DIN 41612 Selector Guide

PCB Connectors

DIN 41612

FCI: SETTING THE STANDARD FOR CONNECTORS

With operations in 30 countries, FCI is a leading manufacturer of connectors.

Our 13,500 employees are committed to providing customers with high-quality, innovative products for a wide range of consumer and industrial applications.

FCI DIN Selector Guide

All you want

Easy to find

FCI new DIN selector brings together our proven standard connectors, such as signal solder to board, press-fit and power. In addition to the presented products, FCI can provide other options (Selective Loading of Contacts, First Make / Last Break contacts, Harpoons / Board Locks) and backpanel accessories (Latch Frames, Latches, Shrouds, Covers).

You can find them all right here and we make it easy for you to find the right ones to design in. Getting product and samples is easier and faster too.

• Technical Characteristics for DIN signal connectors	4
• Other DIN product ranges at FCI	5

DIN PCB signal solder to board

• Style C (standard format, classical gender)	6
• Style C/2 (half format, classical gender)	7
• Style R (standard format, reversed gender)	8
• Style R/2 (half format, reversed gender)	9
• Style B (2 rows)	10
• Style B/2 (2 rows, half format)	11

DIN PCB signal press-fit

• Style C (standard format)	12
• Style R (standard format, reversed gender)	13

DIN 41612

Technical Characteristics

Insulator Material	:	Polyester Thermoplastic UL 94 V0
Contact Material	:	Copper Alloy
Contact Plating	Active zone	: Gold over Nickel
	Termination zone	: Matt Tin over Nickel (for RoHS compatible), or Tin-Lead over Nickel (for non RoHS)
Current Rating at 20°C	:	1.5 A
Maximum current	:	2 A
Temperature Range	:	-55° C to +125°C
Contact Resistance	:	$\leq 20 \text{ m}\Omega$
Insulation Resistance	:	$\geq 10^6 \text{ M}\Omega$
Test Voltage (rms)	:	1000 V
Mating insertion force per Contact	:	$\leq 0.94 \text{ N}$
Mating extraction force per Contact	:	$\geq 0.15 \text{ N}$
Press-fit mean insertion force per Contact	:	60 N
Press-fit mean push-out force per Contact	:	50 N
RoHS maximum temperature	:	260°C during 3.5 s

For the right angle versions, like the present leaded versions, it is recommended to use high temperature adhesive or metallic device, to protect the nearest plastic part in contact with the solder wave, to avoid any visual plastic deterioration.

Performance classes

Standard platings are those required by DIN 41612. All active contact areas are selectively plated with gold over nickel in order to fulfill the requirements of the DIN standard. Termination areas are plated according to applications.

DIN 41612 class III	DIN 41612 class II	DIN 41612 class I
50 operations, no industrial atmosphere	200 operations + 4 days industrial atmosphere SO ₂ + 200 operations	250 operations + 21 days industrial atmosphere SO ₂ + 250 operations
Field of applications		
consumer electronics, peritelephony, office supplies	industrial electronics, data, private switching	telecommunication, public switching, datacom

Nota : All dimensions in mm

PCB connectors

- Signal solder to board – 8609 Series, style Q (headers only)
- Mix signal and power or coax solder to board – 8609 Series (headers only)
- Mix signal and power or coax press-fit – 8609 Series
- Medium power connectors – 5159 Series, style F
- High power connectors – 5159 Series, style H

Cable connectors

- IDC - BPS8 Series
- Wire wrap - 8609 Series

Accessories

- Shrouds
- Covers

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
