

## Features

- Any frequency between 1 MHz and 220 MHz accurate to 6 decimal places
- Widest pull range options:  $\pm 25$ ,  $\pm 50$ ,  $\pm 80$ ,  $\pm 100$ ,  $\pm 150$ ,  $\pm 200$ ,  $\pm 400$ ,  $\pm 800$ ,  $\pm 1600$ ,  $\pm 3200$  ppm
- 0.23 ps RMS phase jitter (typ) over 12 kHz to 20 MHz bandwidth
- Wide temperature range support from  $-40^{\circ}\text{C}$  to  $105^{\circ}\text{C}$
- Industry-standard packages: 7.0 x 5.0 mm, 5.0 x 3.2 mm, 3.2 x 2.5 mm packages
- For frequencies 220.000001 MHz to 720 MHz, refer to [SiT3373](#)

## Applications

- Cable Modem Termination System (CMTS), Video, Broadcasting System, Audio, Industrial Sensors, Remote Radio Head (RRH)
- SATA, SAS, 10Gbps Ethernet, Fibre Channel, PCI-Express

## Electrical Characteristics

**Table 1. Electrical Characteristics – Common to LVPECL, LVDS and HCSL**

All Min and Max limits in the Electrical Characteristics tables are specified over temperature and rated operating voltage with standard output termination shown in the termination diagrams. Typical values are at  $25^{\circ}\text{C}$  and nominal supply voltage.

| Parameter                       | Symbol  | Min.                                                      | Typ. | Max. | Unit | Condition                                                                                                                                                                               |
|---------------------------------|---------|-----------------------------------------------------------|------|------|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Frequency Range                 |         |                                                           |      |      |      |                                                                                                                                                                                         |

Table 5. Pin Description

| Pin | Symbol | Functionality      |                                                                                                                                                                                          |
|-----|--------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1   | VIN    | Input              | Control Voltage                                                                                                                                                                          |
| 2   | NC/OE  | No Connect (NC)    | No Connect: Leave floating or connect to GND for better heat dissipation. NC for all 3.2 x 2.5 mm package options.                                                                       |
|     |        | Output Enable (OE) | H <sup>[4,5]</sup> : specified frequency output<br>L: output is high impedance. Only output driver is disabled. OE function only available on 7050 package. Pin 2 on 3225 package is NC. |
| 3   | GND    | Power              | Vdd Power Supply Ground                                                                                                                                                                  |
| 4   | OUT+   | Output             | Oscillator output                                                                                                                                                                        |
| 5   | OUT-   | Output             | Complementary oscillator output                                                                                                                                                          |
| 6   | Vdd    | Power              | Power supply voltage <sup>[6]</sup>                                                                                                                                                      |

Figure 1. Pin Assignments  
(7.0 x 5.0 mm and  
5.0 x 3.2 mm packages)

Figure 2. Pin Assignments  
(3.2 x 2.5 mm package)

Notes:

4. A pull-up resistor of 10 kΩ or less is recommended if pin 1 is not externally driven.
5. OE mode is only available in the 7050 and 5032 packages. 3225 package is NC.
6. A capacitor of value 0.1 μF or higher between Vdd and GND is required. An additional 10 μF capacitor between Vdd and GND is required for the best phase jitter performance.

**Table 6. Absolute Maximum Ratings**

Attempted operation outside the absolute maximum ratings may cause permanent damage to the part.  
Actual performance of the IC is only guaranteed within the operational specifications, not at absolute maximum ratings.

| Parameter                                                            | Min. | Max.       | Unit |
|----------------------------------------------------------------------|------|------------|------|
| Vdd                                                                  | -0.5 | 4.0        | V    |
| VIH                                                                  |      | Vdd + 0.3V | V    |
| VIL                                                                  | -0.3 |            | V    |
| Storage Temperature                                                  | -65  | 150        | °C   |
| Maximum Junction Temperature                                         |      | 130        | °C   |
| Soldering Temperature (follow standard Pb-free soldering guidelines) |      | 260        | °C   |

**Table 7. Thermal Considerations<sup>[7]</sup>**

| Package     | $\theta_{JA}$ , 4 Layer Board (°C/W) | $\theta_{JC}$ , Bottom (°C/W) |
|-------------|--------------------------------------|-------------------------------|
| 3225, 6-pin | 80                                   | 30                            |
| 5032, 6-pin | TBD                                  | TBD                           |
| 7050, 6-pin | 52                                   | 19                            |

**Notes:**

7. Refer to JESD51 for  $\theta_{JA}$  and  $\theta_{JC}$  definitions, and reference layout used to determine the  $\theta_{JA}$  and  $\theta_{JC}$  values in the above table.

**Table 8. Maximum Operating Junction Temperature<sup>[8]</sup>**

| Max Operating Temperature (ambient) | Maximum Operating Junction Temperature |
|-------------------------------------|----------------------------------------|
| 70°C                                | 95°C                                   |
| 85°C                                | 110°C                                  |
| 95°C                                | 120°C                                  |
| 105°C                               | 130°C                                  |

**Notes:**

8. Datasheet specifications are not guaranteed if junction temperature exceeds the maximum operating junction temperature.

**Table 9. Environmental Compliance**

| Parameter                                                            | Test Conditions           | Value  | Unit |
|----------------------------------------------------------------------|---------------------------|--------|------|
| Mechanical Shock Resistance                                          | MIL-STD-883F, Method 2002 | 10,000 | g    |
| Mechanical Vibration Resistance                                      | MIL-STD-883F, Method 2007 | 70     | g    |
| Soldering Temperature (follow standard Pb free soldering guidelines) | MIL-STD-883F, Method 2003 | 260    | °C   |
| Moisture Sensitivity Level                                           | MSL1 @ 260°C              |        |      |
| Electrostatic Discharge (HBM)                                        | HBM, JESD22-A114          | 2,000  | V    |

| POD-37 Rev A        |                 |

**Note:**  
Circles in center pad are thermal vias, recommended to improve thermal performance

### Notes:

- Top Marking: Y denotes manufacturing origin and XXXX denotes manufacturing lot number. The value of "Y" will depend on the assembly location of the device.
- A capacitor of value 0.1  $\mu$ F or higher between Vdd and GND is required. An additional 10  $\mu$ F capacitor between Vdd and GND is required for the best phase jitter performance
- The center pad has no electrical function. Soldering down the center pad to the GND is recommended for best thermal dissipation, but is optional.

## Ordering Information

**SiT3372AC-1B2-33NH122.123456T**

**Notes:**

- 12. Contact [SiTime](#) for ±15 ppm
- 13. Bulk is available for sampling only
- 14. Contact [SiTime](#) for custom pull range options
- 15. "E": Output Enable function is only available in 7.0 x 5.0 mm and 5.0 x 3.2 mm packages

**Table 10. Ordering Codes for Supported Tape & Reel Packing Method**

© SiTime Corporation 2017-2018. The information contained herein is subject to change at any time without notice. SiTime assumes no responsibility or liability for any loss, damage or defect of a Product which is caused in whole or in part by (i) use of any circuitry other than circuitry embodied in a SiTime product, (ii) misuse or abuse including static discharge, neglect or accident, (iii) unauthorized modification or repairs which have been soldered or altered during assembly and are not capable of being tested by SiTime under its normal test conditions, or (iv) improper installation, storage, handling, warehousing or transportation, or (v) being subjected to unusual physical, thermal, or electrical stress.

**Disclaimer:** SiTime makes no warranty of any kind, express or implied, with regard to this material, and specifically disclaims any and all express or implied warranties, either in fact or by operation of law, statutory or otherwise, including the implied warranties of merchantability and fitness for use or a particular purpose, and any implied warranty arising from course of dealing or usage of trade, as well as any common-law duties relating to accuracy or lack of negligence, with respect to this material, any SiTime product and any product documentation. Products sold by SiTime are not suitable or intended to be used in a life support application or component, to operate nuclear facilities, or in other mission critical applications where human life may be involved or at stake. All sales are made conditioned upon compliance with the critical uses policy set forth below.

#### CRITICAL USE EXCLUSION POLICY

BUYER AGREES NOT TO USE SITIME'S PRODUCTS FOR ANY APPLICATION OR IN ANY COMPONENTS USED IN LIFE SUPPORT DEVICES OR TO OPERATE NUCLEAR FACILITIES OR FOR USE IN OTHER MISSION-CRITICAL APPLICATIONS OR COMPONENTS WHERE HUMAN LIFE OR PROPERTY MAY BE AT STAKE.

SiTime owns all rights, title and interest to the intellectual property related to SiTime's products, including any software, firmware, copyright, patent, or trademark. The sale of SiTime products does not convey or imply any license under patent or other rights. SiTime retains the copyright and trademark rights in all documents, catalogs and plans supplied pursuant to or ancillary to the sale of products or services by SiTime. Unless otherwise agreed to in writing by SiTime, any reproduction, modification, translation, compilation, or representation of this material shall be strictly prohibited.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
