

SY898530U

500MHz 1:16 3.3V-to-2.5V LVPECL
Fanout Buffer

General Description

The SY898530U is a 1:16 Fanout buffer which can accept most standard differential logic levels and outputs the signal as a differential 2.5V LVPECL signal. The part can amplify input signals as small as 150mVpp to the full LVPECL output swing. The SY898530U is well suited for clock distribution applications which demand versatility and low-skew performance. It is pin-to-pin compatible with IDT's ICS8530 fanout buffer.

The SY898530U operates from a 3.3V $\pm 5\%$ core power supply and a 2.5V $\pm 5\%$ output supply and is guaranteed over the full commercial temperature range (0°C to +70°C). It is available in a 48-pin TQFP lead-free package.

Data sheets and support documentation can be found on Micrel's web site at www.micrel.com.

Functional Block Diagram

Features

- 16 Differential 2.5V LVPECL outputs
- Differential CLK inputs. Accepts LVDS, LVPECL, LVHSTL, SSTL, HCSL logic levels
- Translates any single-ended input signal to 2.5V LVPECL levels with a resistor bias on /CLK input
- 500MHz maximum output frequency
- <50ps output skew
- <250ps part-to-part skew
- <2ns propagation delay
- 3.3V Core, 2.5V output operating supply
- 0°C to +70°C operating temperature
- Available in 48-pin TQFP package
- Pin-to-pin compatible with ICS8530

Applications

- Data distribution
- High-performance PCs
- Communications
- Parallel processor-based systems

Notes:

1. Permanent device damage may occur if absolute maximum ratings are exceeded. This is a stress rating only and functional operation is not implied at conditions other than those detailed in the operational sections of this data sheet. Exposure to absolute maximum ratings conditions for extended periods may affect device reliability.
2. The data sheet limits are not guaranteed if the device is operated beyond the operating ratings.
3. Package thermal resistance assumes exposed pad is soldered (or equivalent) to the device's most negative potential on the PCB. ψ_{JB} and θ_{JA} values are determined for a 4-layer board in still-air number, unless otherwise stated. The circuit is designed to meet the DC specifications shown in the above table after thermal equilibrium has been established.
4. For single-ended applications, the maximum input voltage for CLK, /CLK is $V_{CC} + 0.3V$.
5. Common mode voltage is defined as V_{IH} .
6. The circuit is designed to meet the DC specifications shown in the above table after thermal equilibrium has been established.

AC Electrical Characteristics

$V_{CC} = 3.135V$ to $3.465V$, $V_{CCO} = 2.375V$ to $2.625V$, $T_A = 0^{\circ}C$ to $+70^{\circ}C$, unless otherwise stated.

	Duty Cycle		47	50	53	%

Notes:

7. Measured from the differential input crossing point to the differential output crossing point.
8. Output-to-Output skew is the difference in time between outputs, receiving data from the same input, for the same temperature, voltage and transition.
9. Part-to-part skew is defined for two parts with identical power supply voltages at the same temperature and no skew at the edges at the respective inputs.
10. This parameter is defined in accordance with JEDEC Standard 65.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
