

The mini-analog series is a group of ICs that incorporate a general purpose analog circuit in a small package. The S-89230/89240 Series is a CMOS type comparator works on a lower voltage and lower current consumption. These features make this product the ideal solution for small battery-powered portable equipment.

This product is a dual comparator (with 2 circuits).

## ■ Features

- Lower operating voltage than the conventional general-purpose:  
 $V_{DD} = 1.8\text{ V to }5.5\text{ V}$
- Low current consumption (per circuit):  
 $I_{DD} = 23\ \mu\text{A Typ. (S-89230 Series)}$   
 $I_{DD} = 5\ \mu\text{A Typ. (S-89240 Series)}$
- Low input offset voltage:  
4.0 mV Max.
- Output full swing
- A dual comparator (with 2 circuits)
- Lead-free, Sn 100%, halogen-free<sup>\*1</sup>

\*1. Refer to “■ Product Name Structure” for details.

## ■ Applications

- Mobile phones
- Notebook PCs
- Digital cameras
- Digital video cameras

## ■ Packages

- SNT-8A
- TMSOP-8

■ Block Diagram

Figure 1

## ■ Product Name Structure

Users can select the product type and package for the S-89230/89240 Series. Refer to “1. Product name” regarding the contents of product name, “2. Package” regarding the package drawings and “3. Product name list” regarding the product type.

### 1. Product name

\*1. Refer to the tape specifications.

### 2. Package

Package Name	Drawing Code			
	Package	Tape	Reel	Land
SNT-8A	PH008-A-P-SD	PH008-A-C-SD	PH008-A-R-SD	PH008-A-L-SD
TMSOP-8	FM008-A-P-SD	FM008-A-C-SD	FM008-A-R-SD	–

### 3. Product name list

Table 1

Product name	Current consumption (per circuit)	Rise propagation delay time*1	Fall propagation delay time*1	Number of circuits	Package
S-89230BC-I8T1U	23 μA	26 μs	4 μs	2 circuits	SNT-8A
S-89230BC-K8T2U	23 μA	26 μs	4 μs	2 circuits	TMSOP-8
S-89240BC-I8T1U	5 μA	100 μs	18 μs	2 circuits	SNT-8A
S-89240BC-K8T2U	5 μA	100 μs	18 μs	2 circuits	TMSOP-8

\*1. The value when V<sub>DD</sub> = 3.0 V

**Remark** Please select products of environmental code = U for Sn 100%, halogen-free products.

■ Pin Configurations

Figure 2

Table 2

Pin No.	Symbol	Description
1	OUT1	Output pin 1
2	IN1(-)	Inverted input pin 1
3	IN1(+)	Non-inverted input pin 1
4	VSS	GND pin
5	IN2(+)	Non-inverted input pin 2
6	IN2(-)	Inverted input pin 2
7	OUT2	Output pin 2
8	VDD	Positive power supply pin

Figure 3

Table 3

Pin No.	Symbol	Description
1	OUT1	Output pin 1
2	IN1(-)	Inverted input pin 1
3	IN1(+)	Non-inverted input pin 1
4	VSS	GND pin
5	IN2(+)	Non-inverted input pin 2
6	IN2(-)	Inverted input pin 2
7	OUT2	Output pin 2
8	VDD	Positive power supply pin

## ■ Absolute Maximum Ratings

Table 4

(Ta = +25°C unless otherwise specified)

Parameter	Symbol	Absolute maximum ratings	Unit	
Power supply voltage	V <sub>DD</sub>	V <sub>SS</sub> -0.3 to V <sub>SS</sub> +7.0	V	
Input voltage	V <sub>IN</sub>	V <sub>SS</sub> -0.3 to V <sub>SS</sub> +7.0	V	
Output voltage	V <sub>OUT</sub>	V <sub>SS</sub> -0.3 to V <sub>DD</sub> +0.3	V	
Differential input voltage	V <sub>IND</sub>	±7.0	V	
Output pin current	I <sub>SINK</sub>	20	mA	
Power dissipation	SNT-8A	P <sub>D</sub>	450 <sup>*1</sup>	mW
	TMSOP-8		650 <sup>*1</sup>	mW
Operating ambient temperature	T <sub>opr</sub>	-40 to +85	°C	
Storage temperature	T <sub>stg</sub>	-55 to +125	°C	

\*1. When mounted on board

[Mounted board]

(1) Board size: 114.3 mm × 76.2 mm × 1.6 mm

(2) Board name: JEDEC STANDARD51-7

**Caution** The absolute maximum ratings are rated values exceeding which the product could suffer physical damage. These values must therefore not be exceeded under any conditions.

Figure 4 Power Dissipation of Package (When Mounted on Board)

■ Test Circuit (Per Circuit)

1. Power supply voltage rejection ratio, input offset voltage

Figure 5

• Power supply voltage rejection ratio (PSRR)  
Input offset voltage ( $V_{IO}$ )

The input offset voltage ( $V_{IO}$ ) is defined as  $V_{IN} - V_{DD} / 2$  when  $V_{OUT}$  is changed by changing  $V_{IN}$  to  $V_{DD} / 2$  level. The power supply voltage rejection ratio (PSRR) can be calculated by following expression, with the value of  $V_{IO}$  measured at each  $V_{DD}$ .

Measurement conditions:

When  $V_{DD} = 1.8\text{ V}$ :  $V_{DD} = V_{DD1}$ ,  $V_{IO} = V_{IO1}$

When  $V_{DD} = 5.0\text{ V}$ :  $V_{DD} = V_{DD2}$ ,  $V_{IO} = V_{IO2}$

$$PSRR = 20 \log \left( \frac{V_{DD1} - V_{DD2}}{V_{IO1} - V_{IO2}} \right)$$

2. Common-mode input signal rejection ratio, common-mode input voltage range

Figure 6

• Common-mode input signal rejection ratio (CMRR)

The common-mode input signal rejection ratio (CMRR) can be calculated by the following expression, with the offset voltage ( $V_{IO}$ ) set as  $V_{IN1} - V_{IN2}$  after  $V_{OUT}$  is changed by changing  $V_{IN1}$ .

Measurement conditions:

When  $V_{IN2} = V_{CMR\ Max}$ :  $V_{IN2} = V_{INH}$ ,  $V_{IO} = V_{IO1}$

When  $V_{IN2} = V_{DD}/2$ :  $V_{IN2} = V_{INL}$ ,  $V_{IO} = V_{IO2}$

$$CMRR = 20 \log \left( \frac{V_{INH} - V_{INL}}{V_{IO1} - V_{IO2}} \right)$$

• Common-mode input voltage range ( $V_{CMR}$ )

Varying  $V_{IN2}$ , the range of  $V_{IN2}$  that satisfies the common-mode input signal rejection ratio (CMRR) is the common-mode input voltage range ( $V_{CMR}$ ).

3. Maximum output swing voltage ( $V_{OH}$ )

Figure 7

• Maximum output swing voltage ( $V_{OH}$ )

Test conditions:

$$V_{IN1} = \frac{V_{DD}}{2} - 0.1 \text{ V}$$

$$V_{IN2} = \frac{V_{DD}}{2} + 0.1 \text{ V}$$

$$R_L = 1 \text{ M}\Omega$$

4. Maximum output swing voltage ( $V_{OL}$ )

Figure 8

• Maximum output swing voltage ( $V_{OL}$ )

Test conditions:

$$V_{IN1} = \frac{V_{DD}}{2} + 0.1 \text{ V}$$

$$V_{IN2} = \frac{V_{DD}}{2} - 0.1 \text{ V}$$

$$R_L = 1 \text{ M}\Omega$$

5. Current consumption

Figure 9

• Current consumption ( $I_{DD}$ )

Test conditions:  
 $V_{IN} = V_{SS}$   
 $V_{IN} = V_{CMR Max.}$

6. Source current

Figure 10

• Source current ( $I_{SOURCE}$ )

Test conditions:  
 $V_{OUT} = 0 V$   
 $V_{IN1} = \frac{V_{DD}}{2} - 0.5 V$   
 $V_{IN2} = \frac{V_{DD}}{2} + 0.5 V$

7. Sink current

Figure 11

• Sink current ( $I_{SINK}$ )

Test conditions:  
 $V_{OUT} = 0.5 V$   
 $V_{IN1} = \frac{V_{DD}}{2} + 0.5 V$   
 $V_{IN2} = \frac{V_{DD}}{2} - 0.5 V$

8. Propagation time, response time

Figure 12

■ **Precautions**

- Do not apply an electrostatic discharge to this IC that exceeds performance ratings of the built-in electrostatic protection circuit.
- ABLIC Inc. claims no responsibility for any disputes arising out of or in connection with any infringement by products including this IC of patents owned by a third party.

## Disclaimers (Handling Precautions)

1. All the information described herein (product data, specifications, figures, tables, programs, algorithms and application circuit examples, etc.) is current as of publishing date of this document and is subject to change without notice.
2. The circuit examples and the usages described herein are for reference only, and do not guarantee the success of any specific mass-production design.  
ABLIC Inc. is not liable for any losses, damages, claims or demands caused by the reasons other than the products described herein (hereinafter "the products") or infringement of third-party intellectual property right and any other right due to the use of the information described herein.
3. ABLIC Inc. is not liable for any losses, damages, claims or demands caused by the incorrect information described herein.
4. Be careful to use the products within their ranges described herein. Pay special attention for use to the absolute maximum ratings, operation voltage range and electrical characteristics, etc.  
ABLIC Inc. is not liable for any losses, damages, claims or demands caused by failures and / or accidents, etc. due to the use of the products outside their specified ranges.
5. Before using the products, confirm their applications, and the laws and regulations of the region or country where they are used and verify suitability, safety and other factors for the intended use.
6. When exporting the products, comply with the Foreign Exchange and Foreign Trade Act and all other export-related laws, and follow the required procedures.
7. The products are strictly prohibited from using, providing or exporting for the purposes of the development of weapons of mass destruction or military use. ABLIC Inc. is not liable for any losses, damages, claims or demands caused by any provision or export to the person or entity who intends to develop, manufacture, use or store nuclear, biological or chemical weapons or missiles, or use any other military purposes.
8. The products are not designed to be used as part of any device or equipment that may affect the human body, human life, or assets (such as medical equipment, disaster prevention systems, security systems, combustion control systems, infrastructure control systems, vehicle equipment, traffic systems, in-vehicle equipment, aviation equipment, aerospace equipment, and nuclear-related equipment), excluding when specified for in-vehicle use or other uses by ABLIC, Inc. Do not apply the products to the above listed devices and equipments.  
ABLIC Inc. is not liable for any losses, damages, claims or demands caused by unauthorized or unspecified use of the products.
9. In general, semiconductor products may fail or malfunction with some probability. The user of the products should therefore take responsibility to give thorough consideration to safety design including redundancy, fire spread prevention measures, and malfunction prevention to prevent accidents causing injury or death, fires and social damage, etc. that may ensue from the products' failure or malfunction.  
The entire system in which the products are used must be sufficiently evaluated and judged whether the products are allowed to apply for the system on customer's own responsibility.
10. The products are not designed to be radiation-proof. The necessary radiation measures should be taken in the product design by the customer depending on the intended use.
11. The products do not affect human health under normal use. However, they contain chemical substances and heavy metals and should therefore not be put in the mouth. The fracture surfaces of wafers and chips may be sharp. Be careful when handling these with the bare hands to prevent injuries, etc.
12. When disposing of the products, comply with the laws and ordinances of the country or region where they are used.
13. The information described herein contains copyright information and know-how of ABLIC Inc. The information described herein does not convey any license under any intellectual property rights or any other rights belonging to ABLIC Inc. or a third party. Reproduction or copying of the information from this document or any part of this document described herein for the purpose of disclosing it to a third-party is strictly prohibited without the express permission of ABLIC Inc.
14. For more details on the information described herein or any other questions, please contact ABLIC Inc.'s sales representative.
15. This Disclaimers have been delivered in a text using the Japanese language, which text, despite any translations into the English language and the Chinese language, shall be controlling.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
