2 Current Input Module (MPU-CIM)

The MPU-CIM Current Input Module is the interface between the MPU-32 relay and the 5-A-secondary, 1-A-secondary, and sensitive current transformers. The MPU-CIM is ordered separately from the MPU-32 and can be surface- or DIN-rail mounted. Wire-clamping terminals are standard but the MPU-CTI is available for those who require ring-tongue terminals.

Accessories

- A Phase Current Transformers**
Phase CTs are required to detect phase currents. For upgrade applications, existing CTs can be used.
- B Ground-Fault Current Transformer**
Optional zero-sequence current transformer detects ground-fault current. Available with 5-A and 30-A primary ratings for low-level pickup.
- C MPS-RTD Temperature Input Module**
Optional module provides 8 inputs to connect Pt100, Ni100, Ni120, and Cu10 RTDs.
- D MPS-DIF Differential Current Module**
Optional motor differential protection, compatible with core balance and summation current transformer connections.
