CMOS Integrated Circuits High Power SP4T Switch

DESCRIPTION

The μPD5904T7K is a CMOS MMIC SP4T (Single Pole Four Throw) switch for GSM and UMTS/LTE main Antenna switching and other High Power RF switching applications up to +35 dBm.

This device can operate frequency from 0.05 to 6.0 GHz, having low insertion loss and high isolation.

This device is housed in a 12-pin plastic QFN (Quad Flat Non-Leaded) (T7K) package.

FEATURES

- Low control voltage : $V_{cont} = 1.3 \text{ V MIN.}, V_{DD} = 2.3 \text{ V MIN.}$
- Low insertion loss : $L_{ins} = 0.4 \text{ dB TYP. @ } f = 1 \text{ GHz}$
: $L_{ins} = 0.5 \text{ dB TYP. @ } f = 2 \text{ GHz}$
- High isolation : $ISL = 35 \text{ dB TYP. @ } f = 1 \text{ GHz}$
: $ISL = 30 \text{ dB TYP. @ } f = 2 \text{ GHz}$
- High Handling power : $P_{in(0.1dB)} = +38 \text{ dBm TYP. @ } f = 0.9/2 \text{ GHz}$
- High-density surface mounting : 12-pin plastic QFN (T7K) package (2.0 × 2.0 × 0.6 mm)
- No DC blocking capacitors required.

APPLICATIONS

- GSM and UMTS/LTE main Antenna switching
- Diversity Antenna switching
- Antenna tuning Application

ORDERING INFORMATION

Part Number	Order Number	Package	Marking	Supplying Form
μPD5904T7K-E2	μPD5904T7K-E2-A	12-pin plastic QFN (T7K) (Pb-Free)	5904	<ul style="list-style-type: none"> • Embossed tape 8 mm wide • Pin 10, 11 and 12 face the perforation side of the tape • Qty 3 kpcs/reel

Remark To order evaluation samples, please contact your nearby sales office.

Part number for sample order: μPD5904T7K-A

CAUTION

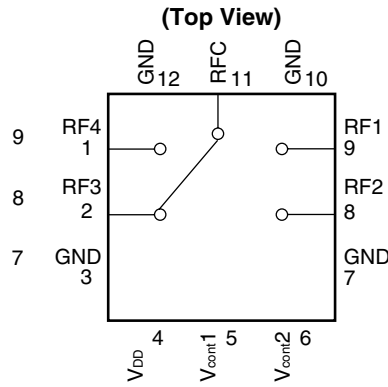

Although this device is designed to be as robust as possible, ESD (Electrostatic Discharge) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions must be employed at all times.

The mark <R> shows major revised points.

The revised points can be easily searched by copying an "<R>" in the PDF file and specifying it in the "Find what:" field.

<R> **EVALUATION CIRCUIT**

The application circuits and their parameters are for reference only and are not intended for use in actual design-ins.

APPLICATION INFORMATION

- L_{ESD} provides a means to increase the ESD protection on a specific RF port, typically the port attached to the antenna.

TYPICAL CHARACTERISTICS

($T_A = +25^{\circ}\text{C}$, $V_{DD} = 2.5\text{ V}$, $V_{\text{cont (H)}} = 1.8\text{ V}$, $V_{\text{cont (L)}} = 0\text{ V}$, $Z_O = 50\ \Omega$, unless otherwise specified)

RECOMMENDED SOLDERING CONDITIONS

This product should be soldered and mounted under the following recommended conditions. For soldering methods and conditions other than those recommended below, contact your nearby sales office.

Soldering Method	Soldering Conditions	Condition Symbol
Infrared Reflow	Peak temperature (package surface temperature) : 260°C or below Time at peak temperature : 10 seconds or less Time at temperature of 220°C or higher : 60 seconds or less Preheating time at 120 to 180°C : 120±30 seconds Maximum number of reflow processes : 3 times Maximum chlorine content of rosin flux (% mass) : 0.2% (Wt.) or below	IR260
Partial Heating	Peak temperature (terminal temperature) : 350°C or below Soldering time (per side of device) : 3 seconds or less Maximum chlorine content of rosin flux (% mass) : 0.2% (Wt.) or below	HS350

CAUTION

Do not use different soldering methods together (except for partial heating).

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
