## 3.3 V Differential Multipoint Low Voltage M-LVDS Driver Receiver

### Description

The NB3N20xS Series are pure 3.3 V supply differential Multipoint Low Voltage (M-LVDS) line Drivers and Receivers. Devices NB3N201S and NB3N206S are TIA/EIA-899 compliant. NB3N201S offers the Type 1 receiver threshold at 0.0 V. NB3N206S offers the Type 2 receiver threshold at 0.1 V.

These devices have Type-1 and Type-2 receivers that detect the bus state with as little as 50 mV of differential input voltage over a common-mode voltage range of -1 V to 3.4 V. The Type-1 receivers have near zero thresholds ( $\pm 50$  mV) and exhibit 25 mV of differential input voltage hysteresis to prevent output oscillations with slowly changing signals or loss of input. Type-2 receivers include an offset threshold to provide a detectable voltage under open-circuit, idle-bus, and other faults conditions.

NB3N201S and NB3N206S support Simplex or Half Duplex bus configurations.

### ORDERING INFORMATION

See detailed ordering and shipping information in the package dimensions section on page 18 of this data sheet.

### Features

- Low-Voltage Differential 30  $\Omega$  to 55  $\Omega$  Line Drivers and Receivers for Signaling Rates Up to 200 Mbps
- Type-1 Receivers Incorporate 25 mV of Hysteresis
- Type-2 Receivers Provide an Offset (100 mV) Threshold to Detect Open-Circuit and Idle-Bus Conditions
- Meets or Exceeds the M-LVDS Standard TIA/EIA-899 for Multipoint Data Interchange
- Controlled Driver Output Voltage Transition Times for Improved Signal Quality
- -1 V to 3.4 V Common-Mode Voltage Range Allows Data Transfer With up to 2 V of Ground Noise
- Bus Pins High Impedance When Disabled or  $V_{CC} \leq 1.5$  V

- M-LVDS Bus Power Up/Down Glitch Free
- Operating range:  $V_{CC} = 3.3 \pm 10\%$  V (3.0 to 3.6 V)
- Operation from -40°C to 85°C.
- These are Pb-Free Devices

### Applications

- Low-Power High-Speed Short-Reach Alternative to TIA/EIA-485
- Backplane or Cabled Multipoint Data and Clock Transmission
- Cellular Base Stations
- Central-Office Switches
- Network Switches and Routers

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

2. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and not valid simultaneously.

If stress limits are exceeded device functional operation is not implied, damage may occur and reliability may be affected.

## NB3N201S, NB3N206S

Figure 15. Equivalent Input and Output Schematic Diagrams

### APPLICATION INFORMATION

#### Receiver Input Threshold (Failsafe)

The MLVDS standard defines a type 1 and type 2 receiver. Type 1 receivers include no provisions for failsafe and have their differential input voltage thresholds near zero volts.

Type 2 receivers have their differential input voltage thresholds offset from zero volts to detect the absence of a voltage difference. The impact to receiver output by the offset input can be seen in Table 10 and Figure 16.

Table 10. RECEIVER INPUT VOLTAGE THRESHOLD REQUIREMENTS

Receiver Type	Output Low	Output High
Type 1	$-2.4 \text{ V} \leq \text{VID} \leq -0.05 \text{ V}$	$0.05 \text{ V} \leq \text{VID} \leq 2.4 \text{ V}$
Type 2	$-2.4 \text{ V} \leq \text{VID} \leq 0.05 \text{ V}$	$0.15 \text{ V} \leq \text{VID} \leq 2.4 \text{ V}$

## NB3N201S, NB3N206S

**Figure 16. Receiver Differential Input Voltage Showing Transition Regions by Type**

### LIVE INSERTION/GLITCH-FREE POWER UP/DOWN

The NB3N201/206 family of products provides a glitch-free power up/down feature that prevents the M-LVDS outputs of the device from turning on during a power up or power down event. This is especially important in live insertion applications, when a device is physically connected to an M-LVDS multipoint bus and  $V_{CC}$  is ramping.

While the M-LVDS interface for these devices is glitch free on power up/down, the receiver output structure is not. Figure 17 shows the performance of the receiver output pin, R (CHANNEL 2), as  $V_{CC}$  (CHANNEL 1) is ramped. The glitch on the R pin is independent of the RE voltage. Any complications or issues from this glitch are easily resolved in power sequencing or system requirements that suspend operation until  $V_{CC}$  has reached a steady state value.

Figure 17. M-LVDS Receiver Output: VCC (CHANNEL 1), R Pin (CHANNEL 2)

**Simplex Theory Configurations:** Data flow is unidirectional and Point-to-Point from one Driver to one Receiver. NB3N201SDG and NB3N206SDG devices provide a high signal current allowing long drive runs and high noise immunity. Single terminated interconnects yield

Figure 18. Point-to-Point Simplex Single Termination

high amplitude levels. Parallel terminated interconnects yield typical MLVDS amplitude levels and minimizes reflections. See Figures 18 and 19. A NB3N201SDG and NB3N206SDG can be used as the driver or as a receiver.

Figure 19. Parallel-Terminated Simplex

**Simplex Multidrop Theory Configurations:** Data flow is unidirectional from one Driver with one or more Receivers. Multiple boards required. Single terminated interconnects yield high amplitude levels. Parallel terminated interconnects yield typical MLVDS amplitude levels and

minimizes reflections. On the Evaluation Test Board, Headers P1, P2, and P3 may be used as need to interconnect transceivers to a each other or a bus. See Figures 20 and 21. A NB3N201SDG and NB3N206SDG can be used as the driver or as a receiver.

## NB3N201S, NB3N206S

Figure 20. Multidrop or Distributed Simplex with Single Termination

Figure 21. Multidrop or Distributed Simplex with Double Termination

**Half Duplex Multinode Multipoint Theory Configurations:** Data flow is unidirectional and selected from one of multiple possible Drivers to multiple Receivers. One “Two Node” multipoint connection can be accomplished with a single evaluation test board. More than Two Nodes requires multiple evaluation test boards. Parallel terminated interconnects yield typical MLVDS amplitude

levels and minimizes reflections. Parallel terminated interconnects yield typical LMVDS amplitude levels and minimizes reflections. On the Test Board, Headers P1, P2, and P3 may be used as need to interconnect transceivers to each other or a bus. See Figure 22. A NB3N206SDG can be used as the driver or as a receiver.

### ORDERING INFORMATION

Device	Receiver	Pin 1 Quadrant	Package	Shipping†
NB3N201SDG	Type 1	Q1	SOIC – 8 (Pb–Free)	98 Units / Rail
NB3N201SDR2G	Type 1	Q1	SOIC – 8 (Pb–Free)	2500 / Tape & Reel
NB3N206SDG	Type 2	Q1	SOIC – 8 (Pb–Free)	98 Units / Rail
NB3N206SDR2G	Type 2	Q1	SOIC – 8 (Pb–Free)	2500 / Tape & Reel

†For information on tape and reel specifications, including part orientation and tape sizes, please refer to our Tape and Reel Packaging Specifications Brochure, BRD8011/D.

# NB3N201S, NB3N206S

## PACKAGE DIMENSIONS

### SOIC-8 NB CASE 751-07 ISSUE AK

#### NOTES:

1. DIMENSIONING AND TOLERANCING PER ANSI Y14.5M, 1982.
2. CONTROLLING DIMENSION: MILLIMETER.
3. DIMENSION A AND B DO NOT INCLUDE MOLD PROTRUSION.
4. MAXIMUM MOLD PROTRUSION 0.15 (0.006) PER SIDE.
5. DIMENSION D DOES NOT INCLUDE DAMBAR PROTRUSION. ALLOWABLE DAMBAR PROTRUSION SHALL BE 0.127 (0.005) TOTAL IN EXCESS OF THE D DIMENSION AT MAXIMUM MATERIAL CONDITION.
6. 751-01 THRU 751-06 ARE OBSOLETE. NEW STANDARD IS 751-07.

DIM	MILLIMETERS		INCHES	
	MIN	MAX	MIN	MAX
A	4.80	5.00	0.189	0.197
B	3.80	4.00	0.150	0.157
C	1.35	1.75	0.053	0.069
D	0.33	0.51	0.013	0.020
G	1.27 BSC		0.050 BSC	
H	0.10	0.25	0.004	0.010
J	0.19	0.25	0.007	0.010
K	0.40	1.27	0.016	0.050
M	0 °	8 °	0 °	8 °
N	0.25	0.50	0.010	0.020
S	5.80	6.20	0.228	0.244

#### SOLDERING FOOTPRINT\*

SCALE 6:1 (mm/inches)

Компания «Life Electronics» занимается поставками электронных компонентов импортного и отечественного производства от производителей и со складов крупных дистрибьюторов Европы, Америки и Азии.

С конца 2013 года компания активно расширяет линейку поставок компонентов по направлению коаксиальный кабель, кварцевые генераторы и конденсаторы (керамические, пленочные, электролитические), за счёт заключения дистрибьюторских договоров

Мы предлагаем:

- Конкурентоспособные цены и скидки постоянным клиентам.
- Специальные условия для постоянных клиентов.
- Подбор аналогов.
- Поставку компонентов в любых объемах, удовлетворяющих вашим потребностям.
- Приемлемые сроки поставки, возможна ускоренная поставка.
- Доставку товара в любую точку России и стран СНГ.
- Комплексную поставку.
- Работу по проектам и поставку образцов.
- Формирование склада под заказчика.
- Сертификаты соответствия на поставляемую продукцию (по желанию клиента).
- Тестирование поставляемой продукции.
- Поставку компонентов, требующих военную и космическую приемку.
- Входной контроль качества.
- Наличие сертификата ISO.

В составе нашей компании организован Конструкторский отдел, призванный помогать разработчикам, и инженерам.

Конструкторский отдел помогает осуществить:

- Регистрацию проекта у производителя компонентов.
- Техническую поддержку проекта.
- Защиту от снятия компонента с производства.
- Оценку стоимости проекта по компонентам.
- Изготовление тестовой платы монтаж и пусконаладочные работы.
