

3.96mm Pitch Connector Directly Mounted on Board

DF6 Series

■Features

1. Service Efficiency Up

Conventional thick cables are directly mounted on the board piece by piece, but connectorization has achieved soldering services in a batch. This product enhances soldering service efficiency.

2. Miniaturization

This product achieves miniaturization for thick cables.

Mounting height on board : 7.5mm

Width : 5.0mm

3. Board Prefixed Mechanism

Since the connector is softly press-fitted to the board for insertion, it can be prefixed to the board.

■Applications

Secondary power supply units for various equipment

◆Precautions

1.Recommended soldering condition	Flow: 250℃ for 3 seconds Manual soldering: 290℃ for 2 seconds ■After soldering, if a load is given to the cable where connector and cable contain heat, the jacket holding member will be loosened. After soldering, the operation should be performed, after connector returns to room temperature.
2.Cleaning condition	Refer to the "Nylon Connector Use Hand book". Don't use solvent to degrade the cable jacket like trichloroethane. In addition, avoid heat cleaning with solvent.
3.Connecting condition	Refer to the "Nylon Connector Use Hand book".
