

100mW Stereo Headphone Amplifier

- Operating from **V_{cc}=2V to 5.5V**
- 100mW into 16Ω at 5V
- 38mW into 16Ω at 3.3V
- 11.5mW into 16Ω at 2V
- Switch ON/OFF click reduction circuitry
- High power supply rejection ratio: 85dB at 5V
- High signal-to-noise ratio: 110dB(A) at 5V
- High crosstalk immunity: 100dB (F=1kHz)
- Rail-to-rail input and output
- Unity-gain stable
- Available in **SO-8, MiniSO-8 & DFN8**

Description

The TS482 is a dual audio power amplifier able to drive a 16 or 32Ω stereo headset down to low voltages.

It is delivering up to 100mW per channel (into 16Ω loads) of continuous average power with 0.1% THD+N from a 5V power supply.

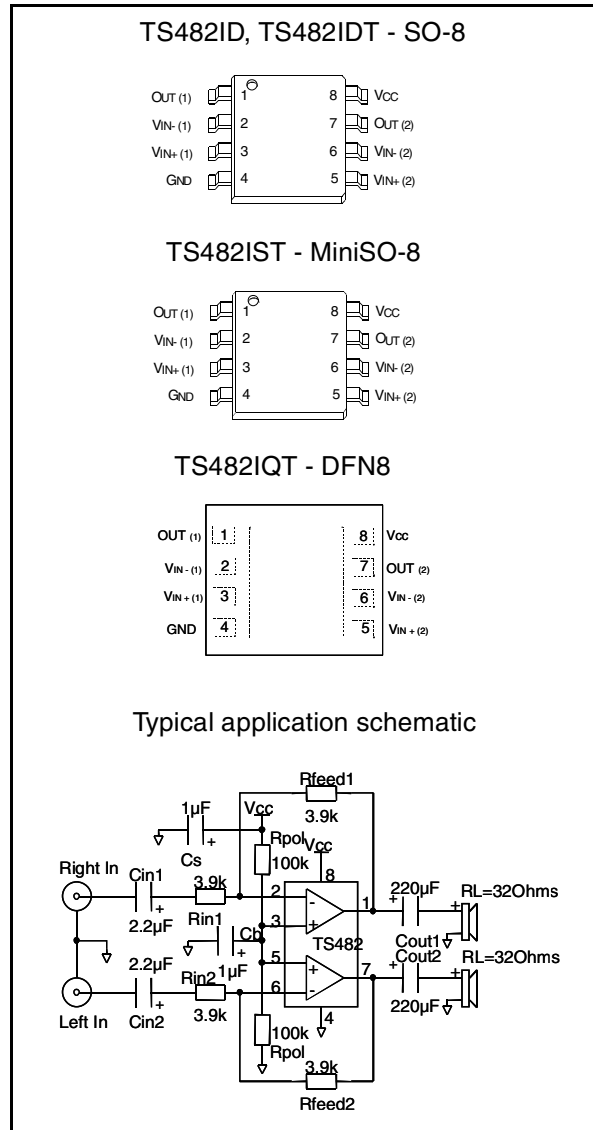

The unity gain stable TS482 can be configured by external gain-setting resistors.

Applications

- Stereo headphone amplifier
- Optical storage
- Computer motherboard
- PDA, organizers & notebook computers
- High-end TV, set-top box, DVD players
- Sound cards

1. All voltages values are measured with respect to the ground pin.
2. Pd has been calculated with Tamb = 25°C, Tjunction = 150°C.
3. Attention must be paid to continuous power dissipation. Exposure of the IC to a short circuit on one or two amplifiers simultaneously can cause excessive heating and the destruction of the device.

Table 7. Components description

Components	Functional Description
Rin	Inverting input resistor which sets the closed loop gain in conjunction with Rfeed. This resistor also forms a high pass filter with Cin ($f_c = 1 / (2 \times \pi \times R_{in} \times C_{in})$)
Cin	Input coupling capacitor which blocks the DC voltage at the amplifier input terminal
Rfeed	Feed back resistor which sets the closed loop gain in conjunction with Rin
Cs	Supply Bypass capacitor which provides power supply filtering
Cb	Bypass capacitor which provides half supply filtering
Cout	Output coupling capacitor which blocks the DC voltage at the load input terminal This capacitor also forms a high pass filter with RL ($f_c = 1 / (2 \times \pi \times R_L \times C_{out})$)
Rpol	These 2 resistors form a voltage divider which provide a DC biasing voltage ($V_{cc}/2$) for the 2 amplifiers.
Av	Closed loop gain = $-R_{feed} / R_{in}$

3 Package Mechanical Data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренеспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
