

Pressure Sensors

Low-Cost, Stainless Steel, Isolated Sensors

19 mm Series

FEATURES

- Low cost
- Rugged, isolated stainless steel package
- Small size
- Reliable semiconductor technology
- Calibrated and temperature compensated
- Absolute and gage pressures
- Vacuum compatible, isolated sensors
- 0 psi to 3 psi to, 0 psi to 500 psi

TYPICAL APPLICATIONS

- Industrial controls
- Process control systems
- Industrial automation and flow control
- Pressure calibrators

Honeywell's stainless steel 19C, 19U, and 19 Vacuum Gage Series sensors were developed for pressure applications that involve measurement of hostile media in harsh environments compatible with 316 stainless steel. The special Vacuum Gage Series sensors are specifically designed for applications that can be exposed to vacuum.

The 19C Series are calibrated and temperature compensated. They are available for use with either a constant voltage or current source. They feature a variety of pressure connections to allow use in a wide range of OEM (Original Equipment Manufacturer) equipment. The 19U Series is uncompensated for applications that use their own specialized circuit designs.

The 19C and 19U Series sensors are rugged and reliable transducers for use in a wide variety of pressure sensing applications where corrosive liquids or gases are monitored.

NOTES

- Reference conditions (unless otherwise noted): $T_A = 25\text{ }^\circ\text{C}$ [77 $^\circ\text{F}$]; 19C Supply $V_s = 10\text{ Vdc} \pm 0.01\text{ Vdc}$ or $I_s = 1.5\text{ mA} \pm 0.0015\text{ mA}$; 19U Supply $V_s = 5\text{ Vdc} \pm 0.01\text{ Vdc}$ or $I = 1.0\text{ mA} \pm 0.0015\text{ mA}$
- Full-scale span (FSS) is the algebraic difference between the output voltage at full-scale pressure and the output at zero pressure. FSS is ratiometric to supply voltage.
- Pressure non-linearity is based on best-fit straight line from zero to the full-scale pressure. Pressure hysteresis is the maximum output difference at any point within the operation pressure range for increasing and decreasing pressure.
- Maximum error band of the offset voltage or span over the compensated temperature range, relative to the 25 $^\circ\text{C}$ [77 $^\circ\text{F}$] reading.
- Long-term stability over a six-month period.
- Response time for a 0 psi to FSS pressure step change, 10 % to 90 % rise time.
- Common mode voltage as measured from output to ground. For higher levels of common mode voltage, contact factory.
- The error band resulting from a maximum deviation of a transducer's output parameter (offset, span, or resistance) as temperature is varied 25 $^\circ\text{C}$ [77 $^\circ\text{F}$] to any other temperature within the specified range (0 $^\circ\text{C}$ to 82 $^\circ\text{C}$ [32 $^\circ\text{F}$ to 180 $^\circ\text{F}$]). This parameter is not 100 % tested and is guaranteed by process design and tested on a sample basis only. Temperature coefficient of span is evaluated using a constant current source.

ORDERING INFORMATION

19C Series

For example:
Part #19C100PA4K =
19 mm Cell,
Compensated, 100 psi,
Absolute, 1/8NPT Port
with 10 Vdc excitation.

19U Series

For example:
Part #19U100PA4K =
19 mm Cell,
Uncompensated, 100
psi, Absolute, 1/8NPT
Port with 5 Vdc
excitation.

19 Vacuum Gauge Series

For example: Part
#19C100PV4K = 19
mm Cell, Comp., 100
psi, Vacuum Gauge,
1/8NPT Port with 10
Vdc excitation.

For example: Part
#19U100PV4K = 19

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
