Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. ## Reset Timer with Fixed Delay and Reset Pulse

### Features

- Fixed Reset Delay: 10 Seconds
- One Input Reset Pin
- Open-Drain Output Pin with Fixed 530ms Pulse
- 1.8V to 5.0V Operation ( $T_A = -40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$ )
- 1.7V to 5.0V Operation ( $T_A = -25^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$ )
- 1.65V to 5.00V Operation ( $T_A = 0^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$ )
- $<1\mu\text{A}$   $I_{CCQ}$  Consumption
- Zero-Second Test-Mode Enable
- Integrated Pull-Up Resistor on /SRO

### Applications

- Cell Phones
- Portable Media Players
- Tablets
- Mobile Devices
- Consumer Medical

### Description

The FT10001 is a timer for resetting a mobile device where long reset times are needed. The long delay helps avoid unintended resets caused by accidental key presses. It has a fixed delay of  $10 \pm 20\%$  seconds. The DSR pin enables Test Mode operation by immediately forcing /RST1 LOW for factory testing.

The FT10001 has one input for single-button resetting capability. The device has a single open-drain output with 0.5mA pull-down drive.

FT10001 draws minimal  $I_{CC}$  current when inactive and functions over a power supply range of 1.65V to 5.00V.

### Note:

1. This pin must always be tied to either GND or VCC. It must not float.

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

$C_{OUT}$	Output Capacitance	$V_{CC} = 5.0\text{V}$	5	pF

## Functional Description

Default operation time  $N$  is 10s. If the DSR pin is pulled HIGH prior to  $V_{CC}$  ramp, the FT10001 enters Test Mode and the reset output,  $/RST1$ , is immediately pulled LOW for factory testing. The DSR pin MUST be forced to GND during normal operation. The DSR pin should never be driven HIGH or left to FLOAT during normal operation. The DSR PIN state should never be changed during device operation; it must be biased prior to supplying the  $V_{CC}$  supply. If there is a need to use the DSR= $V_{CC}$  Test Mode, the  $/SR0$  must be HIGH when the DSR pin is moved from LOW to HIGH to enter Zero-Second Factory-Test Mode. To return to the standard 10-second reset time, the same procedure must be followed with DSR=GND. The DSR pin should never be allowed to change state while the  $/SR0$  pin is LOW.

## Operation Modes

A low input signal on  $/SR0$  starts the oscillator. There are two scenarios for counting: short duration and long duration. In the short-duration scenario, output  $/RST1$  is not affected. In the long-duration scenario, the output  $/RST1$  goes LOW after  $/SR0$  has been held LOW for  $\geq 10$ s. The  $/RST1$  output returns to its original HIGH

state 530ms after time  $t_{REC}$  has expired, regardless of the state of  $/SR0$ . The  $/RST1$  output is an open-drain driver. When the count time exceeds time 10s, the  $/RST1$  output pulls LOW.

### Short Duration ( $t_w < 10$ s)

When the  $/SR0$  input goes LOW, the internal timer starts counting. If the  $/SR0$  input goes HIGH before 10s has elapsed, the timer stops counting and resets and no changes occur on the outputs.

### Long Duration ( $t_w > 10$ s)

When the  $/SR0$  input goes LOW, the internal timer starts counting. If the  $/SR0$  input stays LOW for at least 10s, the RST output is enabled and pulled LOW. The output RST is held LOW for  $t_{REC}$ , 530ms, as soon as the reset time of 10s is met, regardless of the state of the  $/SR0$  pin. When the  $/SR0$  input has returned HIGH and  $t_{REC}$  has expired, the internal timer resets and awaits the next RESET event.

### Zero-Second Test Mode

$/RST1$  goes LOW immediately after  $/SR0$  goes LOW.

## DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS. THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN, WHICH COVERS THESE PRODUCTS.

## LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

## ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, [www.fairchildsemi.com](http://www.fairchildsemi.com), under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
