

Rectangular, Multiple-Position Rack/Panel Insulation Displacement Connectors (IDC)

QR/P18 Series

Overview

The QR/P18 Series of miniature rack/panel connectors is designed for the complete segmentation of the structure of the external holder/terminal units of the well-received QR/P Series of plug-in rectangular rack/panel connectors; furthermore, the subsequent insertion of the harnessed terminal unit affords a more efficient harness mounting task. These connectors are configured with 12, 18, or 24 (insulation displacement connection) positions in the signal portion, and 4 (crimp) positions in the power supply portion.

Features

1. Completely segmented structure of the external holder/terminal unit

In order to improve the harness mounting task, the connectors are designed for the complete segmentation of the external holder and the signal/power supply unit, and the method of subsequently inserting harnessed products aims to improve the workability of the power supply/signal section harness as well as the mounting of the set.

2. Signal unit

The signal unit uses the highly reliable insulation displacement connection method. (The wire is AWG #26 and the insulation outside diameter is 0.88 mm.)

The insulation displacement task can now be used by fitting a special applicator to a commercially available automatic insulation displacement machine, or a manual press can also be selected.

3. Power supply portion

The power supply terminals permit the use of a crimp harness using wire of AWG #16 to 18 (and insulation outside diameter of 2.1 to 2.2 mm), and can accommodate a maximum of 12 A.

4. Sequenced structure

Connectors possess two sequenced contacts in the signal male unit and one sequenced contact in the power supply female unit making them perfect in terms of safety too.

5. Panel installation

Installation to a panel uses a single-action method on the anchored side and a floating screw structure on the floating side which permits smooth insertion and disconnection without forcing.

6. RoHS compliant

All components and materials comply with the requirements of the EU Directive 2002/95/EC.

*A portion of this series is suitably constructed for high-speed differential transfer, and using a suitable cable, transfer of 2.5Gbps per pair is possible.

2.5 Gbps Eye Pattern Waveform

2.5Gbps Scale
 AWG28 2m X : 100ps/div
 Y : 100V/div

Applications

PPC, transmitting and receiving devices, data communications equipment, vending machines, measuring instruments, factory automation equipment, and other high-speed transfer applications, etc.

■Product Specifications

| | | | | |
|---------|----------------|--|-----------------------------|-----------------------------|
| Ratings | Voltage rating | 125 V AC (Signal contacts) 300V AC (Power contacts) | Operating temperature range | -40°C to +105°C (Note 1) |
| | Current rating | 1A (Signal contacts) 12A (Power contacts) | | |

| Item | Specification | Conditions |
|------------------------------------|---|---|
| 1. Contact resistance | 50mΩ max. (Signal contacts) (Note 2) 10mΩ max. (Power contacts) (Note 2) | 100 mA |
| 2. Insulation resistance | 1000MΩ min. (Signal contacts) 5000MΩ min. (Power contacts) | 500 V DC |
| 3. Withstanding Voltage | No flashover or insulation breakdown. | 500 V AC / one minute |
| 4. Durability (mating / un-mating) | Contact resistance: 70mΩ max. (Signal contacts) 20mΩ max. (Power contacts) | 3000 cycles |
| 5. Vibration | No electrical discontinuity of 10μs or more. | Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 axis. |
| 6. Shock | No damage, cracks, or parts dislocation. | Acceleration of 490 m/s ² , 11 ms duration, sine half-wave waveform, 3 cycles in each of the 3 axis |
| 7. Temperature cycle | Contact resistance: 70mΩ max. (Signal contacts) 20mΩ max. (Power contacts) No damage, cracks, or parts dislocation. | Temperature: -55°C→+5°C to +35°C→+105°C→+5°C to +35°C Time: 30→5→30→5 (Minutes) 5 cycles |
| 8. Humidity (Steady state) | Insulation resistance: 100MΩ min. (Signal contacts, state) 3000MΩ min. (Power contacts, state) No damage, cracks, or parts dislocation. | 96 hours at 40°C and RH 90% to 95% |
| 9. Salt mist | No corrosions. | 5% salt water solution for 48 hours |

Note1: Includes temperature rise caused by current flow.

Note2: Excludes wire conductor resistance.

■Materials

| Products | Components | Material | Finish | Remarks |
|-----------------------|-----------------|-----------------|---------------------------------|---------|
| External holder | Insulator | PBT | ———— | UL94V-0 |
| | Insulator | PA | ———— | UL94V-0 |
| Signal contact unit | Female contacts | Phosphor bronze | Gold plated | ———— |
| | Male contacts | Phosphor bronze | Gold plated | ———— |
| Power contact unit | Insulator | PBT | ———— | UL94V-0 |
| | Female contacts | Phosphor bronze | Gold plated | ———— |
| | Male contacts | Phosphor bronze | Gold plated | ———— |
| Power supply contacts | Female contacts | Copper alloy | Gold plated + Tin copper plated | ———— |
| | Male contacts | Copper alloy | Gold plated + Tin copper plated | ———— |

■ Inspection After Cable Wiring

● Signal contact unit

- (1) After wiring the cable, examine the cable end position, the insulation displacement height, and the insulation height.
- (2) In examining the insulation displacement height and the insulation height, use a measurement pin having a tip of 0.5 mm diameter.
- (3) For information about the detailed inspection method, please request the "Inspection Standards Manual" from Hirose Electric.
- (4) The inspection method of the diagrams is for cable with AWG #26 wire and an insulation outside diameter of 0.88 mm.

● Power supply contacts

Before inserting the power supply contacts into the power supply terminal unit, check that the spring portion illustrated in the diagram is not misshapen.

When the spring portion is less than the dimensions indicated in the diagram, the spring could pull out from the power supply terminal unit; therefore, the specified dimensions should be maintained.

HIROSE ELECTRIC CO.,LTD.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
