

16-Channel, Low Harmonic Distortion, High Voltage Analog Switch with Bleed Resistors

Features

- ▶ Low harmonic distortion
- ▶ Integrated bleed resistors on the outputs
- ▶ 3.3 or 5.5V CMOS input logic level
- ▶ 20MHz data shift clock frequency
- ▶ HVC MOS technology for high performance
- ▶ Very low quiescent power dissipation ($\sim 10\mu\text{A}$)
- ▶ Low parasitic capacitance
- ▶ DC to 50MHz small signal frequency response
- ▶ CMOS logic circuitry for low power
- ▶ Excellent noise immunity
- ▶ Cascadable serial data register with latches
- ▶ Flexible operating supply voltages

Applications

- ▶ Medical ultrasound imaging
- ▶ NDT metal flaw detection
- ▶ Piezoelectric transducer drivers
- ▶ Optical MEMS modules

General Description

The Supertex HV2733 is a low charge injection, 16-channel, low harmonic distortion, high voltage analog switch integrated circuit (IC) intended for use in applications requiring high voltage switching, controlled by low voltage control signals, such as medical ultrasound imaging, piezoelectric transducer drivers, and printers. The bleed resistors eliminate voltage built up on capacitive loads such as piezoelectric transducers.

The outputs are configured as single-pole double-throw analog switches. Data are shifted into a 8-bit shift register using an external clock. The $\overline{\text{LE}}$ latches the shift register data into the individual switch latches. A logic high connects a switch common YX to SWX. A logic low connects YX to $\overline{\text{SWX}}$. A logic high in CLR resets all switches to $\overline{\text{SWX}}$ simultaneously.

To reduce any possible clock feed-through noise, the latch enable bar ($\overline{\text{LE}}$) should be left high until all bits are clocked in. Data are clocked in during the rising edge of the clock. Using HVC MOS technology, this device combines high voltage bilateral DMOS switches and low power CMOS logic to provide efficient control of high voltage analog signals.

Block Diagram

Ordering Information

Device	Package Option
	48-Lead LQFP 7.00x7.00mm body 1.60mm height (max) 0.50mm pitch
HV2733	HV2733FG-G

-G indicates package is RoHS compliant ('Green')

Absolute Maximum Ratings

Parameter	Value
V_{DD} logic supply	-0.5V to +7.0V
$V_{PP} - V_{NN}$ differential supply	220V
V_{PP} positive supply	-0.5V to +200V
V_{NN} negative supply	+0.5V to -200V
Logic input voltage	-0.5V to $V_{DD} + 0.3V$
V_{SIG} analog signal range	V_{NN} to V_{PP}
Peak analog signal current/channel	2.5A
Storage temperature	-65°C to 150°C
Power dissipation, 48-Lead LQFP	1.0W

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.

Recommended Operating Conditions

Sym	Parameter	Value
V_{DD}	Logic power supply voltage	3.0V to 5.5V
V_{PP}	Positive high voltage supply	+40V to $V_{NN} + 200V$
V_{NN}	Negative high voltage supply	-40V to -160V
V_{IH}	High level input voltage	$0.9V_{DD}$ to V_{DD}
V_{IL}	Low level input voltage	0V to $0.1V_{DD}$
V_{SIG}	Analog signal voltage peak-to-peak	$V_{NN} + 10V$ to $V_{PP} - 10V$
T_A	Operating free air temperature	0°C to 70°C

Notes:

- Power up/down sequence is arbitrary except GND must be powered-up first and powered-down last.
- V_{SIG} must be within V_{NN} and V_{PP} or floating during power up/down transition.
- Rise and fall times of power supplies V_{DD} , V_{PP} and V_{NN} should not be less than 1.0msec.

Notes:

1. Serial data is clocked in on the L to H transition of the CLK.
2. All switches go to a state retaining their latched condition at the rising edge of $\overline{LE}$. When $\overline{LE}$ is low the shift registers data flow through the latch.
3. D_{OUT} is high when data in the shift register 7 is high.
4. Shift registers clocking has no effect on the switch states if $\overline{LE}$ is high.
5. The CLR clear input overrides all other inputs.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
