

Precision quad operational amplifier

Datasheet – production data

Features

- Low input offset voltage: 500 μ V max.
- Low power consumption
- Short-circuit protection
- Low distortion, low noise
- High gain bandwidth product
- High channel separation
- ESD protection 2 kV

Description

The TS514 device is a high-performance quad operational amplifier with frequency and phase compensation built into the chip. The internal phase compensation allows stable operation as a voltage follower in spite of its high gain bandwidth.

The circuit presents very stable electrical characteristics over the entire supply voltage range, and is particularly intended for professional and telecom applications (such as active filters, for example).

Pin connections (top view)

1 Absolute maximum ratings and operating conditions

Table 1. Absolute maximum ratings

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage	± 18	V
V_i	Input voltage	$V_{DD}-0.2$ to $V_{CC}+0.2$	V
$V_{id}^{(1)}$	Differential input voltage	$\pm V_{CC}$	V
T_{stg}	Storage temperature range	-65 to +150	°C
R_{thja}	Thermal resistance junction-to-ambient		
	SO-14 DIP14	103 80	°C/W
R_{thjc}	Thermal resistance junction-to-case		
	SO-14 DIP14	31 33	°C/W
ESD	HBM: human body model ⁽²⁾	2	kV
	MM: machine model ⁽³⁾	200	V
	CDM: charged device model ⁽⁴⁾	1.5	kV

- Differential voltages are the non-inverting input terminal with respect to the inverting input terminal.
- Human body model: a 100 pF capacitor is charged to the specified voltage, then discharged through a 1.5kΩ resistor between two pins of the device. This is done for all couples of connected pin combinations while the other pins are floating.
- Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5 Ω). This is done for all couples of connected pin combinations while the other pins are floating.
- Charged device model: all pins and the package are charged together to the specified voltage and then discharged directly to ground through only one pin. This is done for all pins.

Table 2. Operating conditions

Symbol	Parameter	Value	Unit
V_{CC}	Supply voltage	6 to 30	V
V_{icm}	Common mode input voltage range	$V_{DD}+0.8$ to $V_{CC}-1.5$	V
T_{oper}	Operating free air temperature range	-40 to +125	°C

6 Revision history

Table 7. Document revision history

Date	Revision	Changes
09-Mar-2001	1	Initial release.
23-Jun-2005	2	Automotive grade part references inserted in the datasheet (see Chapter 5: Ordering information on page 14).
30-Sep-2005	3	The following changes were made in this revision. <ul style="list-style-type: none"> – An error in the device description was corrected on page 1. – Chapter 5: Ordering information on page 14 updated with complete list of markings. – Addition of supplementary data in Table 1: Absolute maximum ratings on page 2. – Addition of Table 2: Operating conditions on page 2. – Reorganization of Chapter 4: Package information on page 11. – Minor grammatical and formatting changes throughout.
24-Oct-2008	4	Added performance AC and DC characteristic curves for $V_{CC}=6\text{ V}$, $V_{CC}=10\text{ V}$ and $V_{CC}=30\text{ V}$ in Chapter 3: Electrical characteristics . Modified I_{CC} typ, added parameters over temperature in Table 3 . Deleted old macromodel. Added R_{thjc} , R_{thja} in Table 1 . Corrected V_i and V_{id} AMR values in Table 1 . Added input common mode range V_{icm} in Table 2: Operating conditions . Updated Section 4.1: DIP14 package information and Section 4.2: SO-14 package information .
12-Sep-2012	5	Updated Features (removed “macromodel”). Updated CMR and SVR test conditions in Table 3 . Updated ECOPACK text in Section 4 . Removed TS514IYD, TS514IYDT, TS514AIYD, and TS514AIYDT order code from Table 6 . Minor corrections throughout document.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
