Product Description

This module is a 1x2 switch module intended to address WiMAX, WiFi, and Cellular 700MHz to 2.7GHz, 3.3GHz to 3.8GHz applications. This switch is specified to be capable of supporting linear power levels over 1 watt. The small form factor and integrated DC blocking minimizes the layout size and reduces the number of external components. The device is provided in a 4 mm x 4 mm x 0.9mm LGA package. This module meets or exceeds the RF Front End needs of IEEE802.11b/g/n and IEEE802.16 systems.
