### Belden Traceable Bonded-Pair Patch Cords

Meeting the ever growing need to quickly and easily identify and trace network connections in today's high-density and mission-critical infrastructure environments.

### Belden Traceable Bonded-Pair Patch Cords shed light on your network connections, saving time and money

In today's high-density and complex network infrastructure environments, maintaining uptime and network reliability is more important than ever. Being able to quickly and easily trace cables with instant cable identification can dramatically reduce downtime. Belden Traceable Bonded-Pair Patch Cords allow today's IT manager to ensure fast and easy maintenance, and quick resolution of mistakes and erroneous network connections to save time and money.

Belden Traceable Bonded-Pair Patch Cords feature an integrated exceptionally bright LED light for easy identification. With just a simple press of a button on the low-profile plug, the LED flashes on both ends of the patch cord for easy port identification. Offered in 10GX (Category 6A) for 10 gigabit applications and CAT6+ for gigabit applications, Belden Traceable Bonded-Pair Patch Cords are ideal for tracing server and switch connections in the data center, congested outlet connections in open office areas, and high-bandwidth connections in mission critical applications like financial and medical-grade networks.

### Unique Features

Belden Traceable Bonded-Pair Patch Cords have several unique features that make them an exceptional alternative to other patch cords on the market. They feature a highly-efficient and bright LED with a battery life expectancy of seven years, or 1,000 activations (battery is also replaceable). When activated, the LED blinks for 20 seconds and can be stopped at any time with a second press of the button. The LED and its tracing wires are integrated right into the patch cord, eliminating the need for a separate power source.

Belden Traceable Bonded-Pair Patch Cords come standard with a unique serial number and bar code at each end. This code can be scanned using mobile enabled DCIM systems to manage end-to-end connectivity and inventory throughout the enterprise. Because the cords are identified and managed using a barcode they require no additional physical equipment to solve the challenge of enterprise connectivity management; bringing true intelligence to patch management. Belden worked with Cormant Inc. to develop this feature and these cords are ready to be used as part of an overall Cormant-CS mobile DCIM solution as well as other IM systems.

*Continued*

With Belden's patented Bonded-Pair technology that bonds individual insulated conductors together along their longitudinal axis for uniform conductor-to-conductor spacing, these patch cords maintain stability and electrical performance when subjected to everyday handling stresses such as bending, coiling and pulling. The cords also feature an overmolded boot that offers improved strain relief for optimum performance in high-density installations. Belden Traceable Bonded-Pair Patch Cord's unique traceability combined with superior robustness and small diameter offer greater flexibility to easily handle moves, adds and changes in higher density network environments.

Offered in 1-foot increments for lengths to 15 feet, 20 and 25-foot versions and custom lengths up to 250 feet, Belden Traceable Bonded-Pair Patch Cords are 100% factory tested and certified to exceed TIA Category 6A and Category 6 performance specifications.

## Traceable Patch Cord Components

### Battery Cover/LatchTab

- Remove to Replace Battery
- Provides Snagless Feature

### LED/Switch Module

- LED Blinks for 20 Seconds
- You Can Stop It At Any Time

### Overmolded Boot

- Provides Strain Relief
- Protects Circuitry

### Plug Shell

- Clear Polycarbonate
- 50 µin Gold Plating

### Pair Position Insert

- Guarantees DNEXT Stability
- Provides Headroom in Systems

### Tracing Wires

- Carry Signal for LED

### Bonded-Pair Technology

- Provides Stability in Electrical Performance

## Key Specifications

- Available in 10GX and CAT6+ for end-to-end Belden 10GX, 4800, 3600 and 2400 systems
- Exceptionally bright, efficient LED light for easy identification in both bright and dark environments
- Belden Bonded-Pair technology for extra robustness, performance and reliability
- Bar code tagging on each end of the cord compatible with DCIM systems
- Low-profile plug boot supports ultra-high density 48-port 1U patch panels
- 100% factory tested and certified for Category 6A and Category 6
- Replaceable battery with 7-year life expectancy or 1,000 activations
- Available in a variety of colors and sizes, with custom lengths available to 250 feet
- Backed by superior support and a Belden 25-year IBDN Certified System Warranty

## The Belden Advantage

Belden Traceable Bonded-Pair Patch Cords are backed by superior local and global technical support, fully-trained installation partners and the most comprehensive distribution network. To learn more about Traceable Bonded-Pair Patch Cords, call **1.800.BELDEN.1** today, or visit the web site at [www.belden.com](http://www.belden.com).

## Ordering Information

### 10GX Traceable Patch Cord, Bonded-Pair, 4-Pair, 24 AWG Solid, T568A/B-T568A/B, CMR

| Description   | Belden Part Number |            |            |            |            |            |            |            |

Custom lengths available up to 250-ft

Cormant-CS is a trademark of Cormant Inc.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
