## EAO Product Information

Series 10 LED

Description .....	3
Illumination.....	4
Accessories.....	8
Technical Data.....	9
Drawings.....	10
Index.....	11

**Product Information****General notes**

The LEDs have decisive advantages:

1. Optimum of illumination
2. Low power consumption
3. Used on DC voltage and AC voltage
4. Low heat generation
5. Extrem long lifetime
6. Shock and vibration proof

**Design**

The LEDs are built with an integrated resistor and they are available in three versions:

Without rectifier

Only for use on DC voltage. Please be aware of the polarity!

With half-wave rectifier

These LEDs are built with a protection diode in series with the resistor and the LED. They can be used without any problems on DC voltage and AC voltage. The typical light reduction on AC voltage against DC voltage operation is round 25%.

With bridge rectifier

Can be used without any problems on a DC voltage and AC voltage with the same light output. Bipolarity on DC voltage!

**Illumination**

Single-Chip LEDs in red, blue, green, yellow and white gives superb illumination and can be supplied in 6 VDC, 12, 24, 28, 48 VAC/DC, 130 VDC, 130 VAC and 230 VAC.

Due to production tolerances, colour temperature variations may be detected within individual consignments.
