

FEATURES

- Low offset voltage: 130 μV max**
- Input offset drift: 1.5 $\mu\text{V}/^\circ\text{C}$ max**
- Low noise: 0.25 μV p-p**
- High gain, CMRR and PSRR: 115 dB min**
- Low supply current: 1.1 mA**
- Wide supply voltage range: $\pm 4\text{ V}$ to $\pm 18\text{ V}$ operation**

APPLICATIONS

- Medical and industrial instrumentation**
- Sensors and controls**
 - Thermocouple**
 - RTDs**
 - Strain bridges**
 - Shunt current measurements**
- Precision filters**

GENERAL DESCRIPTION

The AD8677 is the next generation of precision, ultralow offset amplifiers. It builds on the high performance of the OP07 and integrates lower power (1.1 mA typical), lower input bias current ($\pm 1\text{ nA}$ maximum), and higher CMRR/PSRR (130 dB) in the small TSOT package. Operation is fully specified from $\pm 5\text{ V}$ to $\pm 15\text{ V}$ supply.

The AD8677 provides higher accuracy than industry-standard OP07-type amplifiers due to Analog Devices' iPolar™ process, which supports enhanced performance in a smaller footprint. These performance enhancements include wider output swing, lower power, and higher CMRR (common-mode rejection ratio) and PSRR (power supply rejection ratio). The AD8677 maintains stability of offsets and gain virtually regardless of variations in time or temperature. Excellent linearity and gain accuracy can be maintained at high closed-loop gains.

The AD8677 is fully specified over the extended industrial temperature range of -40°C to $+125^\circ\text{C}$. The AD8677 amplifier is available in the tiny, 5-lead TSOT and the popular 8-lead, narrow SOIC lead-free packages.

ABSOLUTE MAXIMUM RATINGS

Table 3.

Parameter	Value
Supply Voltage	± 18 V
Input Voltage	$\pm V$ Supply
Differential Input Voltage	± 0.7 V
Output Short-Circuit Duration to GND	Indefinite
Storage Temperature Range	
UJ-5, R Package	-65°C to $+150^{\circ}\text{C}$
Operating Temperature Range	-40°C to $+125^{\circ}\text{C}$
Junction Temperature Range	
RM, R Package	-65°C to $+150^{\circ}\text{C}$
Lead Temperature (Soldering, 10 sec)	$+300^{\circ}\text{C}$

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

THERMAL RESISTANCE

θ_{JA} is specified for the worst-case conditions, that is, a device soldered in a circuit board for surface-mount packages.

Table 4.

Package Type	θ_{JA}	θ_{JC}	Unit
5-Lead TSOT (UJ-5)	207	61	$^{\circ}\text{C}/\text{W}$
8-Lead SOIC (R-8)	158	43	$^{\circ}\text{C}/\text{W}$

ESD CAUTION

ESD (electrostatic discharge) sensitive device. Electrostatic charges as high as 4000 V readily accumulate on the human body and test equipment and can discharge without detection. Although this product features proprietary ESD protection circuitry, permanent damage may occur on devices subjected to high energy electrostatic discharges. Therefore, proper ESD precautions are recommended to avoid performance degradation or loss of functionality.

AD8677

NOTES

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
