

## Optocoupler, Phototransistor Output, With Base Connection

### Features

- Isolation Test Voltage 5300 V<sub>RMS</sub>
- Interfaces with Common Logic Families
- Input-output Coupling Capacitance < 0.5 pF
- Industry Standard Dual-in-line 6-pin Package
- Lead-free component
- Component in accordance to RoHS 2002/95/EC and WEEE 2002/96/EC

1179004

### Agency Approvals

- UL1577, File No. E52744 System Code H or J, Double Protection
- DIN EN 60747-5-2 (VDE0884)  
DIN EN 60747-5-5 pending  
Available with Option 1

### Applications

AC Mains Detection  
Reed relay driving  
Switch Mode Power Supply Feedback  
Telephone Ring Detection  
Logic Ground Isolation  
Logic Coupling with High Frequency Noise Rejection

### Description

The 4N25 family is an Industry Standard Single Channel Phototransistor Coupler. This family includes the 4N25/ 4N26/ 4N27/ 4N28. Each optocoupler consists of gallium arsenide infrared LED and a silicon NPN phototransistor.

These couplers are Underwriters Laboratories (UL) listed to comply with a 5300 V<sub>RMS</sub> isolation test voltage. This isolation performance is accomplished through special Vishay manufacturing process.

Compliance to DIN EN 60747-5-2(VDE0884)/ DIN EN 60747-5-5 pending partial discharge isolation specification is available by ordering option1.

These isolation processes and the Vishay ISO9001 quality program results in the highest isolation performance available for a commercial plastic phototransistor optocoupler.

The devices are also available in lead formed configuration suitable for surface mounting and are available either on tape and reel, or in standard tube shipping containers.

Note:

For additional design information see Application Note 45 Normalized Curves

### Order Information

| Part      | Remarks                              |
|-----------|--------------------------------------|
| 4N25      | CTR > 20 %, DIP-6                    |
| 4N26      | CTR > 20 %, DIP-6                    |
| 4N27      | CTR > 10 %, DIP-6                    |
| 4N28      | CTR > 10 %, DIP-6                    |
| 4N25-X006 | CTR > 20 %, DIP-6 400 mil (option 6) |
| 4N25-X007 | CTR > 20 %, SMD-6 (option 7)         |
| 4N25-X009 | CTR > 20 %, SMD-6 (option 9)         |
| 4N26-X006 | CTR > 20 %, DIP-6 400 mil (option 6) |
| 4N26-X007 | CTR > 20 %, SMD-6 (option 7)         |
| 4N26-X009 | CTR > 20 %, SMD-6 (option 9)         |
| 4N27-X007 | CTR > 10 %, SMD-6 (option 7)         |
| 4N27-X009 | CTR > 10 %, SMD-6 (option 9)         |
| 4N28-X009 | CTR > 10 %, SMD-6 (option 9)         |

For additional information on the available options refer to Option Information.

### Absolute Maximum Ratings

$T_{amb} = 25\text{ }^{\circ}\text{C}$ , unless otherwise specified

Stresses in excess of the absolute Maximum Ratings can cause permanent damage to the device. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of this document. Exposure to absolute Maximum Rating for extended periods of the time can adversely affect reliability.

### Input

| Parameter         | Test condition              | Symbol     | Value | Unit |
|-------------------|-----------------------------|------------|-------|------|
| Reverse voltage   |                             | $V_R$      | 6.0   | V    |
| Forward current   |                             | $I_F$      | 60    | mA   |
| Surge current     | $t < 10\text{ }\mu\text{s}$ | $I_{FSM}$  | 2.5   | A    |
| Power dissipation |                             | $P_{diss}$ | 100   | mW   |

### Output

| Parameter                           | Test condition      | Symbol     | Value | Unit |
|-------------------------------------|---------------------|------------|-------|------|
| Collector-emitter breakdown voltage |                     | $V_{CEO}$  | 70    | V    |
| Emitter-base breakdown voltage      |                     | $V_{EBO}$  | 7.0   | V    |
| Collector current                   |                     | $I_C$      | 50    | mA   |
| Collector current                   | $t < 1.0\text{ ms}$ | $I_C$      | 100   | mA   |
| Power dissipation                   |                     | $P_{diss}$ | 150   | mW   |

### Coupler

| Parameter                                        | Test condition                                                                 | Symbol    | Value         | Unit               |

## Ozone Depleting Substances Policy Statement

It is the policy of Vishay Semiconductor GmbH to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design  
and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.

Vishay Semiconductor GmbH, P.O.B. 3535, D-74025 Heilbronn, Germany

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
