

DESCRIPTION

Demonstration circuit 1309 features the LT3474-1 36V step-down 1A LED driver. The demonstration circuit is designed to drive a string of 1A LEDs from a high input voltage. The high switching frequency scheme permits the use of small inductors and ceramic capacitors to save space and cost. The current mode control scheme provides fast transient response and cycle-by-cycle current limiting. Frequency foldback and thermal shutdown provide additional protection. The external clamp provides open LED protection. The LT3474-1 can be dimmed with an analog CTRL pin or with a PWM dimming input. The typical efficiency of the LT3474-1 DC1309 is 90.4% with 32VIN and an 8-LED string of 23V driven at 1A.

A few simple modifications can be made to DC1309 in order to add PWM dimming to the circuit. The LED string cathode can be connected to LED- and one of the PWM dimming MOSFETs can be stuffed in Q1 or Q2 location for the PWM dimming function. Without PWM dimming, the cathode of the LED string should be connected to GND as shown in the setup drawing below.

The overvoltage protection clamp level is set to about 24V on DC1309A. The level of the clamp can be changed by replacing the zener diode (D4) with a different zener diode.

The LT3474-1 differs from the LT3474 in the output voltage capabilities. The LT3474 has a 13V clamp that does not allow the use of an LED string of greater than 13V on the output. However, LT3474-1 does not have this clamp and it can power LEDs up to 26V as long as the external clamp is adjusted correctly. High output power can result in excessive heating of the IC. Please read the datasheet for thermal details.

The LT3474-1 datasheet gives a complete description of the part, operation and applications information. The datasheet must be read in conjunction with this Quick Start Guide for DC1309. The LT3474-1 is assembled in a 16-lead plastic TSSOP FE package with a thermally enhanced ground pad. Proper board layout is essential for maximum thermal performance. See the datasheet section 'Layout Hints'.

Design files for this circuit board are available. Call the LTC factory.

QUICK START PROCEDURE

DC1309 is easily set up for evaluating the LT3474-1 step-down 1A LED driver circuit. Follow the test procedure outlined below and see Figure1.

1. Setup DC1309 as shown in Figure 1 with hand-held multimeters, a high-voltage LED string, and a bench supply (power turned off) with voltage greater than the LED string and less than 36V.
2. Turn on the bench power supply and observe a constant 1A through the string of LEDs and high efficiency operation.

3. Use the /SHDN terminal to turn the LEDs on and off by respectively floating or ground the terminal.

CUSTOMER NOTICE

LINEAR TECHNOLOGY HAS MADE A BEST EFFORT TO DESIGN A CIRCUIT THAT MEETS CUSTOMER-SUPPLIED SPECIFICATIONS; HOWEVER, IT REMAINS THE CUSTOMER'S RESPONSIBILITY TO VERIFY PROPER AND RELIABLE OPERATION IN THE ACTUAL APPLICATION. COMPONENT SUBSTITUTION AND PRINTED CIRCUIT BOARD LAYOUT MAY SIGNIFICANTLY AFFECT CIRCUIT PERFORMANCE OR RELIABILITY. CONTACT LINEAR TECHNOLOGY APPLICATIONS ENGINEERING FOR ASSISTANCE.

THIS CIRCUIT IS PROPRIETARY TO LINEAR TECHNOLOGY AND SUPPLIED FOR USE WITH LINEAR TECHNOLOGY PARTS.

SHEET 1 OF 1

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
