Notice for TAIYO YUDEN products

Please read this notice before using the TAIYO YUDEN products.

REMINDERS

Product information in this catalog is as of October 2013. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or usage of the Products.

Please note that TAIYO YUDEN CO., LTD. shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this catalog or individual specification.

Please contact TAIYO YUDEN CO., LTD. for further details of product specifications as the individual specification is available.

Please conduct validation and verification of products in actual condition of mounting and operating environment before commercial shipment of the equipment.

All electronic components or functional modules listed in this catalog are developed, designed and intended for use in general electronics equipment.(for AV, office automation, household, office supply, information service, telecommunications, (such as mobile phone or PC) etc.). Before incorporating the components or devices into any equipment in the field such as transportation,(automotive control, train control, ship control), transportation signal, disaster prevention, medical, public information network (telephone exchange, base station) etc. which may have direct influence to harm or injure a human body, please contact TAIYO YUDEN CO., LTD. for more detail in advance.

Do not incorporate the products into any equipment in fields such as aerospace, aviation, nuclear control, submarine system, military, etc. where higher safety and reliability are especially required.

In addition, even electronic components or functional modules that are used for the general electronic equipment, if the equipment or the electric circuit require high safety or reliability function or performances, a sufficient reliability evaluation check for safety shall be performed before commercial shipment and moreover, due consideration to install a protective circuit is strongly recommended at customer's design stage.

The contents of this catalog are applicable to the products which are purchased from our sales offices or distributors (so called "TAIYO YUDEN' s official sales channel").
It is apply applied to the products our sales of TAIYO YUDEN' sofficial sales channel".

It is only applicable to the products purchased from any of TAIYO YUDEN's official sales channel.

Please note that TAIYO YUDEN CO., LTD. shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from your usage of products in this catalog. TAIYO YUDEN CO., LTD. grants no license for such rights.

Caution for export

Certain items in this catalog may require specific procedures for export according to "Foreign Exchange and Foreign Trade Control Law" of Japan, "U.S. Export Administration Regulations", and other applicable regulations. Should you have any question or inquiry on this matter, please contact our sales staff.

TAIYO YUDEN 2014

LEADED COMMON MODE CHOKE COILS FOR DC AND SIGNAL LINES

LEADED COMMON MODE CHOKE COILS FOR DC AND SIGNAL LINES, LEADED COMMON MODE CHOKE COILS FOR AC LINES

RELIABILITY DATA

1. Operating Temperature Range					
	BU-RA Type	−25~+ 105°C			
Specified Value	TLH, TLF Type	-23~ + 103 C			
Test Method and Remarks	Including temperature rise due to self—generated heat.				

2. Storage temperature range				
Specified Value	BU-RA Type	−40~+ 85°C		
	TLH, TLF Type			

3. Rated current				
Specified Value	BU-RA Type			
Specified value	TLH, TLF Type		Within the specified range	
Test Method and Remarks	TLH10U, TLF10UA TLF9UA, 14CB、24HB TLF9UB	: The maximum valu	e of AC current within the temperature rise of 60° C ie of AC current within the temperature rise of 45° C ie of DC current within the temperature rise of 45° C	

4. Inductance			
Crassifierd Malve	BU-RA Type		
Specified Value	TLH, TLF Type		Within the specified tolerance
	BU-RA		
	Measuring equipment : HP4262A		
	TLF9U:		
	Measuring equipment : LCR meter 4		84A or its equivalent
Test Method and	Measuring frequency : 1kHz		
Remarks	Measuring voltage : 1Vrms		
	TLH、TLF(except TLF9U):		
	Measuring equipment	: LCR meter 42	84A or its equivalent
	Measuring frequency	: 1kHz	
	Measuring voltage	: 0.1Vrms	

5. DC resistance				
Specified Value	BU—RA Type			
Specified Value	TLH, TLF Type		Within the specified tolerance	
Test Method and Remarks	Measuring equipment	: DC ohmmeter		

6. Terminal strength	6. Terminal strength tensile force					
Specified Value	BU-RA Type		Na aku ama liku			
Specified value	TLH, TLF Type		No abnormality			
Test Method and Remarks			ally in the direction to draw terminal $5N$, 10 ± 1 sec. ed tensile force gradually in the direction to draw terminal.			
			stated tensile force gradually in the direction to draw terminal.			
	force [N]	duration [s]				
	10	30±5				

7. Insulation resista	7. Insulation resistance between wires				
Specified Value	BU-RA Type		100MΩ min.		
Specified value	TLH, TLF Type		TUUMISE MIN.		
	Applied voltage	: 50VDC (BU-RA,)			
Test Method and		: 500VDC (TLH, TLF (except TLF9UB))			
Remarks		: 250VDC (TLF9UB)			
	Duration	: 60sec.			

8. Insulation resistance between wire and core			
Specified Value	BU—RA Type		
	TLH, TLF Type		100M Ω min.(except TLH, TLF10UAH Type)
Test Method and Remarks	TLF : Applied voltage : 500VDC (TLF (except TLF9UB)) : 250VDC (TLF9UB) Duration : 60 sec.		TLF9UB))

9. Withstanding : be	9. Withstanding : between wires				
Specified Value	BU-RA Type		No abnormality		
Specified Value	TLH, TLF Type				
Test Method and Remarks	Applied voltage	plied voltage : 250VDC (BU-RA) : 2000VAC (TLH, TLF (except TLF9UB)) : 500VDC (TLF9UB)			
	Duration	: 60sec.			

10. Withstanding : b	10. Withstanding : between wires and core			
Crassifierd Malue	BU-RA Type			
Specified Value	TLH, TLF Type		No abnormality(except TLH, TLF10UAH Type)	
Test Method and Remarks	TLF : Applied voltage Duration	: 2000VAC (TLF (except : 500VDC (TLF9UB) : 60sec.	t TLF9UB))	

11. Rated voltage			
Specified Value	BU-RA Type		Within the specified range
	TLH, TLF Type		
Test Method and	TLH, TLF (except TLF9UB)	: 250VAC	
Remarks	BU-RA,TLF9UB	: 50VDC	

12. Resistance to v	ribration		
Specified Value	BU-RA Type		
	TLH, TLF Type		TLF9U : Inductance change : Within $\pm 5\%$ TLH, TLF (except TLF9U) : Appearance is no abnormality and within the specified range
Test Method and Remarks	BU-RA,TLH, TLF : According to JIS C 0040 Direction : 2hrs each in X, Y and Z direction Total : 6hrs Frequency range : 10 to 55 to 10Hz (1 min.) Amplitude : 1.5mm (shall not exceed acceleration 196m/s²) Mounting method : soldering onto PC board Recovery : At least 1hr of recovery under the standard condition after the removal from test chamber, followed by th measurement within 2hrs. (TLH, TLF)		(1 min.) exceed acceleration 196m/s ²) board covery under the standard condition after the removal from test chamber, followed by the

13. Solderability			
	BU-RA Type		At least 75% of terminal electrode is covered by new solder.
Specified Value	TLH, TLF Type		At least 90% of terminal electrode is covered by new solder.
Test Method and	TLH, TLF : Solder temperature Duration Immersion depth	: 235±0.5°C : 2±0.5sec. : Up to 1.5 to 2.0mr	n from PBC mounted level.
Remarks	TLH, TLF : Solder temperature Duration	: 245±5℃ : 4±1sec.	

: Up to 1.0 to 1.5mm from PBC mounted level.

Immersion depth

14. Resistance to s	oldering heat		
	BU—RA Type		Appearance : No abnormality Inductance change : Within $\pm 15\%$
Specified Value	TLH, TLF Type		TLF9UA : Inductance change : Within $\pm 5\%$ TLF14CB : Appearance is no abnormality and within the specified range
Test Method and Remarks	TLH, TLF : Solder temperature : 260±5°C Duration : 5±0.5sec. Immersion depth : Up to 1.5 to 2.0mm from PBC mounted level. Recovery : At least 1hr of recovery under the standard condition after the removal from test chamber		covery under the standard condition after the removal from test chamber, followed by the
	Immersion depth Recovery	: Up to 1.0 to 1.5mm from PBC mounted level. : At least 1hr of recovery under the standard condition after the removal from test chamber, followed by the measurement within 2hrs.	

15. Thermal shock		
	BU-RA Type	Appearance : No abnormality Inductance change : Within $\pm 15\%$
Specified Value	TLH, TLF Type	TLF9UA : Inductance change : Within $\pm 15\%$ TLH, TLF (except TLF9UA) : Withstanding voltage : No abnormality Insulation resistance : No abnormality
Test Method and Remarks	BU-RA,TLH, TLF : According to JIS C 0025 Conditions for 1 cycle -25°C ~+85°C, keep each 30min Number of cycles : 10 Recovery : At least 1hr of recovery under the standard condition after the removal from test chamber, followed by the measurement within 2 hrs.	

16. Damp heat			
Specified Value	BU-RA Type		
			TLF9UA : Inductance change : Within ±15%
	TLH, TLF Type		TLH, TLF (except TLF9UA) : Withstanding voltage : No abnormality
			Insulation resistance : No abnormality
	TLH, TLF :		
	Temperature	: 60±2°C	
Test Method and		: 40±2°C (※except TLF9L	J)
Remarks	Humidity	: 90 ~ 95%RH	
	Duration	: 500 hrs	
	Recovery	: At least 1hr of recovery ur	nder the standard removal from test chamber followed by the measurement within 2 hrs.

17. Loading under d	lamp heat		
0	BU—RA Type		Appearance : No abnormality Inductance change : Within $\pm 15\%$
Specified Value	TLH, TLF Type		Withstanding voltage : No abnormality Insulation resistance : No abnormality
	BU-RA : Temperature Humidity Applied current Recovery		urrent across windings (※except TLF9U) ry under the standard removal from test chamber followed by the measurement within 2 hrs.
Test Method and Remarks	TLH, TLF : Temperature	: 60±2°C : 40±2°C (※except Tl	LF9U)
	Humidity Duration	: 90~95%RH : 100 hrs : 500 hrs Apply rated cu	urrent across windings (※except TLF9U)
	Applied voltage	TLF9UA 25 TLF9UB 50	ecified voltage between windings. 50VAC IVDC
	Recovery	: At least 1hr of recover	ry under the standard removal from test chamber followed by the measurement within 2 hrs.

18. Low temperatur	18. Low temperature life test			
	BU-RA Type	Appearance : No abnormality Inductance change : Within $\pm 15\%$		
Specified Value	TLH, TLF Type	TLF9U : Inductance change : Within $\pm 15\%$ TLH, TLF (except TLF9U) : Withstanding voltage : No abnormality Insulation resistance : No abnormality		
Test Method and Remarks	BU-RA,TLH, TLF : Temperature : -25±2°C : -40±2°C (※TLF•TLH) Duration : 500 hrs Recovery : At least 1hr of recovery under the standard removal from test chamber followed by the measurement within 2 hrs.			

19. High Temperature life test			
	BU—RA Type		Appearance : No abnormality Inductance change : Within ±15%
Specified Value	TLH, TLF Type		TLF9U : Inductance change : Within ±15% TLH, TLF (except TLF9U) : Withstanding voltage : No abnormality Insulation resistance : No abnormality
Test Method and Remarks	BU-RA,TLH, TL F : Temperature : 85±2°C (※ BU-RA) : 105±3°C (※ TLF•TLH) Duration : 500 hrs Recovery : At least 1hr of recovery under the standard removal from test chamber followed by the measurement within 2 hrs.		

LEADED COMMON MODE CHOKE COILS FOR DC AND SIGNAL LINES, LEADED COMMON MODE CHOKE COILS FOR AC LINES

PRECAUTIONS

1. Circuit Design	
Precautions	 Operating environment The products described in this specification are intended for use in general electronic equipment, (office supply equipment, telecommunications systems, measuring equipment, and household equipment). They are not intended for use in mission-critical equipment or systems requiring special quality and high reliability (traffic systems, safety equipment, aerospace systems, nuclear control systems and medical equipment including life-support systems) where product failure might result in loss of life, injury or damage. For such uses, contact TAIYO YUDEN Sales Department in advance.

2. PCB Design	
Precautions	 Design 1. Please design insertion pitches as matching to that of leads of the component on PCBs.
Technical considerations	 Design 1. When Inductors are mounted onto a PC board, hole dimensions on the board should match the lead pitch of the component, if not, it will cause breakage of the terminals or cracking of terminal roots covered with resin as excess stress travels through the terminal legs.

3. Soldering	
Precautions	 Wave soldering Please refer to the specifications in the catalog for a wave soldering. Do not immerse the entire inductor in the flux during the soldering operation. Lead free soldering When using products with lead free soldering, we request to use them after confirming of adhesion, temperature of resistance to soldering heat, etc. sufficiently. Recommended conditions for using a soldering iron Put the soldering iron on the land-pattern. Soldering iron's temperature - Below 350°C Duration - 3 seconds or less The soldering iron should not directly touch the product.
Technical considerations	 Lead free soldering If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently degrade the reliability of the products. Recommended conditions for using a soldering iron If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently degrade the reliability of the products.

4. Cleaning	
Precautions	 Cleaning conditions 1. TLF type Please contact any of our offices for about a cleaning.

5. Handling		
Precautions	 Handling Keep the product away from all magnets and magnetic objects. Mechanical considerations Please do not give the product any excessive mechanical shocks. TLF type Please do not add any shock or power to a product in transportation. Packing Please do not give the product any excessive mechanical shocks. In loading, please pay attention to handling indication mentioned in a packing box (a loading direction / number of maximum loading / fragile item). 	
Technical considerations	 Handling There is a case that a characteristic varies with magnetic influence. Mechanical considerations There is a case to be damaged by a mechanical shock. TLF type There is a case to be broken by a fall. Packing There is a case that a lead route turns at by a fall or an excessive shock. 	

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

TAIYO YUDEN

6. Storage conditions	
Precautions	 Storage To maintain the solderability of terminal electrodes and to keep the packing material in good condition, temperature and humidity in the storage area should be controlled. Recommended conditions
Technical considerations	 Storage Under a high temperature and humidity environment, problems such as reduced solderability caused by oxidation of terminal electrodes and deterioration of taping/packaging materials may take place.

ООО "ЛайфЭлектроникс"

ИНН 7805602321 КПП 780501001 Р/С 40702810122510004610 ФАКБ "АБСОЛЮТ БАНК" (ЗАО) в г.Санкт-Петербурге К/С 3010181090000000703 БИК 044030703

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
