

8-, 16- and 32-bit Microcontrollers/Microprocessors

## TWR-WIFI-AR4100

### Tower System 802.11n Wi-Fi® module

#### Overview

The TWR-WIFI-AR4100 peripheral module provides an ultra low-power wireless solution with 802.11n Wi-Fi® connectivity using the Freescale Tower System. This fully FCC- and CE-certified Qualcomm Atheros system-in-package module comes with MQX™ software and enables you to quickly go from the lab to production with the same Wi-Fi hardware module.

The on-board Qualcomm Atheros silicon features easy-to-use wireless connectivity for the entire home, and pre-certification will save you time and money in getting your product to market.

This peripheral module is designed to be combined and used with other microcontroller and peripheral modules in the Tower System.

## Features

- Ultra low-power AR4100 802.11n Wi-Fi system-in-package solution from Qualcomm Atheros
- Low energy and low system resource requirements
- Integrated RF front end, RF shield, 32 kHz sleep clock and system clock
- Best-in-class Rx sensitivity for superior throughput rate-over-range performance
- Integrated high-power, high-efficiency power amplifier
- Low-density parity check (LDPC) encoding for improved uplink robustness over range
- Space time code blocking (STBC) for improved downlink robustness over range
- Wi-Fi protected setup (WPS) 2.0
- FCC and Wi-Fi certified
- Compatible with the Tower System, including MQX-based driver support
- SPI interface to Tower MCU modules
- On-board SPI flash for enabling minimal impact to MCU resources
- Access to expansion GPIO and debug signals for advanced development

## The Freescale Tower System

### Controller Module

- Tower MCU/MPU board
- Works stand-alone or in Tower System
- Features integrated debugging interface for easy programming and run control via standard USB cable

### Secondary Elevator

- Additional and secondary serial and expansion bus signals
- Standardized signal assignments
- Mounting holes and expansion connectors for side-mounting peripheral boards

### Primary Elevator

- Common serial and expansion bus signals
- Two 2x80 connectors on backside for easy signal access and side-mounting board (LCD module)
- Power regulation circuitry
- Standardized signal assignments
- Mounting holes

### Board Connectors

- Four card-edge connectors
- Uses PCI Express® connectors (x16, 90 mm/3.5" long, 164 pins)

### Size

- Tower is approx. 3.5" H x 3.5" W x 3.5" D when fully assembled

### Peripheral Module

- Examples include serial interface module, memory expansion module and Wi-Fi®

## Tower Geeks Online Community

**TowerGeeks.org** is an online design engineer community that allows members to interact, develop designs and share ideas. Offering a direct path to explore and interact with other engineers designing with the Tower System, **TowerGeeks.org** is a great way to discuss your projects, post videos of your progress, ask questions through the forum and upload software. With updates through Twitter and Facebook, it's easy to get involved.

Document Number: AR4100FS REV 1

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
