [.05-5.0 mm<sup>2</sup>] wire sizes
- Contacts available with pre-tin or gold plating
- Dual locking lances provide optimum contact stability
- Panel mount or free-hanging
- Mate with Universal MATE-N-LOK II Housings
- Available in UL 94V-0 flame retardant material. Meets the material requirements of table 25.1 of U.L. Standard 1410 (television receivers and video products)
- Not for interrupting current
- Harness to PC Board capability using pin or socket headers
- Pin and socket headers are available in both vertical and right-angle style
- Solderability—headers meet MIL-STD 202 Method 208
- Contacts are on .250 [6.35] centerline spacing
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association, File No. LR 7189 
- Passed test by VDE under their Registration Number 3980/Continuous Surveillance 

### Performance Characteristics

The Universal MATE-N-LOK Connector performance characteristics found on pages 169-170 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

**Dielectric Withstanding Voltage**—5.0 KVAC or 5.0 KVDC between adjacent circuits

**Insulation Resistance**—1000 megohms minimum initial between adjacent circuits

**Voltage Rating**—600 V AC or DC

**Contact Insertion Force**—5.0 lb. max. per contact

**Contact Retention**—15 lb. min. per contact

**Durability**—50 cycles, mating and unmating

**Universal MATE-N-LOK Connectors** (Continued)

**Performance Characteristics** (Continued)

**Maximum Current**—Maximum current rating of Universal MATE-N-LOK connectors is limited by the maximum operating temperature of the housings which is 125°C for 94V-2 housings and 120°C for 94V-0 housings including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Printed Wiring Board Conductor Size**—The finished trace conductor width and thickness should be maximized to allow for the greatest current carrying capacity and heat dissipation.

Universal MATE-N-LOK connectors also will withstand the following tests:

**Vibration**—10-55-10 cycles per minute at .06 inch total excursion

**Physical Shock**—18 drops, 50 G sawtooth at 10 milliseconds

**Housing Panel Retention**—75 lb. min.

**Housing Lock Strength**—30 lb. min.

**Thermal Shock**—-55°C to +85°C

**Temperature-Humidity Cycling**—25°C to 65°C at 95 RH

**Corrosion**—48 hr. at 5% salt concentration

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested, and this chart contains interpolated and extrapolated values.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

| AWG | Min. Length (in.) | AWG | Min. Length (in.) |
|-----|-------------------|-----|-------------------|
| 30  | 2.6               | 18  | 9.4               |
| 28  | 3.2               | 16  | 11.3              |
| 26  | 4.1               | 14  | 13.7              |
| 24  | 5.1               | 12  | 16.4              |
| 20  | 7.8               | 10  | 19.3              |

**Note:** If wire lengths used are less than those listed above, the current carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

**Wire-to-Board**

Due to the vast differences in trace geometry and printed circuit board configurations, we are unable to provide a separate current carrying chart for our printed circuit board header products. However, the above Wire-to-Wire charts may be used as a guideline for headers if the trace width and thickness is equal to the listed wire gauge. For vertical headers, only 95% of the Wire-to-Wire value should be used. For right-angle headers, only 75% of the Wire-to-Wire value should be used. The chart values are only a tool for connector selection and will require the customer to fully test their application.

**Termination Resistance/Contact Crimp Tensile Force**

| Wire Size |                 | Termination Resistance |                                   | Contact Crimp Tensile Force |     |
|-----------|-----------------|------------------------|-----------------------------------|-----------------------------|-----|
| AWG       | mm <sup>2</sup> | Test Current (Amps)    | Resistance Milliohms (Max. Init.) | Force (Min.) lbs.           | N   |
| 30        | .05             | —                      | —                                 | 2                           | 9   |
| 28        | .08             | —                      | —                                 | 3                           | 13  |
| 26        | .12             | —                      | —                                 | 6                           | 27  |

<sup>1</sup>Duplex Finish — Plated with .000030 [.000762] min. gold in mating area, matte tin on solder tail end over .000050 [.00127] min. nickel underplate on entire contact.

<sup>2</sup>Universal MATE-N-LOK Plug and Cap housings accept pin or socket contacts. Use the appropriate contacts in the Plug housing as required by the mating component.

<sup>3</sup>Housing material has 125°C temperature rating.

<sup>4</sup>Black in color.

<sup>5</sup>Tool Removable

<sup>6</sup>UV Resistant housing material available.

<sup>7</sup>European glow wire housing material available.

**Note: All part numbers are RoHS Compliant.**

<sup>1</sup>Socket Contact — .010 [.254] stock thickness

<sup>2</sup>Gold Finish — Plated with .000030 [.000762] min. gold in mating area and inside wire barrel over .000050 [.00127] min. nickel underplate on entire contact.

<sup>3</sup>Select Gold Finish — Plated with .000030 [.000762] min. gold in mating area over .000050 [.00127] min. nickel underplate on entire contact.

<sup>4</sup>Recommended for predominant use of 14 AWG wire.

<sup>5</sup>There is no insulation barrel on this contact. Insulation maximum diameter is limited by the housing.

<sup>6</sup>HDM Applicator part number ending in -1 is used on AMPOMATOR CLS Machine with T or G Terminators, -2 is used on AMP-O-LECTRIC Model K Machine, -3, -4 & -6 are used on AMP-O-LECTRIC Model G Machine. See pages 207-210 for further information.

<sup>7</sup>Hand Tool No. **91508-1** is for wire size 20-18 AWG. Hand Tool No. **91506-1** is for wire size 16-14 AWG. Hand Tool No. **69710-1** use die set No. **58380-1** for 12 AWG and No. **58380-2** for 10 AWG.

**Note:** Phosphor bronze material contacts should be used in high temperature/humidity cycling applications.

**Note:** All part numbers are RoHS Compliant.

<sup>1</sup>Gold Finish—Plated with .000030 [.000762] min. gold in mating area and inside wire barrel over .000050 [.00127] min. nickel underplate on entire contact.

<sup>2</sup>Select Gold Finish—Plated with .000030 [.000762] min. gold in mating area over .000050 [.00127] min. nickel underplate on entire contact.

<sup>3</sup>HDM Applicator part number ending in -1, is used on AMPOMATOR CLS Machine with T or G Terminators, -2 is used on AMP-O-LECTRIC Model K Machine, -4 & -6 are used on AMP-O-LECTRIC Model G Machine. See pages 207-210 for further information.

<sup>4</sup>Hand Tool No. **91508-1** for wire size 20-18 AWG. Hand Tool No. **91506-1** for wire size 16-14 AWG.

**Notes:**

1. Split pins recommended for use in housings having 6, 9, 12 and 15 circuits to reduce mating force.
2. Phosphor bronze material contacts are available for use in high temperature/humidity cycling applications, consult Tyco Electronics.

**Grounding Pins**

(.100 [2.54] longer than standard pin)  
(Mate first, break last, not for interrupting current)

<sup>1</sup>There is no insulation barrel on this contact. Insulation maximum diameter is limited by the housing.

<sup>2</sup>HDM Applicator part number ending in -1 is used on AMPOMATOR CLS Machine with T or G Terminators, -2 is used on AMP-O-LECTRIC Model K Machine, -3 & -6 are used on AMP-O-LECTRIC Model G Machine. See pages 207-210 for further information.

**Programmable Connector Contact**

(Socket with 110 Series Special FASTON Tab)

**Material and Finish**

Brass, pre-tin

**Part Number**  
**350877-1**

**Note:** This contact will accept a 110 Series FASTON Receptacle—Part No. **350871-1** (strip form) allowing simple field wiring or wiring changes.

**Note:** All part numbers are RoHS Compliant.

**Notes:**

1. Recommended panel thickness — .030-.090 [.762-2.286]. Panel must be punched so that housing enters panel in same direction as the punch.
2. Optional — Do not remove this material when keying cap housing to panel.
3. Circuit #1 location when using panel keying with 6, 9, 12 and 15 circuit Matrix housings.
4. Circuit #1 location when using panel keying with 2, 3, 4, 5, 6, 8 and 10 circuit In-Line housings.
5. .175 [4.45] dimension is .125 [3.18] for 6, 8 and 10 circuit In-Line housings.

**Keying Plugs**

IS 408-3320

**Part Numbers**

UL94V-2 Nylon material, natural color — 1-640415-1  
UL94V-0 Nylon material — 1-640415-0

**Note:** Keying plug snaps into plug or cap housing

**Plug Housing Strain Reliefs**

IS 408-3320

**2, 3, 4, 5, 6 and 8 Circuit, In-Line**

**Part Numbers**

UL94V-2 Nylon material, natural color — 1-350589-0  
UL94V-0 Nylon material — 350811-1

**6, 9, 12 and 15 Circuit, Matrix**

**Part Numbers**

UL94V-2 Nylon material, natural color — 1-350590-0  
UL94V-0 Nylon material — 350812-1

**Note:** Strain relief part number represents one half of a strain relief. Two strain reliefs required per housing.

**Note:** All part numbers are RoHS Compliant.

**Notes:**

1. Cable clamping insert comes attached to strain relief. It can be used to provide additional adjustment for small wire bundles or discarded.
2. Insert to be positioned as shown by dotted lines.
3. Strain relief part number represents one-half of a strain relief. Two strain reliefs required per housing.
4. Must use cap housing adapters when attaching strain reliefs to a cap housing. Two adapters required per housing.
5. Strain reliefs for 6 and 8 circuit In-Line fits plug housings only.

**Note:** All part numbers are RoHS Compliant.

Standard Density

Universal MATE-N-LOK Connectors  
.250 [6.35] Centerline

**Universal MATE-N-LOK Flanged Cap Housings with Twist and Lock Feature**

**Product Facts**

- Available in a 6, 9, and 12 circuit design
- Designed for household appliances where a bulkhead connector system is needed in conjunction with foam-in insulation
- Mates with standard Universal MATE-N-LOK plug housings (page 174)
- Accepts Universal MATE-N-LOK pin and socket contacts (page 167)
- Designed to utilize the Splash Proof/Sealed Universal MATE-N-LOK seals for additional sealing protection (pages 174-175)

**Material and Finish**

**Housing**—Nylon, UL 94V-0 or UL 94V-2 rated

**Contacts**—Phosphor Bronze or Brass

**Plating**—Pre-tin or Gold

**Related Product Data**

**Contacts**—pages 172-173

**Plug Housings**—page 174

**Seals**—page 180

**Recommended Panel Cutout  
(for 6 and 9 Pos. Housings)**

**Notes:**

1. Recommended Panel Thickness: 0.76-2.29 [.030-.090]
2. Panel must be punched so that the housing enters the panel in the same direction as the punch.
3. Asymmetrical panel cutout provides polarization for Pin 1 location.

| Number of Circuits | Cap Housing Part Numbers |          |
|--------------------|--------------------------|----------|
|                    | UL 94V-0                 | UL 94V-2 |
| 6                  | 794760-1                 | 794714-1 |
| 9                  | 794761-1                 | 794715-1 |
| 12                 | 794762-1                 | 794716-1 |

**Note:** All part numbers are RoHS Compliant.

## Universal MATE-N-LOK Sealed Bulkhead Connectors

### Product Facts

- Bulkhead mount Universal MATE-N-LOK connector that facilitates sealed panel mounting and works with existing Universal MATE-N-LOK seals to provide a fully-sealed interconnection system
- Available in 4, 6, 9 and 12 positions
- Sealed, flange mount design
- Mates to standard Universal MATE-N-LOK plug housings
- Accepts standard Universal MATE-N-LOK contacts
- Works with standard Universal MATE-N-LOK connector interface and wire seals
- Anti-rotation feature aids installation
- Rear mount flange design enables use in wire harnesses
- Pins and sockets can be intermixed in the same housing
- UL Recognized, File No. E28476
- CSA Certified, File No. 1030930

### Applications

- Vending Machines
- Industrial Machinery
- Lighting
- HVAC Equipment

### Performance Characteristics

**Dielectric Withstanding Voltage**—5.0 KVAC or 5.0 KVDC between adjacent circuits

**Insulation Resistance**—1000 megohms minimum initial between adjacent circuits

**Voltage Rating**—600 V AC or DC

**Durability**—50 cycles, mating and unmating

### Technical Documents

## Universal MATE-N-LOK Sealed Connectors

### Splash Proof Seals

#### Product Facts

- Economical splash proof/immersion sealed connector system
- No design changes to existing Universal MATE-N-LOK product
- Existing applications utilizing Universal MATE-N-LOK connectors can be upgraded to a splash proof system
- Utilizes two wire seals and one interface seal
- Wire range is 20-14 AWG [.5-2.0] with insulation diameter range .060-.130 [1.52-3.30]
- .110-.130 [2.79-3.30] insulation diameter passed European IP sealing level 5/6 + 7 (swirling dust/immersion to 1 meter for 30 minutes)
- .060-.110 [1.52-2.79] insulation diameter passed European IP sealing level 5/5 + 7 (swirling dust/heavy seas)
- Universal MATE-N-LOK II keying plug can be used to seal unused circuits
- Primary application is for wire-to-wire; wire-to-board application must use a closed bottom header

#### Material

Silicone rubber, blue color

<sup>1</sup>Gold Finish—Plated with .000030 [.000762] min. gold in mating area and inside wire barrel over .000050 [.00127] min. nickel underplate on entire contact.  
<sup>2</sup>Select Gold Finish—Plated with .000030 [.000762] min. gold in mating area over .000050 [.00127] min. nickel underplate on entire contact.  
<sup>3</sup>HDM Applicator part number ending in -1, is used on AMPOMATOR CLS Machine with T or G Terminators, -2 is used on AMP-O-LECTRIC Model K Machine, -4 & -6 are used on AMP-O-LECTRIC Model G Machine. See pages 207-210 for further information.

**Notes:**

1. Split pins recommended for use in housings having 6, 9, 12 and 15 circuits to reduce mating force.
2. Phosphor bronze material contacts are available for use in high temperature/humidity cycling applications, consult Tyco Electronics.
3. 18-24 AWG contacts (page 166) can be used with splash proof seals if insulation diameter range is .060-.100 [1.52-2.54].

**Universal MATE-N-LOK II Keying Plug/Splash Proof Sealing Plug**

IS 408-3392

**Part Number**  
UL94V-0 Nylon material—770377-1

**Contact Extraction Tool**  
Part No. 318851-1  
IS 408-4371

**Contact Insertion Tool (For inserting contacts applied to small diameter wire)**  
Part No. 91002-1  
IS 408-7347

**Note:** All part numbers are RoHS Compliant.

**Universal MATE-N-LOK Connectors**

**PC Board Vertical Pin Headers**

.250 [6.35] Centerline spacing

**Material**

**Housing**—

UL94V-2 Nylon, natural color  
UL94V-0 Nylon

**Contacts**—Phosphor bronze

Solder tail diameter .062 [1.57]

**Note:** Header Housings on pages 182-185 are available in **colors** listed on page 188. Call Technical Support for exact Part Numbers.

<sup>1</sup>Duplex Finish—Plated with .000030 [.000762] min. gold in mating area, matte tin on solder tail end over .000050 [.00127] min. nickel underplate on entire contact.  
<sup>2</sup>Use Standard Tail for .062 [1.57] thick PC Board. <sup>3</sup>Use Long Tail for .125 [3.18] thick PC Board.  
<sup>4</sup>Black in color. <sup>5</sup>No drain holes, used w/ seals, page 180. **Note: All part numbers are RoHS Compliant.**

**Universal MATE-N-LOK Connectors (Continued)**

**PC Board Vertical Socket Headers**

.250 [6.35] Centerline spacing

**Material**

**Housing**—

UL94V-2 Nylon, natural color  
UL94V-0 Nylon

**Contacts**—Phosphor bronze

Solder tail diameter .062 [1.57]

## Universal MATE-N-LOK Circular Connectors

### Product Facts

- Unique product designed to accommodate the specific needs of the lighting industry
- Circular design allows the connector to pass through 7/8 inch knock-out holes in electrical fixtures and boxes
- 6-position accommodates most major electrical industry requirements
- Universal MATE-N-LOK connector centerline spacing maintains UL and CSA approvals
- Uses standard Universal MATE-N-LOK contacts and application tooling
- Positive polarized housing helps prevent incorrect mating
- UL Recognized, File No. E28476 
- CSA Certified, File No. LR7189 

### Applications

- Primary applications are in the Lighting, Vending, and Appliance industries
- Applications where use of a completed harness that will pass through a 7/8 inch knock-out is required
- Provides the capability to quickly disconnect individual fixtures from sensitive environmental areas and perform maintenance at other sites
- Not for interrupting current

### Performance Characteristics

- Voltage**—600 V AC or DC
- Current**—20 amps maximum per UL-1977 (6 position, fully energized)
- Dielectric Withstanding Voltage**—5 KVAC or KVDC
- Insulation Resistance**—1000 M $\Omega$  max. between adjacent circuits
- Durability**—50 cycles mating and unmating
- Contact Retention**—15 lb. minimum per contact

Universal MATE-N-LOK Connectors — Available in Colors  
.250 [6.35] Centerline

## Universal MATE-N-LOK II Connectors

### Product Facts

- High reliability
- For use where repair or replacement would be difficult
- Pins and sockets can be intermixed in the same housing
- Available in 2 through 15 circuit sizes for free-hanging or panel mount wire-to-wire connection
- Mate with standard Universal MATE-N-LOK Housings and PC Board Headers
- Uses standard Universal MATE-N-LOK panel cutouts and strain reliefs
- Polarized housings available in UL94V-0 flammability rated material
- Enclosed contacts for shock protection
- F-Crimp terminals accept 30-10 AWG [.05-5.0 mm<sup>2</sup>] wire sizes
- Contacts available in strip and loose form
- Lanceless contacts for tangle-free handling
- Insulation capability to .200 [5.08] diameter
- Connector design provides for complete contact insertion
- Three-point stabilization precisely controls contact alignment, minimizing stubbing
- Tin or duplex gold plated contacts
- Contacts are on .250 [6.35] centerline spacing
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association, File No. LR 7189 
- Passed test by VDE under their Registration Number 3980/Continuous Surveillance 

### Performance Characteristics

The Universal MATE-N-LOK II Connector performance characteristics found on pages 189-190 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

**Dielectric Withstanding Voltage**—5.0 KV AC or DC between adjacent circuits initially

**Insulation Resistance**—1000 megohms minimum between adjacent circuits

**Voltage Rating**—600 V AC or DC

**Connector Mating**—Split Pin—1.5 lb. max. per circuit

**Connector Unmating**—Split Pin—.5 lb. min. per circuit

**Contact Insertion Force**—3.0 lb. max. per contact unassembled

**Contact Retention**—35 lb. min. per contact

**Durability**—50 cycles, mating and unmating

**Universal MATE-N-LOK II Connectors** (Continued)

**Performance Characteristics** (Continued)

**Maximum Current**—Maximum current rating of Universal MATE-N-LOK II connectors is limited by the maximum operating temperature of the housings which is 120°C including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

Universal MATE-N-LOK II connectors also will withstand the following tests:

**Vibration**—10-55-10 cycles per minute at .06 inch total excursion

**Physical Shock**—18 drops, 50 g sawtooth at 10 milliseconds

**Housing Panel Retention**—75 lb. min.

**Housing Lock Strength**—35 lb. min.

**Thermal Shock**—-55°C to +85°C

**Temperature-Humidity Cycling**—25°C to 65°C at 95 RH

**Corrosion**—48 hr. at 5% salt concentration

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

**Wire-to-Wire**

**Calculated Current Table**

| Number of Circuits | Wire Gauge |       |       |       |       |       |      |      |      |      |
|--------------------|------------|-------|-------|-------|-------|-------|------|------|------|------|

| 15                 | 12.00      | 11.50 | 10.00 | 8.50  | 7.50  | 6.00  | 4.50 | 4.00 | 3.00 | 2.00 |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested, and this chart contains interpolated and extrapolated values.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

| AWG | Min. Length (in.) | AWG | Min. Length (in.) |
|-----|-------------------|-----|-------------------|
| 30  | 2.6               | 18  | 9.4               |
| 28  | 3.2               | 16  | 11.3              |
| 26  | 4.1               | 14  | 13.7              |
| 24  | 5.1               | 12  | 16.4              |
| 20  | 7.8               | 10  | 19.3              |

**Note:** If wire lengths used are less than those listed above, the current carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

**Wire-to-Board**

Due to the vast differences in trace geometry and printed circuit board configurations, we are unable to provide a separate current carrying chart for our printed circuit board header products. However, the above Wire-to-Wire charts may be used as a guideline for headers if the trace width and thickness is equal to the listed wire gauge. For vertical headers, only 95% of the Wire-to-Wire value should be used. For right-angle headers, only 75% of the Wire-to-Wire value should be used. The chart values are only a tool for connector selection and will require the customer to fully test their application.

**Termination Resistance/Contact Crimp Tensile Force**

| Wire Size |                 | Termination Resistance |                                   | Contact Crimp Tensile Force |     |
|-----------|-----------------|------------------------|-----------------------------------|-----------------------------|-----|
| AWG       | mm <sup>2</sup> | Test Current (Amps)    | Resistance Milliohms (Max. Init.) | Force (Min.)                |     |
|           |                 |                        |                                   | lbs.                        | N   |
| 30        | .05             | —                      | —                                 | 1.5                         | 7   |
| 28        | .08             | —                      | —                                 | 3                           | 13  |
| 26        | .12             | —                      | —                                 | 5                           | 22  |
| 24        | .2              | 1.5                    | 3.50                              | 7                           | 31  |
| 22        | .3              | 3                      | 3.50                              | 12                          | 53  |
| 20        | .5              | 4.5                    | 3.00                              | 17                          | 66  |
| 18        | .8              | 6                      | 3.00                              | 30                          | 133 |
| 16        | 1.2             | 8                      | 2.75                              | 45                          | 200 |
| 14        | 2.0             | 10                     | 2.75                              | 50                          | 222 |
| 12        | 3.0             | —                      | —                                 | 60                          | 267 |
| 10        | 5.0             | —                      | —                                 | 70                          | 311 |

**Note:** This is the total resistance between wire crimps of a mated pin and socket.

<sup>1</sup>Duplex Finish — Plated with .000030 [.000762] min. gold in mating area, matte tin on solder tail end over .000050 [.00127] min. nickel underplate on entire contact.

<sup>2</sup>Universal MATE-N-LOK II Plug and Cap housings accept pin or socket contacts. Use the appropriate contacts in the Plug housing as required by the mating component.

**Note:** All part numbers are RoHS Compliant.

Standard Density

Universal MATE-N-LOK II Connectors  
.250 [6.35] Centerline

**Universal MATE-N-LOK II Connectors** (Continued)

**Contacts**

Split pin diameter .086 [2.18]  
Stock thickness .012 [.305]  
These contacts can be used in either Universal MATE-N-LOK II Plug or Cap housings.

<sup>1</sup>Gold Finish—Plated with .000030 [.000762] min. gold in mating area and inside wire barrel over .000050 [.00127] min. nickel underplate on entire contact.  
<sup>2</sup>Duplex Finish—Plated with .000030 [.000762] min. gold in mating area and .000050 [.00127] min. tin in crimp area over .000050 [.00127] min. nickel underplate on entire contact.  
<sup>3</sup>There is no insulation barrel on this contact. Insulation maximum diameter is limited by the housing. Use of strain relief is recommended with these contacts.  
<sup>4</sup>Use Hand Tool No. 91508-1 for 20–18 AWG and No. 91506-1 for 16–14 AWG.  
<sup>5</sup>Hand Tool No. 69710-1 uses die set No. 58380-1 for 12 AWG and No. 58380-2 for 10 AWG.  
<sup>6</sup>HDM Applicator part number ending in -1 is used on AMPOMATOR CLS Machine with T or G Terminators, -2 is used on AMP-O-LECTRIC Model K Machine, -4 is used on AMP-O-LECTRIC Model G Machine. See pages 207-210 for further information.

**Grounding Pin**

(Mate first, break last, not for interrupting current)

Solid pin diameter .084 [2.13]  
.100 [2.54] longer than standard pin  
Stock thickness .012 [.304]

These contacts can be used in either Universal MATE-N-LOK II Plug or Cap housings only.

**Notes:**

1. Recommended panel thickness — .030-.090 [.762-2.286]. Panel must be punched so that housing enters panel in same direction as the punch.
2. Optional — Do not remove this material when keying cap housing to panel.
3. Circuit #1 location when using panel keying with 6, 9, 12 and 15 circuit housings.
4. Circuit #1 location when using panel keying with 2, 3, and 4 circuit housings.

**Notes:**

1. Insert comes attached to strain relief. It can be used to provide additional adjustment for small wire bundles or discarded.
2. Insert to be positioned as shown by dotted lines.
3. Strain relief part number represents one-half of a strain relief. Two of a part number are required for one connector.

<sup>1</sup>Duplex Finish — Plated with .000030 [0.000762] min. gold in mating area, matte tin on solder tail end over .000050 [0.00127] min. nickel underplate on entire contact.

**Note:** All part numbers are RoHS Compliant.

**Universal MATE-N-LOK Headers for UMNL II Connectors** (Continued)

**High Current Contacts**

The Louvertac bands have the versatility of being designed into contact dimensions used in existing AMP connectors.

Universal MATE-N-LOK II High Current contacts have been designed to fit into an existing Universal MATE-N-LOK II housing. An initial T-Rise test of a fully energized 4 circuit connector with 10 gage wires has shown a 31 amp capability per line with a 30° T-rise.

**Cable-to-Cable**

**Material**

**Body** — Copper Alloy

**Louvertac Band** — Beryllium Copper

**Finish** — Silver

Contact Extraction Tool No. 318851-1

Latch Disengaging Tool No. 58382-1

**Notes:** 1. High Current contacts with Louvertac bands are **not** intermateable with any other contact.  
2. Additional information on connectors is available in AMP High Current Products Catalog 65141.  
3. Additional information on contacts is available in AMP Precision Pin and Socket Contacts Catalog 65910.

**Note:** All part numbers are RoHS Compliant.

**Universal MATE-N-LOK Headers for UMNL II Connectors (Continued)**

**High Current Vertical Pin Headers**

High Current Universal MATE-N-LOK II Vertical Pin Headers are designed to accept Universal MATE-N-LOK II Plugs with High Current Socket contacts. All housings are polarized in order to allow proper circuit board placement. Eight versions are available from 2 circuit to 15 circuits.

Standard Density

Universal MATE-N-LOK Headers  
.250 [6.35] Centerline

**.156 MATE-N-LOK Connectors**

**Product Facts**

- Positive polarized nylon housings
- Panel mount or free-hanging
- Numbered cavities for easy circuit identification
- Removable, crimp snap-in contacts
- Contacts accept 20-10 AWG wire sizes
- Pin contacts are used in cap housings, socket contacts are used in plug housings
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association File No. LR7189

## Application Tooling

### Semiautomatic Machines

#### AMP-O-LECTRIC Model "G" Terminating Machines, 354500-1, -9, -11

Semiautomatic bench machines for crimping reeled terminals and contacts, featuring a quiet and reliable direct motor drive, microprocessor controls for ease of setup and operation, and guarding and lighting designed for operator convenience and safety. All models are equipped with either manual or automatic precision adjustment of crimp height. Machine-mounted sensors are available for crimp quality monitoring using conventional miniature-style applicators.

#### Specifications

**Width**—18.7-25.3 [475-643] depending on applicator type

**Depth**—21.5-28.1 [546-713] depending on applicator type

**Height**—20 [508]

**Weight**—240 lb [110 kg]

**Electrical**—120 or 220 VAC, 50 or 60 Hz

**Air**—90-110 psi [6.21-7.59 bar], 6 scfm [0.00282 m<sup>3</sup>/s] when required with air-feed applicators

**Wire Range**—26-10 AWG [0.12-6 mm<sup>2</sup>] solid or stranded, depending on product applied

For more information, request Catalog **65828**, Catalog **82275 (Crimp Quality Monitor (CQM))**.

#### AMP-O-MATIC Stripper-Crimper Machine, 854040-3, -4

Semiautomatic bench crimping machines that also strip the wire, and are therefore used for terminating jacketed cable. Feature manual precision adjustment of crimp height, keyed strip blades for faster, more accurate setups, and an efficient scrap removal system. All adjustments can be made from the front of the machines without special tools. Available with crimp quality monitoring.

#### Specifications

**Width**—14 [355]

**Depth**—18 [457]

**Height**—33 [838] without reel

**Weight**—150 lb [68 kg]

**Electrical**—120 VAC, 50 or 60 Hz, .5 A

**Air**—80-100 psi [5.52-6.90 bar], 3.5 scfm [0.00165 m<sup>3</sup>/s]

**Wire Range**—32-14 AWG [0.03-2 mm<sup>2</sup>]

For more information, request Catalog **65004**.

#### AMP 3K/40 and AMP 5K/40 Terminators

As value oriented terminators, the AMP 3K/40 and AMP 5K/40 are designed for customers that require the increased output and quality of a semi-automatic machine at a competitive price. By incorporating the most commonly requested features as standard and offering a long list of optional equipment, these terminators offer flexibility to meet the specific needs of various applications at the lowest possible cost.

#### Optional Stripping Module for the AMP 3K/40, AMP 5K/40 and AMP-O-LECTRIC Model G Terminators

The combination of the Stripping Module with the AMP-O-LECTRIC Model G Terminator or the AMP 3K/40, 5K/40 provides an economical, proficient method of stripping wire and crimping terminals on the same machine. Wires are stripped moments before crimping, meaning there is virtually no chance of damaging wire conductors during handling or storage. Once the wire is fed into the start sensor the Stripping Module does the rest, improving placement accuracy.

For more information, request Catalog **1309085**.

#### Crimp Quality Monitor

This system measures the crimp height of each termination as it is made. It also evaluates the quality of each crimp. If a crimp is questionable, the monitor alerts the operator with both visual and audible alarms. It also features ports for printing and networking. For use with AMP-O-LECTRIC Model "G" and AMP-O-MATIC Stripper-

Crimper Machines, the monitor is mounted to the machine. For use with AMPOMATOR CLS IV+ Machines, it is integrated into the machine's operating system, with the displays appearing on the machine's touch screen.

For more information, request Catalog **82275**.

**Note:** This listing is for reference purposes only. To obtain part numbers for specific applications call Technical Support.

**Application Tooling** (Continued)

Application Tooling

**Automatic Machines**

**AMPOMATOR System III  
Leadmaker**

The AMPOMATOR System III Leadmaker is designed for the demands of low-volume/high-mix manufacturing and precision quality. This leadmaker combines the best wire processing capabilities with

new technologies in terminal feeding and machine set-up found in the System III Applicator to offer significant advantages for higher throughput and efficiencies. Request Catalog 1654956-5.

**AMPOMATOR CLS IV+  
Lead-Making Machines,  
356500-1, -2**

**System III Applicator**

The System III Applicator introduces several new technologies into the applicator including a precision servo-electric motorized feeding system, a built-in data module for storing terminal crimp and

set-up information, a precision fit round ram, and a newly designed terminal depressor. It still utilizes the proven quality of the HD-M crimper and anvil tooling.

Fully-automatic machines that measure, cut, strip and terminate single leads. Microprocessor-controlled, and programmed and operated using an easy-to-follow, menu-driven touchscreen. Features include direct-drive terminating units with precision crimp height adjustment, fully programmable setups, wire runout and splice detection, and motorized pre-feed with wire straightener. Crimp quality monitoring is also available.

**Specifications**

- Width**—159 [4 039]
  - Depth**—68 [1 730]
  - Height**—90 [2 285] min., with 24 [610] dia. reel
  - Weight**—2 000 lb [907 kg]
  - Electrical**—220 VAC, 50 or 60 Hz, 1 Ø, 20 A with neutral and ground
  - Air**—90 psi [6.21 bar], 15 scfm [0.00708 m³/s] sustained
  - Wire Range**—26-10 AWG [0.12-6 mm²] stranded, 26-16 AWG [0.12-1.4 mm²] solid
  - Lead Lengths**—3-90 [76.2-2 286], 90-1 000 [2 286-25 400] with long lead conveyors
- For more information, request Catalog **124324**.

**EDGE Electronic Applicator  
Counter**

The new, versatile EDGE applicator counter tracks wearable tool usage for the most effective maintenance planning. The completely electronic counter, with clear LCD display, indicates cycles since installation. By performing maintenance at measured intervals with pre-set

limits, operators avoid break-downs and rejects caused by tool wear or mis-adjustment. For more information, request Catalog **1773385**.

**Application Tooling** (Continued)

**Applicator Styles**

**End- and Side-Feed Heavy-Duty Miniature (HDM) Applicators**

- Handle a wide variety of products
- Used with both semi- and fully-automatic machines
- Quickly interchangeable to run different products
- Easily repaired
- Simple dial-in settings to handle similar products and various wire sizes

**Stripper-Crimper (SCA) Applicators**

- For use with AMP-O-MATIC Stripper-Crimper Machines
- Terminate a wide variety of open-barrel products
- Quickly interchangeable to run different products
- Easily repaired
- Simple dial-in settings to handle similar products and various wire sizes
- CQM applicators are available

**Crimp Quality Monitor (CQM) Applicators**

- Same basic features as regular HDM and SCA applicators
- Recommended for use with machines featuring manual or automatic precision-adjust
- Use two built-in sensors to provide the Crimp Quality Monitor with data to measure crimp height, and evaluate the quality of each crimp

**Mechanical Hand Tools**

**CERTI-CRIMP II Straight Action Hand Tools (SAHT) 91501-1, 91502-1**

Premium grade hand tools. Feature ratchet control to provide complete crimp cycle. Die sets close in a straight line. Include a contact locator and wire stop, plus an insulation crimp

adjustment lever, when applicable. Approximate weight 1.3 lb [0.59 kg] For more information, request Catalog 65780.

[tycoelectronics.com](http://tycoelectronics.com)

82181-7.5M-MS-FP-4-08-2-0G3B

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
