GENERAL DESCRIPTION

The HMC241ATCPZ-EP is a general-purpose, nonreflective, 100 MHz to 4 GHz single-pole, four-throw (SP4T) switch manufactured using a gallium arsenide (GaAs) process. This switch offers high isolation of 43 dB typical at 2 GHz, low insertion loss of 0.7 dB at 2 GHz, and on-chip termination of the isolated ports.

The on-chip circuitry allows the HMC241ATCPZ-EP to operate at a single, positive supply voltage range of 3 V to 5 V. This switch

requires two positive logic control voltages. The HMC241ATCPZ-EP includes an on-chip, binary two to four line decoder that provides logic control from two logic input lines to select one of the four radio frequency (RF) lines.

The HMC241ATCPZ-EP is available in a 3 mm $\times$ 3 mm, 16-lead LFCSP package. Additional application and technical information can be found in the [HMC241ALP3E](#) data sheet.

ESD CAUTION

ESD (electrostatic discharge) sensitive device.

Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.
