DC-3 GHz**

SERIES	RELAY TYPE
RF255	Commercial Magnetic-Latching, DPDT, High Power, Half-Size Crystal Can Relay
RF257	Commercial Magnetic-Latching, DPDT, High Power, Half-Size Crystal Can Relay

**DESCRIPTION**

The Series RF255 is an industry-standard, half-size, latching crystal can relay. These relays are highly suitable for high RF power applications (RF Power Handling) and other RF circuits, the RF255/RF257 features:

- High repeatability
- Broad Bandwidth
- Metal enclosure for EMR shielding
- Highly resistant to ESD

Teledyne Relays' Series RF255 offers:

- All welded construction
- Wire leads, gold plated or solder-coated
- Matched seal for superior hermeticity
- Gold-plated contact assembly
- Modernized assembly process
- Advanced cleaning techniques

The RF257 is a variation of the RF255 featuring a different schematic.

**ENVIRONMENTAL AND  
PHYSICAL SPECIFICATIONS**

<b>Temperature</b> (Ambient)	Storage	-65°C to +125°C
	Operating	-55°C to +85°C
<b>Vibration</b> (General Note 1)		10 g's 10 to 500 Hz
<b>Shock</b> (General Note 2)		30 g's, 6ms half sine
<b>Enclosure</b>		Hermetically sealed
<b>Weight</b>		0.46 oz. (13g) max.

## SERIES RF255/RF257 TYPICAL RF CHARACTERISTICS (See RF Notes)

### RF NOTES

- Test conditions:
  - Fixture: .031" copper clad, reinforced PTFE, RT/duroid® 6002 with SMA connectors. (RT/duroid® is a registered trademark of Rogers Corporation.)
  - Room ambient temperature.
  - Terminals not tested were terminated with 50-ohm load.
  - Contact signal level: -10 dBm.
  - No. of test samples: 4.
- Data presented herein represents typical characteristics and is not intended for use as specification limits.
- Data is per pole, except for pole-to-pole data.
- Data is the average from readings taken on all open contacts.
- Data is the average from readings taken on poles with de-energized.
- Data is the average from readings taken on all closed contacts.
- Test fixture effect de-embedded from frequency response data.

**SERIES RF255/RF257**  
**TYPICAL RF CHARACTERISTICS (See RF Notes)**

**RF255/RF257 RF POWER HANDLING CAPABILITY**

**Test Notes:**

1. Test condition: Ambient temperature and pressure
2. Hot switched cycle rate: 1/3 Hz
3. Matched load: 1.2:1 maximum

**OUTLINE DIMENSIONS**

**SCHEMATIC**  
(Coil X Last Energized)  
(Bottom View)

**GENERAL NOTES**

1. Vibration (sinusoidal): MIL-STD-202, method 204, test condition D (except frequency shall be 10 to 2,500 Hz). Contact chatter shall not exceed 10µs maximum for closed contacts, and 1µs maximum closure for open contacts. Vibration (random): MIL-STD-202, method 214, test condition IG. Contact chatter shall not exceed 10µs maximum for closed contacts, and 1µs maximum closure for open contacts (applicable to qualification and group C testing only).
2. Shock (half-sine pulse): MIL-STD-202, method 213, test condition C (100 g's). Contact chatter shall not exceed 10µs maximum for closed contacts, and 1µs maximum closure for open contacts.
3. Dimensions are in inches. Metric equivalents in parentheses for reference only.
4. Unless otherwise specified, tolerance is ±.010 (0.25mm).
5. Indicated terminal is marked with a contrasting bead.
6. Unless otherwise specified, relays will be supplied with either gold-plated or solder coated leads. The slash and characters appearing after the slash are not marked on the relay.
7. When latching relays are installed in equipment, the latch and reset coils should not be pulsed simultaneously.
8. Each relay possesses high-level and low level capabilities. However, relays previously tested or used above 10mA resistive at 6Vdc maximum or peak ac open circuits not recommended for subsequent use in low-level applications.
9. Relays may be subjected to 260°C (1 minute) peak solder reflow temperature.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
