

## Corcom Facility EMI Filter Products

## A World Leader in RFI Technology

TE Connectivity (TE) has dedicated more than 50 years to developing RFI filter technology for electronic devices. We're proud that our focus on the design and production of the highest quality products has made TE a world leader in RFI technology.

Our leadership in the filter and power entry module markets was enhanced in 1988 with the acquisition of the Heavy Power Line Division of Cornell Dubilier. The high quality designs and manufacturing of these heavy power line filter products is maintained and enhanced by TE.

We have continued that dedication to excellence begun by Cornell Dubilier and inherent to TE's way of doing business. Only the highest quality designs, capacitors, inductors, and workmanship are used to produce these filters. We recognize the need for great care demanded by high-reliability military filters and automatically apply like quality to the heavy power line products. We treat all product as if it is high-reliability.

TE's office in Mundelein, Illinois provides application engineering service for these heavy power line and military products. Our engineers can help to design a special filter in the rare case a standard product from this catalog cannot adequately solve the problem. Additional product performance data and test results are available from the engineers at this facility.

TE's worldwide sales offices can help you locate information on these products or any of the hundreds of high quality power line filters and power entry modules made by TE.

The export of certain TE Connectivity products is restricted by the Arms Export Control Act (Title 22, U.S.C. Sec 2751, et seq.) or the Export Administration Act of 1979, as amended (Title 50, U.S.C., App. 2401 et seq.). Orders may be subject to export approval by the U.S. Government. Buyer must comply with all applicable export laws of all applicable jurisdictions.

*\*\* Not intended for digital / addressable systems.  
Contact TE/Corcom for recommendation on a filter solution for these systems.*

## Technical Notes

### Facility Filter Questions and Answers:

The following are examples of the most commonly asked questions about TE Connectivity's Corcom power and signal line filter products.

Although every RF filter installation must be considered according to the user's individual requirements, these general principles apply to a wide range of applications and should prove helpful as an introduction to our product.

#### Why do I need RF filters for my facility?

Corcom facility filters have both protective and security functions. Shielded installations and applications involving sensitive measurements or equipment require an environment free from conducted or radiated EMI/RFI emissions.

Facility filters for power, data, telephone and all other signals are used for every electrical penetration in EMI/RFI enclosures to reduce conducted emissions. When the shielded area is sealed, all emissions are reduced or contained.

#### What is the difference between "W" and "X" styles?

All Corcom "W" style facility power filters are designed to provide 100 dB from 14 kHz-10.0 GHz when tested per MIL-STD-220A. However, this standard only requires testing under load conditions from 100 kHz - 20 MHz (CDEUW, CDSUW, CDSUA Series).

The majority of current government programs specify MIL-STD-220A, with the additional specification of under load testing from 14 kHz - 100 kHz. This is due to requirements for sensitive electronic or national security related activities.

A filter for this higher performance application would generally be designated an "X" or "Extended Range Buffer Network" style (CDEUX, CDEUL, TECUL, CDSUX Series).

#### What is the difference between "Enclosure Style" and "Stand-Alone" Filters?

Enclosure style filters consist of removable inserts mounted in a radio frequency secure cabinet. This is the type specified by the U.S. government for a number of important advantages in heavy power and multi-line communications applications.

An enclosure makes for a simplified, single penetration field installation, providing greater RF integrity and simpler filter maintenance.

Stand-alone filters offer the identical levels of filter performance as the enclosure models, but are available with self-enclosed terminals for individual and dual line applications. Penetrations for installation are provided for this type of unit directly from the factory.

#### What is the difference between MIL-PRF-15733 and UL-1283 filters?

All Corcom power filter products are designed to meet MIL-PRF-15733, which is the general U.S. Military standard for RF filters. UL1283 is an Underwriter's Laboratories requirement for features which are primarily related to safety considerations.

The individual heavy power filters or inserts for both UL and MIL-STD applications are all equipped with oil impregnated, bypass and feed-through capacitors. UL1283 listed models use capacitors which are designed to withstand mandatory high potential factory tests of up to 2,200 volts.

#### What types of factory tests are performed on the filters?

TE has one of the most comprehensive automated quality assurance programs in the filter industry.

Certified factory test data is available upon request<sup>1</sup>. Filters are factory tested for:

- Insertion Loss
- Voltage Drop<sup>2</sup>
- Harmonic Distortion<sup>2</sup>
- Terminal Strength
- Temperature Rating<sup>2</sup>
- Dielectric Withstanding Voltage
- D.C. Insulation Resistance
- Current and Overload Ratings<sup>2</sup>

<sup>1</sup> Additional charges may apply

<sup>2</sup> Performed upon customer request only

**Technical Notes** *(continued)***Which are the "input" and "output" sides of the filters?**

Unless otherwise specified, Corcom signal and power filter products are electrically symmetrical. Either side of the unit may be used as "input" or "output" terminal (Exceptions include inductive input CDEUL and TECUL Series).

An exception to this general rule is found in enclosure style filter assemblies where only one of the two compartments is secure or "RF-tight". If the filter unit is mounted outside of the shielded area, the secure compartment would be the "output" side. Because the reverse is also true, the non-secure side would be used as the "output" if the filter is mounted inside the shielded room.

Customized enclosures with RF gasketing on both compartments are also available upon request.

**Do I need to filter the neutral line for 3-phase/4-wire power installations?**

All electrical lines entering a shielded area must be filtered to prevent conducted emissions. Even though the neutral conductor may be grounded elsewhere in the installation, this is no guarantee that radiated signals will not induce additional conducted emission.

The neutral filter must also be rated for the full system power levels, since phase imbalances and short-circuit faults can cause substantial currents to flow in the neutral line.

**What is the function of Electronic Surge Arrestors?**

Although Corcom filter products are designed for heavy duty use and subjected to rigorous testing requirements, surge currents greater than the design parameters can cause damage to sensitive equipment which is only protected from conducted radio frequency emissions by the filter.

Electronic Surge Arrestors or ESAs limit over-voltage surges and spikes to levels which prevent damage to the user's equipment. ESA installations are also available which are designed for military applications to protect from the effects of electromagnetic pulses caused by nuclear detonations or EMP.

**Why do I need filter discharge "bleeder" resistors?**

Bleeder resistors drain away any residual charge which may remain across the filter's capacitors when the power is turned off within one minute. The purpose of this feature is to prevent the possibility of harmful electrical shock.

All Corcom power products above 10A per phase are equipped with external bleeder resistors.

**When are "Power Factor Correction Coils" required?**

Power factor correction coils are required for Corcom products in 400 Hz applications where power levels exceed 25A per phase.

All 400 Hz power filters in heavy power installations draw a high level of reactive current when compared with equivalent 50/60 Hz systems. To counteract this effect, external-mounted inductors can be placed in parallel with the filter's capacitors to provide more efficient operation and are specifically recommended.

**Are Corcom filters "HEMP Certified"?**

Although there is no such thing as a "HEMP Certified" product, the surge arrester equipped version of the CDEUL Series (rated up to 150A) and the TECUL Series (rated from 225A to 1200A) have been tested by others in accordance with MIL-STD-188-125-1 and proven to comply with the residual current limits defined by this specification. MIL-STD-188-125-1 clearly requires each and every installed filter to be acceptance and verification tested in-situ after installation.

**CDEUW Series (Capacitive Input)**

# CDEUW Series

60 Hz Models Only

**Filter Cabinet**

- Modified NEMA I, constructed of not less than #14 gauge CRS with galvanized bulkhead
- Blue epoxy finish to all non-conductive surfaces
- R.F. Radiation of the shielded (load) compartment greater than 100 dB from 14 kHz to 10 GHz
- Front cover access, dual cover design
- Filter inserts pre-wired to standoffs and lugs
- Lifting hooks and mounting tabs
- Legs for floor mount available (see page 24)

**Individual Filters**

- Sealed components with welded and/or soldered seams
- Constructed of not less than #16 gauge steel with corrosion resistant plating
- Bleeder resistor to eliminate shock hazard provided
- Surge arrestors provided upon request†

**Electrical Characteristics**

**Voltage Drop:**

Less than 1% @ unity power factor

**Overload:**

140% of rated current for 15 minutes

**Harmonic Distortion:**

Less than 2% @ full rated current

**Dielectric Withstanding Voltage:**

Per MIL-PRF-15733 and UL1283

**D.C. Insulation Resistance:**

Per MIL-STD-202, Method 302

**Terminal Strength:**

Per MIL-STD-202, Method 211, Condition E

**Temperature Rise:**

Per MIL-PRF-15733 and UL1283

**R.F. Radiation:**

100 dB minimum shielding effectiveness

**Insertion Loss:**

100 dB from 14 kHz - 10 GHz per MIL-STD-220A, under standard load condition

**Applicable Publications:**

- MIL-PRF-15733 — Filters, radio interference
- MIL-STD-202 — Test methods for Components
- MIL-STD-220A — Test method of Insertion Loss
- MIL-STD-285 — Test method for Shielding Effectiveness
- NFPA 70-1987 — National Electric Code
- 486A - 1983 — Wire Connectors and Lug
- UL1283 — UL standard for EMI Filters

Shown with optional legs  
Center mounting bracket not installed on all sizes

**How to Order:**

Examples:

- CDEUW400225A6-S-L =  
4, 225A CDEUW, 120/280V filters in cabinet  
with surge arrestors and legs
- CDEUW300030B6 =  
3, 30A CDEUW, 277/480V filters in cabinet

Note 1: Surge Arrestor for A6/A4\* Models: V251BA60  
Surge Arrestor for B6 Models: V481BA60

Note 2: Current configuration listed as 5 digits with leading zeros

† Not intended for HEMP applications. Refer to the CDEUL (<150A) page 12 or TECUL Series (>225A) page 14 for HEMP applications.

**CDEUW Series (Capacitive Input) (continued)**

Recommended torque for fasteners on removable cover: 25 in. lb. ± 3 in. lb.

Max. Operating Voltage	
A6:	120/208V, 60 Hz
B6:	277/480V, 60 Hz
A4*:	120/208V, 400 Hz

\*400Hz filters available upon request. Will require external power factor correction coil. Please contact TE Connectivity Application Engineering 847-573-6517.

**CDEUL Series - Extended Range Buffer Networks (Inductive Input)**

# CDEUL Series

60 Hz Models Only

### Filter Cabinet

- Modified NEMA 1, constructed of not less than #14 gauge CRS with galvanized bulkhead
- Blue epoxy finish to all non-conductive surfaces
- R.F. Radiation of the shielded (load) compartment greater than 100 dB from 14 kHz to 10 GHz
- Front cover access, dual cover design
- Filter inserts pre-wired to standoffs and lugs
- Lifting hooks and mounting tabs
- Legs for floor mount available (see page 24)

### Individual Filters

- Sealed components with welded and/or soldered seams
- Constructed of not less than #16 gauge steel with corrosion resistant plating
- Bleeder resistor to eliminate shock hazard provided
- HEMP Surge arrestors provided upon request†

### Electrical Characteristics

#### Voltage Drop:

Less than 1% @ unity power factor

#### Overload:

140% of rated current for 15 minutes

#### Harmonic Distortion:

Less than 2% @ full rated current

#### Dielectric Withstanding Voltage:

Per MIL-PRF-15733 and UL1283

#### D.C. Insulation Resistance:

Per MIL-STD-202, Method 302

#### Terminal Strength:

Per MIL-STD-202, Method 211, Condition E

#### Temperature Rise:

Per MIL-PRF-15733 and UL1283

#### R.F. Radiation:

100 dB minimum shielding effectiveness

#### Insertion Loss:

100 dB from 14 kHz - 10 GHz per MIL-STD-220A, under load condition, using extended range buffer networks over the frequency range of 14 kHz - 20 MHz

### Applicable Publications:

- MIL-PRF-15733 — Filters, radio interference
- MIL-STD-202 — Test methods for Components
- MIL-STD-220A — Test method of Insertion Loss
- MIL-STD-188-125 — HEMP
- MIL-STD-285 — Test method for Shielding Effectiveness
- NFPA 70-1987 — National Electric Code
- 486A - 1983 — Wire Connectors and Lug
- UL1283 — UL standard for EMI Filters

† Intended for HEMP applications ≤150A. For filters rated ≥225A refer to the new TECUL Series on page 14.

Shown with optional legs  
Center mounting bracket not installed on all sizes

### How to Order:

#### Examples:

- CDEUL401000A6-S-L =  
4, 1000A CDEUL, 120/280V filters in cabinet  
with surge arrestors and legs
- CDEUL300030B6 =  
3, 30A CDEUL, 277/480V filters in cabinet

Note 1: Surge Arrestor for A6/A4\* Models: V251BA60  
Surge Arrestor for B6 Models: V481BA60

Note 2: Current configuration listed as 5 digits with leading zeros

**CDEUL Series - ERBN (Inductive Input) (continued)**

Recommended torque for fasteners on removable cover: 25 in. lb. ± 3 in. lb.

**TECUL Series - Extended Range Buffer Networks (Inductive Input)**

# TECUL Series

## Filter Cabinet

- Modified NEMA 1, constructed of not less than #14 gauge CRS with galvanized bulkhead
- WHITE epoxy finish to all non-conductive surfaces
- Brush-plated electro-tin on all conductive surfaces
- R.F. Radiation of the shielded (load) compartment greater than 100 dB from 14 kHz to 10 GHz
- Front cover access, dual cover design
- Filter inserts pre-wired to standoffs and lugs
- Lifting hooks and mounting tabs
- Legs for floor mount available (see page 24)

## Individual Filters

- Sealed components with welded seams
- Constructed of not less than #16 gauge steel with corrosion resistant plating
- Bleeder resistor to eliminate shock hazard provided
- HEMP Surge arrestors provided upon request†

## Electrical Characteristics

### Voltage Drop:

Less than 1% @ unity power factor

### Overload:

140% of rated current for 15 minutes

### Harmonic Distortion:

Less than 2% @ full rated current

### Dielectric Withstanding Voltage:

Per MIL-PRF-15733 and UL1283

### D.C. Insulation Resistance:

Per MIL-STD-202, Method 302

### Terminal Strength:

Per MIL-STD-202, Method 211, Condition E

### Temperature Rise:

Per MIL-PRF-15733 and UL1283

### R.F. Radiation:

100 dB minimum shielding effectiveness

### Insertion Loss:

100 dB from 14 kHz - 10 GHz per MIL-STD-220B, under load condition, using extended range buffer networks over the frequency range of 14 kHz - 20 MHz

## Applicable Publications:

- MIL-PRF-15733 – Filters, radio interference
- MIL-STD-202 – Test methods for Components
- MIL-STD-220B – Test method of Insertion Loss
- MIL-STD-188-125-1 – HEMP

Less than 2% @ full rated current

#### Dielectric Withstanding Voltage:

Per MIL-PRF-15733 and UL1283

#### D.C. Insulation Resistance:

Per MIL-STD-202, Method 302

#### Terminal Strength:

Per MIL-STD-202, Method 211, Condition E

#### Temperature Rise:

Per MIL-PRF-15733 and UL1283

#### R.F. Radiation:

100 dB minimum shielding effectiveness

#### Insertion Loss:

100 dB from 14 kHz - 10 GHz per MIL-STD-220A, under load condition

### Applicable Publications:

\*400Hz filters available upon request. Will require external power factor correction coil. Please contact TE Connectivity Application Engineering 847-573-6517.

Max. Operating Voltage	
A6:	120/208V, 60 Hz
B6:	277/480V, 60 Hz
A4*:	120/208V, 400 Hz

CDSUA Series

# CDSUA Series

## Features

- All four current ratings utilize a single housing (single-wire 30, 60, 100A and two-wire 30A)
- Sealed using 18 AWG steel suitably plated housing
- Removable input cover provides quick access to terminals
- Three knockouts on the input side
- Discharge bleeder resistor provided to reduce shock hazard
- Surge protector provided upon request

## Electrical Characteristics

### Voltage Drop:

Less than 1% @ unity power factor

### Overload:

140% of rated current for 15 minutes

### Harmonic Distortion:

Less than 2% @ full rated current

### Dielectric Withstanding Voltage:

Per MIL-PRF-15733 and UL1283

### D.C. Insulation Resistance:

Per MIL-STD-202, Method 302

### Terminal Strength:

Per MIL-STD-202, Method 211, Condition E

### Current Rating:

Singe-wire 30, 60 and 100A, two-wire 30A

### R.F. Radiation:

100 dB minimum shielding effectiveness

### Insertion Loss:

100 dB from 100 kHz - 10 GHz per MIL-STD-220A

### Operating Frequency:

50/60Hz

### Operating Voltage:

Line to Ground: 277 VAC (max)  
Line to Line: 480 VAC (max)

## Applicable Publications:

UL1283 – UL standard for EMI Filters

## How to Order:

Examples: CDSUA1030-C, CDSUA2030-C-S

## Engineering Notes

---

**Power Factor Correction Coils (Three Phase)**

**Features**

- Used to cancel part of the undesirable capacitive-reactive current due to the line-to-ground capacitors in Power Line Filters operating at 400 Hz power
- Coils are optional for CDEUX,CDEUW, CDEUL, TECUL, CDSUW and CDSUX filters

**Electrical Characteristics**

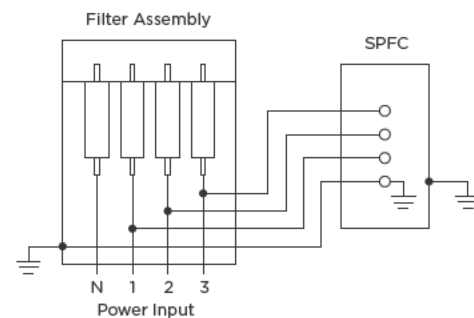

**Voltage Rating:**  
120/208 VAC/400 Hz

**Temperature Rise:**  
Case temperature rise shall not exceed 35°C when operating at an ambient temperature of 25°C

**Materials**

- Unit Case:**
- #16GA min. steel
  - All surfaces painted

Power factor correction coils are also available for single phase products. Contact Product Engineering at 847-573-6517

**NEMA Cabinet Legs**

# NEMA Cabinet Legs

For use with CDEUX, CDEUW, CDEUL and TECUL Series NEMA Cabinet Style Filters

Each Leg requires the following additional installation hardware *(sold separately)*

TE part #	Description	Qty
4-1609604-6	Screw, 7-16 x 1" L	4
4-1609555-6	Nut, Hex 7/16-14	4
4-1609422-5	Washer, Flat, 7/16"	8
4-1609428-5	Washer, Lock, 7/16"	4

Filter cabinets specified with factory installed legs are supplied with legs continuously welded to the exterior of the filter enclosure. No penetrations are made in the enclosure to accommodate the legs.

Field installation of legs to existing cabinets requires modification of the filter enclosure to accommodate mounting hardware through the cabinet.

**SLA Series — Cabinets and Signal/Data/Control Filters**

---

## SLA Series

### Enclosure

- Modified NEMA I, constructed of not less than #14 gauge CRS with galvanized bulkhead
- Blue epoxy finish to all non-conductive surfaces
- R. F. Radiation of the shielded (load) side greater than 100 dB up to 10 GHz
- Front cover access
- Pre-wired push pin terminal blocks or screw type terminations
- MOV or Gas tube arrestors installed upon request
- Legs for floor mount available

### Individual Filters

- Each filter is a dual circuit
- Sealed with soldered seams
- Covered with suitable plating
- Designed and tested per MIL-PRF-15733, latest revision

### Filter Selection *(Part Numbers for Ordering)*

- WFV3470 — Telephone (KS20162)
- WFV3544 — Telephone (Standard)
- WFV3577 — Telephone (Special)
- WFV3561 — Data (9.6 KBAUD)
- WFV3562 — Data (19.2 KBAUD)
- WFV3563 — Data (56.0 KBAUD)
- WFV3564 — Fire Alarm
- WFV3575 — Intercom

**How to Order:**

Example: SLA266-25-50-S =  
25 Analog Fire Alarm Filters installed inside 50 space cabinet with surge arrestors

† NFL21593-3 inductive input version provided when used with surge arrestor  
‡ NFL21595-5 inductive input version provided when used with surge arrestor

**SLA Series – Cabinets and Signal/Data/Control Filters** *(continued)*

**SLA Series Filters**

Model No.	Type	Impedance (Ohms)	Insertion Loss (dB)		Rated Current	Case Size			Filter Installs In Cabinet
			Pass Band	Stop Band		A	B	C	
<b>1.25" Filters</b>									
WFV3470	Telephone (KS20162)	300/600	5kHz	65 dB, 14kHz, 100 dB, 30kHz-10GHz	0.16A	5.25 <i>133.4</i>	2.50 <i>63.5</i>	1.25 <i>31.8</i>	SLA215
WFV3544	Telephone (Standard)	300/600	3kHz	100 dB, 14kHz-10GHz	0.5A	5.25 <i>133.4</i>	2.50 <i>63.5</i>	1.25 <i>31.8</i>	SLA214
WFV3561	Data (9.6kB)	300/600	28kHz	100 dB, 150kHz-10GHz	0.2A	5.25 <i>133.4</i>	2.50 <i>63.5</i>	1.25 <i>31.8</i>	SLA253
WFV3562	Data (19.2kB)	50/100	56kHz	100 dB, 300kHz-10GHz	0.2A	5.25 <i>133.4</i>	2.50 <i>63.5</i>	1.25 <i>31.8</i>	SLA254
WFV3563	Data (56kB)	50/100	168kHz	100 dB, 1MHz-10GHz	0.2A	5.25 <i>133.4</i>	2.50 <i>63.5</i>	1.25 <i>31.8</i>	SLA255
ISDN64	Data (64k)	67.5/135	160kHz	100 dB, 1MHz-10GHz	0.1A	5.25 <i>133.4</i>	2.50 <i>63.5</i>	1.25 <i>31.8</i>	SLAISDN

NFL21590*									
<b>1.75" Filters</b>									
WFV3564**	Fire Alarm (Analog)**	63/126	N/A	100 dB, 14kHz-10GHz	1.0A	6.00 <i>152.4</i>	3.00 <i>76.2</i>	1.75 <i>44.5</i>	SLA256
WFV3568	T1 Communication	50/100	4.8MHz	100 dB, 50MHz-10GHz	0.5A	6.00 <i>152.4</i>	3.00 <i>76.2</i>	1.75 <i>44.5</i>	SLA3602
WFV3575	Comm/ Intercom	22.5/95	3kHz	100 dB, 14kHz-10GHz	0.5A	6.00 <i>152.4</i>	3.00 <i>76.2</i>	1.75 <i>44.5</i>	SLA267
NF21593-3	Control (3A)	50/100	N/A	100 dB, 14kHz-10GHz	3.0A	6.00 <i>152.4</i>	3.00 <i>76.2</i>	1.75 <i>44.5</i>	SLA259
NFL21593-3*									
NF21593-5	Control (5A)	50/100	N/A	100 dB, 14kHz-10GHz	5.0A	6.00 <i>152.4</i>	3.00 <i>76.2</i>	1.75 <i>44.5</i>	SLA268
NFL21593-5*									

The above filters are used for AC or DC applications up to 125VAC/400VDC, EXCEPT WFV3575 which is 50 VAC/100 VDC.

\* Inductive input versions, intended for use with surge arrester.

\*\*Not intended for digital / addressable systems. Contact TE/Corcom for recommendation on a filter solution for these systems.

## CDFS Series

# CDFS Series

### Features

- Sealed, constructed of suitably plated steel
- Removable input cover for terminal access and field wiring connection
- Threaded conduit fitting with two #20 AWG flexible leads provided on the load side
- Three knockouts on the input side
- Designed and tested per MIL-PRF-15733 (latest revision)

### Filter Selection *(Part Numbers for Ordering)*

CDFS1038 — Telephone (KS20162)  
CDFS1004 — Telephone (Standard)  
CDFS1039 — Telephone (Special)  
CDFS1030 — Data (9.6 KBAUD)  
CDFS1040 — Data (19.2 KBAUD)  
CDFS1041 — Data (56.0 KBAUD)  
CDFS1028 — Fire Alarm  
CDFS1029 — Comm/Intercom  
CDFS1042 — Control (1.0 A)  
CDFS1043 — Control (3.0 A)  
CDFS1044 — Control (5.0 A)

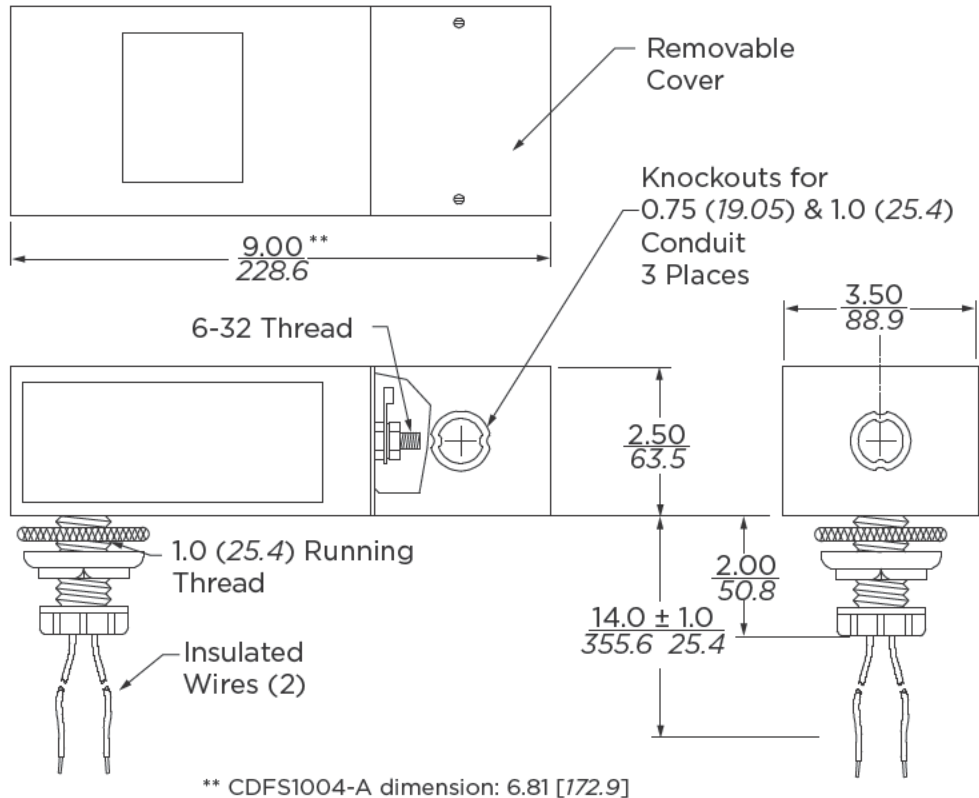

### Applicable Publications:

MIL-PRF-15733 — Filters, Radio Interference  
MIL-STD-220 — Test Method of Insertion Loss

**CDFS Series** (continued)

Model No.*	Type	Impedance (Ohms)	Insertion Loss (dB)		Rated Current
			Pass Band	Stop Band	
CDFS1038	Telephone (KS20162)	300/600	5kHz	65 dB, 14kHz, 100 dB, 30kHz-10GHZ	0.16A
CDFS1004-A	Telephone (Standard)	300/600	3kHz	100 dB, 14kHz-10GHZ	0.5A
CDFS1039	Telephone (Special)	300/600	5kHz	80 dB, 14kHz-10GHZ	0.5A
CDFS1030	Data (9.6kB)	300/600	28kHz	100 dB, 200kHz-10GHZ	0.2A
CDFS1040	Data (19.2kB)	50/100	56kHz	100 dB, 300kHz-10GHZ	0.2A
CDFS1041	Data (56kB)	50/100	168kHz	100 dB, 1MHz-10GHZ	0.2A
CDFS1028	Fire Alarm† (Analog)	N/A	N/A	100 dB, 14kHz to 10GHZ	1.0A
CDFS1029	Comm/Intercom	22.5/45	3kHz	100 db, 14kHz-10GHZ	0.5A
CDFS1042	Control (1A)	N/A	N/A	100 db, 14kHz-10GHZ	1.0A
CDFS1043	Control (3A)	N/A	N/A	100 db, 14kHz-10GHZ	3.0A
CDFS1044	Control (5A)	N/A	N/A	100 db, 14kHz-10GHZ	5.0A

The above filters are used for AC or DC applications up to 125VAC/400VDC, EXCEPT CDFS1029 which is 50 VAC/100 VDC.

\* Add "S" for surge arrestors. Ex: CDFS1038-S

† The CDFS1028 is intended for installations in analog applications only. Not designed for use in digital systems. Contact TE Connectivity for a recommendation on a filter solution for these systems.

**MRI 2030 High Performance (100dB 100 kHz to 10 GHz)**

# MRI2030

## Features

- UL 1283 listed
- Filter compartment sealed, constructed of suitably plated or stainless steel
- Removable input cover for terminal access and field wiring connection
- Threaded conduit fitting with flexible lead on the load side
- Knockouts provided on the input side
- Discharge bleeder resistor provided to reduce shock hazard

## Electrical Characteristics

### Rated Voltage:

277/480 VAC 50/60 Hz

### Rated Current:

2 x 30A

### Voltage Drop:

Less than 1% @ unity power factor.

### Overload:

140% of rated current for 15 minutes.

### Harmonic Distortion:

Less than 2% @ full rated current.

### Dielectric Withstanding Voltage:

Per MIL-PRF-15733 and UL1283.

### D.C. Insulation Resistance:

Per MIL-STD-202, Method 302.

### Terminal Strength:

Per MIL-STD-202, Method 211, Condition E.

### Temperature Rise:

Per MIL-PRF-15733 and UL1283.

### R.F. Radiation:

100 dB minimum shielding effectiveness.

### Insertion Loss:

100 dB 100 kHz to 10GHz.

**MRI 2030 High Performance (100dB 100 kHz to 10 GHz) *(continued)***

**MRI 2030R (100 dB 5 MHz to 20 GHz)**

# MRI2030R

**Features**

- UL listed and CSA Certified
- Filter compartment sealed, constructed of suitably plated steel
- Competitively priced
- Removable input cover for terminal access and field wiring connection
- Threaded conduit fitting with flexible lead on the load side
- Knockouts provided on the input side
- Discharge bleeder resistor provided to reduce shock hazard

**Electrical Characteristics****Rated Voltage:**

277/480 VAC 50/60 Hz

**Rated Current:**

2 x 30A

**Voltage Drop:**

Less than 1% @ unity power factor.

**Overload:**

140% of rated current for 15 minutes.

**Harmonic Distortion:**

Less than 2% @ full rated current.

**Dielectric Withstanding Voltage:**

Per MIL-PRF-15733 and UL1283.

**D.C. Insulation Resistance:**

Per MIL-STD-202, Method 302.

**Terminal Strength:**

Per MIL-STD-202, Method 211, Condition E.

**Temperature Rise:**

Per MIL-PRF-15733 and UL1283

**R.F. Radiation:**

100 dB minimum shielding effectiveness.

**Insertion Loss:**

100 dB from 5 MHz - 20 GHz per MIL-STD-220.

**MRI 2030R (100 dB 5 MHz to 20 GHz) (continued)**

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
