

15V, ±5A Monolithic Synchronous Step-Down Regulator

DESCRIPTION

Demonstration circuit 2131A is a current mode DC/DC step-down Silent Switcher[®] buck regulator featuring the LTC[®]3623. The board operates from an input range of 4V to 15V, and provides ±5A of output current. The output voltage of the demonstration board can be set from 0V to $V_{IN} - 0.5V$. It operates at 1MHz and may be synchronized to an external clock. A soft-start feature controls output voltage slew rate at start-up, reducing current surge and voltage overshoot. A power good output and current monitor signal are provided. Discontinuous conduction mode can be selected with a jumper. The demonstration board has options for cable drop compensation, negative output voltage and input voltage regulation.

This board is suitable for a wide range of battery-powered, point-of-load, DDR memory, Thermo Electric Cooler (TEC) systems and other applications. The LTC3623 is available in a low profile, 24-pin QFN package. For other output requirements, see the LTC3623 data sheet.

Design files for this circuit board are available at <http://www.linear.com/demo/DC2131A>

PERFORMANCE SUMMARY Specifications are at $T_A = 25^\circ C$

SYMBOL	PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
V_{IN}	Input Supply Range		4		15	V
V_{OUT}	Output Voltage	Jumper Selectable	1		5	V
I_{OUT}	Output Current Range, Continuous	200LFM	0		5	A
f_{SW}	Switching (Clock) Frequency			1		MHz
V_{OUT_P-P}	Output Ripple	$V_{IN} = 12V, V_{OUT} = 5V, I_{OUT} = 5A$ (20MHz BW)		<25		mV _{P-P}
I_{REG}	Output Regulation	$V_{IN}: 4V$ to 15V, $A_{OUT}: 0A$ to 5A, $V_{OUT} = 1V$		±2		%
		$V_{IN}: 4V$ to 15V, $A_{OUT}: 0A$ to 5A, $V_{OUT} = 1.5V$		±2		%
		$V_{IN}: 4V$ to 15V, $A_{OUT}: 0A$ to 5A, $V_{OUT} = 2.5V$		±2		%
		$V_{IN}: 4.7V$ to 15V, $A_{OUT}: 0A$ to 5A, $V_{OUT} = 3.3V$		±2		%
		$V_{IN}: 6.5V$ to 15V, $A_{OUT}: 0A$ to 5A, $V_{OUT} = 5V$		±2		%

QUICK START PROCEDURE

Demonstration circuit 2131A is easy to set up to evaluate the performance of the LTC3623. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

NOTE: When measuring the output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the output voltage ripple by touching the probe tip and ground ring directly across the last output capacitor as shown in Figure 1.

1. Using an input power supply that is capable of 4V to 15V, set the voltage to 12V. Then turn off the supply.
2. With power off, connect the supply to the input terminals $+V_{IN}$ and $-V_{IN}$.
 - a. If efficiency measurements are desired, an ammeter capable of measuring 5A DC or a resistor shunt can be put in series with the input supply in order to measure the DC1722A's input current.
 - b. A Voltmeter with a capability of measuring at least 15V can be placed across the input terminals in order to get an accurate input voltage measurement.
3. Turn on the power at the input.

NOTE: Make sure that the input voltage never exceeds 15V.
4. Check for the proper output voltage which is set using a jumper. Setting the jumper to the OPT position will set the output voltage to 5V.
5. Once the proper output voltage is established, connect a variable load capable of sinking 5A at 5V to the output terminals $+V_{OUT}$ and $-V_{OUT}$. Set the current for 0A.
 - a. If efficiency measurements are desired, an ammeter or a resistor shunt that is capable of handling 5A DC can be put in series with the output load in order to measure the DC3623A's output current.
 - b. A Voltmeter with a capability of measuring at least 5V can be placed across the output terminals in order to get an accurate output voltage measurement.

NOTE: If there is no output, temporarily disconnect the load to make sure that the load is not set too high.
6. Adjust the load and/or input within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other desired parameters.

DEMO MANUAL DC2131A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкуренспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
