NX5P2924B

Logic controlled high-side power switch Rev. 1 — 24 February 2014

Product data sheet

1. **General description**

The NX5P2924B is a high-side load switch which features a low ON resistance N-channel MOSFET with controlled slew rate that supports 2.5 A of continuous current. Designed for operation from 0.8 V to 5.5 V, it is used in power domain isolation applications to reduce power dissipation and extend battery life. The enable logic includes integrated logic level translation making the device compatible with lower voltage processors and controllers. The NX5P2924B is ideal for portable, battery operated applications due to low ground current.

Features and benefits 2.

- Wide supply voltage range from 0.8 V to 5.5 V
- Very low ON resistance:
 - 14 mΩ (typical) at a supply voltage of 1.2 V
 - 14 mΩ (typical) at a supply voltage of 1.8 V
- High noise immunity
- High current handling capability (2.5 A continuous current)
- Turn-on slew rate limiting
- ESD protection:
 - ♦ HBM JESD22-A114F Class 3A exceeds 4000 V
 - CDM AEC-Q100-011 revision B exceeds 1000 V
- Specified from -40 °C to +85 °C

Applications 3.

- Cell phone
- Digital cameras and audio devices
- Portable and battery-powered equipment

Logic controlled high-side power switch

4. Ordering information

Table 1. Ordering information

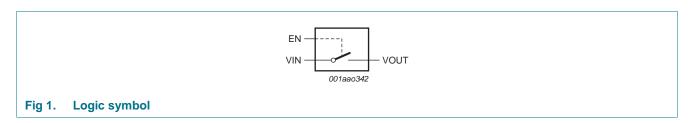

| Type number | Package | | | | | | | |
|-------------|-------------------|--------|---|-----------|--|--|--|--|
| | Temperature range | Name | Description | Version | | | | |
| NX5P2924BUK | –40 °C to +85 °C | WLCSP6 | wafer level chip-scale package; 6 bumps; 0.87 x 1.37 x 0.5 mm | NX5P2924B | | | | |

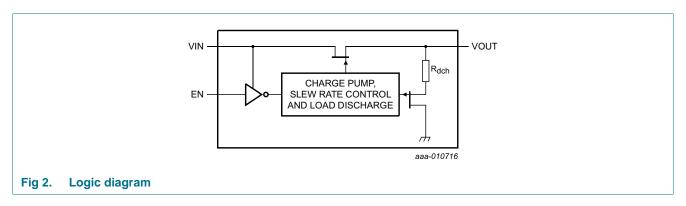

5. Marking

Table 2. Marking codes

| Type number | Marking code |
|-------------|--------------|
| NX5P2924BUK | 4B |

6. Functional diagram

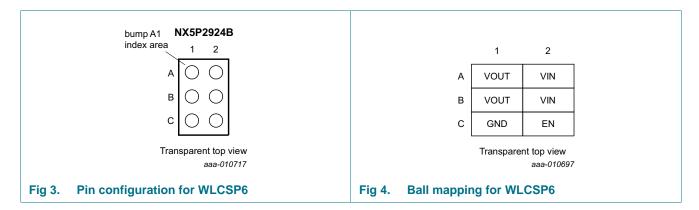

Logic controlled high-side power switch

7. Pinning information

7.1 Pinning

7.2 Pin description

Table 3. Pin description

| Symbol | Pin | Description |
|--------|--------|----------------------------|
| VIN | A2, B2 | input voltage |
| GND | C1 | ground (0 V) |
| EN | C2 | enable input (active HIGH) |
| VOUT | A1, B1 | output voltage |

8. Functional description

Table 4. Function table [1]

| Input EN | Switch |
|----------|------------|
| L | switch OFF |
| Н | switch ON |

^[1] H = HIGH voltage level; L = LOW voltage level.

Logic controlled high-side power switch

9. Limiting values

Table 5. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to GND (ground = 0 V).

| Symbol | Parameter | Conditions | Min | Max | Unit |
|---------------------|------------------------------|---|-------------------|--------------|------|
| V_{I} | input voltage | input EN | [<u>1</u>] -0.5 | +6.0 | V |
| | | input VIN | [2] -0.5 | +6.0 | V |
| V _{SW} | switch voltage | output VOUT | [2] -0.5 | $V_{I(VIN)}$ | V |
| I _{IK} | input clamping current | input EN: $V_{I(EN)} < -0.5 \text{ V}$ | -50 | - | mA |
| I _{SK} | switch clamping current | input VIN: $V_{I(VIN)} < -0.5 \text{ V}$ | -50 | - | mA |
| | | output VOUT: $V_{O(VOUT)} < -0.5 \text{ V}$ | -50 | - | mA |
| | | output VOUT: $V_{O(VOUT)} > V_{I(VIN)} + 0.5 \text{ V}$ | - | 50 | mA |
| I _{SW} | switch current | V _{SW} > -0.5 V | - | ±2500 | mA |
| T _{j(max)} | maximum junction temperature | | -40 | +125 | °C |
| T _{stg} | storage temperature | | -65 | +150 | °C |
| P _{tot} | total power dissipation | | [3] _ | 470 | mW |

^[1] The minimum input voltage rating may be exceeded if the input current rating is observed.

10. Recommended operating conditions

Table 6. Recommended operating conditions

| Symbol | Parameter | Conditions | Min | Max | Unit |
|------------------|---------------------|------------|-----|-----|------|
| VI | input voltage | | 0.8 | 5.5 | V |
| T _{amb} | ambient temperature | | -40 | +85 | °C |

^[2] The minimum and maximum switch voltage ratings may be exceeded if the switch clamping current rating is observed.

^[3] The (absolute) maximum power dissipation depends on the junction temperature T_j. Higher power dissipation is allowed with lower ambient temperatures. The conditions to determine the specified values are T_{amb} = 85 °C and the use of a two layer PCB.

Logic controlled high-side power switch

11. Thermal characteristics

Table 7. Thermal characteristics

| Symbol | Parameter | Conditions | Тур | Unit |
|---------------|---|------------|----------------|------|
| $R_{th(j-a)}$ | thermal resistance from junction to ambient | | <u>[1]</u> 139 | K/W |

^[1] R_{th(j-a)} is dependent upon board layout. To minimize R_{th(j-a)}, ensure that all pins have a solid connection to larger copper layer areas. In multi-layer PCBs, the second layer should be used to create a large heat spreader area below the device. Avoid using solder-stop varnish under the device.

12. Static characteristics

Table 8. Static characteristics

 $V_{I(VIN)} = 1.0 \text{ V}$ to 5.5 V, unless otherwise specified; Voltages are referenced to GND (ground = 0 V).

| Symbol | Parameter | Conditions | Ta | _{mb} = 25 | °C | $T_{amb} = -40$ °C | C to +85 °C | Unit |

Logic controlled high-side power switch

13.1 Waveforms, graphs and test circuit

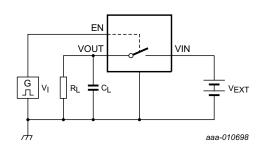

Measurement points are given in Table 11.

Logic level: $V_{\mbox{\scriptsize OH}}$ is the typical output voltage that occurs with the output load.

Fig 14. Switching times

Table 11. Measurement points

| Supply voltage | EN Input | Output | | | |
|---------------------|------------------------|---------------------|---------------------|--|--|
| V _{I(VIN)} | V _M | V _X | V _Y | | |
| 1.0 V to 5.5 V | $0.5 \times V_{I(EN)}$ | $0.1 \times V_{OH}$ | $0.9 \times V_{OH}$ | | |

Test data is given in Table 12.

Definitions test circuit:

R_L = Load resistance.

 C_L = Load capacitance including jig and probe capacitance.

 V_{EXT} = External voltage for measuring switching times.

Fig 15. Test circuit for measuring switching times

Table 12. Test data

17.1 Data sheet status

| Document status[1][2] | Product status[3] | Definition |
|--------------------------------|-------------------|---|
| Objective [short] data sheet | Development | This document contains data from the objective specification for product development. |
| Preliminary [short] data sheet | Qualification | This document contains data from the preliminary specification. |
| Product [short] data sheet | Production | This document contains the product specification. |

- [1] Please consult the most recently issued document before initiating or completing a design.
- [2] The term 'short data sheet' is explained in section "Definitions"
- [3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nxp.com.

17.2 Definitions

Draft — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local NXP Semiconductors sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

Product specification — The information and data provided in a Product data sheet shall define the specification of the product as agreed between NXP Semiconductors and its customer, unless NXP Semiconductors and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the NXP Semiconductors product is deemed to offer functions and qualities beyond those described in the Product data sheet.

17.3 Disclaimers

Limited warranty and liability — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. NXP Semiconductors takes no responsibility for the content in this document if provided by an information source outside of NXP Semiconductors.

In no event shall NXP Semiconductors be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, NXP Semiconductors' aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the *Terms and conditions of commercial sale* of NXP Semiconductors.

Right to make changes — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use — NXP Semiconductors products are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors and its suppliers accept no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk

Applications — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using NXP Semiconductors products, and NXP Semiconductors accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the NXP Semiconductors product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

NXP Semiconductors does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using NXP Semiconductors products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). NXP does not accept any liability in this respect.

Limiting values — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

Terms and conditions of commercial sale — NXP Semiconductors products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nxp.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. NXP Semiconductors hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of NXP Semiconductors products by customer.

No offer to sell or license — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Non-automotive qualified products — Unless this data sheet expressly states that this specific NXP Semiconductors product is automotive qualified, the product is not suitable for automotive use. It is neither qualified nor tested in accordance with automotive testing or application requirements. NXP Semiconductors accepts no liability for inclusion and/or use of non-automotive qualified products in automotive equipment or applications.

In the event that customer uses the product for design-in and use in automotive applications to automotive specifications and standards, customer (a) shall use the product without NXP Semiconductors' warranty of the product for such automotive applications, use and specifications, and (b) whenever customer uses the product for automotive applications beyond

NXP Semiconductors' specifications such use shall be solely at customer's own risk, and (c) customer fully indemnifies NXP Semiconductors for any liability, damages or failed product claims resulting from customer design and use of the product for automotive applications beyond NXP Semiconductors' standard warranty and NXP Semiconductors' product specifications.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.

OOO «ЛайфЭлектроникс" "LifeElectronics" LLC

ИНН 7805602321 КПП 780501001 P/C 40702810122510004610 ФАКБ "АБСОЛЮТ БАНК" (ЗАО) в г.Санкт-Петербурге К/С 3010181090000000703 БИК 044030703

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
