

925-093 to 925-299

**31/32**

## Description

### General Notes

The series 31 illuminated pushbuttons are equipped with snap-action or low-level switching elements.

For technical data see pages 2-4.

In addition to the standard contacts (gold-plated silver), silver contacts can also be ordered. The front dimensions of these units are 18 x 24 mm or 18 mm dia.

In addition to a number of illuminated pushbuttons, the customer can choose from a wide range of other units and accessories having the same front and mounting dimensions: indicators, keylock switches, flashers, segment displays, buzzers, illuminated pushbuttons with microfuse, etc. (For keylock switches see series 51 or 61.)

### Mounting

Mounting from the front through the mounting hole is assured even when the wiring has already been attached (mounting dimensions and spacing see pages 5-7).

The universal terminals of the low-level switching elements permit mounting on printed circuit boards (PCB).

These terminals are also suitable for dip soldering. For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in. All rectangular switches, as well as the square and round keylock switches are secured against rotation.

### Lenses

The flat or concave lenses, made of polymethyl methacrylate, are obtainable in various colours, as well as translucent or transparent.

### Marking

For engravings, hot stamping and film inserts, see under "Marking" on page 29.

### Illumination

Perfect illumination of the different coloured lenses is assured by midget-grooved lamps T 1¼ (6-60 V).

**If the supply voltage is above 60 V, an external dropping resistor or capacitor must be used.** Multi-LED midget-grooved lamps T 1¼ (6, 12, 24, 48 V) are available in the colours red, yellow and green.

**Due to the high surface temperature, resistors may not be soldered direct to the terminals of the pushbuttons.**

See under "Lamp accessories" on page 22.

### Position indication

When a switch with maintained action is actuated, the lens remains in the depressed position mechanically. The state of the switch is apparent at all times from the position of the lens.

### How to order

31-XXX.OXX

31-9XX.X

Lens

Example:

- Illuminated pushbutton, round, with momentary action; gold-plated silver contact; 1 switching element  
31-131.025
- Lens, red  
31-933.2

All dimensions in mm.

We reserve the right to modify technical data.

### Snap-action switching element with soldering terminals at the sides

These elements can be stacked up to 4 elements per button.

Indicator .005/.805  
 Illuminated pushbuttons and keylock switches with snap-action switching elements:  
 – gold-plated silver contacts .025/.825  
 – silver contacts, suitable for over 20 V .015/.815

### Snap-action switching element with axial plug-in/soldering terminals 2,8 mm

These elements cannot be stacked, hence only one element per button.

Indicator .002/.802  
 Illuminated pushbuttons and keylock switches with snap-action switching elements:  
 – gold-plated silver contacts .022/.822  
 – silver contacts, suitable for over 20 V .012/.812

### Switching system

Self-cleaning, double-break, snap-action switching system.  
 Can be used as double-throw switch with one normally closed or one normally open contact per element.

### Contact material

- gold-plated silver
- silver, suitable for over 20 V

### Travel

3 mm

### Actuating force (measured at the lens)

2–5,5 N (200–550 g), depending on the number of switching elements

### Switch rating

250 VAC, 5 A (p. f. = 1)  
 250 VAC, 3 A (p. f. = 0,3)

### Switch rating AC, p. f. 0,7 as per AC 11 (IEC 337)

Voltage V	125	250
Current A	3	2

### Switch rating DC (inductive), L : R = 30 ms as per DC 11 (IEC 337)

Voltage V	24	60	110	220
Current A	2	0,7	0,2	0,1

### Continuous current

$I_{th}$  5 A.  
 The maximum permissible current in continuous operation and at ambient temperature not exceeding the quoted maximum values.

### Mechanical life

2 million operations

### Rated insulation voltage

250 VAC/DC as per VDE 0110, Group B

### Electric strength

2500 VAC, 50 Hz, 1 min between all terminals and earth, as per IEC 512-2-11.

### Terminals

Snap-action element with soldering terminals at the sides:  
 Max. wire diameter: 2 wires of 0,8 mm each  
 Max. wire cross-section of stranded cable:  $1 \times 0,75 \text{ mm}^2$   
 Snap-action element with axial plug-in terminals which can also be used as soldering terminals.  
 Plug-in terminals:  $2,8 \times 0,5 \text{ mm}$   
 Soldering terminal: max. wire diameter: 2 wires of 1 mm each  
 Max. wire cross-section of stranded cable:  $2 \times 0,75 \text{ mm}^2$

### Ambient temperature

–25 °C to +55 °C

For indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely.

### Storage temperature

–40 °C to +85 °C

### Switching system

This low-level switching element was designed for switching low powers in electronic circuits. The mechanism assures reliable switching of loads ranging from a few  $\mu\text{A}/\mu\text{V}$  up to 100 mA/42 VAC/VDC. Single-break momentary contact, as normally open or normally closed with 4 independent points of contact.  
2 momentary contacts per switching element; combination of normally open and normally closed is possible.  
Special features are the long life, extremely short rebound time and stable contact resistance.

### Contact material

gold-plated

### Travel

3 mm

### Actuating force (measured at the lens)

3–3,5 N (300–350 g)

### Switch rating

10  $\mu\text{A}/100 \mu\text{V}$  to 100 mA at 42 VAC/VDC

### Contact resistance

Value as new  $\leq 50 \text{ m}\Omega$

### Rebound time

typical  $< 100 \mu\text{s}$

### Mechanical life

5 million operations

### Electric strength

2500 VAC, 50 Hz, 1 min between all terminals and earth, as per IEC 512-2-11.

### Terminals

The universal terminals permit these units to be mounted on printed circuit boards (PCB). These terminals can also be used as soldering or plug-in terminals. For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

Max. wire diameter: 2 wires of 0,8 mm each

Max. wire cross-section of stranded cable:  $1 \times 0,75 \text{ mm}^2$

Plug-in terminals:  $2,0 \times 0,5 \text{ mm}$

### Ambient temperature

$-25 \text{ }^\circ\text{C}$  to  $+55 \text{ }^\circ\text{C}$

For indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely.

### Storage temperature

$-40 \text{ }^\circ\text{C}$  to  $+85 \text{ }^\circ\text{C}$

### Shockproof (single impact, semi-sinusoidal)

15 g for 11 ms as per IEC 68-2-27

### Actuator case

Made of polytherimide, self-extinguishing

### Switch case

Made of polysulfon, heat-resistant and self-extinguishing

### Degree of protection of front as per IEC 529

IP 40

IP 67 with sprayproof cover

### Switching function (colour code)

### Terminals

### PCB layout conductor side

**Resistance to vibration** (sinusoidal)

10 g at 10–2000 Hz, amplitude 1,5 mm as per IEC 68-2-6

**Shockproof** (single impacts, semi-sinusoidal)

15 g for 11 ms as per IEC 68-2-27

**Actuator case**

Made of polytherimide, self-extinguishing

**Switch case**

DAP (diallyl phthalate), heat-resistant and self-extinguishing

**Degree of protection** of front as per IEC 529

IP 40

IP 67 with sprayproof cover

For lamps see page 21

With indicators and illuminated pushbuttons equipped with diodes, the user is able to perform a lamp check

or wire an alarm circuit simply with a considerable saving of space.

**Applications:**

Lamp check

Lamp check with blocking diodes

Alarm circuit from fault annunciating system

Lamp check and alarm circuit

Lamp check and alarm circuit with only one diode and AC voltage

LC = Lamp check

Description		Type No.	Depth mm
Buzzer, continuous and intermittent tone	10-26 VDC	31-801.002	36

(-) a — b (+) Continuous tone  
 (+) a . . . . b (-) Intermittent tone

**Technical data**

**Acoustic data**

Sound pressure 95 db ± 5 at a distance of 0,1 m  
 Sound frequency approx. 2,0 kHz  
 Interval frequency 4 Hz

**Electrical data**

Operating voltage: 10-26 VDC  
 Working current: ≤ 30 mA

**Mechanical data**

Dimensions of front: 18 x 24 mm  
 Mounting hole: 16 mm dia.  
 Back panel depth: 36 mm  
 Terminals: Plug-in terminals 2,8 x 0,5 mm  
 Degree of protection: IP 40 as per IEC 529

**Materials**

Case: polyetherimide, self-extinguishing  
 Storage and operating temperature: -25 °C to +55 °C

**Application**

Depending on how the terminals are connected, the buzzer can operate with a continuous tone a(-) b(+) or with intermittent tone a(+) b(-).

**Note:** For mounting on PCB use plug-in base 31-942.

Dimensions see page 6

18 x 24 mm

Description		Type No.	Depth mm
Buzzer, continuous and intermittent tone	10-55 VAC 10-75 VDC	31-810.005	67

### Technical data

#### Sound pressure

90 db ± 5 at a distance of 0,1 m  
Volume variable with a 1 MΩ/potentiometer or corresponding fixed resistor.

#### Frequency (tone)

appr. 2,8 kHz

#### Supply voltage I

#### Supply voltage II

#### Current consumption

typical 25 mA AC  
typical 15 mA DC

#### Typical applications

1. Supply voltage I  
Continuous tone  
U = 10-35 VAC  
U = 10-50 VDC

2. Supply voltage II  
Continuous tone  
U = 35-55 VAC  
U = 35-75 VDC

3. Intermittent tone  
Interval appr. 3 Hz

4. Volume control

#### Ambient temperature

-25 °C to +55 °C

#### Storage temperature

-40 °C to +85 °C

#### System

- Contactless electronic buzzer
- With IC oscillator

#### Features

- Low power consumption
- Wide voltage range
- No mechanical contacts
- Rugged construction

Description		Type No.		
Hinged, transparent <b>protective cover</b> with means of sealing (to prevent unauthorized operation of the lens)	square	31-920		
	rectangular	01-925		
				
Two-part <b>sprayproof cover</b> enabling the lamp to be replaced without problems (protection IP 67)	square membrane of PVC	31-923		
	rectangular membrane of silicone	31-924.2		
				
<b>Protective guard, matt chromium-plated</b> (with the narrow ends bent upwards) (with the broad sides bent upwards)		01-926 01-927		
				
<b>Blind plugs</b>	rectangular 18 x 24 mm	black grey	01-947.0 01-947.8	
	square 18 x 18 mm	black grey	01-948.0 01-948.8	
	circular 18 mm dia.	black grey	01-949.0 01-949.8	

Description	Type No.
<p>AML adaptor for American panel cutout</p>  <p style="margin-left: 100px;">square</p>	<p>31-948</p> 
 <p style="margin-left: 100px;">rectangular</p>	<p>31-949</p> 
<p>Insulation socket for axial snap-action switching element 2,8 mm, to cover the plug-in terminals</p>	<p>01-928</p> 
<p>Terminal cover for snap-action switching element</p>	<p>01-929</p> 

**Description**

Type No.

**Axial PCB plug-in base for low-level switching elements**  
16,4 mm dia. x 9,8 mm high

31-940

**Right-angled PCB plug-in base for low-level switching elements**  
17,9 mm square x 8,4 mm high  
The withdrawable mounting pins allow the distance between the PCB plug-in base and the board to be varied by up to 3 mm

31-941

**Axial PCB plug-in base for axial snap-action switching element 2,8 mm**  
17,8 mm dia. x 9,8 mm high

31-942

**Plug-in adapter with screw connection for switches with plug-in terminal 2,8 x 0,5 mm**  
The screw connections can be applied for 2 wires each 1 mm Ø or 2 standard wires each 0,75 mm<sup>2</sup>.  
The use of the plug-in adapter increases the back panel depth by 14 mm compared to the standard switch requiring a new spacing dimension with the adapter of 24 x 24 mm.

31-943.0

Description	Type No.	
<p><b>Connector for low-level switching elements</b></p> <p><b>Insulation socket for connector 31-945</b></p>	<p>31-945</p> <p>31-928</p>	
<p><b>Connector for axial snap-action switching element 2,8 mm</b></p> <p><b>Insulation socket for connector 31-946</b></p>	<p>31-946</p> <p>31-929</p>	

Description	Type No.	
Lens remover	02-905	
Lamp remover	02-906	
LED remover	51-996	
Dressing tool used as aid to aligning buttons	01-906	
Mounting tool for tightening (or loosening) fixing nuts	01-907	

Description	Type No.	
<p><b>Metal fixing ring</b> (especially for keylock switches)</p>	<p>31-991</p>	
<p><b>Adhesive label</b> for illuminated pushbuttons with microfuse 18 mm dia. x 24 mm</p>	<p>31-999</p>	

## 1. Engraving

### Typefaces

In addition to the most commonly used world languages (see DIN 1451) with close spacing, the following typefaces are available: Scandinavian, Slavian, Greek, Russian.

### Coloured filling of engraving

Red, blue and black lenses have the engraving filled with white. Lenses of other colours have the engraving filled with black.

### Symbols

A list of the symbols available can be supplied on request.

## 2. Hot stamping

For large batches it is worth while to have the lettering produced by hot stamping.

### Typefaces

For letters and figures, typefaces with 2,5 mm, 3 mm and 4 mm are available.

### Symbols

A list of the symbols available can be supplied on request.

### Important!

Before engraving, check the position of the illuminated pushbutton or indicator.

Height of letters mm	Thickness of letters mm	Horizontal mounting			Vertical mounting			Number of lines	Number of letters per line	Number of letters per line	Number of lines	Number of letters per line	Number of letters per line
		Number of lines	Number of letters per line	Number of letters per line	Number of lines	Number of letters per line	Number of letters per line						
h	s		(caps)	(small)		(caps)	(small)		(caps)	(small)		(caps)	(small)
2,5	0,4	4	11	12	5	7-8	8	3	6	6	4	7-8	8
3	0,4	3	9-10	10-11	4	6-7	7	2	5	6	3	6-7	7
4	0,5	2	7	7-8	3	4-5	5	2	3	4	2	4-5	5
5	0,5	2	5-6	6	2	3-4	4	1	2	3	2	3-4	4
6	0,6	1	4-5	5	2	3	3-4	1	2	3	1	3	3-4
8	0,6	1	3-4	3-4	1	2-3	2-3	1	2	2	1	2-3	2-3

## 3. Film inserts

Instead of using engraving, the lenses can be fitted with transparent film inserts. For this purpose, though, it is advisable to use transparent lenses. When a smoked lens is used, the lettering does not become visible until the lamp lights.

To insert the film, the feet of the lens support have to be pushed together far enough to enable the lens to be lifted off easily.

### Film dimensions

max. 12,7 x 18,7 mm

12,7 x 12,7 mm

12,8 mm

Film thickness 0,2 mm

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
