Notes:

1. 5V output is adjustable with +/-10% rangeOther output voltages available, consult factory.
2. Measured with noise probe directly across output terminals, and load terminated with 0.1μF ceramic and 47μF low ESR capacitors. Ripple & Noise of V2 at no load is 2% maximum. All specifications are typical at 230Vac, full load, at 25°C ambient unless noted.
3. Total Regulation is defined as the maximum deviation from the nominal voltage for all steady state conditions of initial voltage setting, input line voltage, and output load.
4. Contact factory for availability of specific models.
